The PRESIDENT pro tempore. Stated in another form of words, the question is what the Chair originally stated.

Mr. ROBINSON of Arkansas. Mr. President, if any other punishment or penalty than that of removal from office is contemplated, I should favor the motion of the Senator from Pennsylvania [Mr. REED]; but certainly as to the question of the fitness of Mr. Barry to continue to serve as an officer of the Senate there can be no defense made, and no justification. Prompt and decisive action should be taken.

I inquire of the Senator from Pennsylvania whether he has in contemplation, and, for that matter, if other Senators have in contemplation, additional penalties to be inflicted, other than removal from office?

Mr. REED. Mr. President, in my judgment, Mr. Barry's offense constitutes a grave contempt of the Senate, and might well support other punishment than that of removal from office; but we are acting in full view of the country. We must not seem to be acting in haste, or out of pique. We must not, by anything we do, seem to make a martyr of Mr. Barry. That is all I am afraid of.

Mr. ROBINSON of Arkansas. Mr. President, if Mr. Barry had asked for time in which to make a defense, or if he had asked for the advice of counsel, I could see advantage to be gained by deferring action. It is not a pleasant thing to any of us to impose a penalty on Mr. Barry; but if the Senate of the United States, after hearing this matter, should retain in its employ an officer who has committed this contempt, every self-respecting Senator would be compelled to resign from this body.

Mr. LEWIS. Mr. President——

Mr. ROBINSON of Arkansas. Mr. President, it is for the reason that the Sergeant at Arms has divested himself of any defense to the charge, it is for the further reason that we owe some duty to the body at the other end of the Capitol—a body that has not direct jurisdiction of the persons of our officers—that I believe the Senate should act promptly.

Mr. LEWIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arkansas yield to the Senator from Illinois?

Mr. ROBINSON of Arkansas. Yes; I yield to the Senator from Illinois.

Mr. LEWIS. May I make a parliamentary inquiry?

The PRESIDENT pro tempore. The Senator will propound it.

Mr. LEWIS. I desire to ascertain and ask the Senator from Arizona, the Senator from Arkansas, and the Senator from Pennsylvania, has the Sergeant at Arms been given an opportunity to say whether this article is correct, whether he has written it, whether it has been printed correctly?

Mr. ROBINSON of Arkansas. Why, Mr. President, I assume that the Senator from Illinois was not in the Chamber when the Sergeant at Arms was brought before the Senate.

Mr. LEWIS. I have just returned to the Chamber.

Mr. ROBINSON of Arkansas. Those questions were asked by the Senator from Indiana [Mr. WATSON], and other questions were asked him by the Senator from Nebraska [Mr. NORRIS] and by the Senator from Kentucky [Mr. BARKLEY].

Mr. LEWIS. I thank the Senator.

Mr. ASHURST. Mr. President, I feel somewhat as if it were an act of temerity to oppose the matured judgment of my own leader. My regard for him transcends the bounds of friendship. It is a brotherly affection; but upon this question I have decided convictions.

I wish to express what I have in my breast and in my mind.

That Mr. Barry has committed a grave indiscretion—yes; worse than an indiscretion—is true. That he has wrongfully dealt with that tender subject, human character, is not less true. If called upon to vote with the light now before me, I should vote to declare his office vacant.

But, Mr. President and gentlemen of the Senate, if there be one thing that ought to characterize a Senate, it is impartiality and an absolute freedom from any suspicion of haste, resentment, or indignation toward any person.

Mr. President, the Senate is under fire. Many vile things in cheap shows are said about the Senate; but, Mr. President, the Senate can best meet those charges and insinuations by acting with dignity and with manhood.

When a person whose hands are imbrued with the blood of his fellowman is brought before an American court, and even pleads guilty to the crime of murder in the first degree, the judge, if he be a real judge, never passes sentence then and there. He remands the offender at least for a few hours.

I support the view of the distinguished Senator from Pennsylvania. Hasty action would give the impression that Senators were so thin-skinned and so tender of criticism that simply because they possessed the power they promptly, upon the same afternoon, while hot speeches were falling from their lips, removed and stigmatized this man.

That he has done wrong no one denies, but I remember his 12 years of faithful service here, and that thousands, if not hundreds of thousands, of dollars have passed through his hands and not an unclean penny has ever clung to his fingers. That I shall vote for his removal to-morrow may be quite true; but I beg the Senate not to act as if we were moved by bitter resentment, not to act as if we were a body of men none of whom had ever been on the bench.

Here are men who have been judges of supreme courts, men who have been governors. Let calm reason prevail; let a nightfall and a sunrise take place before this man is summarily removed.

Forbearance, moderation, and restraint are the virtues of those who have power. Let those who have power always remember those grand virtues of moderation, restraint, fortitude, and endurance. Since we have the power to do this, let us endure this for another 12 hours.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield to me for just a brief statement?

Mr. ASHURST. I yield to the Senator from Arkansas.

Mr. ROBINSON of Arkansas. The statement of my good friend the Senator from Arizona that he wishes to defer this action until to-morrow, when he will vote for the motion of the Senator from Nebraska, reminds me of the story of an Arkansas justice of the peace, who, 20 years ago, said:

The court will take this case under advisement until to-morrow, at which time he will promptly decide the case for the plaintiff.

[Laughter.]

Mr. ASHURST. Mr. President, I am glad that the Arkansas justice of the peace had that much moderation, humanity, and prudence; and I beg the Senate to emulate the wisdom of the Arkansas justice of the peace. [Laughter.]

Mr. COUZENS obtained the floor.

Mr. BARKLEY. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Michigan yield to the Senator from Kentucky?

Mr. COUZENS. I should like to offer an amendment to the motion of the Senator from Nebraska first, if the Senator will permit me.

I move, as an amendment to the motion made by the Senator from Nebraska, that Mr. Barry be suspended from office, and that at 4 o'clock on February 10 the Senate take final action.

Mr. GEORGE. Mr. President——

The PRESIDENT pro tempore. The amendment proposed by the Senator from Michigan happens to be an amendment in the third degree. It can not be entertained except by unanimous consent.

Mr. REED. Mr. President, my motion is still capable of modification by myself, as long as it is pending?

The PRESIDENT pro tempore. It is. The Senator from Pennsylvania has complete control of the wording of his motion.

Mr. REED. Therefore I modify my motion so that it will read in accordance with the substitute presented by the Senator from Michigan.

The PRESIDENT pro tempore. Will the Senator from Pennsylvania please state the form of words in which he now wishes the motion to be submitted?

Mr. REED. I move that the Sergeant at Arms be suspended from office until futher action of the Senate, and that at 4 o'clock on February 10 the Senate proceed to final disposition of this matter.

Mr. GEORGE. Mr. President——

The PRESIDENT pro tempore. The question is upon agreeing to the motion proposed by the Senator from Pennsylvania.

Mr. NORRIS. Mr. President, it is the motion of the Senator from Michigan, is it not?

The PRESIDENT pro tempore. It is, in form of words, but it is not in parliamentary status.

Mr. NORRIS. No; but the Chair stated that the question was on the motion of the Senator from Pennsylvania. I have offered a substitute.

The PRESIDENT pro tempore. True, and the Senator from Michigan proposed an amendment, which would have been an amendment in the third degree, and, in the view of the present occupant of the chair, it could not be entertained except by unanimous consent.

Mr. NORRIS. Then the motion of the Senator from Michigan is not in order?

The PRESIDENT pro tempore. It is not. Inasmuch as the original motion was made by the Senator from Pennsylvania, and inasmuch as the unbroken practice and the rules of the Senate commit the form of words of any motion or any amendment to the hands of the Senator making the motion or offering the amendment, the Senator from Pennsylvania is wholly within his right in modifying his original motion.

Mr. NORRIS. Mr. President, I do not know why the Chair enters into that long argument. Nobody has questioned the right of the Senator from Pennsylvania to modify his motion.

The PRESIDENT pro tempore. The Chair thought the Senator from Nebraska was questioning it.

Mr. NORRIS. No; but I want to say a word on the motion of the Senator from Michigan. However, since that is

out of order, I will say a word about the motion of the Senator from Pennsylvania.

The PRESIDENT pro tempore. Which, may the Chair state, is exactly the same.

Mr. NORRIS. What did the Chair say?

The PRESIDENT pro tempore. The motion the Senator from Pennsylvania has now before the Senate is exactly in the form in which the Senator from Michigan originally made his motion.

Mr. NORRIS. I understand that. The Senator from Pennsylvania, in other words, has modified his amendment; but my motion to substitute is the pending question.

The PRESIDENT pro tempore. It is.

Mr. NORRIS. He can not take my motion out of the way by changing his motion.

The PRESIDENT pro tempore. The Senator from Nebraska is wholly right.

Mr. NORRIS. Then, Mr. President, the question resolves itself, really, into an inquiry as to whether we shall postpone action until the 10th day of February.

Personally, I would much rather have had the motion of the Senator from Michigan or the Senator from Pennsylvania as he originally had it. But now everybody knows what we are going to do on the 10th day of February. The story told by the Senator from Arkansas applies 100 per cent. No Senator will admit now, or at any time between now and the 10th of February, that he is not going to vote to remove this man from office.

Mr. REED. Mr. President, will the Senator permit a question?

Mr. NORRIS. Yes.

Mr. REED. Does every Senator likewise know whether he will vote for or against any further punishment, which we would have the power to inflict?

Mr. NORRIS. No; and if there is any further punishment to follow, we can impose it. The removal of Mr. Barry would not take away the power of the Senate to punish for contempt, if it wanted to.

Mr. President, we are confronted with certain evidence. There is no dispute about the evidence. Mr. Barry has admitted the facts. He has not asked for a continuance; he has not asked for the mercy sought to be extended to him, and which would be taken away from him on the 10th of February. He has not requested it, and inasmuch as the facts are beyond dispute, inasmuch as there is no question about the removal of this man in anybody's mind, I do not understand, myself, why we should not act now.

I do not entertain the fear the Senator from Pennsylvania, or the Senator from Arizona seem to have that the country will criticize us for acting too hastily in the matter. We will not still the voice of the country. Will not the country say, "When you are confronted by an unworthy official of the Senate who has admitted that he has told a falsehood and published it to the four corners of the earth, if you had the right kind of patriotism, if you had the right kind of viewpoint as to the dignity and the responsibility of your position, and the determination to keep it pure and unsullied, you would not hesitate for a minute to act, any more than if he struck you in the face you would not hesitate to return the blow, and you would not say that you would wait until the 10th of February to do it."

Mr. President, it seems to me there is no dispute, and that there is only one course we can honorably pursue, and that is to remove this man. We might, it is true, remove him to-morrow or the next day, but we know what we are going to do, so why not do it now?

Mr. GEORGE. Mr. President, I think it unfortunate that we seem to have the confused idea that Mr. Barry is on trial for some offense. He is on trial for no offense, either against the law of the United States, or any special or specific rule of the Senate.

The fact that, though he is an officer of the Senate, his offense is not against the Senate alone, but against the House of Representatives also, raises a responsibility to the other branch of the Legislature; and inasmuch as Mr. Barry is not on trial for any offense, and inasmuch as the body which elects him to this particular office, and which he serves, has an absolute right to inquire concerning his conduct at any time, it seems to me that the motion to permit him to go under suspension, and in the meantime consider the question of resignation, or what not, and then come back at a later date to hear what this body will say about this article, admittedly libelous, upon the Members of the Senate, is wholly inexcusable.

If I may be pardoned for saying it, I think, if nothing else justified the general condemnation of the Senate, conduct of that kind would unmistakably justify it. We would stand before the country wholly unexcused and inexcusable in the face of the admitted statement of Mr. Barry, an officer of this body with long experience, prior to his choice as Sergeant at Arms, I believe, a newspaper man, familiar with the processes of Government, invited not once but more than once by the Senator from Idaho and others to ask for a delay, or for an opportunity to be heard at a later date, expressly declining that invitation and saying that he was ready to proceed, and admitting here all of the facts with reference to the particular article.

Mr. President, it seems to me that to delay action on the matter is entirely without excuse, and would leave the Senate in a most unenviable and vulnerable position. Mr. Barry ought to be dismissed upon what he confesses and admits, or he ought not to be dismissed, but there is no excuse why the Senate should not act.

Mr. BARKLEY. Mr. President, I should like to ask Mr. Barry one question, if I may be permitted.

A while ago, Mr. Barry, in response to a question of mine, you stated that this article appeared earlier than you had expected it to appear in the magazine. Am I to understand by that that your real intention was to have this article appear after your term of office expires, so that the Senate would have no jurisdiction over you?

Sergeant at Arms BARRY. Not at all. I expected it to be printed this month, but I did expect to receive the proof of it, and I did not know what date it would be printed. I knew it would be printed in the month of February.

Mr. BARKLEY. Did I understand you to say a while ago that you actually wrote this article, physically, yourself?

Sergeant at Arms BARRY. Yes, sir; I did not say so, but I did write it.

Mr. BARKLEY. Nobody else wrote it and used your name?

Sergeant at Arms BARRY. No, sir.

Mr. BARKLEY. It is your production?

Sergeant at Arms BARRY. Yes, sir.

Mr. BLAINE obtained the floor.

Mr. WALSH of Montana. Mr. President, will the Senator from Wisconsin yield to me to ask a question.

Mr. BLAINE. I yield.

Mr. WALSH of Montana. Mr. Barry, the article says that these Senators and Representatives who have been guilty of bribery are well known, but I understand you to say that you do not know who they are?

Sergeant at Arms BARRY. I did not mean to say in the article that anybody could name them, but they were so generally known that they would be known by their colleagues and by everybody in Washington.

Mr. WALSH of Montana. But you do not know who they are?

Sergeant at Arms BARRY. I do not.

Mr. WALSH of Montana. Can you tell us of anyone who does know who they are?

Sergeant at Arms BARRY. No, sir.

Mr. WALSH of Montana. How could you say, then, that they are well known, if you do not know of anybody who knows them?

Sergeant at Arms BARRY. That was just a general statement. It was made carelessly and thoughtlessly, and, I say, might have been changed.

Mr. LA FOLLETTE. Mr. President——

The PRESIDENT pro tempore. Does the junior Senator from Wisconsin yield to his colleague?

Mr. BLAINE. I yield for the purpose of permitting my colleague to ask Mr. Barry a question.

Mr. LA FOLLETTE. Mr. Barry, who first approached you about this article for the New Outlook?

Sergeant at Arms BARRY. The man that owns the magazine.

Mr. LA FOLLETTE. I can not hear you.

Sergeant at Arms BARRY. Mr. Tichenor, the man that owns the magazine.

Mr. LA FOLLETTE. Did he interview you personally, or address you a letter?

Sergeant at Arms BARRY. I have forgotten. He did both, but which was first, I do not just remember. I think he saw me before he wrote me, but I am not sure about that, Senator.

Mr. LA FOLLETTE. When you discussed the matter with him, did you discuss the subject matter of the article?

Sergeant at Arms BARRY. No, sir; not this part of it, anyhow. I might have gone over it in a general way, but this subject matter was not discussed with him or anyone else.

Mr. LA FOLLETTE. Was the title of the article discussed at that interview?

Sergeant at Arms BARRY. No, sir.

Mr. LA FOLLETTE. Was the subject matter of this article, or anything relating to it, suggested in the correspondence which you had with the gentleman subsequent to your interview with him?

Sergeant at Arms BARRY. No, sir. Suggested by him, you mean, to me?

Mr. LA FOLLETTE. Yes.

Sergeant at Arms BARRY. No, sir; it was not.

Mr. LA FOLLETTE. Then it was entirely your own idea, and was not suggested to you by the owner of the magazine, the publisher, or by anyone else connected with it, or by any other person, that you should write this article which now has appeared in the publication?

Sergeant at Arms BARRY. Yes, sir.

Mr. LA FOLLETTE. I did not hear the response.

Sergeant at Arms BARRY. I said yes; meaning that it was not suggested by anybody—by him, or anyone else.

Mr. BLAINE. Mr. President, it appears to me that there are some issues in this matter which have not been discussed. Preliminary to a discussion of those issues, I want to make some general observations respecting men who are charged with offenses.

I have often observed a scene which frequently occurs in a court room. The sheriff, or the policeman, marches the accused into the court chamber manacled, irons upon his wrists, he is brought before the judge, who sits there possessed of tremendous power over the human being before him, solemn, perhaps determined, in his looks. There is the prosecuting attorney, ready to send the accused to jail. The matter is presented in a preliminary manner, the whole audience, all the men and women in the court room, the judge, the arresting officer, and the prosecuting attorney, all ready, anxious, willing, and zealous, to find the man guilty.

Our American system of jurisprudence wisely provides that a man must be represented by counsel, that witnesses must be produced to confront the accused, that their evidence must be given in open court, that a jury be impaneled and all the facts sifted and all of the circumstances considered. The accused may be guilty, beyond any doubt, but he is entitled to a fair, open, public hearing. That is the American way. That is the constitutional way. Even the accused ought not to be permitted to make a plea of guilt until the court examines into the circumstances to ascertain the degree of punishment that should be administered. That briefly, though inadequately, describes the court scene.

Now what is the scene before the Senate of the United States? Here is the Sergeant at Arms called before the bar of the Senate. He is a subordinate officer. The Senate of the United States is the supreme power and the supreme judge. It is this body, including the House of Representatives, which has been charged in an article written by the Sergeant at Arms with being subject to bribery; it is charged, in fact, that some of the Members have actually been bribed. Of course, such a charge is bound to bring disrespect and disrepute, not only upon the Congress as a whole, but upon the two Houses of Congress and upon every Member of Congress in either of its branches.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Massachusetts?

Mr. BLAINE. No; I decline to yield presently, that I may have my argument properly connected.

The PRESIDENT pro tempore. The Senator declines to yield.

Mr. BLAINE. The Sergeant at Arms is brought before the Senate. He admits that he has libeled the Senate and the House of Representatives, and of course, that admission carries the implication that he has made a charge of bribery against every Member of the Senate and against every Member of the House, though he does not specify which individual is guilty of bribery. But he stands here before the Senate alone and without counsel. He makes no defense. He does not claim or allege truth as a justification for the charge that he has made in the magazine article. He admits, as I understand his testimony, that the charge is false and that he has no information that any Member of either House has been guilty of bribery.

Therefore, Mr. President, we approach the proposition from this angle: If that magazine article was written in a spirit of revenge, in a spirit of malice, if it was written for the purpose of obtaining money, for the purpose of enriching himself, then the Sergeant at Arms stands in an entirely different situation before the bar of the Senate, and mere removal would not be sufficient punishment. There being no justification offered by him, he admitting the untruthfulness and the falsity of the charge made in the magazine article, so far as the Senate is concerned there are no extenuating circumstances offered by him why the punishment should not be for contempt as well as removal from office.

Therefore, Mr. President, if we are to proceed according to the American way we will accept this issue in the nature of a libel action. The pleading is in by the Sergeant of Arms. He admits he wrote the article. He admits that the article is untrue and false. But there may be circumstances of which we have not been informed which would justify a lesser punishment than removal for contempt. He ought to have an opportunity to present extenuating circumstances if there be such so that the punishment might be modified, might be mellowed. The Senate would stand convicted of dishonor if it simply suspended the Sergeant at Arms and then removed him if the article was written with malice, with malicious intent to injure the character of any Member of the Senate or of the House of Representatives. Circumstances might be proven either upon the statement and admission of the Sergeant at Arms or upon circumstances growing out of admissions, the question of the payment of money, who paid him, who induced him to write the article, and many other circumstances which might be brought out to ascertain whether or not the article was maliciously written. If it was written maliciously, then punishment by removal is, I submit, not sufficient.

Mr. President, the Senate of the United States sits as a court. Against the Senate and against the House of Representatives the charge has been made. We therefore can not afford to be hasty in the matter. We can not afford to be precipitous in the matter. We should exercise that judicial care, that judicial temperament whereby the Sergeant at Arms will have an opportunity before a proper committee to present all the facts and all the evidence if there are facts or evidence, in extenuation so that the punishment which might be administered will not be the greatest punishment to which he may be subjected.

As I understand, punishment may be administered by temporary suspension, punishment may be administered by removal from office, and in addition thereto punishment by way of contempt proceedings that may involve imprisonment. If that is a correct assumption, if the Senate has that

jurisdiction, then the Senate ought to resolve that this matter be referred to a proper committee to take the evidence, to adduce the facts, to develop the circumstances. If it shall appear that the article was maliciously written then, Mr. President, so far as I am concerned, I would not only vote for removal, but also for punishment for contempt. But I am unwilling now to vote upon the degree of punishment that should be inflicted in this case until the accused has had an opportunity to present any extenuating circumstances that he may have before a committee of the Senate and that committee shall have reported to the Senate upon the evidence so produced.

Mr. NORRIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Nebraska?

Mr. BLAINE. I yield.

Mr. NORRIS. I would like to ask the Senator from Wisconsin if the Sergeant at Arms should be suspended as the Senator has advocated and as the motion made by the Senator from Pennsylvania contemplated, could he not in the meantime resign before the Senate takes the matter up on the 10th of February and thus escape removal?

Mr. BLAINE. No doubt the Sergeant at Arms could resign and escape removal from office, but the resignation of the Sergeant at Arms would not relieve him from punishment under contempt proceedings, and that punishment, of course, is far more severe than punishment by mere removal.

Mr. CONNALLY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Texas?

Mr. BLAINE. I yield.

Mr. CONNALLY. The Senator does not contend that dismissal of the Sergeant at Arms would divest the Senate of jurisdiction to punish him for contempt if it saw fit later to do so?

Mr. BLAINE. I do not, but I do contend this——

Mr. CONNALLY. Then, why should we not go ahead and act and take up later the matter of contempt?

Mr. BLAINE. I contend that the Sergeant at Arms is before the bar of the Senate of the United States. The charge against him has been made. He has made certain replies. He has admitted the falsity of the magazine article. But I have not heard any word or any suggestion as to any extenuating circumstances. If the Senate is to proceed in an orderly manner, it will keep jurisdiction of the Sergeant at Arms and of the whole proceedings so that it can administer the punishment according to the offense that has been committed. I think in fairness to the Sergeant at Arms every opportunity should be given to him, that he may have the opportunity to plead such extenuating circumstances as he may have, that the punishment may be reduced from punishment for contempt to punishment by removal and perhaps even to the lesser punishment of suspension.

However, I am not prepared to vote upon the degree of punishment which should be administered until Mr. Barry has had an opportunity to present such facts and such circumstances as may relieve him from the more severe punishment.

Mr. President, it would seem to me that if the Senate acts hastily in this matter, if it removes Mr. Barry to-day, the people of the country may look upon the action of the Senate as having been done in a spirit of spite, in a spirit of revenge, in a spirit of vengeance. But if the Senate proceeds in an orderly way, I know the country will support the Senate if the Senate finds a malicious libel has been made against the Congress and the members thereof, and will sustain the punishment for contempt in addition to punishment by removal.

Mr. BINGHAM. Mr. President, it seems to me that we are in danger of acting more hastily than is in accord with the pride of our race and our inheritance. We are irritated by what has taken place; we are irritated by the charges that have been made. The Sergeant at Arms has told that he did not intend to libel the Senate; he has admitted that the language is more severe than he supposed it was. He has told us that he had no opportunity to see the article in print, and everyone who has read in print anything that he has written or spoken is always surprised, sooner or later, to find that he has said something either by implication or indirectly which he did not intend to say.

The Sergeant at Arms, summoned before the bar of the Senate without counsel, endeavoring in his manner to explain what has taken place, faced by a Senate full of irritated Senators who do not like the implication or the charges which have been made, is at a very great disadvantage.

When the Senator from Pennsylvania suggested that this matter should be taken under consideration by the Judiciary Committee, and a prompt report made thereon, it appealed to me that that was the wise, the American, method to pursue; and I hope very much, Mr. President, no matter how irritated we may be with the charges contained in this article, that we will act with a little more circumspection, a little more self-restraint, than we appear to be about to do.

I am going to ask the Senator from Pennsylvania if he will not change his motion once more so that it may read that the Sergeant at Arms be suspended; that his case be referred to the Judiciary Committee for consideration; that he appear before them for full investigation, and that they then recommend at an early date to the Senate the steps they believe should be taken?

It seems to me, Mr. President, that if the Senator from Pennsylvania will amend his motion in that regard——

Mr. NORRIS. Mr. President, may I make an inquiry of the Senator from Connecticut?

Mr. BINGHAM. Certainly.

Mr. NORRIS. The Senator asks that the Judiciary Committee take evidence in the matter. What more evidence could we take? Have we not got the evidence? The Sergeant at Arms does not ask for counsel; he does not ask for delay; he does not ask that evidence be heard. Now if it were just put up to the Judiciary Committee, and they were authorized to take evidence, where would they go to get it? Whom would we summon? What kind of evidence would we take and what would we take any evidence for, when the entire matter has rested entirely upon the testimony of the defendant himself? I would not know where to go to get evidence; I would not know what kind of evidence to ask for. I do not know anybody that has any. Here is a charge made; the man admits it. He says, "I do not want delay; I have said it." Further on practically he says that the Senate and the House when they passed certain amendments were moved by demagoguery. He is an officer of the Senate. If he was not an officer of the Senate, I would feel differently about it. I do not understand why Senators are so anxious to give this man leniency and time and consideration and have a lawyer provided for him and all that, when he himself does not ask it. He flaunts it in our faces. And yet it is said that he must have a lawyer; he must go before the Judiciary Committee; there must be a trial; we must take evidence.

The PRESIDENT pro tempore. The Chair will say, before the Senator from Arizona leaves the Chamber, that the Sergeant at Arms has suggested to the present occupant of the chair that at some time——

Mr. NORRIS. I yield to the Chair. I did not know he was going to make an interruption.

The PRESIDENT pro tempore. The Chair thanks the Senator.

Mr. BINGHAM. The Senator from Nebraska did not have the floor.

Mr. NORRIS. That is right; I beg the Senator's pardon.

The PRESIDENT pro tempore. The statement was made to the Chair by the Sergeant at Arms that at some time before action is taken either before a committee or before the Senate he desires to make a statement.

Mr. BINGHAM. Mr. President, in view of that statement given to us by the Chair on behalf of the Sergeant at Arms, I trust the Senator from Nebraska will not press his motion, but will permit the matter to be referred to the Judiciary Committee, of which he is the distinguished chairman and

which is composed of lawyers accustomed to proceedings designed to secure justice. I am not a member of the bar; I am only familiar with the traditions of my family and of my race. We do not believe in what is sometimes called lynch law. We do not believe in drumhead courts-martial. Here is a matter which has been brought to our attention for the first time to-day. We saw it in the paper for the first time to-day. The Sergeant at Arms was immediately called before us. He answered questions in a somewhat contradictory and halting manner. We are about to place the stigma upon him of expulsion from his post contrary to the traditions of our race. Since he desires to make a statement to the committee——

Mr. NORRIS. Let him make it; he is right here.

Mr. BINGHAM. I hope the Senator will not press his motion for immediate action.

Mr. WATSON and Mr. BARKLEY addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Connecticut yield and if so to whom?

Mr. BINGHAM. I yield to the Senator from Indiana.

Mr. WATSON. Mr. President, I went to Mr. Barry a moment ago, on my own personal responsibility, and asked him if he wanted to say anything further or if he had anything further to say, and if he wanted to say it here or if he wanted to go before a committee to say it. I also asked him if he wanted somebody to represent him. I said, "I am sure that the Senate will be willing to give you every possible opportunity to explain or extenuate the article or the words that you have written." He said, "Well, I should like to make a further statement." I said, "Do you want to make it before the committee?" He said, "No; I will make it right here." I will inquire of Mr. Barry if that was not his statement?

Sergeant at Arms BARRY. Yes, sir. I merely want to state——

Mr. BLAINE. Mr. President——

The PRESIDENT pro tempore. The Senator from Indiana happens to hold the floor.

Mr. BLAINE. I beg pardon of the Senator from Indiana. I will not interrupt Mr. Barry.

Sergeant at Arms BARRY. In the statement of Senator BLAINE I understood him to have said that I admitted this article was false and untrue. I do not think I made such an admission as that. I did not mean to make it. I made the statement that I had no opportunity to see the proof of this article; and that if I had and had gone over it more carefully, I might have seen that these words said what I did not intend to say. But I do not apologize for that; I have to stand on the article as it is. But I did not mean to say that it was misleading and false.

Mr. BLAINE. May I address an inquiry to Mr. Barry? Do you now contend that that portion of the article—in reference to Members of Congress accepting bribes—is false or true?

Sergeant at Arms BARRY. That is a matter of opinion. I can not produce evidence to show that any men were bribed or that any men might have been bribed or that they were not. That is only a matter of opinion.

Mr. BLAINE. You say it is a matter of opinion. Well, what is your opinion?

Sergeant at Arms BARRY. I am not expressing my opinion now.

Mr. BLAINE. Have you an opinion?

Sergeant at Arms BARRY. I think not to-day.

Mr. BLAINE. Not to-day. Would you have to-morrow?

Sergeant at Arms BARRY. Well, I do not think I would have to-morrow. I might have.

Mr. BLAINE. Did you have an opinion yesterday?

Sergeant at Arms BARRY. Not except as stated in that article.

Mr. BLAINE. When will you have an opinion?

Sergeant at Arms BARRY. I do not understand the question.

Mr. BLAINE. You said it was a matter of opinion whether the article was false or true.

Sergeant at Arms BARRY. I can not produce evidence on that.

Mr. BLAINE. I am inquiring what your opinion is as to the truth or falsity of the article?

Sergeant at Arms BARRY. I do not think the article is false or untrue.

Mr. BLAINE. You think the article is true?

Sergeant at Arms BARRY. I think it is true as written.

Mr. BLAINE. Then you plead the truth as justification for the article? Is that correct?

Sergeant at Arms BARRY. I have not done so.

Mr. BLAINE. What extenuating circumstances do you present?

Sergeant at Arms BARRY. None, except as I have stated them to the Senate.

Mr. BLAINE. Have you any?

Sergeant at Arms BARRY. No more than I have stated.

Mr. BLAINE. No more than what you have stated. Who is the editor of the magazine?

Sergeant at Arms BARRY. Alfred E. Smith.

Mr. BLAINE. When did he first consult you respecting this article?

Sergeant at Arms BARRY. I never saw him and never talked to him.

Mr. BLAINE. Did he write you?

Sergeant at Arms BARRY. He never wrote to me.

Mr. BLAINE. How did you come in contact with the magazine?

Sergeant at Arms BARRY. I explained all that to Senator LA FOLLETTE, that the owner of the magazine came over here to see me, but the editor of it, Mr. Alfred E. Smith, I know nothing about.

Mr. BLAINE. Who is the owner of the magazine?

Sergeant at Arms BARRY. Mr. Frank A. Tichenor.

Mr. BLAINE. Where does he live?

Sergeant at Arms BARRY. In New York.

Mr. BLAINE. He came to consult you?

Sergeant at Arms BARRY. Yes; about this matter.

Mr. BLAINE. And what was the agreement between you and the owner of the magazine?

Sergeant at Arms BARRY. I agreed to write a certain number of articles. The number was not stated, but this and one other—two of them—were sent to him. He wrote back, and I think I saw him and he accepted those two articles, and that is the last I heard of it. I never received any proof of the article.

Mr. BLAINE. What was the price that you were to receive for writing the articles?

Sergeant at Arms BARRY. As I told the Senate, $250 apiece.

Mr. BLAINE. I did not hear the answer.

Sergeant at Arms BARRY. The price was to be $250 apiece for these articles. He did not say how many of them or on what subjects they should be. He talked with me in a general way, but there was nothing said about this article. He did not discuss it.

Mr. BLAINE. Was there any other individual other than the owner who inspired you to write this article?

Sergeant at Arms BARRY. No, sir. I answered Senator LA FOLLETTE all those questions. Nobody spoke to me about it.

Mr. LEWIS. Mr. President——

The PRESIDENT pro tempore. The Senator from Illinois.

Mr. LEWIS. I have an observation which I can not altogether remove from the influence of a very long acquaintance with Mr. Barry and a very great sympathy for his situation as now disclosed.

Mr. President, it is within half an hour of 6 o'clock, and between now and that hour would give time for Mr. Barry to obtain counsel, and to have some private conferences with such counsel. Then he could come before this body, after having received the advice of counsel, and disclose or have disclosed whatever would be an extenuation, such as, for instance, whether he had read the article after it had been prepared, whether he had reviewed it, whether he had

seen it after it was put into form, and what were the particular circumstances which led him to such conclusions as he now confides he knew no foundation for.

I respectfully suggest that when a Member of this body has been charged with bribery, as history shows, he was first accorded opportunity to consult counsel; investigation was allowed, and time for the consideration of all the facts, and then a report was made to the body, and action taken by the body.

I respectfully suggest that under the present circumstances the Chair could name any Senator to act as counsel for Mr. Barry, or let Mr. Barry choose any one. Let him have a conference with his counsel. It is now half-past five. Within 30 minutes the conference could be concluded. He will have had some time for self-consideration. His counsel would have had an opportunity to consider the subject matter as the facts might reveal and the method in which he could come before the Senate and present the evidence or a communication from Mr. Barry.

I feel, sir, that some one should be named, either at the selection of Mr. Barry or at the instance of the Chair, to represent him, and that Mr. Barry should have some moments for consultation with such representative, and then that we resume the subject in such formal manner as may be proper after he has had opportunity for reflection and conference, and then treat him in such a way as has been the practice of the Senate in matters equally grave and much more severe.

Mr. Barry is being charged with an offense that is very grave. It is grave because it violates the confidence of the men who reposed a confidence in him and chose him. It is grave because it goes to the country as the belief of an officer of this body that men could be guilty of such things as the article intimates. It is equally grave in view of the fact that the general public to-day is having its confidence in legislative bodies undermined by misrepresentations and misunderstandings; and all of that is well calculated to give rise to some heat of disposition and some feeling of resentment on the part of the body. But it is just such a moment as that that tests the character of justice and the strength of honor of this honorable body; and we respectfully suggest that in view of the long practice and habit—I may say, procedure—that is always applied in matters of offenses charged, there ought not to be an exception now.

An exception could be made in the length of time to be given; but it is perfectly apparent that this particular gentleman seems to be under some strange influence. It is clearly apparent to me that some one has been suggesting to him matters that caused him to write such indictment as is found in the first paragraph of the article. It is evidence to me that some sources have stimulated him.

I respectfully, therefore, suggest to this honorable body the wisdom and justice that there be a designation of some one as counsel, either at the suggestion of Mr. Barry—let him make his choice if he desires—or by the Chair let a designation be made, and let him have the time of half an hour or an hour, and at the end of such time then be brought before the body for such explanation as his counsel may give and the statement of such position as Mr. Barry then feels he should take. Otherwise, we stand as making an exception in the matter of the trial of an alleged offender, which will be imputed, sir, either to quick, sudden temper and a lack of self-control on the one hand, or to a desire to equip ourselves with a new-established faith from the public, by our acting in such mad fury as to restore ourselves to public confidence which we fancy we have lost.

Mr. TRAMMELL. Mr. President——

Mr. LEWIS. I yield to the Senator from Florida.

Mr. TRAMMELL. I desire to ask the Senator from Illinois if he has not cited precedents that usually prevail in cases that are contested, and where the defendants plead not guilty, instead of the precedent of a case in which the defendant comes into court and admits his guilt, as Mr. Barry has done in this instance.

Mr. LEWIS. My answer to the Senator from Florida is that the courts of this country will take a man's plea of guilty, but still be conscious that the man himself may not be conscious to what extent that plea would go, in what it involves him; and, therefore, investigations will be entered by the court before it will inflict the punishment, in order that, in the language of the ancient line, "The punishment may fit the crime."

I feel that while Mr. Barry may say he did the acts, yet, sir, there may be circumstances surrounding him which by inquiry and consultation may be disclosed and brought before this body that could soften the penalty and that that opportunity ought not to be shut off from him, or opportunity of counsel and the calm privilege of defense denied him, if there be such. For that reason I suggest that he ought to have counsel, a short period of time for consultation, and then, sir, the conclusion of judgment to follow this afternoon.

Mr. ROBINSON of Indiana. Mr. President, I do not hold any brief for the Sergeant at Arms. I recognize perfectly well that he has committed a very grave indiscretion. I also recognize that he is wholly within the power of the Senate; and I submit to my colleagues here that he is not in an enviable situation as a defendant.

It seems to me the procedure of the Senate in the last two hours has been more or less amazing.

Here is an employee of the Senate, its Sergeant at Arms. He finds himself confronted with a charge suddenly, and he is haled before this powerful body without knowing what it is all about.

Every Member here is accustomed to standing on his feet and participating in debate. He has to defend himself from charges almost as grave as those suggested by the Sergeant at Arms right on this floor, time and again. He has become accustomed to the procedure; and here we drag before this body a timid man who has never had any opportunity to speak on this floor, who knows little about the procedure, and nothing about court customs, of course. Some of us have presided over courts and are familiar with judicial methods; and then the Senate proceeds, or gets ready to proceed, to act as a mob—nothing less than that, Mr. President. We propose to rend asunder the defendant and disgrace him. He has not a chance on earth. He was convicted before he ever came to this floor, and he has made some unfortunate admissions against his own interest.

Mr. President, I submit that the worst criminal in the world would get a squarer deal than that before any American court.

I think the first suggestion made by the Senator from Pennsylvania [Mr. REED] was a proper one. I think this case should have gone before the Committee on the Judiciary. It was perfectly proper to hale the Sergeant at Arms in here, if you want to bring him here, and let him tell his story, though he has had no opportunity whatever for preparation; but then, before taking action in the matter, we should be fair, be decent and honorable about it, and give him the same chance one would expect to have for himself if in a similar situation. Let the matter be referred to the Committee on the Judiciary. Then let Mr. Barry appear before that committee if he desires to do so. Then let that committee deliberate on the question whether or not there shall be any punishment; if punishment, how severe it shall be; if judgment shall be rendered, what that judgment shall be; and go at it soberly, judicially.

That is the way we proceed in all other matters where defendants are brought before courts.

I dislike very much to disagree with my esteemed friend the very distinguished Senator from Nebraska [Mr. NORRIS], for whom I have great affection and very high regard, but I do not agree with him in his position that "the evidence is before the court; now let us decide it, here and now." I think we can very well deliberate in the Committee on the Judiciary. The members could go over the matter carefully. After having given earnest thought to it for a day

or two they may not be so anxious to tear this man to pieces as some of us seem to be this afternoon.

Juries do that, Mr. President. A defendant appears before a court. The evidence is put in the record. After the evidence has been adduced, the jury retires to deliberate—12 fair and impartial men. Then they decide what shall be done. Why can we not be just as fair as a jury? Why would it not be the proper procedure to let this matter go before the Committee on the Judiciary, and then, if Mr. Barry has any further evidence to offer, let him appear there and testify, and then let the Committee on the Judiciary deliberate on what the punishment shall be, report back to the Senate, and let the Senate then discuss the matter as much as it chooses, finally arriving at a decision which shall be just and fair?

Mr. SHIPSTEAD. Mr. President, I should like to ask the Senator from Nebraska [Mr. NORRIS] a question. He is the chairman of the Judiciary Committee. Not being a lawyer, I hope the distinguished lawyers here will pardon me for asking a question which may seem very irrelevant.

I have found it difficult to determine who is the accuser and who is the defendant here. The Sergeant at Arms has made certain charges against the Senate. He is brought before the Senate so that the Senate may be faced with its accuser. He says he stands upon the article. The truth or untruth of the article he says is a matter of opinion. I should like to be informed who is the defendant here.

Mr. BLACK. Mr. President, perhaps if there has been any time when the action of the Senate would justify criticism, it has been in the last two or three hours.

There is no man on trial here for a crime. This gentleman is employed by the Senate. The Senate employs him, and the Senate can discharge him. He is not on trial for contempt. If the Senate desires to prefer charges for contempt, it can do so later. Personally, I do not.

It is my judgment that if he has committed a criminal libel, in so far as the libel is concerned, that should be tried before a jury. The only issue here is not whether he has had counsel for preparation, as the Senator from Indiana [Mr. ROBINSON] says—preparation for what? He does not claim to desire preparation to tell the truth.

Mr. ROBINSON of Indiana. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Indiana?

Mr. BLACK. I yield to the Senator.

Mr. ROBINSON of Indiana. Why this haste? may I suggest to the Senator. This matter could have gone over until to-morrow or the next day——

Mr. BLACK. It could have gone over until the 4th of March.

Mr. ROBINSON of Indiana. And we could have told Mr. Barry something of the charges that were going to be lodged against him. I have never read the article. I have just heard excerpts from it read. I do not know what is in it; but, regardless of what is in it, Mr. Barry ought to have a fair chance, and he ought to be advised in advance that he is going to be haled before this powerful body, so that he can be prepared.

Mr. BARKLEY. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Kentucky?

Mr. BLACK. I yield to the Senator.

Mr. BARKLEY. The Sergeant at Arms has testified here that he wrote this article himself, that he was solely responsible for its preparation, and that he produced it. We are bound to assume that he did it in deliberation, and not in haste.

He now says that while there is no justification for the article, while he has no evidence that anybody in either House has ever accepted a bribe, he still stands on the article as he wrote it, and that he received pay for it.

It is not like jerking a man up into court without any knowledge of anything that he has done. What Mr. Barry has done in violation of his relationship to the Senate has been done deliberately. He knew he wrote the article when he wrote it. He has known ever since he wrote it that he did write it. He knew it was going to appear in this magazine. He may have been surprised at its appearance in February instead of in March, when it would have been too late for the Senate to have taken official notice of it; but he has known all the time that this article was going to be published, and he was the instigator of it.

Mr. BLACK. Mr. President, in so far as the jury's deliberation is concerned, I never heard, until it was stated by the Senator from Indiana, that after a jury heard the evidence in the case they were required to wait a day, or 10 days, or 2 weeks, before they reached a verdict. There is no precedent of that kind I have ever heard of. A jury hears the evidence, and then the jury is presumed to act. Of course, they can talk, they can keep on talking, they can keep on talking, and they can keep on talking for the next year, or they can act.

Mr. ROBINSON of Indiana. Mr. President, will the Senator yield there?

Mr. BLACK. Let me proceed just a little further with reference to one or two other matters. After I have concluded I shall be glad to yield to the Senator for any question.

Mr. Barry has not asked for an attorney. I have never seen a gentleman more composed. I predict that there will be still more interesting articles appearing in the magazine, probably at an increased price, after this hearing, and that the price will go up in proportion to the number of days of delay.

There has been no indication on Mr. Barry's part that he is greatly disturbed. He was asked if he desired counsel, and he said no. Of course, it may be that we should have compelled him to accept counsel before he stated whether he wrote the article for which he got $250. Maybe it would have been wise on our part to have said, "Go and get a lawyer, so that you may know whether to tell the truth about whether you got $250 to write the article."

If we were trying Mr. Barry in a court, and he were being subjected to a trial which might result in imprisonment, there would be some reason for all this solicitous talk about the procedure, but we know that in all probability Mr. Barry will not be Sergeant at Arms after March 4, anyhow, so there is probably involved only a matter of a few days.

Mr. Barry is an employee of the Senate. Certainly this gentleman owes loyalty to his employer. It may be true that if an employee of the Senator from Indiana were to make charges against the Senator from Indiana, and sell them to the public press for a consideration of $250, the Senator from Indiana would then call the employee in and say, "Get a lawyer, hire the best lawyer you can get, in order to help you determine whether or not you will tell me the truth as to whether you made a disloyal statement about me."

If the Sergeant at Arms had any basis for the statement he made, no one would have a right to complain. If there is any basis on earth for his having made the statement that there are Senators and Representatives, only a few of them, who sell their votes, no one would have a right to complain. But there is only one single, solitary, lonesome issue here. A statement is made as plainly as a man can make it that there are a few men in the Senate and the House who sell their votes for money.

No one who knows of the intelligence of the Sergeant at Arms would doubt that he knew what he was saying when he said that. Then he comes into the Senate and says that he said it. And now, with all the important legislation that is awaiting action, we have already taken more than two hours to determine whether or not we will keep him as an employee of the Senate or will discharge him from his employment with the Senate.

It is my judgment that the country would be far better off, if we want to delay the matter, if we simply let Mr. Barry serve on until March the 4th, and let the country know that we are going to deliberate on it for about 30 more days, while a few more million people get out of employment in this country, and while we hesitate and dilly-

dally and delay as to whether we will force a man to take a lawyer when he does not want a lawyer.

Shall we employ a guardian for the gentleman, and say, "Now, you are not right, your mentality is weak, you need a lawyer"? Shall we get him a doctor at the same time?

Mr. CONNALLY. Mr. President, will the Senator yield?

Mr. BLACK. I yield.

Mr. CONNALLY. Frankly I will say to the Senator that I think we ought to appoint a guardian ad litem for him. I think that is what he needs.

Mr. BLACK. Mr. President, I desire to say that, so far as I am personally concerned, I can certainly vote on the question of whether the Sergeant at Arms shall be retained as well to-day as I can next week.

Mr. DILL. Mr. President, will the Senator yield?

Mr. BLACK. I yield.

Mr. DILL. The elaborate speeches which have been made about the awful punishment that is to be meted out because we take a man off the pay roll would make one think it was worse than if he were to be sent to the penitentiary.

Mr. BLACK. I might state to the Senate that there are probably a great many others who are going to have that punishment after the 4th of March, without the benefit of counsel.

Mr. WATSON. Why bring that up. [Laughter.]

Mr. BLACK. Mr. President, I desire to say to the Senator from Indiana that there was no personality intended in my remarks.

Mr. President, this is the situation. Mr. Barry decides he wants to write some articles. He knows he can sell them better the more sensational they appear. That is a well-known fact. It is also well known that the Senate is a rather good target. Particularly is it a good target for a man who has been working for the Senate for a number of years.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. BLACK. I yield.

Mr. BARKLEY. Further along in the same magazine, on page 57, there is an explanation on the part of the magazine of the opportunities which Mr. Barry has to observe the operations of the Senate, and that therefore he must know what he is talking about.

Mr. BLACK. Naturally. I have not read the other articles which Mr. Barry has already prepared. I shall await them with some interest. But I predict that there will be still further articles appearing after the 4th of March. But, Mr. President, why are 96 men asked to wait until to-morrow, or next week, to take action on whether or not they will retain an employee who, at best, will be retained only until the 4th of March?

I sincerely hope, for myself, that if it is going to be delayed, and we have to listen to more speeches and more arguments about counsel and lawyers, and haling people befor the bar of the Senate, when Mr. Barry was perfectly willing to come, I sincerely hope that we may simply forget it.

As a matter of fact, I do not know that anybody is going to be injured materially by the decision whether Mr. Barry shall remain in the employment of the Senate or not. Personally, I am of the opinion that when a man acts disloyally to those who employ him, he should be discharged. That is the only issue here, whether or not it is right for a man holding the responsible position Mr. Barry holds to take advantage of his opportunity to make statements leaving the inference that men are guilty of the crime of bribery, when he admits without counsel, as I presume he would admit with counsel, that he had no evidence on which to base his charge.

Let us dispose of the matter. I believe 100 per cent with the Senator from Nebraska, that we ought to act and act before we adjourn to-night. It is not a question of what the country will think. If it were, I ask Senators in which attitude will the Senate show itself up in better light before the country, to delay another day or another week in deciding whether or not it will keep an employee and dilly-dally around about vital legislation affecting the people of this country, or have some more speeches on the ancient right to have a trial by jury, on the traditions of our race. If we are talking about the traditions of our race, I would judge that one of the traditions the Senator should have referred to is that, as suggested by the Senator from Nebraska, when somebody hits you in the face you do not say, "I will take it up with you next week, after you have consulted your lawyer."

Mr. President, the issue, let it be borne in mind, is this and this only: Shall Mr. Barry be retained, or shall he be discharged? Personally, I think we ought to act, and act now. Mr. Barry has made no request that we delay. He has asked for no advice of a lawyer. He knows he needs none. Mr. Barry knows, as he knew a while ago, that if he came before the Senate again he would make the statement just as he made it before. Certainly no lawyer would advise him to make a different statement, if he were the type of lawyer Mr. Barry ought to have.

Mr. President, I sincerely hope that if any one does make a motion to adjourn or to recess, the Senate will stay in session until it disposes of this matter. As a matter of fact, I am of the opinion that the safety of the Nation does not depend on how we vote on Mr. Barry.

SEVERAL SENATORS. Vote! Vote!

The PRESIDENT pro tempore. The question is upon the amendment in the nature of a substitute offered by the Senator from Nebraska [Mr. NORRIS].

Mr. BULKLEY. Mr. President, before we vote I would like to inquire whether the Sergeant at Arms has anything further to say to the Senate.

The PRESIDENT pro tempore. The Sergeant at Arms may proceed.

Sergeant at Arms BARRY. I think not, except with reference to Senator BARKLEY's suggestion a moment ago. I explained earlier in the discussion that I knew the article would be printed in February, and so I thought it was rather unfair that he should have insinuated that it might have gone over until March, when I would no longer be Sergeant at Arms. I knew it was to appear in February.

Mr. BARKLEY. Mr. President, in that connection, I understood the Sergeant at Arms in his first statement, before I interrogated him, to say that he was surprised that the article was published as soon as it was.

Sergeant at Arms BARRY. I knew it was to be published in February.

Mr. BARKLEY. If there is any controversy about whether he said that, I would like to refer to the notes of the reporter. Mr. Barry's statement was the basis of my inquiry.

Sergeant at Arms BARRY. I had been expecting it, but I had not received any proof.

The PRESIDENT pro tempore. The question is on agreeing to the amendment in the nature of a substitute proposed by the Senator from Nebraska [Mr. NORRIS] to the motion proposed by the Senator from Pennsylvania [Mr. REED]. The motion of the Senator from Pennsylvania is—

> That the Sergeant at Arms be suspended from office until further action of the Senate, and that at 4 o'clock p. m. on February 10 the Senate proceed with the matter to a final disposition.

An amendment in the nature of a substitute to that motion is proposed by the Senator from Nebraska [Mr. NORRIS] in these words:

> That David S. Barry be, and he is hereby, removed from the office of Sergeant at Arms of the Senate.

The question is on agreeing to the amendment in the nature of a substitute.

Mr. COPELAND obtained the floor.

SEVERAL SENATORS. Vote! Vote!

Mr. COPELAND. Mr. President, no man knows how physical disabilities might serve temporarily to warp the judgment of any individual. Who is there here who knows what caused Mr. Barry to use the particular language in question? Apparently he does not know now what language he did use. The fundamental reason for the act might be something entirely different from the more obvious one.

I want to ask in all fairness, Mr. President, what would be gained by speedy action? We are not dealing with a mad dog. Here is a human being who has made a mistake. I am confident that he has made a mistake. That must be admitted.

But there was sprung upon him without warning of any sort a serious accusation. What one of us would have made a better case under similar circumstances? It will not hurt us to adopt the alternative motion and take time to inquire into all the facts. This will involve our considering the physical basis for opinions that the man might hold and utter under these circumstances.

That is the American ideal of justice, and it will reflect greater credit, in my judgment, upon the Senate if it takes that considered action.

Mr. NORRIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Nebraska?

Mr. COPELAND. That is all I have to say, Mr. President; but I am glad to yield to the Senator from Nebraska, or to yield the floor to him.

Mr. NORRIS. I want to ask the Senator if it is his opinion that we ought to delay to take evidence as to the physical ability or disability of the Sergeant at Arms?

Mr. COPELAND. I hinted at that.

Mr. NORRIS. Does the Senator mean——

Mr. COPELAND. I do not care to debate it. Every man here knows exactly what I have in mind. Before I made this statement I talked with our colleague, the Senator from West Virginia [Mr. HATFIELD], who takes exactly the view that I do, that, under all the circumstances, we ought to be more considerate in dealings with this matter and not take too hasty action.

Mr. NORRIS. As I understand it, then, in reality the Senator is interposing a defense of insanity here. If that is the case, and we assume it to be true, is not that sufficient justification for action and to have him removed from office? We do not want an insane man for Sergeant at Arms.

SEVERAL SENATORS. Vote! Vote!

The PRESIDENT pro tempore. The question is on the amendment in the nature of a substitute proposed by the Senator from Nebraska. [Putting the question.] The noes seem to have it.

Mr. NORRIS. I demand the yeas and nays.

The yeas and nays were ordered.

Mr. BINGHAM. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. BINGHAM. It has been suggested to me that, in view of the fact that this is in the nature of impeachment proceedings, pairs do not hold, as they do not hold in an impeachment proceeding. I rise to ask the Chair whether that is the custom of the Senate or not.

The PRESIDENT pro tempore. The form in which the matter comes before the Senate at this minute is in the nature of a simple motion. Therefore, a majority is sufficient to carry the affirmative. Under these circumstances the Chair would think that pairs were valid. The yeas and nays having been ordered, the clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. ROBINSON of Indiana (when his name was called). Again announcing my general pair with the junior Senator from Mississippi [Mr. STEPHENS] and not knowing how he would vote and being unable to obtain a transfer of my pair, I withhold my vote. If permitted to vote I would vote "nay."

Mr. SHORTRIDGE (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. NEELY]. Not knowing his view on this question I must of course withhold my vote. If permitted to vote I would vote "nay."

Mr. THOMAS of Idaho (when his name was called). I have a general pair with the junior Senator from Montana [Mr. WHEELER]. Not knowing how he would vote I withhold my vote. If permitted to vote I would vote "nay."

Mr. WAGNER (when his name was called). I have a general pair with the junior Senator from Missouri [Mr. PATTERSON] who is absent on account of a death in his family. I am not informed how he would vote. Therefore I withhold my vote.

Mr. WALSH of Massachusetts (when his name was called). A short time ago the senior Senator from Wisconsin [Mr. LA FOLLETTE] left the Chamber to be absent some time. He asked me to pair with him on the Johnson amendment. After conferring with his colleague, the junior Senator from Wisconsin [Mr. BLAINE] I am of the opinion that perhaps he expected me to pair with him during the entire time of his absence. Therefore I announce my general pair with the senior Senator from Wisconsin [Mr. LA FOLLETTE] and, not knowing how he would vote, I withhold my vote.

The roll call was concluded.

Mr. DAVIS (after having voted in the negative). I have a general pair with the junior Senator from Kentucky [Mr. LOGAN]. Not knowing how he would vote I withdraw my vote.

Mr. HEBERT. I have a general pair with the senior Senator from North Carolina [Mr. BAILEY]. Not knowing how he would vote, I withhold my vote. If permitted to vote, I should vote "nay."

Mr. BRATTON (after having voted in the affirmative). I have a general pair with the junior Senator from Nebraska [Mr. HOWELL]. I transfer that pair to the senior Senator from Mississippi [Mr. HARRISON] and let my vote stand.

Mr. WALSH of Massachusetts. After further conference with the colleague of the senior Senator from Wisconsin [Mr. LA FOLLETTE] I feel free to withdraw the announcement of my pair and vote. I vote "yea."

Mr. FESS. I desire to announce the following general pairs:

The Senator from Wyoming [Mr. CAREY] with the Senator from Louisiana [Mr. LONG];

The Senator from New Mexico [Mr. CUTTING] with the Senator from Arkansas [Mrs. CARAWAY]; and

The Senator from Illinois [Mr. GLENN] with the Senator from Virginia [Mr. SWANSON].

The result was announced—yeas 31, nays 40—as follows:

YEAS—31

Bankhead	Clark	Kendrick	Russell
Barkley	Connally	McGill	Sheppard
Black	Coolidge	McKellar	Smith
Bratton	Dill	Norris	Thomas, Okla.
Brookhart	Fletcher	Nye	Trammell
Bulkley	George	Pittman	Walsh, Mass.
Bulow	Gore	Reynolds	Walsh, Mont.
Byrnes	Hull	Robinson, Ark.	

NAYS—40

Ashurst	Fess	Kean	Schuyler
Austin	Frazier	Keyes	Shipstead
Barbour	Glass	Lewis	Smoot
Bingham	Goldsborough	McNary	Steiwer
Blaine	Grammer	Metcalf	Townsend
Capper	Hale	Moses	Tydings
Copeland	Hastings	Norbeck	Vandenberg
Couzens	Hatfield	Oddie	Walcott
Dale	Hayden	Reed	Watson
Dickinson	Johnson	Schall	White

NOT VOTING—25

Bailey	Davis	Logan	Swanson
Borah	Glenn	Long	Thomas, Idaho
Broussard	Harrison	Neely	Wagner
Caraway	Hebert	Patterson	Wheeler
Carey	Howell	Robinson, Ind.	
Costigan	King	Shortridge	
Cutting	La Follette	Stephens	

So Mr. NORRIS's substitute was rejected.

The PRESIDENT pro tempore. The question recurs to the motion made by the Senator from Pennsylvania [Mr. REED].

Mr. ROBINSON of Arkansas. Let the motion be stated.

The PRESIDENT pro tempore. The motion is that the Sergeant at Arms be suspended from office until further action of the Senate and that at 4 o'clock p. m., on February 10, the Senate proceed to the final disposition of the matter.

Mr. NORRIS. I move to amend by striking out "February 10" and inserting "next Monday."

Mr. WATSON. That would be February 6?

Mr. REED. I am satisfied to accept that modification.

The PRESIDENT pro tempore. If the Senator from Arizona will permit the Chair to make another observation——

Mr. ASHURST. Mr. President, a point of order! The Senator from Arizona was sitting in his seat in a respectful manner. With all respect to the Chair I do not know why I should be singled out in this way. I am not interrupting the Chair. The Chair interrupts himself enough without an interruption from me.

Mr. NORRIS. Mr. President, I want to change the date. I understand that next Monday is the day fixed for the Coolidge eulogies. I would suggest that it be made Tuesday instead of Monday.

Mr. WATSON. That will be February 7. I am wondering whether the Senator will not be willing further to modify his motion so as to provide that in the meantime the Committee on the Judiciary shall take charge of the case, or that it shall be referred to the Committee on the Judiciary. Otherwise we leave the matter up in the air.

Mr. REED. Mr. President, I am perfectly willing to modify my motion to provide that until the time set for action by the Senate the matter shall be referred to the Committee on the Judiciary.

Mr. WATSON. I thank the Senator.

Mr. BINGHAM. Mr. President, may I suggest to the Senator from Pennsylvania that the Judiciary Committee be directed to report to the Senate not later than noon of Tuesday?

Mr. REED. That would follow necessarily.

Mr. WALSH of Montana. Mr. President, in view of the action apparently contemplated by the Senate, I submit the following resolution:

(S. Res. 345)

Resolved, That the proceedings of the Senate this day had in the matter of the Sergeant at Arms be certified to the district attorney of the District of Columbia with a view to prosecution under section 38 of title 6 of the Code of the District of Columbia, as follows: "Whoever publishes a libel shall be punished by a fine not exceeding $1,000 or imprisonment for a term not exceeding five years, or both." And also to the district attorney for the southern district of New York for appropriate action by him.

The PRESIDENT pro tempore. Will the Senator withhold that until the Senate has acted on the motion of the Senator from Pennsylvania?

Mr. WALSH of Montana. I am going to ask that the resolution be referred to the Committee on the Judiciary.

Mr. LEWIS. Mr. President, first may I be permitted to say that I am not quite sure of whether my position is parliamentarily correct, but I wish to add an amendment to the amendment tendered by the Senator from Indiana [Mr. WATSON].

The PRESIDENT pro tempore. There is no amendment of that sort. The Chair understands the Senator from Pennsylvania to have accepted the suggestion of the Senator from Indiana.

Mr. LEWIS. If the matter is sent to the Judiciary Committee, I should like to suggest a modification to provide some form of representation, of counsel, for Mr. Barry.

Mr. REED. I do not want to accept that, Mr. President.

Mr. BLAINE. Mr. President, I rise to inquire what the Senator from Pennsylvania expects the Committee on the Judiciary to do within the short time given to the committee?

Mr. WATSON. That is up to the committee.

Mr. BLAINE. It is not up to the committee. There will be no opportunity——

The PRESIDENT pro tempore. What is the inquiry made by the Senator from Wisconsin?

Mr. BLAINE. The inquiry has been made and answered but the answer is unsatisfactory. This matter will simply repose in the archives of the Judiciary Committee without any opportunity on the part of that committee to subpœna witnesses.

Mr. President, I think that the Senate in this matter ought to postpone the report of the Judiciary Committee until there is an opportunity for that committee to issue subpœnas, not only to the publishers but to the editor of the magazine containing the article and to other witnesses who the committee may eventually determine to be material witnesses. So far as I am concerned, it appears to me that the Senate ought to go into this matter thoroughly and ascertain whether any of its Members are guilty of receiving bribes. The issue, in my opinion, is raised above the mere matter of whether or not the Sergeant at Arms shall be removed or punished for contempt. The issue is far more important than that. Simply to let this matter rest with the committee, with no opportunity to make any examination, seems to me to be a procedure that could not be better designed that the facts shall not be made known as they ought to be made known. Therefore I move, as an amendment, to the original proposition to insert "Friday" instead of "Tuesday," giving the Judiciary Committee an opportunity to make some kind of an investigation.

The PRESIDENT pro tempore. Let the Chair understand definitely the formal words in which the Senator from Wisconsin makes his motion. As the Chair now understands, the Senator from Wisconsin wishes to have the date February 10 retained in the motion of the Senator from Pennsylvania, with the purpose of permitting the Judiciary Committee, under the amendment suggested by the Senator from Indiana and agreed to by the Senator from Pennsylvania, to take evidence and be ready to render judgment in the matter. Is that the purpose of the Senator from Wisconsin? Otherwise the Chair will have to insist that the Senator reduce his amendment to writing.

Mr. BLAINE. The purpose, so far as I am concerned, is to give ample time within which the Judiciary Committee may make the investigation of this whole matter, not only as it relates to the Sergeant at Arms but as well to other questions that are involved——

Mr. GEORGE. The committee might report to the next Congress; that would be a good time.

Mr. BLAINE. But obviously that is impossible to do by next Tuesday.

Mr. REED. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. REED. As I understand my own motion, it provides for action on next Tuesday, the 7th of February.

The PRESIDENT pro tempore. That is correct.

Mr. REED. The Senator from Wisconsin moves to amend that to make the date the 10th. That is a simple motion and can we not have a vote on it?

The PRESIDENT pro tempore. The Chair understands the question before the Senate to be this: The Senator from Pennsylvania has moved that the Sergeant at Arms be suspended from office until further action of the Senate and that at 4 o'clock on Tuesday, February 7, the Senate proceed to the final disposition of the matter, in the meantime the whole subject to be referred to the Committee on the Judiciary.

Mr. WATSON. That is correct.

The PRESIDENT pro tempore. The Senator from Wisconsin moves to strike out "February 7" and insert "Friday, February 10." The question is on that motion.

Mr. GORE. Mr. President, I merely desire to suggest that the Committee on the Judiciary consider the advisability of recommending that on February 10 the Sergeant at Arms be decorated with a medal of honor, the croix de guerre, and be retired on full pay after March 4.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Wisconsin to the motion of the Senator from Pennsylvania.

The amendment was rejected.

The PRESIDENT pro tempore. The question recurs on the motion proposed by the Senator from Pennsylvania.

The motion was agreed to.

Mr. WALSH of Montana. I now ask that the resolution I sent to the desk may be referred to the Committee on the Judiciary.

The PRESIDENT pro tempore. Without objection, the resolution, Senate Resolution 345, will be received and referred to the Committee on the Judiciary.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

The PRESIDENT pro tempore. The question now recurs on the amendment proposed by the Senator from Maryland [Mr. TYDINGS] to the amendment of the Senator from California [Mr. JOHNSON].

Mr. ODDIE. Mr. President, last night I made the statement to the Senate that I would request the Senate to remain in session to-night in order, if possible, to complete this bill. The time is so short before the closing of the present session of the Congress that it is necessary to make all possible haste, and I now request the Senate to remain in session to-night and continue the consideration of this bill.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Maryland [Mr. TYDINGS] to the amendment of the Senator from California [Mr. JOHNSON].

Mr. TYDINGS. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Couzens	Kean	Sheppard
Austin	Dale	Keyes	Shipstead
Bankhead	Davis	Lewis	Shortridge
Barbour	Dickinson	McGill	Smith
Barkley	Dill	McKellar	Steiwer
Bingham.	Fess	McNary	Thomas, Idaho
Black	Fletcher	Metcalf	Thomas, Okla.
Blaine	Frazier	Moses	Townsend
Bratton	George	Nye	Trammell
Bulkley	Goldsborough	Oddie	Tydings
Bulow	Gore	Pittman	Vandenberg
Byrnes	Grammer	Reed	Wagner
Capper	Hale	Reynolds	Walsh, Mass.
Clark	Hastings	Robinson, Ark.	Walsh, Mont.
Connally	Hatfield	Robinson, Ind.	Watson
Coolidge	Hayden	Russell	White
Copeland	Hebert	Schall	
Costigan	Johnson	Schuyler	

The PRESIDING OFFICER (Mr. FESS in the chair). Seventy Senators having answered to their names, a quorum is present.

Mr. TYDINGS. Mr. President, I ask to have the amendment read at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. At the end of the amendment of the Senator from California it is proposed to add the following:

That hereafter any appropriation of money for crop production of any crop whereof there is already an exportable surplus in the United States is hereby rescinded, and any such appropriation shall revert to the Treasury.

Mr. TYDINGS. Mr. President, the amendment explains itself. All it provides is that where we have appropriated money for crop production and where we already have an exportable surplus of that crop, those sums shall revert to the Treasury.

Mr. REED. Mr. President, will the Senator permit a question?

Mr. TYDINGS. Yes.

Mr. REED. Why does the Senator advance that as an amendment to the pending amendment of the Senator from California?

Mr. TYDINGS. Only in the interest of economy, because I am forced to get at it in this way.

Mr. REED. I do not think so. Oh, I see! The Senator does not think he can get the votes to suspend the rules for the purpose of offering it?

Mr. TYDINGS. I can not get it on an appropriation bill, and I am afraid I can not get the appropriation reduced except in this way.

Mr. REED. I think a great many of us feel as I do, that as an independent proposition I would vote for the amendment of the Senator from Maryland; but I will vote against it now, because I think it jeopardizes the success of a very valuable amendment now pending.

Mr. TYDINGS. I do not think it does, may I say to the Senator from Pennsylvania. In this appropriation bill there is a long section devoted to legislation, and I have simply offered this amendment in that particular category.

I want to point out to the Senator from Pennsylvania, and I know that as a business man he will at least agree with this logic, that where we have an exportable surplus now that we can not sell we are only compounding our difficulty when we appropriate money for crops to add to that surplus. It seems to me to be so ridiculous as a matter of congressional policy that we ought not to waste this money.

There is practically nobody in my State that I know of who has protested against it. These agents are out in every agricultural county in every State in the Union. But what is the use of appropriating money to produce a crop when we are already carrying over a year's world supply of some crops next year? Is it not only going to add more to the surpluses which we can not move? Is it not only going to depreciate the price still further? Is it not only making a burden upon the taxpayers that they will have to pay in the future? When we need to save money, why should we appropriate money to produce a crop of which we already have so much that we can not sell it?

Mr. DILL and Mr. VANDENBERG addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Washington?

Mr. TYDINGS. Yes; I yield.

Mr. DILL. Mr. President, will the Senator name some crop that we can produce on loans of which we do not have a surplus?

Mr. TYDINGS. I do not attempt to say what they are; but I stick to the basic proposition that wherever we have a crop for which there is no demand whatever, of which there is an overwhelming supply, we ought not to appropriate the people's money to produce more of something that we can not sell now.

Mr. DILL. I want to remind the Senator that there is a surplus to-day of all the basic crops that we produce in this country.

Mr. TYDINGS. An exportable surplus?

Mr. DILL. An exportable surplus. We can not export it, because nobody will buy it all.

Mr. TYDINGS. There are many crops that we raise in America that we do not export.

Mr. DILL. Will the Senator name some of them?

Mr. TYDINGS. Turnips, radishes, tomatoes, sugar corn.

Mr. DILL. I doubt that. We do export them to Canada.

Mr. TYDINGS. Oh, no—very little, at any rate.

Mr. DILL. Oh, yes, we do!

Mr. TYDINGS. But that would not be called an export in this general category.

Mr. DILL. There are no exceptions made here. The Senator is going to shut out every wheat farmer, every cotton farmer, every corn farmer in America.

Mr. TYDINGS. That is right.

Mr. DILL. And they have to live.

Mr. TYDINGS. What will we do, may I point out to my friend from Washington, if we do not shut them out? We will add to an already staggering surplus, and take dollars and cents—because we will have increased the supply without increasing the demand—from every other farmer who now is struggling to pay his interest.

Mr. DILL. Let me ask the Senator a question.

Mr. TYDINGS. I yield.

Mr. DILL. Does the Senator think it is proper that there shall be no loans to men on the farms who want to produce enough corn and enough wheat to feed the stock that is necessary to be kept on the farm for purposes of farming?

Mr. TYDINGS. Why, yes, Mr. President. I mean to say, generally speaking, that the problem of America to-day is, What is it going to do with its huge surpluses which it can not handle, and which have glutted the business market? That is all.

Mr. DILL. The trouble with the Senator is that the language of his amendment would prohibit any loans to the people who are trying to live for the purpose of maintaining

their livestock and their dairy cattle and their chickens on which they are able to survive. The Senator will not allow them to be loaned a single dollar to produce the grain needed to feed them.

Mr. TYDINGS. And what will be the result if we do lend them the money?

Mr. DILL. They will be able to live, at least.

Mr. TYDINGS. We have here in America a world's supply of cotton for next year, carried over from 1932 to 1933, enough to supply all the world with cotton, and still we are appropriating money to produce more cotton. There is absolutely no law of economics or common sense, in my humble judgment, which will justify that.

Mr. FRAZIER and Mr. SMITH addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Maryland yield; and if so, to whom?

Mr. TYDINGS. I yield first to the Senator from North Dakota.

Mr. FRAZIER. Mr. President, I want to ask the Senator from Maryland if he does not think there are cases where drought has stricken a part of the country, or where storms have wiped out the crops that were to have been used for feed, where we are justified in loaning the farmers in those communities enough at least to take care of their livestock and to live upon for another year?

Mr. TYDINGS. If that is the case, let the people borrow from the Reconstruction Finance Corporation, and let the State lend to those farmers sufficient money to carry them through, which sums of money are already provided. That is what we do for the man in the city. We lend to the State or the city a sum of money, and the State maintains him with the funds borrowed from the Federal Government until such time as he can get a job.

What I am complaining about is compounding the very difficulty from which we are attempting to escape. We all stand up here and say, "What is going to become of the farmer with all of this surplus which he can not sell?" What is going to become of him, I ask, if to that surplus we add another tremendous surplus for which there is no market?

Mr. SMITH. Mr. President——

Mr. TYDINGS. I yield to the Senator from South Carolina.

Mr. SMITH. I think the Senator feels as the rest of us do. If we are going to start embargoes and stop exportation, why produce anything here for export?

Mr. TYDINGS. The Senator is right.

Mr. SMITH. In this case, however, we are appropriating millions of dollars for the unemployed. We already have a surplus of labor, known as the unemployed. They must be fed and taken care of. The question is whether it is better to take care of these men on the farms, even though they do produce a modicum that might be added to their exportable surplus——

Mr. TYDINGS. Mr. President, I am going to remind my good friend from South Carolina that he is speaking in my time, which is limited, and I have already given him three minutes.

Mr. SMITH. All right; I will finish in my own time.

Mr. TYDINGS. Mr. President, I have a lot more to say; but I will not say it if those who are assembled here will give me the privilege of having a roll-call vote on this matter. May I ask my fellow Senators if they will order the yeas and nays?

Mr. President, I ask for the yeas and nays. May I get enough hands to get a roll call?

Mr. BINGHAM. Mr. President——

Mr. TYDINGS. A sufficient number, Mr. President.

Mr. BINGHAM. A point of order, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. TYDINGS. I have the floor, Mr. President.

Mr. BINGHAM. I make a point of order.

The PRESIDING OFFICER. Any Senator may take the floor to make a point of order.

Mr. BINGHAM. I make the point of order that the amendment suggested by the Senator from Maryland is out of order, since no amendment not germane or relevant to the subject matter contained in the bill can be received. By vote of the Senate we have permitted the Senator from California [Mr. JOHNSON] to offer to the subject matter of the bill new legislation; but the amendment suggested by the Senator from Maryland is not relevant or germane to the subject matter covered by that vote.

Mr. TYDINGS. If the Senator will permit an interruption, I am not offering this amendment to the bill. I am offering this amendment to the amendment for which the rules have been suspended; and the Senator's premise is not well taken.

The PRESIDING OFFICER. The Chair would be glad to hear Senators on the point of order.

Mr. BINGHAM. Mr. President, while the statement made by the Senator from Maryland, of course, is correct, actually it is to the bill that the Senator proposes the amendment.

The amendment offered by the Senator from California [Mr. JOHNSON] was out of order until made in order by a two-thirds vote of this body. It then became in order on the bill. I now make the point of order that an amendment not germane or relevant to this matter which has been made in order by a vote of the Senate can not be offered, and therefore that the amendment offered by the Senator from Maryland is out of order.

Mr. TYDINGS. Mr. President, that is an absolutely untenable and ridiculous premise. The rules were suspended for the purpose of offering the amendment offered by the Senator from California [Mr. JOHNSON]. I am permitted under the rules to amend that amendment in any way I see fit. The question of germaneness does not enter into amendments to the amendment. When the rules were suspended they were suspended for that amendment in such form as it should finally be adopted by the Senate; and I submit, without further argument, that the point of order is not well taken.

Mr. BINGHAM. Mr. President, if the Senator's position is correct, then when once the rules are suspended to permit an amendment for new legislation on an appropriation bill, the entire civil and criminal code could be added as an amendment to it. Any legislation could be proposed. Obviously, that is a ridiculous position to take.

When the Senate moved to suspend the rules and permit the amendment of the Senator from California [Mr. JOHNSON] to be offered, it knew exactly what the amendment was that would be offered, because that is required under the rule. It is required that that be stated. It is not a general permission to introduce any subject in connection with the amendment offered.

Mr. TYDINGS. Mr. President, I submit that when Senators voted to suspend the rules they had no more knowledge of what the final shape of this amendment would be than I have of the constitution of Siam. When they moved to suspend the rules, they took the responsibility of permitting any Senator on this floor to offer any amendment he saw fit to that proposition. Inasmuch as my proposition deals indirectly with the same subject matter—namely, exportable surpluses—which the Senator in the opposite view sought to cover by a provision permitting only the sale of American goods, which was in the general philosophy of tariffs or embargoes, my proposition is not only germane, but, even if it were not germane, it would still be in order.

The PRESIDING OFFICER (Mr. FESS in the chair). The Chair is ready to rule.

The contention is made by the Senator from Maryland that when the matter that is submitted, which ordinarily would be out of order, is made in order through suspension of the rules, that amendment is subject to amendment. The amendment to it, however, must be germane and relevant to the subject matter.

Mr. TYDINGS. If the Chair will permit me to interrupt him—and I do not want to interrupt him—may I say that the whole philosophy of the amendment offered by the Senator from California was one dealing with tariff matters. It was to prevent only the purchase of goods which in part, or in some cases altogether, originated in America. I am dealing with the same subject in reverse English, to say it

in a couple of words. I am asking, therefore, in view of the policy which we have adopted, that we make our policy consistent; namely, if we are not to purchase from abroad, that we do not appropriate money to sell abroad.

I submit to the Chair that the subject matter comes under the same general heading and is germane.

The PRESIDING OFFICER. The Chair is of the opinion that the amendment offered by the Senator from California has no significance in the matter of production in the way of surplus. The Senator's amendment is dealing with surplus, and the Chair is of the opinion that it is not relevant. The Chair, therefore, sustains the point of order.

Mr. TYDINGS. Then, Mr. President, in view of the Chair's ruling I move the suspension of the rules, and ask for the yeas and nays, if my colleagues will give me that vote.

Mr. BINGHAM. Mr. President, a point of order. That motion may not be made, except by giving notice one day in advance.

Mr. TYDINGS. If the Senator wants to fall back on the rule book and wants to prevent himself from voting on this matter, of course, I shall have to abide by it.

Mr. BINGHAM. The Senator from Connecticut only desires to shut off debate and get some action on the bill.

Mr. TYDINGS. That is all I want. I renew my motion.

The PRESIDING OFFICER. Let the Chair make a statement to the Senator from Maryland. While the Chair proceeded to sustain the point of order on the question of relevancy, the question of relevancy must always be submitted to the Senate. Therefore the Chair will submit to the Senate the question that the Senator has submitted.

Mr. TYDINGS. May I have the yeas and nays on that, Mr. President?

The PRESIDING OFFICER. Is there a second to the request for the yeas and nays?

Mr. WALSH of Massachusetts. Let us have a quorum call.

Mr. TYDINGS. I suggest the absence of a quorum.

Mr. BINGHAM. I make the point of order that since the last quorum call no business has been transacted.

The PRESIDING OFFICER. A point of order has been raised and a decision has been given on it, and that is business.

The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Costigan	Kean	Schuyler
Austin	Dale	Keyes	Sheppard
Bankhead	Davis	McGill	Shipstead
Barbour	Dickinson	McKellar	Smith
Barkley	Dill	McNary	Steiwer
Bingham	Fess	Metcalf	Thomas, Idaho
Black	Fletcher	Moses	Thomas, Okla.
Blaine	Frazier	Norbeck	Townsend
Bratton	George	Nye	Trammell
Bulkley	Gore	Oddie	Tydings
Bulow	Grammer	Pittman	Vandenberg
Byrnes	Hale	Reed	Wagner
Capper	Hastings	Reynolds	Walsh, Mass.
Clark	Hatfield	Robinson, Ark.	Watson
Connally	Hayden	Russell	White
Copeland	Johnson	Schall	

The PRESIDING OFFICER. Sixty-three Senators having answered to their names, there is a quorum present.

The question is on the amendment of the Senator from Maryland to the amendment of the Senator from California.

Mr. TYDINGS. I ask for the yeas and nays.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. The Senator from Maryland offers the following amendment: To add a new section in the proper place, reading as follows:

> That hereafter any appropriation of money for crop production of any crops whereof there is already an exportable surplus in the United States is hereby rescinded and any such appropriation shall revert to the Treasury.

The PRESIDING OFFICER. The Senator from Connecticut [Mr. BINGHAM] has made a point of order on this amendment on the ground that it was not relevant. That question must be submitted to the Senate without debate. The question now is as to whether the amendment is relevant or not.

Mr. TYDINGS. I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. BRATTON (when his name was called). I have a general pair with the junior Senator from Nebraska [Mr. HOWELL]. In his absence I withhold my vote, but if free to vote I should vote "nay."

Mr. DAVIS (when his name was called). I have a general pair with the junior Senator from Kentucky [Mr. LOGAN], which I transfer to the junior Senator from Maryland [Mr. GOLDSBOROUGH], and vote "nay."

Mr. HEBERT (when his name was called). Again announcing my pair with the senior Senator from North Carolina [Mr. BAILEY], I withhold my vote.

Mr. MCNARY (when his name was called). On this vote I have a pair with the senior Senator from Mississippi [Mr. HARRISON]. I transfer that pair to the senior Senator from Michigan [Mr. COUZENS] and vote "nay."

Mr. THOMAS of Idaho (when his name was called). I have a pair with the junior Senator from Montana [Mr. WHEELER], who is absent. I do not know how that Senator would vote, and therefore I withhold my vote. If permitted to vote, I would vote "nay."

Mr. WALSH of Massachusetts (when his name was called). On this motion I am paired with the Senator from Wisconsin [Mr. LA FOLLETTE]. Not knowing how he would vote if present, I withhold my vote.

The roll call was concluded.

Mr. WAGNER (after having voted in the negative). I have a pair with the junior Senator from Missouri [Mr. PATTERSON], but I am informed that if present he would vote as I have voted, and therefore I permit my vote to stand.

Mr. BINGHAM (after having voted in the negative). I have a general pair with the junior Senator from Virginia [Mr. GLASS]. In his absence I transfer that pair to my colleague the junior Senator from Connecticut [Mr. WALCOTT] and allow my vote to stand.

Mr. SHIPSTEAD. On this vote I am paired with the junior Senator from Arkansas [Mrs. CARAWAY]. I am informed that if present and voting the Senator from Arkansas would vote as I shall vote, so I am at liberty to vote, and I vote "nay."

Mr. CONNALLY (after having voted in the negative). A parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. CONNALLY. The question is as to the relevancy of the amendment?

The PRESIDENT pro tempore. The question is as to the germaneness of the amendment proposed by the Senator from Maryland [Mr. TYDINGS].

Mr. CONNALLY. A vote in the negative would mean that the Senator so voting was of opinion it is not germane?

The PRESIDENT pro tempore. That is correct.

Mr. CONNALLY. I allow my vote to stand.

Mr. COSTIGAN. The Senator from West Virginia [Mr. NEELY] is unavoidably absent. I am instructed to say that if present he would vote "nay."

Mr. GORE. The senior Senator from Iowa [Mr. BROOKHART] is absent on account of illness. He requested me to pair with him on the main question involved in this amendment. I do not feel at liberty to vote on the present question. If I were at liberty to vote, I would vote "yea."

Mr. FESS. I desire to announce the following general pairs:

The Senator from Wyoming [Mr. CAREY] with the Senator from Louisiana [Mr. LONG];

The Senator from Illinois [Mr. GLENN] with the Senator from Virginia [Mr. SWANSON];

The Senator from Wisconsin [Mr. LA FOLLETTE] with the Senator from Massachusetts [Mr. WALSH];

The Senator from California [Mr. SHORTRIDGE] with the Senator from West Virginia [Mr. NEELY]; and

The Senator from Indiana [Mr. ROBINSON] with the Senator from Mississippi [Mr. STEPHENS].

The result was announced—yeas 2, nays 54, as follows:

YEAS—2

	Bulkley	Tydings	

NAYS—54

Ashurst	Davis	McGill	Schuyler
Austin	Dickinson	McKellar	Sheppard
Bankhead	Dill	McNary	Shipstead
Barbour	Fess	Metcalf	Smith
Barkley	Fletcher	Moses	Steiwer
Bingham	Frazier	Norbeck	Thomas, Okla.
Black	Grammer	Nye	Townsend
Bulow	Hale	Oddie	Trammell
Capper	Hastings	Pittman	Vandenberg
Clark	Hatfield	Reed	Wagner
Connally	Hayden	Reynolds	Watson
Copeland	Johnson	Robinson, Ark.	White
Costigan	Kean	Russell	
Dale	Keyes	Schall	

NOT VOTING—40

Bailey	Couzens	Hull	Robinson, Ind.
Blaine	Cutting	Kendrick	Shortridge
Borah	George	King	Smoot
Bratton	Glass	La Follette	Stephens
Brookhart	Glenn	Lewis	Swanson
Broussard	Goldsborough	Logan	Thomas, Idaho
Byrnes	Gore	Long	Walcott
Caraway	Harrison	Neely	Walsh, Mass.
Carey	Hebert	Norris	Walsh, Mont.
Coolidge	Howell	Patterson	Wheeler

So the amendment of Mr. TYDINGS to the amendment was declared not to be germane.

Mr. TYDINGS submitted the following notice of a motion to suspend the rules, which was read:

Pursuant to the provisions of Rule XL of the Standing Rules of the Senate, I hereby give notice in writing that I shall hereafter move to suspend paragraph 4 of Rule XVI, for the purpose of proposing to the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes, the following amendment, viz, at the proper place in the bill insert the following:

"SEC. —. That hereafter any appropriation of money for crop production of any crop whereof there is already an exportable surplus in the United States is hereby rescinded, and any such appropriation shall revert to the Treasury."

Mr. COPELAND. Mr. President, is it in order to offer an amendment to the pending amendment?

The PRESIDENT pro tempore. It is.

Mr. COPELAND. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. It will be stated for the information of the Senate.

The CHIEF CLERK. On page 2, line 15, after the word "States," strike out "or to be used for experimental or scientific purposes."

Mr. JOHNSON. Mr. President, that has already been adopted.

Mr. BINGHAM. Mr. President, in connection with the amendment just offered by the Senator from New York, and which was offered last night by his colleague [Mr. WAGNER], may I have the attention of his colleague?

The PRESIDENT pro tempore. The attention of the junior Senator from New York is requested.

Mr. BINGHAM. I appreciate the intention of the Senator; but may I say to him that I believe that the inclusion of the word "experimental" will be extremely detrimental to the progress of aeronautical science in the United States unless the Secretary of War or Secretary of Commerce or Secretary of the Navy, as the case might be, were to make a certificate of the absolute necessity in the public interest of breaking the effect of the law.

We occasionally purchase one of the best foreign airplanes for Government experimental use. It is flown by our best pilots, who report on it. It is later broken up and reduced to its component parts and a complete study made of the methods by which it has been constructed. Surely the Senator would not interfere with material being brought in for experimental purposes of that nature? If the Senator will permit the word "experimental" to go out and merely confine it to scientific purposes, I think he will reach the object which he has in view, which is to encourage the Government to buy its scientific instruments of American manufacturers. I hope the Senator will not insist upon the word "experimental," because that would prevent our bringing in for the Government any new foreign articles with which we desire to experiment and see how they were made and possibly to improve upon them or make some like them.

The PRESIDENT pro tempore. Inasmuch as the amendment offered by the Senator from New York was accepted by the Senator from California, it is the privilege of the Senator from California to modify his amendment as he may wish.

Mr. BINGHAM. I understood that as fully and perfectly as does the present occupant of the chair, but I prefer that the Senator from New York would ask the Senator from California to modify the amendment which he offered yesterday, after the explanation which I have made. I do not like to ask the Senator from California to change it, since it originated with the junior Senator from New York.

Mr. WAGNER. Mr. President, my view is that the amendment which was offered by me would not prevent the importation of such a product as the airplane which the Senator mentioned, because there are safeguards in the Johnson amendment as to the question of quality and the question of the amount produced in this country. If the department should determine that the particular product is of superior quality to anything we have here, as they must decide under the suggestions made by the Senator from Connecticut, then the amendment would not interfere with its importation.

Mr. BINGHAM. The department does not know that it is superior. It hopes the American airplanes are superior, but it learns that a new ariplane has been constructed and manufactured for a foreign government. It wishes to experiment and see whether the information obtained can be used and improved upon by our manufacturers.

Mr. WAGNER. Then it is something that is not produced in this country.

Mr. BINGHAM. Oh, no. The airplanes are produced in this country. I asked the Comptroller General this morning whether, in view of the fact that on the floor of the Senate the words "for experimental and scientific purposes" were stricken out, he would be able to permit a voucher to be paid for an experimental airplane, and he said he would not be able to do so, in view of the action of the Senate, unless the Secretary who introduces it chose to make a certificate that it was not in the public interest to keep the airplane out.

Mr. WAGNER. Of course, I do not care to interfere with any such enterprise as the Senator mentions. If the amendment is not to be acted upon to-night, may I have an opportunity at least to reflect overnight on the suggestion made by the Senator from Connecticut. Then I am quite willing to confer with the author of the original amendment and discuss the matter with the Senator from Connecticut.

Mr. BINGHAM. Very well.

Mr. COPELAND. Mr. President, I offer the following amendment.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 4, after line 6, after the period, insert the following:

Nothing in this act shall apply to articles, materials, or supplies of stock in the United States on the effective date of this act or in transit from outside of the United States on such date or contracted for prior to such date.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from New York.

Mr. COPELAND. Before I say something about the amendment, let me say that I was not aware that my colleague had introduced the amendment about scientific apparatus. I attempted a few moments ago to introduce the identical amendment and found it had been adopted last night. If the Senator from Connecticut is correct, there should be some language inserted in the bill so there will be no doubt, as in a case such as the Senator has suggested it would be all right for the head of a department to order the mate-

rial from abroad. That is what the language says. I am amazed that the officers in the departments say we could not buy such equipment as the Senator suggests. My suggestion to the Senator is that such language ought to be modified in some way so that such apparatus could be purchased for experimental purposes.

Mr. BINGHAM. Mr. President, will the Senator permit a question?

Mr. COPELAND. Certainly.

Mr. BINGHAM. What object is there in preventing the introduction of articles to be bought by the Government for experimental purposes? I can see perfectly well the object of the Senator in preventing the Government from purchasing articles needed for use in laboratories or for scientific purposes which could perfectly well and should be bought in this country; but when an article is brought in for experimental purposes I can not see that we have anything to lose, but everything to gain.

Mr. COPELAND. Would the Senator consider that a galvanometer or some instrument to be used in a physiological or other laboratory for experimental purposes would be covered by the term "scientific instrument"?

Mr. BINGHAM. I should certainly suppose so.

Mr. COPELAND. I have no doubt the Senator from Connecticut and my colleague will work out some solution of the matter.

Mr. WAGNER. Mr. President, if my colleague will yield, I want to suggest that the Senator from Connecticut will be convinced——

Mr. COPELAND. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. COPELAND. Am I allowed to use my time in this way?

Mr. WAGNER. My colleague may have my time.

The PRESIDENT pro tempore. That may not be done. Senators may not yield their time to other Senators.

Mr. COPELAND. I have only a limited time, and hope my colleague will be brief.

Mr. WAGNER. Let me invite the attention of the Senator from Connecticut to this section. The only time this legislation applies is where the particular article in question is produced in the United States in commercial quantities and of a satisfactory quality.

Mr. BINGHAM. But airplanes are produced in the United States of commercial quantities and of satisfactory quality, and, therefore, no airplanes could be bought for experimental purposes under the terms of the bill, because the comptroller would say there are plenty of airplanes produced in the United States.

Mr. WAGNER. The Senator may be correct about it.

Mr. BINGHAM. The comptroller said the question having been brought up on the floor of the Senate and the Senate having stricken out those words, he would be obliged to interpret the matter more strictly than if no attention had been called to it and it had not been originally in the bill.

Mr. COPELAND. Now, Mr. President, I invite attention to the amendment which I have offered, which has to do with a case like this. A casement-window company in my State has on hand certain stocks of rolled steel which they use in the making of window frames. About 18 per cent of the total stock that this company has on hand was made in England. The concern in question does not dispute the wisdom of the measure and is in harmony with it, but would not wish to be precluded from the use of such articles as are actually now on hand.

Mr. JOHNSON. Mr. President, will the Senator yield?

Mr. COPELAND. Certainly.

Mr. JOHNSON. The difficulty with the Senator's amendment is solely that it will confuse, I fear. I would rather not adopt it. I can not in justice to those who have been working with me accept it, and he will have to put it to the Senate for determination.

Mr. COPELAND. I am very sorry. We are now imposing upon the manufacturers of this country a very rigid law which does not permit them to sell to the Government anything which is made abroad, or a substantial part of which is made abroad. There are thousands of concerns in America who have in stock now some material which came from abroad. It certainly would be unfair and unjust to them to make it impossible for them to use up such material as they have on hand.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield?

Mr. COPELAND. Certainly.

Mr. WALSH of Massachusetts. I presented a similar amendment to the Senator from California a week or 10 days ago, and I was unsuccessful in persuading him to accept it. I fear the Senator from New York will meet the same fate.

Mr. CONNALLY. Mr. President, I desire to inquire of the Senator from Nevada does he intend to go on to-night with the consideration of this bill?

Mr. ODDIE. Yes, Mr. President; I want to go on to-night. I gave notice of my intention last night and again, about two hours ago, I gave the same notice.

Mr. CONNALLY. For about how long does the Senator desire to continue the consideration of the bill?

Mr. WALSH of Massachusetts. Will not the Senator agree that the Senate shall take a recess after this amendment shall have been acted upon?

Mr. ODDIE. I should not like to do that, because there are many other important items in the bill that have not as yet been discussed.

Mr. WALSH of Massachusetts. May I inquire how long the Senator expects the Senate to continue in session?

Mr. ODDIE. Until about 10 o'clock, because there is so much important work yet to be done on this bill.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from New York [Mr. COPELAND] to the amendment.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question recurs upon the amendment proposed by the Senator from California, as modified.

Mr. BLAINE. Before the vote is taken I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Dickinson	McKellar	Shipstead
Bankhead	Dill	McNary	Smith
Barbour	Fess	Metcalf	Steiwer
Bingham	Fletcher	Moses	Thomas, Idaho
Black	Frazier	Norbeck	Thomas, Okla.
Blaine	George	Nye	Townsend
Bratton	Gore	Oddie	Trammell
Bulkley	Grammer	Pittman	Tydings
Bulow	Hale	Reed	Vandenberg
Byrnes	Hayden	Reynolds	Wagner
Capper	Hebert	Robinson, Ark.	Walsh, Mass.
Clark	Johnson	Robinson, Ind.	Watson
Connally	Kean	Russell	White
Copeland	Keyes	Schall	
Costigan	King	Schuyler	
Davis	McGill	Sheppard	

The PRESIDENT pro tempore. Sixty-one Senators having answered to their names, a quorum is present.

Mr. SHIPSTEAD. Mr. President, it is not my intention to delay the Senate in taking a vote on the pending amendment. I wish merely to take a few moments to explain why I shall vote against it.

Since I have been a Member of the Senate I have from time to time supported what I thought was a reasonable policy of protective tariff, but not prohibitive tariffs. There is something more involved now than the question of a general policy of protective tariff. The eminent Senator from California cited some of the legislation of the British Empire the other day, and the Senator from Massachusetts has given us some information concerning the difficulty experienced by American exporters into Canada. That information, in my opinion, only shows that other countries are getting to be as crazy as we ourselves are. It is only a phase of the world-wide battle of tariffs, embargoes, and currencies that has been going on since we passed the tariff

act of 1930; and this war of tariffs and currencies is as destructive of values and of social conditions as is armed warfare.

Because I want to protest against the policy that has been pursued here as well as in other countries of continued warfare on the field of economics, a warfare that is driving the commodity price level into a tail spin, gradually descending, choking off all commerce, making debts impossible of payment and spreading progressively more and more chaos throughout the world, I shall vote against this amendment. I shall enter my protest in that way against the continuation of the economic war that is now going on, ruining practically every country in the world.

The PRESIDING OFFICER (Mr. FESS in the chair). The question is on the amendment of the Senator from California [Mr. JOHNSON], as modified.

Mr. WALSH of Massachusetts. I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. BRATTON (when his name was called). I have a general pair with the junior Senator from Nebraska [Mr. HOWELL], who is absent on official business of the Senate. Not knowing how he would vote, I withhold my vote.

Mr. DAVIS (when his name was called). I have a general pair with the junior Senator from Kentucky [Mr. LOGAN]. I understand that if present he would vote on this question as I intend to vote. Therefore, I feel at liberty to vote, and vote "yea."

Mr. HEBERT (when his name was called). Again announcing my pair with the senior Senator from North Carolina [Mr. BAILEY], I withhold my vote. If permitted to vote, I should vote "yea."

Mr. MCNARY (when Mr. LA FOLLETTE'S name was called). The senior Senator from Wisconsin is unavoidably absent. If he were present he would vote "nay."

Mr. MCKELLAR (when his name was called). On this question I am paired with the senior Senator from Michigan [Mr. COUZENS]. If he were present he would vote "yea," and if I were at liberty to vote I should vote "nay."

Mr. ROBINSON of Indiana (when his name was called). I find that I can transfer my general pair with the junior Senator from Mississippi [Mr. STEPHENS] to the junior Senator from California [Mr. SHORTRIDGE]. I do so, and vote "yea."

Mr. SHIPSTEAD (when his name was called). On this question I am paired with the junior Senator from Arkansas [Mrs. CARAWAY]. I am informed that if she were present and voting, she would vote "yea." If I were at liberty to vote, I should vote "nay."

The PRESIDING OFFICER (when Mr. SWANSON'S name was called). The present occupant of the chair has been requested to announce that the senior Senator from Illinois [Mr. GLENN] has a general pair with the senior Senator from Virginia [Mr. SWANSON]. If the Senator from Illinois were present, he would vote "yea"; and if the Senator from Virginia were present, he would vote "nay."

Mr. THOMAS of Idaho (when his name was called). Again announcing my pair with the junior Senator from Montana [Mr. WHEELER], I withhold my vote. If at liberty to vote I should vote "yea."

The roll call was concluded.

Mr. BINGHAM. I have a general pair with the junior Senator from Virginia [Mr. GLASS], who is necessarily absent. I transfer that pair to my colleague, the junior Senator from Connecticut [Mr. WALCOTT] who, if present, would vote as I intend to vote. I vote "yea."

Mr. MCNARY. I have a pair with the senior Senator from Mississippi [Mr. HARRISON]. I transfer that pair to the junior Senator from Maryland [Mr. GOLDSBOROUGH], and will vote. I vote "yea."

Mr. DICKINSON. I have a general pair with the senior Senator from Kentucky [Mr. BARKLEY]. I transfer that pair to the Senator from Delaware [Mr. HASTINGS], and will vote. I vote "yea."

Mr. WALSH of Massachusetts. On this question I have a pair with the senior Senator from Wisconsin [Mr. LA FOLLETTE], who is necessarily absent. I transfer that pair to my colleague the junior Senator from Massachusetts [Mr. COOLIDGE]. If my colleague were present, he would vote "yea"; and if the Senator from Wisconsin were present, he would vote "nay." I vote "yea."

The PRESIDING OFFICER. The present occupant of the chair desires to announce the following general pairs:

The Senator from Wyoming [Mr. CAREY] with the Senator from Louisiana [Mr. LONG];

The Senator from Missouri [Mr. PATTERSON] with the Senator from New York [Mr. WAGNER];

The Senator from New Mexico [Mr. CUTTING] with the Senator from West Virginia [Mr. NEELY];

The Senator from Iowa [Mr. BROOKHART] with the Senator from Oklahoma [Mr. GORE]; and

The Senator from Vermont [Mr. AUSTIN] with the Senator from Tennessee [Mr. HULL].

Mr. SHEPPARD. I desire to announce that the Senator from Virginia [Mr. SWANSON], if present, would vote "nay" on this question.

The result was announced—yeas 41, nays 12, as follows:

YEAS—41

Ashurst	Fess	Moses	Sheppard
Barbour	Fletcher	Norbeck	Steiwer
Bingham	Grammer	Nye	Townsend
Bulkley	Hale	Oddie	Trammell
Byrnes	Hatfield	Pittman	Vandenberg
Capper	Hayden	Reed	Walsh, Mass.
Copeland	Johnson	Reynolds	Watson
Dale	Kean	Robinson, Ind.	White
Davis	Keyes	Russell	
Dickinson	McNary	Schall	
Dill	Metcalf	Schuyler	

NAYS—12

Black	Clark	George	Robinson, Ark.
Blaine	Connally	King	Smith
Bulow	Costigan	McGill	Thomas, Okla.

NOT VOTING—43

Austin	Couzens	Hull	Shortridge
Bailey	Cutting	Kendrick	Smoot
Bankhead	Frazier	La Follette	Stephens
Barkley	Glass	Lewis	Swanson
Borah	Glenn	Logan	Thomas, Idaho
Bratton	Goldsborough	Long	Tydings
Brookhart	Gore	McKellar	Wagner
Broussard	Harrison	Neely	Walcott
Caraway	Hastings	Norris	Walsh, Mont.
Carey	Hebert	Patterson	Wheeler
Coolidge	Howell	Shipstead	

So Mr. JOHNSON'S amendment as modified was agreed to, as follows:

On page 87, after line 15, insert the following:

TITLE III

That when used in this title—

(a) The term "United States," when used in a geographical sense, includes the United States and any place subject to the jurisdiction thereof;

(b) The terms "public use," "public building," and "public work" shall mean use by, public building of, and public work of, the United States, the District of Columbia, Hawaii, Alaska, Puerto Rico, the Philippine Islands, American Samoa, the Canal Zone, and the Virgin Islands.

SEC. 2. Notwithstanding any other provision of law, and unless the head of the department or independent establishment concerned shall determine it to be inconsistent with the public interest, or the cost to be unreasonable, only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be, in the United States, shall be acquired for public use. This section shall not apply with respect to articles, materials, or supplies for use outside the United States, or if articles, materials, or supplies of the class or kind to be used or the articles, materials, or supplies from which they are manufactured are not mined, produced, or manufactured, as the case may be, in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality.

SEC. 3. (a) Every contract for the construction, alteration, or repair of any public building or public work in the United States, growing out of an appropriation heretofore made or hereafter to be made, shall contain a provision that in the performance of the work the contractor, subcontractors, material men, or suppliers, shall use only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, and only such manufactured articles, materials, and supplies as have

been manufactured in the United States substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be, in the United States except as provided in section 2: *Provided, however,* That if the head of the department or independent establishment making the contract shall find that in respect to some particular articles, materials, or supplies it is impracticable to make such requirement or that it would unreasonably increase the cost, an exception shall be noted in the specifications as to that particular article, material, or supply, and a public record made of the findings which justified the exception.

(b) If the head of a department, bureau, agency, or independent establishment which has made any contract containing the provision required by subsection (a) finds that in the performance of such contract there has been a failure to comply with such provisions, he shall make public his findings, including therein the name of the contractor obligated under such contract, and no other contract for the construction, alteration, or repair of any public building or public work in the United States or elsewhere shall be awarded to such contractor, subcontractors, material men, or suppliers with which such contractor is associated or affiliated, within a period of three years after such finding is made public.

SEC. 4. This title shall take effect on the date of its enactment, but shall not apply to any contract entered into prior to such effective date.

NORTH CAROLINA SENATORIAL ELECTION

Mr. MOSES. Mr. President, I wish to present a privileged matter in the form of a report from the subcommittee of the Committee on Privileges and Elections, which I ask to have read, and then I shall move to have the report adopted.

The PRESIDING OFFICER. The report will be read.

The legislative clerk read the report (No. 1151), as follows:

The subcommittee of the Committee on Privileges and Elections, to whom was referred the contest filed by George M. Pritchard against the sitting senior Senator from North Carolina, find:

(1) That the original notice of contest was of general character, indefinite in its allegations, and insufficient in itself to justify the contest.

(2) Accordingly, and in response to a notice from the committee to file more specific allegations, the contestant filed a bill of particulars which was specific in the sense that it mentioned general allegations regarding irregularities in the election in certain counties in North Carolina. The subcommittee concluded that these allegations were not less general than the allegations in the original notice; that the limiting of general allegations to certain specified counties was not in itself sufficient to provide particulars upon which to found a contest or to rebut the presumption of the validity of the returns and the record thereof as filed with the committee.

The subcommittee holds the opinion that title to office as shown by the election returns must be respected in the interest of the stability of government and ought not to be reviewed except upon specific showing calculated seriously to raise a doubt as to the title of the holder of the office. The subcommittee also was not unmindful of the time and expense which would be necessary to carry on a contest such as was evidently contemplated.

(3) Final notice was duly served upon the contestant to show cause on January 25, 1933, why this contest should not be dismissed. Accepting as true the contestant's allegations, the committee find that they are not sufficiently specific to sustain the object sought and that they do not tend to show that the contestant was elected or that the contestee was not elected—inasmuch as the contestee's official majority was in excess of 113,000 votes.

For this reason the subcommittee being authorized thereto recommends to the Senate that the petition of the contestant be dismissed.

GEO. H. MOSES.
JAS. E. WATSON.
ROBERT J. BULKLEY.

Mr. MOSES. Mr. President, I move the adoption of the report of the subcommittee.

The PRESIDING OFFICER. The Chair will ask the Senator from New Hampshire what is the resolution? Is it Order of Business 605?

Mr. MOSES. Yes; but that will have to be dealt with otherwise. The subcommittee was authorized by the full committee to report its findings and recommendations directly to the Senate. The findings are contained in the body of the report and the recommendations in the last sentence, recommending that the petition be dismissed.

I move the adoption of the report.

The PRESIDING OFFICER. The question is on the motion of the Senator from New Hampshire.

The report was agreed to.

Mr. MOSES submitted the following resolution (S. Res. 346), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the sum of $500 be paid to the treasurer of the State of North Carolina; that the sum of $3,000 be paid to the Hon. Josiah W. Bailey, the sitting senior Senator from North Carolina; and that $8,000 be paid to the Hon. George M. Pritchard, of Asheville, N. C.; all of said sums to be paid from the contingent fund of the Senate and in full settlement of expenses incurred in the contested case affecting the seat of the senior Senator from North Carolina.

ADDITIONAL PETITIONS AND MEMORIALS

Mr. COPELAND presented a memorial of sundry citizens of Albion and Knowlesville, N. Y., remonstrating against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which was ordered to lie on the table.

He also presented resolutions adopted by Pilgrim's Pride Council, No. 54, Daughters of America, of Brooklyn, N. Y., remonstrating against continuance of the so-called economy act, especially the furlough plan, which were referred to the Committee on Appropriations.

He also presented a letter in the nature of a memorial from the board of directors of the Glens Falls (N. Y.) Hospital, remonstrating against the further extension of Veterans' Administration hospitals or the making of appropriations for new construction until the facilities of local hospitals for caring for veterans are exhausted, which was referred to the Committee on Appropriations.

He also presented a resolution adopted by the Red Creek Dairymen's League Cooperative Association (Inc.), in the State of New York, favoring inflation of the gold currency, which was referred to the Committee on Banking and Currency.

He also presented a resolution of the Westchester County (N. Y.) District Council, United Brotherhood of Carpenters and Joiners of America, Tarrytown, N. Y., favoring the passage of legislation providing for the 6-hour day and 30-hour week, etc., which was referred to the Committee on the Judiciary.

ADDITIONAL REPORT OF A COMMITTEE

Mr. DICKINSON, from the Committee on Military Affairs, to which was referred the bill (S. 1730) to amend and correct the military record of Robert J. Smith, reported it with an amendment to the title and submitted a report (No. 1150) thereon.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

Mr. McKELLAR. Mr. President, on page 57, in line 3, I move to strike out the numerals " $35,500,000 " and to insert " $17,750,000."

This brings up the question of reducing the amount of subsidies paid to ocean shipping companies by 50 per cent of what they are now getting.

Heretofore I have made the argument—and I think it is absolutely sound legally—that 39 of these various shipping contracts out of the 44 are void; but in making this motion to reduce the amount, the question of the validity of the contracts need not be considered.

I want to call the attention of the Senate to the provisions of the contracts themselves.

The PRESIDING OFFICER. Will the Senator state on what page this amendment is proposed?

Mr. McKELLAR. On page 57, line 3. I move to strike out " $35,500,000 " and insert " $17,750,000."

I desire to read the following provision of the contract:

That if mutually agreed to by the Postmaster General and the contractor, the Post Office Department may extend the service to additional ports, curtail the route to omit ports, change the service to substitute ports, or increase or reduce the number of trips, with allowance of not exceeding the contract rate for the increased outbound mileage involved and with a deduction at the contract rate for any decreased outbound mileage involved.

That is in contract No. 4. I have just read from page 152 of Ocean Mail Contracts. The same language is to be found in contract No. 5, as appears on page 157 of Ocean Mail Contracts. The same language is found on pages 163, 167, 169, 175, 179, 184, 186, 191, 196, 200, 205, 211, and so on through, in all of the contracts.

Mr. FLETCHER. Mr. President, what is the Senator reading from?

Mr. McKELLAR. I am reading from Ocean Mail Contracts, Senate Document No. 69, Seventy-second Congress, first session.

So, Mr. President, under these contracts the Congress, by reducing the amount, instructs the Postmaster General to enter into negotiations to reduce the amount of mileage or the number of trips, or otherwise bring the compensation within the appropriation.

Now, Mr. President, I want to refer just briefly to the reasons why these reductions should be made.

From the Truth About Postal Contracts, which is Senate Document 210, we find that some of these steamship companies are doubly subsidized. We find that others of them carry, substantially speaking, neither freight nor mail. We find the greatest extravagance in the matter of managing these shipments of mail.

For instance, I want to call attention to pages 36 and 37.

The American Scantic Line: Compensation for 20 voyages. The normal rate for carrying the mail would be $2,600. The amount in fact paid is $260,000.

American South African Line: Compensation for 8 voyages, at normal rates, $375. Amount in fact paid, $165,000.

American West African Line: Compensation for 12 voyages, at normal rates, $735. The amount actually paid is $195,000. Page 160.

Dollar Steamship Line: Compensation for 15 voyages, at normal rate, $13,500. The amount in fact paid is $728,000.

Dollar Steamship Line: Compensation for 15 voyages, at normal rate, $5,950. The amount in fact paid is $650,000.

Eastern Steamship Line: Compensation for 78 voyages, at normal rate, $1,400. The amount in fact paid is $147,000.

Export Steamship Corporation: Compensation for 66 voyages, at normal rate, $1,770. The amount in fact paid is $820,000.

Grace Steamship Co.: Compensation for 20 voyages, at normal rate, $30,000. The amount in fact paid is $390,000.

Lykes Bros. Steamship Co.: Compensation for 34 voyages, at normal rate, $165. The amount actually paid is $157,000.

Munson Line: Compensation at normal rate, $33,200. The amount actually paid is $920,000.

New York & Cuba Mail Steamship Co.: Compensation for 33 voyages, at normal rate, $35. The amount actually paid is $224,000.

New York & Cuba Mail Steamship Co.: Compensation for 30 voyages, at normal rate, $1,360. The amount actually paid is $242,000.

Oceanic & Oriental Navigation Co.: Compensation for 8 voyages, at normal rate, $535. The amount actually paid is $113,000.

Oceanic & Oriental Navigation Co.: Compensation for 7 voyages, at normal rate, $145. The amount actually paid is $123,000.

Pacific-Argentine-Brazil Line: Compensation for 6 voyages, at normal rate, $3. The amount actually paid is $102,000.

States Steamship Co.: Compensation for 14 voyages, at normal rate, $145. The amount actually paid is $230,000.

States Steamship Co.: Compensation for 8 voyages, at normal rate, $133. The amount actually paid is $122,000.

Mr. President, at times like these, when we are borrowing money to carry on the ordinary expenses of government, with our Treasury $5,200,000,000 in the hole in the last three years in running expenses, we are paying these enormous subsidies to steamship companies, subsidies which are without parallel in the history of government anywhere in the world.

Talk about Great Britain subsidizing her ships. No such subsidies as these are paid by her, or any other nation. The United States is the only nation where these enormous subsidies are paid.

If I have had the proof aright, as I stated here in the Senate before, one of these lines running to South America from San Francisco carried 3 first-class letters, 6 cents postage, and 45 pounds of parcels post, and they got $102,000,000 for that service, or so-called service. No other government on the earth except the American Government would ever permit money to be spent in such a way.

Mr. President, it does seem to me that this amendment ought to be adopted. I can not imagine what argument can be used to defend this wicked and extravagant waste of the American people's money. When we are having to feed the hungry people in all parts of the country, we are granting these enormous subsidies to these steamship companies.

I go a little further. I want to call attention to the fact that 39 out of 44 contracts were let without competition. The shipping law of 1928 required competition, required open bidding, required advertisements for bidding. There was no open bidding. The contracts were let without bidding. The contracts were let in 39 instances so that only one company could bid on the contract. The whole spirit of the law has been violated. Yet these enormous subsidies year by year for 20 years have been paid, and that practice ought not to continue.

Let me call attention to the American-West African Line. It had a contract dated August 30, 1928, for 10 years.

Vessels of class 1, 10 years, 4,500 gross tons.

Schedule must be satisfactory to the Postmaster General and not less than 20 trips per annum.

Compensation for outward trip only. Nautical miles, route A, 6,994; route B, 6,369; route C, 6,224; at $2.50 per mile annual compensation, or a total of $325,287 per annum. Multiply that by 10 and it will be found it amounts to $3,352,870.

Mr. GEORGE. Mr. President, will the Senator yield to me?

Mr. McKELLAR. I yield.

Mr. GEORGE. I wanted to ask the Senator from Tennessee if the contracts are uniform contracts?

Mr. McKELLAR. Almost entirely.

Mr. GEORGE. Do they run for a period of years?

Mr. McKELLAR. They run for a period of years, most of them 10 years, but there is a provision—and I believe the Senator did not hear when I first began—in each one of the contracts which would allow the Postmaster General, if instructed by the Congress, to bring about a settlement as to the number of trips made and the mileage that is run. In other words, they can be mutually readjusted. I read to the Senator from a provision that is in all the contracts:

> If mutually agreed to by the Postmaster General and the contractor, the Post Office Department may extend the service to additional ports, curtail the route to omit ports, change the service to substitute ports, or increase or reduce the number of trips, with allowance of not exceeding the contract rate for the increased outbound mileage involved and with a deduction at the contract rate for any decreased outbound mileage involved.

Mr. GEORGE. That clause is uniform?

Mr. McKELLAR. Uniform through all the contracts.

Mr. GEORGE. In all the contracts?

Mr. McKELLAR. Yes. Of course, the reduction of the appropriation would be a direction to the Postmaster General to use that clause.

Mr. President, under these circumstances, it is just a question of what the Senate wants to do. Do they want to continue these extravagant expenditures, these extravagant subsidies, or do they want to give to these subsidized people still an enormous subsidy? We are curtailing every other officer of the Government. Everyone else who uses Government money has been curtailed. Only those who have the power and the influence to get these vast subsidies are not having their compensation decreased.

If this amendment is voted down, we will give this year $35,500,000 as subsidies or as gifts. I digress long enough here, if I may, to read what our Democratic platform has

to say about that subject. Our Democratic platform referred to this very transaction and stated:

> We condemn the open and covert resistance of administration officials to every effort made by congressional committees to curtail the extravagant expenditures of the Government and to revoke improvident subsidies granted to favorite interests.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. McKELLAR. I ask that the amendment be agreed to.

Mr. FLETCHER. Mr. President, I wish very earnestly and very sincerely to protest against and to oppose this amendment. The amendment reaches to the extent of practically setting aside existing contracts and interfering seriously and conflicting fatally with a policy established by the Government with respect to building up and maintenance of an adequate American merchant marine.

This policy was adopted, particularly with reference to ocean mail contracts, under the act of 1928. Under the shipping act of 1916 we began to construct merchant ships in the United States. We found that it was absolutely necessary, if we were to be at all independent of competitors in foreign markets for the carrying of our products, and bringing to us commodities we needed, to have ships of our own. We proceeded to build ships.

When the shipping act of 1916 was passed, we had only 112 ships of a gross tonnage of 598,220 in foreign trade. We built 2,316 ships, with a gross tonnage of 9,327,635 tons. We operated those ships for quite a while, and created a Fleet Corporation as the operating agency. Then came a declaration by Congress in 1920 that it would be the purpose to get those ships into private hands ultimately, and the policy of pursuing that course was adopted, and the Shipping Board and other authorities of the Government undertook to hurry the ships into private hands. I think perhaps that went too far.

We found that there was a difference between operating ships under the American flag and a difference in cost of constructing ships in our yards as compared with foreign yards—to our disadvantage.

In order to equalize that difference there has to be some assistance rendered to American industry and to American ships. In 1928 we passed what is commonly known as the Jones-White Act. One of the authors of that measure is now a distinguished member of this body. By it we intended to offset this difference in the cost of operating ships under our flag and under foreign flags, and the cost of construction in our yards as against the cost in foreign yards so as to give the American merchant marine a chance to compete on the high seas for the trade of the world and particularly our own trade.

We adopted the policy of providing this subvention, or subsidy, if you like, for American ships by paying American ships engaged in foreign trade for carrying our mails, based upon the mileage rather than the weight of the mail. That was distinctly understood at the time. They are not moving these mails oversea on a dead-weight basis or a poundage basis at all, but upon a mileage basis. The idea was that there would be benefits to American ships if that was established as our policy. It was so established in 1928. The contracts to which the Senator has referred are based upon that law and authorized by that law. That policy has been pursued under the law. We can not, because some contracts were let four or five years ago at what appears to be an outrageous rate and expense to the Government, ignore them now and throw them to one side. We can not get back any of the money that has been wasted, if it has been wasted, by denying this appropriation.

The effect now would be, after having let 44 contracts for carrying the mails over the sea under the law, that we can not let any more contracts and that we can not pay in accordance with our contracts. That is not a good thing to do. It will cripple the merchant marine. It stops the transfer of these ships. We have found that in order to get the ships out of the hands of the Government and into private hands we had to accompany the sale of the ships to the operators under the Shipping Board with a contract for the carriage of mail. We had to give them that benefit. We knew it was helpful to them. We understood it was not based upon the weight of the mail. It was based upon the mileage for the purpose of benefiting the purchasers of the ships to an extent where they might be on an equal footing with foreign ships. These contracts have been let and ships have been passing out of the hands of the Government, so that when the contracts that are pending are closed—three or four more—then there will be no ships left, there will be no need of any other contracts, there will be no occasion for continuing this plan, because the ships will all be gone.

After delivery of the vessels to several shipping companies now bidding under pending proposals there will remain in operation 32 vessels. They will be all that will remain in the hands of the Government to be operated by the Government, and the board does not intend and I should not want nor should anybody want them to part with all of the merchant ships of the Government.

There are presently inactive and in lay-up 130 vessels. The time required to place those in service is about two or three weeks. They will be ready in an emergency at any time to use in our commerce or in national defense or for any other purpose. They can be put in condition in two or three weeks. That is all that will be left when the contracts now pending have been concluded. We have been able to dispose of ships and get the Government out of operating the ships by reason of these contracts.

I have a statement from the department to this effect:

> It is estimated that the postage revenues from the mails carried on these routes for the fiscal year 1932 were, in round figures, $5,182,000, while the total expenditure for the routes for the fiscal year 1932 was $22,431,791.

This $35,000,000 includes $7,000,000 for foreign air mail, and it includes the cost of carrying the mails under the old original contracts. Some of them are carried by foreign vessels on the weight basis. But the real amount for the purpose of performing these ocean mail contracts last year was $22,431,791.

If the appropriation is to be cut arbitrarily and without regard to the legal obligations of the Government, what is to become of the obligations assumed by the contractors to construct and reconstruct vessels, much of which has already been done? The total amount of these obligations imposed upon the contractors is considerably over $300,000,000 during the 10-year periods of the contracts. That is to say, these contracts not only include compensation for carrying the mail, but the contractors are bound to replace vessels, keep them in repair, keep them up, and to build certain vessels. There have been some millions of dollars' worth of ships constructed already by these contractors under their contracts as a part of the mail contracts.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Tennessee?

Mr. FLETCHER. I yield.

Mr. McKELLAR. Three-quarters of the money that is used for constructing ships comes from the Government under the revolving fund, and that at a rate of interest beginning at one-fourth of 1 per cent and running up to 2 per cent.

Mr. FLETCHER. I have not the time to go into the question of interest, but we created a shipbuilding fund at the same time we provided for these contracts authorizing the Government to make loans for the purpose of constructing ships. Those loans have been made. The proceeds of the contracts are larger and the mortgages on the vessels which have been constructed are held by the Government to secure the loans. We have a mortgage on the ships and an assignment of the contract for the purpose of protecting the Government in the making of the loans.

We secured the establishment of routes and service that built up our trade all over the world. We got in addition to that, contracts to replace the ships and contracts to build new ships. Out of all of them we are getting benefits far in excess of the cost of the contracts. For instance, if the contract is good, and I think it is good and authorized by

law, and a sale is made under the two pending contracts, then there will be 66 ships which will pass out of Government ownership into private ownership and there will result from that a benefit to the Government which now loses over a million dollars more than the cost of the contract in the operation of these lines. By letting the contracts the Government would benefit over $1,500,000 a year. The executive assistant to the Postmaster General said:

> It should be borne in mind, of course, that expenditure on these routes was not for the carriage of mail, which was merely a secondary or in many cases an incidental feature of the service. The purpose of the payments was to offset the higher costs of building and operating ships under the American flag than under foreign flags, and for the maintenance of regular and frequent service on essential trade routes in accordance with the declared purpose of Congress to develop an American merchant marine.
>
> When we consider that some $300,000,000 a year, which prior to the establishment of these routes was paid by our shippers to foreign carriers, is now paid to our own nationals and spent in this country rather than in other countries as before, and that in addition the operators of these lines have invested nearly $300,000,000 in the building and reconstruction of ships, all of which is expended in this country, the annual payments on these mail contracts, which assure us second place in the world's ocean tonnage and provide a naval auxiliary and reserve which will be of incalculable value to us in a national emergency, do not seem excessive.

Mr. President, the Congress at the last session authorized and directed the Committee on Post Offices and Post Roads of the Senate—and the House did the same thing as to its committee—to investigate these ocean mail contracts. Why not wait until they report? They have made no report yet. Why stand here and arbitrarily declare null and void these contracts, when we have a committee investigating them and when the House has a committee investigating them?

Mr. President, I ask permission to insert in the RECORD at the close of my remarks a memorandum from the Shipping Board and other memoranda which I send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FLETCHER. At the risk of some repetition, let me say regarding the importance of maintaining as well as establishing an American merchant marine:

The language adopted by Congress as a declaration of policy and purpose was to establish and maintain an adequate American merchant marine.

The necessity for this object had been fully recognized.

The fact is, we have always been a trading people.

Commerce, which uses a 2-way passage, has been one of our prime interests.

The convention held at Annapolis in 1786, just preceding the Constitutional Convention at Philadelphia in 1787, over which George Washington presided, stressed the necessity of proper recognition of interstate commerce and its related problem of foreign commerce.

When the Constitution was under consideration, the provision was adopted, which has played a most important part in the development and progress of the country, known as the commerce clause.

In the early days American sailors carried our flag around the world and did a thriving business in wooden sailing vessels of less than 500 tons.

Interest in shipping grew, and by 1860 American ships were carrying nearly 80 per cent of our foreign business.

After that we lost ground; and when the steel ship came in, our wooden sails gradually disappeared. Our people directed their attention to the land and away from the seas to a great extent. Foreign ships took our overseas trade until, in 1914, we were furnishing only a limited service on a few trade routes, carrying about 10 per cent of our overseas commerce.

Since then we have placed on the seas the second largest merchant marine in the world.

We have established it; now we must maintain it.

To make it strong, we must give it strong support.

It must be American owned and American controlled.

We require it for commerce in order not to be dependent upon our competitors in foreign markets to move our goods.

We require it in order to meet any possible demand for auxiliaries to our Navy.

I need not recite conditions created by the World War. Our producers and shippers will recall them—for instance, when freight on cotton from Galveston to Liverpool went from $2.50 to $50 per bale, and freight on wheat went from 3 cents to 50 cents a bushel from New York to Liverpool.

Other factors I need not mention moved us to active, energetic action, with the result that in pursuance of the act of September, 1916, the Shipping Board became the owner of 71 shipyards and other industrial plants and equipment and facilities, enabling it to construct 2,316 new vessels of all types—gross tonnage, 9,327,685.

At one time or another the board has owned 2,546 vessels of 14,703,717 dead-weight tons.

Under the act of 1920 the policy pursued by those in authority was to hurry the ships into private ownership. The insistence was to get the Government out of business and place the responsibility for developing a permanent American merchant marine under private enterprise.

Although that idea has been always present, it was not to be carried out, as I contended, until private capital was ready to invest and our people took a proper interest in shipping, and then on a reasonable business basis. The administration seemed to me to proceed with undue haste and without proper protection of the public interest to dispose of the ships. A total of 362 vessels was sold prior to 1920. After that 1,645 vessels and 5 dry docks were sold.

At one time the Shipping Board had in operation 379 general cargo services to foreign ports—283 from Atlantic ports, 69 from the Gulf, and 27 from the Pacific.

The number of operating units was reduced to 75, then to 38.

Private enterprise kept insisting that the difference in cost of building and operating ships between foreign and American owners gave the foreigner very considerable advantage over the American. Capital refused to take hold until some plan was devised whereby this differential could be absorbed or corrected, so the American owner could compete on more equal footing.

A ship subsidy bill was proposed during the Harding administration.

To my mind, that bill would have paved the way to get all our vessels into the hands of a few shipping concerns whom we would pay enormous sums out of the Treasury to operate.

I strongly opposed the bill, although it was favorably reported to the Senate. It was defeated, but it was realized some such differential existed and private enterprise was holding off and it was advisable to devise some help to American shipping.

It is true that for two years following 1913, under Admiral W. S. Benson, the Government operated the ships at a considerable profit.

After that commerce decreased, foreign tonnage came back, and those supporting the subsidy bill claimed it was costing the Government $50,000,000 a year to operate the ships then in operation. This was probably an exaggeration, but there was some considerable deficit each year.

To meet the situation as far as possible, the act of 1928 was passed, which provided aids by liberal loans for building and by ocean mail contract benefits.

The legislation has resulted in the construction of 42 new vessels of the most modern type, aggregating 463,000 tons gross; 39 vessels of 263,000 gross tons have been reconditioned or rebuilt.

There has been a steady increase, of course, in private ownership.

In 1913 we had only 2 per cent of the world's tonnage, ranking eighth. By June 30, 1930, we had gained second rank, with almost 12 per cent of the world's total.

Vessel-operating losses have been reduced from $41,000,000 in 1924 to $8,431,000 in 1932—being $864,000 less than the previous year.

In 1920 there were carried on the board and Fleet Corporation pay rolls 9,487 persons, drawing salaries amounting to $19,000,000; this number has been reduced by 8,441, with annual salaries of $2,140,055.

To-day about 86 per cent of the vessels and 83 per cent of the tonnage are owned by private American interests.

The Shipping Board fleet comprises 357 vessels, of which 236 are cargo ships, 10 refrigerator ships, 4 combination passenger and cargo ships, and 7 harbor tugs.

Of the cargo ships, 96 are in active operation on regular line service, and 240 are the laid-up fleet; 124 of these have been undocumented and will be sold for scrapping, thus reducing the Government-owned fleet to 233 vessels.

There are two ocean mail contracts pending, favorably reported on, which, when executed, will take away some 63 ships, which will pass into private hands.

In my judgment, the Government should retain, and the Fleet Corporation, under direction of the Shipping Board, should operate them.

I do not think it wise for the Government to part with all the ships and abandon all operation.

Experience has taught us that influence on freight rates is important and emergency service may be vital.

The total expenditures under the 44 ocean mail contracts for the year 1932 were $22,431,791.

The postage revenues from the mails carried on these routes for the fiscal year 1932 were, approximately, $5,182,000.

Of course, the expenditure was placed on a mileage rather than a poundage basis, because the purpose of Congress was to help offset the higher cost of building and operating ships under the American flag than under foreign flags and for the maintenance of regular and frequent service on essential trade routes, in accordance with the declared purpose of Congress to develop an American merchant marine.

When we consider that some $300,000,000 a year, which prior to the establishment of these routes was paid by our shippers to foreign countries, is now paid to our nationals and spent in this country rather than in other countries, as before, and that in addition the operators of these lines have invested nearly $300,000,000 in the building and reconstruction of ships, all of which is expended in this country, the annual payments on these mail contracts, which assure us second place in the world's ocean tonnage and provide a naval auxiliary and reserve, which would be of incalculable value in a national emergency, do not seem excessive.

Some years ago the Shipping Board sold some valuable ships at ridiculous prices—almost gave them away.

These mail contracts have made possible sales at somewhat reasonable prices, which include agreements to replace and repair the ships and operate them on definite routes and in specified services for 10 years.

Payments on the contracts invariably are less than the annual deficit the Fleet Corporation incurs by their operation.

It is claimed 1,764 sailings with mail and cargo will be available to American traders and travelers during the year.

Shipping has suffered by reason of the falling off of exports and imports.

Our foreign trade reached its greatest volume in June, 1921, when the volume reached 10,699,596 gross tons.

In June, 1931, it amounted only to 5,187,692 gross tons, a decrease of 5,511,904 gross tons—34.7 per cent—carried in American vessels.

Our coasting trade during that time increased 2,305,507 gross tons.

The merchant marine on June 30, 1932, including all kinds of documented craft, comprised 25,156 vessels, of 15,838,655 gross tons, of which 1,967 seagoing vessels, of 9,937,717 gross tons, were of 1,000 tons or over.

The United States Shipping Board had (1932) 362 vessels, of 2,088,864 gross tons.

Private and Shipping Board ownership totaled 1,852 steel vessels, of 9,682,234 gross tons, and 365 wood vessels, of 451,388 gross tons; total of all, 2,217 vessels, of 10,133,622 gross tons.

The policy and purpose expressed in the beginning are sound. We must persist in them.

It is no wonder we find overseas shipping hard pressed when we consider the following figures, furnished by the statistical division of the Bureau of Foreign and Domestic Commerce, Department of Commerce:

1924 (calendar year):	
Imports	$3,609,963,000
Exports	4,590,984,000
1932 (calendar year):	
Imports	1,225,199,000
Exports	1,481,379,000

The 1932 figures are for 11 months only; they do not include those for the month of December.

About one-third of our exports are agricultural products.

We must increase our export business.

Our surplus must find foreign markets. It is essential that we bend our energies in that direction.

This decline in imports and exports will not continue.

It must be gratifying to know that while we had only 6 American-flag ships of 70,000 gross tons in 1914 operated in our trade with Europe, in 1930 we had 232 American ships, of 1,500,000 gross tons, in that trade, which had increased 50 per cent.

There were only 5 American ships of 23,000 gross tons in 1914 operating between the United States and South America. By 1930 the number of American ships had increased to 90 and our trade with that region 200 per cent.

We had no ships to the African Continent in 1914; now we have 20 ships in that trade, of 114,000 gross tons.

In our trade with the Orient in 1914 we had 5 American ships operating from the Pacific coast. In 1931 the number had grown to 87 ships of 700,000 gross tons.

Wherever American-flag services have been inaugurated and extended, there has followed a gratifying expansion of our foreign trade.

It is highly important that we encourage this development.

It would be folly to cripple or surrender the undertakings which have shown such accomplishment.

Commerce speaks the language of cooperation and good will.

The memoranda asked to be inserted are as follows:

UNITED STATES SHIPPING BOARD,
Washington, January 9, 1933.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

DEAR SENATOR FLETCHER: Please find listed below certain information relative to the merchant marine which Admiral Cone has requested that I, in his absence, send to you:

1. The number and tonnage of ships operating under American flag in foreign commerce when the shipping act, 1916, was passed were:

Number	112
Gross tonnage	598,270

(Taken as of June 30, 1914, of vessels of 1,000 gross tons and over.)

2. The number and tonnage of ships constructed by the Government under the emergency war program from 1916 through 1921 were:

Number	2,316
Gross tonnage	9,327,685
Dead-weight tonnage	13,636,967

3. The number and tonnage of ships now owned by the Government are:

Number	356
Gross tonnage	2,065,589
Dead-weight tonnage	3,071,610

4. The number and tonnage of Government-owned ships now being operated are:

Cargo vessels	94
Gross tonnage	556,288
Dead-weight tonnage	858,697
5 tugs (gross tonnage)	2,523

5. The number and tonnage of privately owned ships now operating under American flag in foreign trade are:

Number	280
Gross tonnage	1,900,452

6. The number and tonnage of Government-owned ships now laid up are:

Number	257
Gross tonnage	1,509,301
Dead-weight tonnage	2,212,913

(Includes 117 ships sold for scrapping.)

7. The number and tonnage of privately owned ships now laid up are:

Number	462
Gross tonnage	2,272,788

(As of September 30, 1932.)

8. The number and tonnage of Government-owned ships now idle, but fit and ready for operation are:

Number	72
Gross tonnage	461,872
Dead-weight tonnage	657,044

9. With reference to the scrapping of Government-owned ships, beyond those already sold for that purpose, Admiral Cone wishes to advise you as follows:

The Government should not scrap any more of its ships for the reasons that (a) the remaining ships are of suitable types for foreign and/or domestic trade and are in good condition; (b) these ships are valuable as naval auxiliaries and should be retained for use in national emergency if for no other reason.

10. With reference to the elimination of the Merchant Fleet Corporation, Admiral Cone wishes to advise you as follows:

The objections to the elimination of the Merchant Fleet Corporation are:

(a) That the board would be restricted from following commercial practices in sale of vessels and other property, in the operation of its insurance fund, in the purchasing of supplies, in the employment of specially trained employees as required, and in the disposition or operation of vessels returned to it through foreclosure or other proceedings.

(b) That the board would have no adequate agency through which to function in case of national emergency.

In Admiral Cone's opinion no saving would result from elimination of the corporation, although considerable saving will result from its reduction to a skeleton organization as liquidation progresses to completion. He believes that the Fleet Corporation should be retained as now provided for by law, as it may become necessary at anytime to enter the field of operation. He also believes that the Shipping Board can get the corporation down to a reasonable basis more rapidly and more economically than any other department of the Federal Government. He believes that the corporation should be greatly reduced in personnel and used principally in supervising the laid-up fleet, in liquidation of old accounts, settlement of claims and of lawsuits, the details of which are very complicated and which could not be handled by another organization without waste and delays.

11. The Fleet Corporation now operates, through managing operators, 94 ships of 556,288 gross tons and 858,697 dead-weight tons.

12. When sales to Lykes Bros. Steamship Co., American Hampton Roads, and Oriole Lines are made, 66 ships will pass to private hands, leaving 28 ships in operation through managing operators by the Fleet Corporation.

13. With reference to whether or not the Government should own and operate some ships at all times, Admiral Cone wishes me to advise you that, in his opinion, the Government should own and keep in lay-up, available for operation, the remainder of the ships now owned. He believes that all operations of vessels, except in emergency, should be by private owners, because such operation is cheaper than governmental operation. It is more economical for the Government to give mail pay to private operators than to operate ships itself.

Should you desire any additional information, kindly advise me.

Respectfully,

J. W. BARNETT,
Director Bureau of Construction and Finance.

P. S.—The data contained herein, except in paragraph 2, applies to vessels of 1,000 gross tons and over.

JANUARY 23, 1933.

Memorandum for Admiral Cone.

After delivery of vessels to Southgate-Nelson Corporation and Lykes Bros.-Ripley Steamship Co. (Inc.), there will remain in operation 32 vessels:

America France Line	8
American Pioneer Line	11
American Republics Line	11
	30
Under bare-boat charter:	
American West African Line	1
War Department	1
	32

There are presently inactive and in lay-up 130 vessels.

The time required to place these vessels in service is as follows:

Seventeen vessels will require a period of 2 weeks each, 26 vessels will require a period of 3 weeks each, 32 vessels will require a period of 4 weeks each, 54 vessels will require a period of 6 weeks each.

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., December 30, 1932.

Hon. DUNCAN U. FLETCHER,
United States Senate.

MY DEAR SENATOR FLETCHER: The Postmaster General has asked me to acknowledge receipt of your letter of December 22, 1932, asking information about the amount of revenue which the Government receives from the ocean mail contracts.

It is estimated that the postage revenues from the mails carried on these routes for the fiscal year 1932 were, in round figures, $5,182,000, while the total expenditure for the routes was, for the fiscal year 1932, $22,431,791.

It should be borne in mind, of course, that expenditure on these routes was not for the carriage of mails, which was merely a secondary or, in many cases, an incidental feature of the service. The purpose of the payments was to offset the higher cost of building and operating ships under the American flag than under foreign flags, and for the maintenance of regular and frequent service on essential trade routes in accordance with the declared purpose of Congress to develop an American merchant marine.

When we consider that some $300,000,000 a year, which prior to the establishment of these routes was paid by our shippers to foreign carriers, is now paid to our own nationals and spent in this country rather than in other countries as before, and that, in addition, the operators of these lines have invested nearly $300,000,000 in the building and reconstruction of ships, all of which is expended in this country, the annual payments on these mail contracts, which assure us second place in the world's ocean tonnage and provide a naval auxiliary and reserve which would be of incalculable value to us in a national emergency, do not seem excessive.

Very truly yours,

HAROLD N. GRAVES,
Executive Assistant to the Postmaster General.

THE AMERICAN MERCHANT MARINE

CHAMBER OF COMMERCE OF THE UNITED STATES,
Washington, D. C.

In view of statements recently made, both in this country and abroad, as to our national shipping policies showing that the facts and purposes underlying those policies are completely misunderstood by those making the statements, I desire to invite attention to the position of the Chamber of Commerce of the United States in the matter.

The national chamber took an active part in developing and supporting the key provision of the merchant marine act, 1928, namely, that providing for establishment and maintenance of American-flag services on our essential overseas trade routes through contracts between the Government and private shipping companies able and willing to undertake the obligation of providing the needed services. No longer ago than May, 1932, the chamber clearly reiterated its support of Government assistance to our merchant marine in the following resolution unanimously adopted by the membership at the twentieth annual meeting:

"The assistance extended by the merchant marine act of 1928 has enabled American steamship companies generally to hold their position against foreign competition. Under prevailing conditions the national interest urgently requires maintenance of this assistance. The support of the American merchant marine requires that the Government should utilize its facilities to the fullest possible extent and refrain from operating competing services."

Opponents of our national policy of maintaining a merchant marine under the American flag through the present system exaggerate its cost. In doing so some include the cost of our emergency merchant fleet built for war purposes at war prices, a fleet in part already scrapped and as to the remainder largely obsolete. Others, attacking our policies from another direction, charge that excessive prices are being paid American ships for carriage of the mails. In this they misconstrue the clear purpose of the 1928 act to award mail contracts not merely to pay for transporting the mails but primarily as compensation for maintaining essential American-flag shipping services outside our tariff barriers which would otherwise be impossible in the face of competition from foreign shipping built and operated with labor on wage scales greatly lower than our own.

The opponents of our shipping policy fail to realize the determination of the American people to have a merchant marine. They fail to visualize the consequences of the only alternative to a privately owned and operated merchant marine—that of a marine provided through Government ownership and operation. Experience of the decade following the war taught us that ownership and operation by the Government is both undesirable and costly. The actual costs were much greater than under our present system, and the results were greatly inferior.

Another essential fact apparently overlooked by those who would scuttle the American merchant marine is its indispensability as an adjunct to the national defense, of even greater importance since the limitation of naval armaments. This and the greatly increased interest in overseas trade routes serving the commerce of the different countries represent changes in the world situation which all concerned must take into account.

The United States is in the midst of application of its new and soundly established shipping policies. Under these policies the Government has practically eliminated itself from the shipping business, our essential trade routes are being efficiently maintained, and 42 vessels totaling 463,000 gross tons, adapted to modern requirements and costing $156,000,000, have in the past five years been built in American yards, giving employment to labor and industry not only in the yards but also throughout the country for materials and equipment. The present business depression has now almost stopped the construction program and has thrown heavy burdens upon operators of shipping lines. These condi-

tions, however, in no way affect the soundness of our permanent shipping policies. Rather do they emphasize their importance.

That our policies are moderate and are operating to secure for American shipping only a very modest share of our overseas trade is shown by the fact that in 1931 our shipping carried only 35 per cent of that trade expressed in value and 37 per cent expressed in tonnage.

The chamber's long-continued efforts and support for sound national shipping policies were outlined by the president of the chamber in an address, which is printed herewith, before the Sixth National Conference on the Merchant Marine, held under the auspices of the Shipping Board in the national chamber building on January 4, 1933. The chamber's policies, as described in the address, seemed to be in entire harmony with the views expressed by all speakers at the conference, including Members of Congress, Cabinet officers, and other Government officials having to do with shipping, representatives of the shipping industry, and spokesmen for shipper and foreign-trading interests.

This summary of the chamber's position regarding our national shipping policies is presented in the hope that it will be of assistance in correcting erroneous impressions upon the subject.

HENRY I. HARRIMAN, *President.*

JANUARY 24, 1933.

Mr. WHITE obtained the floor.

Mr. ODDIE. Mr. President, will the Senator from Maine yield?

Mr. WHITE. Certainly.

Mr. ODDIE. I move that when the Senate recess to-night, it recess until 12 o'clock noon to-morrow.

The motion was agreed to.

Mr. COPELAND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Bankhead	Dale	La Follette	Schuyler
Barbour	Davis	McGill	Sheppard
Barkley	Dickinson	McKellar	Shipstead
Bingham	Dill	McNary	Smith
Black	Fess	Metcalf	Steiwer
Blaine	Fletcher	Moses	Thomas, Okla.
Bratton	Frazier	Oddie	Townsend
Bulkley	George	Pittman	Trammell
Bulow	Grammer	Reed	Vandenberg
Byrnes	Hale	Reynolds	Walsh, Mass.
Capper	Hayden	Robinson, Ark.	Watson
Connally	Hebert	Robinson, Ind.	White
Copeland	Johnson	Russell	
Costigan	Keyes	Schall	

Mr. WALSH of Massachusetts. I should like the RECORD to show that my colleague [Mr. COOLIDGE] is out of the city by reason of illness in his family, and will be absent the remainder of the evening and perhaps to-morrow.

The PRESIDING OFFICER. Fifty-four Senators have answered to their names. A quorum is present.

The question is on the amendment of the Senator from Tennessee [Mr. MCKELLAR].

Mr. WHITE. Mr. President, if time permitted, I should undertake to controvert many of the statements of fact made by the Senator from Tennessee and all the conclusions drawn therefrom. I address myself not to the language of the amendment, not to its immediate consequences, but to what I conceive will be the ultimate result if the amendment should be adopted.

Mr. President, this amendment challenges the merchant-marine policy of the United States as declared in the legislation of Congress. It assails directly the efforts that are being made under that legislation to restore the American ship to the sea. I conceive the amendment to be against the interests of our country, for I hold it to be fundamental that for the spread of our trade, for our commercial independence, and for our national security we should have a great and a prosperous American merchant marine.

Mr. President, in the years before the great World War there were carried in American ships of those things which we sold to foreign nations and of those things which we bought less than 10 per cent, while over 90 per cent of the export and import trade of this country of ours was carried by foreign ships; and that 90 per cent accurately represented the degree of our dependence upon alien and, in a commercial sense, hostile agencies. When the World War came in 1914 there was demonstration of the truth of this statement.

In 1914, Mr. President, we had in the overseas trade of the United States just 17 ships flying the American flag. When that war came, when foreign-flag ships were withdrawn from our trade, we saw at all the ports of the United States, the docks and warehouses and railroad terminals, and freight cars stretching miles into the interior, filled with goods of America, the products of our farms and our fields and our factories, unmoved and immovable. We moved then not the things which America desired to sell but only those things which foreign nations chose to transport. As a result of that situation, in the absence of American ships, we saw freight rates mount to intolerable heights. We saw the freight on cotton jump from 35 cents a hundred pounds to $11 a hundred pounds; we saw the freight on wheat jump from 8 cents a bushel to a maximum of $1.36 a bushel; we saw the freight on flour jump from 10 cents a hundred pounds to $1 a hundred pounds; and throughout the whole freight schedule we saw the freight rates rise ten times over. In that situation and because of our want of ships, the American farmer, the American manufacturer, and the American merchant paid in excessive freight rates an amount more than this legislation would cost in a hundred years of time; and we suffered, too, the humiliation of our impotence.

It was out of these circumstances and of our necessities that there sprang the great program of shipbuilding during the war and immediately thereafter. We built almost 2,500 ships of a gross tonnage of ten and a quarter millions, and we paid therefor approximately $3,500,000,000, taken from the taxpayers of this Nation. For a time, as a result of that great shipbuilding program, it seemed as though this country was to have once more its place upon the sea. Those ships were a mass product, and it was found they were inadequate for many trades and for many purposes of trade. The Shipping Board established some 38 lines to the different ports in various quarters of the world with these ships. But they were a mass product and it was found that they were inadequate for many trades and types of service. They were, too, of slow speeds; and as soon as normal conditions were restored throughout the world, we awoke to the realities of our situation. Soon old influences began to exert themselves, and we found ourselves faced with the deplorable fact that the percentage of goods carried in American ships was once more shrinking. Mr. President, from 1921 to 1927 we saw a constant shrinkage in the percentage of goods carried in American ships. In 1921 we carried in American ships approximately 55 per cent of the things we bought and sold. In two years' time it had fallen to 44 per cent, in three years more to 34 per cent, and when 1927 came we were carrying in our ships only 32 per cent of the overseas foreign commerce of the United States.

During that period of time, from 1921 to 1927, out of 59 great ports of the United States through which our export and import trade flowed, foreign ships showed a gain in the percentage they carried in 47. America held her own in but 12 of those ports. In that year, 1926—and I speak of that year because it was the last full year before we began the consideration of this merchant-marine legislation—in that one year 33 foreign nations participated in our carrying trade, and we paid to them in round numbers $600,000,000 for carrying the products of this Nation and bringing to us the things that American money had bought. In the 10 years of time, from 1921 up to 1931, we paid to foreign nations approximately $6,000,000,000 for carrying these commodities of the United States—$6,000,000,000 to be added to those other billions that with prodigal hands we had poured into the coffers of the nations of Europe.

Those were the outstanding commercial facts from 1921 up to 1927.

What was the story with respect to shipbuilding in that time?

Senators, during that period of time from 1921 up to 1927, when we began the consideration of this legislation, there were built in the world, of seagoing vessels of 4,500 gross tons, approximately 7,900,000 tons; and America's contribution was 309,000 tons. That total was made up of 1,039 ships; and America built, of those 1,039 ships, but 41. There were included in that total 307 modern motor ships, and

America's contribution was but 2 of those modern motor ships.

Senators, in that period of time foreign nations built and put into the trade of the United States more than 800 new ships; and here in this country of ours along the Atlantic seaboard, around the turn of the Gulf, up that great Pacific coast, there was not built by an American shipyard for the overseas trade of the United States a single ship. Eight hundred new ships were put into this trade of ours by foreign nations, and not a single ship built in America for the overseas trade of the United States!

What is the significance of those shipbuilding figures?

First of all, they demonstrate that we here in this country were undertaking to hold the markets of the world and to extend this foreign trade of ours with ships that were old and ships that were slow, in competition with foreign nations having ships that were new and modern, ships of speed.

If there is one thing that the story of transportation shows, it is that in this day speed and service are almost synonymous terms; and we could never hope to expand, through the aid of the American ships, this commerce of ours unless we had ships able to compete with the ships of the world.

Those figures demonstrate another thing—that we were in danger of losing, here in this United States of ours, the physical capacity and the technical capacity to build a modern seagoing ship.

Before the Great War, in 1916, we had in the United States 22 shipyards capable of building a modern seagoing vessel. During the war that expanded to 211 yards. When 1927 came, on all the coasts of the United States we had just 12 shipyards capable of building a modern seagoing vessel, and not one of those shipyards was active. Great Britain alone had 57 such yards.

We were told that if that condition continued, the time would come within a short lapse of years when there would not be in this country of ours either the physical or the technical capacity to build a modern combination cargo and passenger ship.

That was the story of our shipbuilding situation that confronted the Congress when 1927 came around.

Then we were faced with the problem of our national defense.

Senators, when 1927 came, and we looked about the world and considered the auxiliary ships available to the Navy of the United States, and then looked abroad and compared our situation with that of foreign nations, what did we find?

Of ships of 4,000 tons and over, and of 15-knot speed, capable of conversion to military purposes, Great Britain alone had 227, and we had only 70 nondescripts.

What is the use of talking about naval parity of this country of ours when Great Britain, in auxiliary ships of the merchant marine, outratios us 3 to 1?

Then we looked abroad, and we saw the shipbuilding programs of these nations under which they were building or proposing to build great superliners; and why were they embarked upon that program, Senators? Those superliners are restricted by no naval agreements; and yet those liners possess a potential military value as great as that of many of the cruisers permitted by present naval limitations. These ships have a speed equal to that of permitted cruisers. They have a greater cruising range than permitted cruisers. They carry guns upon a stabler base than many of these new ships of war. They can carry planes and thousands of troops; and Great Britain and Italy and Germany and France were projecting these programs, planning the building of these great liners, not alone for commercial purposes, but that they might have in the hour of need weapons of offense and of defense as well.

That was the situation that confronted us when the Seventieth Congress came into being, and brought us face to face with the problem of legislating for the American merchant marine.

The alternatives that presented themselves were perfectly clear. We could have done nothing. We could have followed a policy of inertia and inaction. We could have continued idle while the obsolescence of our fleet continued. We could have seen this great investment of $3,500,000,000 becoming worthless. We could have permitted our dependence upon foreign nations to continue to grow. That was one choice of policy.

Another alternative presented to us was the building of a great merchant fleet by the Government of the United States, and the continuance of the Government of the United States in the operation of commercial ships. There immediately was presented, as we considered this alternative, a great replacement program, for by 1928 most of the vessels of the United States had passed half the period of their efficient and economic life, the beginnings of a replacement program that in 10 years of time would have cost this Government at least $500,000,000, and might well have reached to $1,000,000,000; and no one was prepared to vote for that program.

The other alternative was aid for the privately owned merchant marine; the enactment of legislation which would transfer this replacement burden from the Government to the private owner; that would stop this downward trend in the percentage of goods carried in the American ship; that would mean the building of new and faster ships; and that would equip this country of ours to go out and to compete for the markets of the world. That was the course definitely and intentionally decided upon by the Congress of the United States.

The PRESIDING OFFICER. The time of the Senator from Maine has expired.

Mr. WHITE. Mr. President, I understand that under the unanimous-consent agreement I have 15 minutes on the bill.

The PRESIDING OFFICER. The Senator has 15 minutes on the bill.

Mr. WHITE. I will continue, then, as long as my time will permit.

So we entered definitely upon this program of encouragement of the merchant marine in private hands and through private operation. The legislation we passed contained two primary aids: One, loans under the construction-loan fund, and the other, aid under the postal-contract provisions of the legislation.

These loans have been severely criticized, and out of all of them there are probably 12 loans at a rate of interest which I could not and would not attempt to justify; but taking this picture as a whole, looking at them with a mind seeking the truth as to the whole picture, what do we see?

There have been authorized loans totaling approximately $148,000,000. Out of those loans there are just 12 that bear an effective rate of interest less than 3 per cent. In that total, from the time the original act of 1920 was passed, containing the construction-loan fund, to this hour, the average effective rate of interest on all those loans is 4 per cent or over. On the first of this year, out of that total of $148,000,000, there were in arrears just $2,223,000 in principal and interest—$2,223,000 in arrears out of authorized loans of $148,000,000!

And what has it cost?

Those construction-loan funds to this hour have cost the Government of the United States nothing; for the average of 4 per cent which is charged and paid upon these loans is more than the Government of the United States has paid for money since the act of 1920 was passed and the construction-loan fund established. Average it all; take them all as an entirety; they have cost the Government of the United States nothing to this good hour. But through them there has been credit furnished; there have been funds furnished under which this great construction program could be undertaken; and under those loans there have been constructed, or there are in process of construction, or there are to be constructed, 57 vessels in shipyards of the United States, and 42 vessels reconstructed.

That program, I say to Senators, in these dark days of the last three years has meant the employment of more than 40,000 men for two years and a half of time. Forty thousand men through two years and a half of time put

at work and kept at work, at no expense to this time to the Government of the United States itself.

Then there was the mail-contract provision of the law. Under that—and I have to hurry on—there have been contracts let for 43 lines running from the ports of the United States to the ports of the world. Those contracts call for the building of 54 new ships and the reconditioning of 58 other ships in American shipyards.

That is the story of what has been accomplished to this time. You ask me what it has cost. I tell you that the construction-loan fund has cost this Nation as a whole and in its entirety not a cent to this day.

What has the mail-contract provision of the law cost us? Why, back in 1931 we spent, for this mail title, $18,818,000. The carriage of that mail under a poundage basis would have cost $2,710,000. That is a net cost chargeable to these contracts of $16,108,000. But what have we saved by that expenditure? If we go back and average the expenditure, the administrative expense of the Shipping Board and the operating losses of the Fleet Corporation from 1921 to 1926, we find that it averages $40,430,000 a year.

We cut that administrative expense and those operating losses through the influence of this legislation, so that in 1931 it was $6,346,000, and that represents a saving from those administrative expenses and those operating losses of the years preceding this law of approximately $34,000,000. And that is a saving of more than twice what this mail title of this legislation cost in 1931. The figures for 1932 closely parallel those of 1931.

Mr. President, what have we accomplished by this legislation? I have told the Senate of the building of new ships, but there is more than that to its credit. We stopped the downward trend in the percentage of goods carried in American ships. What does that mean? I said, when I began talking, that in 1914 we carried less than 10 per cent of American goods in our ships. From 1923 to 1932 we have carried approximately one-third. In this latter period of time the total tonnage of freight of the United States moving overseas by water was about 953,000,000 tons, its value was about $67,000,000,000, and there was paid for that service approximately $9,000,000,000. Three billion of it under this legislation, and under the expenditures we have made for American ships, came to the United States.

If we had continued the old rate of 10 per cent, instead of the United States receiving $3,000,000,000, it would have received $900,000,000. Instead of paying $6,000,000,000 to foreign nations, we would have paid $8,100,000,000. By the operation of this law, by our efforts to build an American merchant marine, we have transferred from foreign nations in 10 years' time to this country a national income of $2,100,000,000. We have transferred that vast sum from foreign ships, from foreign nations, from foreign interests, and have added it to the national income of the United States. That is $210,000,000 a year or ten times what this legislation has averaged to cost a year. I ask whether that is worth while.

Mr. President, in 1914 we had 17 American ships in the overseas trade of the United States. To-day we have 388 ships flying our flag and going to the markets of the world. To-day by virtue of these mail contracts there are going out from more than 60 ports of the United States American-flag ships to 550 ports of the world. I say, Senators, that there never was a foreign-flag ship that was a salesman for American goods, but wherever American ships go there we find an expanded American trade.

Something was said here the other day about the good old days back before the war. Reference has been made this evening to the American West African Line, and I recall definitely the fact that in 1914 not a single American ship was engaged in trade with Africa. The total of our trade with Africa in that year was $47,000,000, and in 1927, 19 American ships went to Africa and our trade was $200,500,000, an increase of 325 per cent.

In 1914, five ships only flying the flag of our country went to South America in peaceful trade, and the total commerce of this country with South America was $347,000,000. In 1927 there were 89 American ships in that trade, and the value of the trade was a billion dollars.

In 1914, out from the Pacific coast to the Orient went just five American ships. In 1927, from the Atlantic coast and from the Pacific coast, there went to the Orient more than 140 American ships, and the trade with the Orient had jumped from $380,000,000 to $1,800,000,000, an increase of 380 per cent.

Senators may study the figures, and there will come to them demonstration and recognition of the truth known to the fathers of the Nation, that wherever the American ship goes there goes expanded trade for this country of ours.

Senators, through the country, even in high places, we hear raised voices urging repudiation, defending the breaching and dishonoring of contracts. There are those who would haul down our country's flag from its peak and put upon this country of ours the shackles of commercial slavery. I am unwilling, Mr. President, to believe that that is the desire of the American people. I am unwilling to believe that in the Senate of the United States that theory will find approval.

Mr. FRAZIER. Mr. President, I would like to ask the Senator from Maine a question. It has always been hard for me to understand why foreign shipping interests seem to take the trade away from American shipping interests and why it is that our own shipping interests here in the United States can not compete successfully in the foreign trade.

Mr. WHITE. It comes because of a cost differential, in the first instance, and then an operating and subsistence differential against the American ship. To illustrate it briefly, and speaking very generally, because I have no particular ships in mind at the moment, let us take a ship that costs to build in the United States a million dollars. A similar ship could probably be built in Great Britain for $600,000. There would be a capital differential of $400,000. That is the first difficulty.

Mr. FRAZIER. Is that because of the cost of labor?

Mr. WHITE. Very largely, because in the building of one of these modern ships at least 75 per cent, probably 78 per cent, goes to labor. There is an operating differential, there is a subsistence differential, and then, more than that, notwithstanding those differentials in favor of the foreign-flag ship, there is not another maritime nation in the world that has not aided its shipping.

Great Britain began subsidizing her merchant marine away back in 1847, and she never has given up that policy of extending aid to British shipping. Take the *Lusitania* and the *Mauretania*, two great ships. She loaned to the Cunard Co. the entire cost of building those ships. She paid them, in addition to that, a postal subvention, and she paid them a naval subvention, and the *Mauretania* stands the Cunard Co. not a nickel to-day.

She did more than that. I did not know I was to speak on this, and I speak purely from recollection. Along about 1921 Great Britain established a fund to aid Britishers in building their ships, and a trade facilities fund also. She has put into that fund since 1921, roughly, £70,000,000, and it is going out to aid British shipbuilders, notwithstanding these differentials in their favor, and to aid British companies in the expansion of their foreign trade.

France has done the same thing. France began her shipping subsidies in 1881, and she has never stopped it from that day to this. Germany began it in 1886. Germany has kept it up, except for those dark days, for her, of the war.

The PRESIDING OFFICER. The time of the Senator from Maine has expired.

Mr. FRAZIER. Mr. President, I wanted to ask the Senator from Maine if he thinks it will be necessary for the United States to continue this so-called subsidy if we are to keep our American merchant marine in operation.

Mr. WHITE. I hope it will not be necessary. I believe it will not be necessary to continue it indefinitely. If we to-day had a loyalty among the American people comparable with the loyalty of the British to the British ships, and if we carried in American ships to-day the same proportion of

goods that the Britisher ships in British ships, I think that even to-day we could maintain the merchant marine of ours without governmental aid. I believe that if we will persist in this policy with courage and with faith, the day will come when governmental aid will not be necessary for the American merchant marine.

Mr. GEORGE. Mr. President, I wish to ask the Senator from Maine a question.

The PRESIDING OFFICER. The Senator may do so in the time of the Senator from Georgia.

Mr. GEORGE. In my own time; yes. The Senator from Maine has given great study to this matter; he was one of the joint authors of the Jones-White law, and I desire to ask him if there is any question about the right of Congress to compel a modification of these contracts by reduction of the appropriation? Has the Senator made an investigation of that question?

Mr. WHITE. Mr. President, I do not want to be disrespectful in anything I say, or to question the motive of any person, but I think that when we have entered into 54 contracts, under which 54 shipping lines are being paid money, and when on the strength of those contracts they have obligated themselves to huge expenditures of money, and have assumed other heavy burdens, that then to cut that compensation half in two is bad faith on the part of the American Congress.

Mr. GEORGE. I am not asking the Senator about bad faith. I am reasonably capable of making my own judgment upon that point, with the same respect to the Senator.

Mr. WHITE. I beg the Senator's pardon.

Mr. GEORGE. I am asking the Senator about his opinion as to the validity of the contracts, and I am asking the question because I want information.

Mr. WHITE. I may not be able to give the Senator the information he desires.

Mr. GEORGE. Can the amounts contracted to be paid to these companies, respectively, be reduced without violating the contracts?

Mr. WHITE. I would say this without reference to any specific or particular contract: There is in the law authority lodged in the Postmaster General to prescribe generally the terms and conditions of these contracts, and what he may do in a given case depends upon the terms of the particular contract involved. It might give him a measure of authority with respect to changing ports of call and the number of sailings required. That would be governed by the contract itself. When a contract has been made, we will say, with the American West African Line, for illustration, and when that line starts out from New York with a contract which takes it to the west coast of Africa, with various ports of call over there in West Africa named, I have no doubt that under the terms of that contract the Postmaster General could vary somewhat those ports of call on the African coast. I assume that is written in the contract in that form. If it is there, then I answer yes; but I do not believe he could tear the heart out of that contract by cutting down, cutting out, and in effect eliminating that trade altogether. I do not believe that contract or any other gives such sweeping powers of change.

Mr. GEORGE. Mr. President, I was asking for information solely.

Mr. FLETCHER. Mr. President, will the Senator yield?

Mr. GEORGE. I should be glad to yield to the Senator to give me the information, because I do not want to abrogate a contract if there is no proper power in Congress to do so.

Mr. FLETCHER. Mr. President, on that subject, we will say that a contract calls for so many round trips a year. The Postmaster General might be able to say that, instead of making delivery once in two months, or once in a month, the company shall cut the trips down to once in every three or four months. But that would not serve the purpose of the contract at all. That would not serve the interests of the country and the public. That would not increase our trade. The Postmaster General might be able to say, "Well, your contract calls for mail delivery once a week. I am going to make you deliver the mail once every two weeks." He might be able to do that, and perhaps reduce the compensation by lowering the number of trips a ship might make, but in doing that he would destroy the effectiveness of the service.

Mr. GEORGE. I appreciate the Senator's observations on that point. I have no doubt there is great force in them. But what I was particularly trying to ascertain was whether or not the number of deliveries and the duration of the contracts might, without violation of the contract, actually be reduced or changed or modified by the Postmaster General. Of course, I understand that whether or not the contract would serve the real purpose which Congress had in mind would be a different question. I have not given any study to the contracts; I have had no opportunity to do so, and, frankly, a hurried reading of them indicates to my mind that within limitations the Postmaster General might reduce the number of trips or deliveries, and since all the contracts are payable on a mileage basis, that would have the effect of reducing the amount actually paid to the contractors or the shipping companies.

Mr. FLETCHER. The Senator may be right about that, but in case that was done it would be the same as making a contract for carrying mail from Habana to Liverpool and making deliveries once a month, whereas good service would require that deliveries ought to be made once a week. He might be able to change it, but if he did, then there would be no good service, and the mail might as well go by freight.

Mr. GEORGE. That might be. I am merely making inquiry about how far the contracts ought to be observed because they are contracts.

Mr. COPELAND. Mr. President, will the Senator yield to me?

Mr. GEORGE. Certainly.

Mr. COPELAND. If the Senator will bear with me a moment, let me say that I was so impressed by the arguments presented in the committee at various times by the Senator from Tennessee [Mr. McKELLAR] that I sought to find out about the validity of the contracts. I have here an opinion which was rendered to me by a competent attorney on that subject. It is so long that I think it would be unfair to take the time of the Senate to read it, but it is very plain that if the Senate should adopt these amendments it will be in effect charging a failure in his duty upon the Comptroller General. These contracts have to be submitted to him. The Postmaster General agrees upon the terms of the contract, makes the contract, and turns it over to the Comptroller General, who passes upon the legality of it.

Mr. President, I will ask that this memorandum be inserted in the RECORD at this point, because it is too long to read.

Mr. McKELLAR. Mr. President, may I inquire of the Senator from New York who prepared the memorandum?

Mr. COPELAND. An attorney in New York.

Mr. McKELLAR. Would the Senator mind giving his name?

Mr. COPELAND. He is my personal friend and attorney.

Mr. GEORGE. Does the attorney give it as his opinion that the contracts can not be modified at all?

Mr. COPELAND. They can be in certain minor particulars, but the saving which would follow would, in my opinion, be infinitesimal.

The PRESIDING OFFICER. Without objection, the memorandum will be printed in the RECORD, as requested.

The memorandum is as follows:

VALIDITY OF MAIL CONTRACTS

All of the ocean mail contracts have been made under and pursuant to the merchant marine act, 1928.

Section 402 of said act made it the duty of the Postmaster General to certify to the Shipping Board what ocean mail routes, in his opinion, should be established and operated.

Section 403 provides that the board shall as soon as practicable after the receipt of such certification from the Postmaster General determine and certify to him the type, size, speed, and other characteristics of the vessels which should be employed on each route, the frequency and regularity of their sailings, and all other facts which bear upon the capacity of the vessels to meet the requirements of the service stated by the Postmaster General.

The board in making its determination shall take into consideration the desirability of having the mail service performed by vessels constructed in accordance with the latest and most approved types, with modern improvements and appliances.

Section 404 authorizes the Postmaster General to enter into contracts with citizens of the United States whose bids are accepted for the carrying of mail between ports between which it is lawful under the navigation laws for a vessel not documented under the laws of the United States to carry merchandise, and he shall include in such contracts such requirements and conditions as in his best judgment will insure the full and efficient performance thereof and the protection of the interests of the Government.

Section 406 of the act provides that before making any contract under the merchant marine act for the carrying of mails the Postmaster General shall give public notice by advertisement once a week for three weeks in such daily newspapers as he shall select in each of the cities of Boston, New York, Philadelphia, Baltimore, New Orleans, Charleston, Norfolk, Savannah, Jacksonville, Galveston, Houston, and Mobile, calling for bids for carrying of such ocean mails; or when the proposed service is to be on the Pacific Ocean, then in Los Angeles, San Francisco, Portland, Tacoma, and Seattle. The notice for bids shall prescribe the proposed route, the time when such contract will be made, the number of trips a year, the schedule required, the time when the service shall commence, the character of the vessels required, and all other information deemed by the Postmaster General to be necessary to inform prospective bidders as to the character of the service required.

Section 407 then provides that each contract for the carrying of the mails shall be awarded to the lowest bidder who in the judgment of the Postmaster General possesses such qualifications as to insure proper performance of the mail service under the contract.

The Postmaster General has testified repeatedly before the House and Senate Committees on Appropriations that he has literally carried out the mandates of the statute; that he has prescribed the route, made the certification to the Shipping Board, and thereafter called for bids and let the contract to the low bidder. One exception was the letting of a contract to the Mississippi Shipping Co., the high bidder, pursuant to a resolution of Congress directing that such action be taken by the Postmaster General.

After the award is made and before the contract is signed, it is submitted to and approved in the Post Office Department by an Assistant Attorney General of the United States assigned to that department. The Postmaster General does not pay out any money on the contracts. His department certifies to the General Accounting Office the service performed under the contract in the form of a statement, which is filed by the contractor with the postmaster at the port of departure and transmitted by the latter to the Postmaster General, who in turn passes that on to the General Accounting Office. This certification sets forth the amount of mail compensation estimated by the Post Office Department to have been earned under the contract. From that point on all financial transactions under the contract are in the hands of the General Accounting Office.

By the act of June 10, 1921, Congress created an establishment of the Government to be known as the General Accounting Office, which should be independent of the executive departments and under the control and direction of the Comptroller General of the United States.

The act referred to provided that there should be in the General Accounting Office a Comptroller General of the United States and an Assistant Comptroller General of the United States, who should be appointed by the President with the advice and consent of the Senate. These officers were to hold office for 15 years, and the Comptroller General was made ineligible for reappointment.

Section 305 of said act provided that all claims and demands whatever by the Government of the United States, or against it, and all acts whatever in which the Government of the United States is concerned, either as debtor or creditor, shall be settled and adjusted in the General Accounting Office.

Section 313 of said act expressly provided that the Comptroller General should specially report to Congress every expenditure or contract made by any department or establishment in any year in violation of law.

The law is clear that no payment can be made under any mail contract except by and through the General Accounting Office, which is under the control of the Comptroller General, whose express duty is to specially report to Congress any contract made in violation of law.

The fact is that the Comptroller General has not reported any mail contract as made in violation of law, but has consistently approved the payments under the contracts.

The constant charge of Senator McKELLAR that the mail contracts which have been let by the Postmaster General pursuant to the merchant marine act, 1928, are illegal is tantamount to a charge against the Comptroller General that he has failed to carry out the mandate of Congress in the administration of his office.

If the Senate adopts the amendments to the bill proposed by the Senator from Tennessee, it will in effect be charging a failure in his duty upon the Comptroller General. Certainly no evidence of any character had been produced either before the Appropriation Committee or before the Senate which justifies an action of that drastic character.

If the Senator has any evidence by which the legality of one of these contracts could be challenged, he should lay that evidence before the Comptroller General, whose duty it is to pass upon the validity of the contract, and not ask the Senate to usurp the functions of the Comptroller General. Thus it is clear that there is no basis by which the Senate can justify the withholding of appropriations to carry out the contracts which the Comptroller General finds are valid unless Congress means by that action repudiation of contracts which have been made in good faith and carried out under the provisions of a law which was passed after great deliberation to aid in building up the American merchant marine.

There are instances too numerous to mention where the Comptroller General has withheld payments under many forms of contract where any question of illegality was involved and forced the claimants into the Court of Claims for a judicial determination of such contract. He can do the same in connection with any of the mail contracts if he deems them in any respect illegal.

Thus there already exists the machinery by which the validity of any contract can be tested in the courts, and the action withholding appropriations which is here proposed is not only unnecessary but nothing other than a direct repudiation of the contracts as an entirety.

Mr. BINGHAM. Mr. President, the amendment offered by the Senator from Tennessee will cause great rejoicing in London and in British shipping circles. They have been looking forward to this for some time with anticipatory hopes.

In the New York Times of January 27, 1933, Sir Harry Goschen, chairman of the National Provincial Bank of London, is reported to have said:

When the American people and Congress can be cured of the excessive nationalism that makes them compete with other people's shipping with vessels subsidized at the expense of the American taxpayer, a new day will have dawned for America.

"When the American people and Congress can be cured of the excessive nationalism that makes them compete with other people's shipping with vessels subsidized at the expense of the American taxpayer!" Certainly Mr. Harry Goschen, chairman of the National Provincial Bank, would be delighted if the amendment offered by the Senator from Tennessee, which would interfere with this subsidized competition, could be adopted.

In the New York Times for January 26 is a dispatch from London, from the special correspondent, in which it is said:

There is much satisfaction here because the beginning of Anglo-American debt discussions is appreciably nearer. In those discussions the British will be happy to include any or all of the economic troubles of the world, even such matters as shipping subsidies, which have aroused complaint among British shipowners.

Evidently we are getting ready to please our friends the British by destroying the shipping subsidies even before the conference meets, and will have nothing to trade with them in that regard. They had expected us to come trading, and they had expected us as a result of force to withdraw these subsidies, but my good friend from Tennessee is willing to meet them beforehand and withdraw the subsidies and please the British shipping interests right away.

In an article by Frederick William Wile, surveying the situation and the possible arrival in Washington in March of the special British envoys, he said that one of the matters which they are particularly anxious to discuss is merchant-marine matters, and that—

British shipping magnates have recently indulged in somewhat intemperate remonstrances against government assistance to United States shipowners.

Evidently the Senator from Tennessee has been listening to these same intemperate remonstrances against Government assistance to United States shipowners.

Our none too successful attempts to establish a merchant marine capable of offering genuine competition to British shipping are causing increasing concern in the British navigation world—

And to the Senator from Tennessee may I add. In the Liverpool Journal of Commerce annual review of January, 1933, W. L. Hichens said:

British shipowners and shipbuilders are suffering from two major evils to-day—one is economic nationalism and the other foreign subsidies to ships and shipping. Both are disastrous to a country whose home is on the sea, and both should be tackled vigorously. As regards the latter, it seems to me that subsidies are a form of economic warfare.

Evidently the Liverpool Journal of Commerce would likewise be delighted if the amendment offered by the Senator from Tennessee should be agreed to.

In the Daily Telegraph of London, December 22, 1932, is this article:

> There is no dispute about the facts. Long experience had proved that American shipping was quite incapable of competing on level terms with that of other countries, and especially in this country, in the world's transport market. The statute passed to remedy this state of affairs—

I presume reference is made to the so-called Jones-White bill. We have just heard a most eloquent and forceful argument from one of the authors of that bill as to why that policy was wise which the Congress adopted then and which should be continued.

> The statute passed to remedy this state of affairs proceeded frankly on the principle that to build up a great American merchant service was worth whatever it might cost the Nation. Where no large merchantman was built before the passage of that law, 50 had been built or laid down since and many more are projected. This is dumping in its purest form.

It is "dumping" for us to subsidize our shipping so it may compete with British shipping. Evidently the British would be delighted if this amendment were adopted.

It is difficult for some of us who have traveled in various parts of the world before the Jones-White Act was passed, and who regretted the absence of the American flag from nearly all ports of the world, to realize the truth of the statement made recently by the president of the United States Chamber of Commerce in an article on the American merchant marine, where he said that our shipping carried 35 per cent of American overseas trade in 1931, 37 per cent expressed in tonnage and 35 per cent expressed in value. He said:

> That our policies are moderate and are operating to secure for American shipping only a very moderate share of our overseas trade is shown by the fact that in 1931 our shipping carried only 35 per cent of that trade expressed in value and 37 per cent expressed in tonnage.

He said further:

> The United States is in the midst of application of its new and soundly established shipping policies. Under these policies the Government has practically eliminated itself from the shipping business, our essential trade routes are being efficiently maintained, and 42 vessels, totaling 463,000 gross tons, adapted to modern requirements, and costing $156,000,000, have in the past five years been built in American yards, giving employment to labor and industry not only in the yards but also throughout the country for materials and equipment. The present business depression has now almost stopped the construction program and has thrown heavy burdens upon operators of shipping lines.

Mr. President, the Senator from Tennessee has called attention to the fact that we are paying what seemed to him ridiculous amounts of money for carrying very small quantities of mail. It is perfectly well known that the reason for giving these mail contracts is to permit lines to run under the American flag from American ports to foreign ports which had not been able to do so under previous conditions. That the act has been successful in causing the building of a large number of new vessels no one will deny. In our South American trade a few years ago, before the war and immediately after the war, our own vessels under the American flag going to South America were so poor that Americans themselves frequently crossed the North Atlantic to take vessels from England and France in going to Argentina and Brazil because they desired to travel on comfortable vessels. In going to South American ports they frequently traveled on German or British ships in order to have comfortable quarters on vessels. Due to this act and the granting of these subsidies, we now have vessels going to South America than which there are none better. Our trade with South America has steadily increased.

For us, in the midst of contracts granted in pursuance of that policy, to cause a destruction of the belief of our own people in the good faith of the United States Government and strike a blow at the American flag flying over the merchant marine carrying, as it does, American crews with American supplies, carrying American merchandise to foreign ports at rates that are reasonable and which would have to be far greater and probably destroy our business if the subsidies were not granted, seems to me an act of sheerest folly. Of course, it would please our cousins across the sea. There is no doubt whatsoever that the London Times and these papers from which I have quoted would contain expressions of great approval from British shipping interests and shipbuilding interests that American competition, which now they are feeling extremely in overseas trade, would receive a body blow.

Mr. President, I hope the amendment offered by the Senator from Tennessee, which would give so much comfort to them and so much discouragement to our own people who are engaged in this business, will not prevail.

Mr. WALSH of Massachusetts. Mr. President, it is quite evident the proposal of the Senator from Tennessee [Mr. McKELLAR] has created a great stir among the advocates and supporters of the American merchant marine. At a convention held in this city recently, called the Sixth Annual Merchant Marine Conference, a committee was appointed to examine into the effect that this amendment would have upon the American merchant marine. They adopted resolutions. I want to read them for the consideration of the Senate.

I do not think it can fairly be said that all the representatives attending this conference were lacking in public interest and were controlled or influenced in their opinions by selfish motives. The statement of the committee is as follows:

> Certain proposals now pending in Congress, if not properly considered, may very easily destroy the entire American merchant marine engaged in foreign trade, with a resultant loss of millions of dollars a year to American industry, agriculture, and labor.
>
> The present American merchant fleet has been developed under definite laws of Congress, one of which is an act authorizing the Postmaster General to make ocean mail contracts with essential steamship lines as a Government aid to the establishment and maintenance of such lines. Forty-four mail contracts for 10-year periods have been made since 1928, when the act was passed.

Forty-four contracts have been made under an act of Congress.

> They constitute the very foundation upon which the American overseas merchant marine exists. They were entered into as legal, binding contracts, ordered by Congress after a most careful, thoroughgoing, and painstaking investigation of every fact and phase of the question.
>
> Under these contracts private shipowners have brought the American merchant fleet in foreign trade into splendid position, although no ship company is making any real profit at this time. Six hundred American-flag ships now operate on 70 regular lines in foreign trade, as against only 17 in 1914.
>
> The Postmaster General, the Attorney General, and the Comptroller General of the United States, with the cooperation of the United States Shipping Board, each within his respective province, has passed upon these ocean mail contracts. If there is anything radically wrong with any particular contract, it could well and adequately be taken up for correction by the same or succeeding executive heads of these administrative institutions of the Government.

That resolution was adopted at the sixth annual meeting of a committee representing every part of the United States of America interested in the development of the American merchant marine.

Mr. FLETCHER. Mr. President, will the Senator from Massachusetts yield to me?

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Florida?

Mr. FLETCHER. I should like to interrupt the Senator from Massachusetts for just a moment at that point to say that, in addition to what the Senator states and what the telegram sets forth, at the last session of Congress the Committee on Post Offices and Post Roads was directed to investigate these very contracts, as a committee of the House was also directed to investigate them, and neither of those committees has made any report to Congress.

Mr. WALSH of Massachusetts. Have they found anything wrong?

Mr. FLETCHER. No; they have not up to this time.

Mr. WALSH of Massachusetts. Have they done nothing about the ocean mail contracts?

Mr. FLETCHER. I do not know how far they have gone. They have made no report, one way or the other; so we ought, it seems to me, in fairness, to wait for our own committees to report something wrong before we would be justified in taking such action as is now proposed.

Mr. WALSH of Massachusetts. Mr. President, the Senator from Florida is a member of the Committee on Commerce, and I hope will be the next chairman of that committee when the present minority shall become the majority, as it soon will. That committee is, I understand, chiefly and mainly interested in shipping problems, and particularly in problems relating to the development of the American merchant marine.

Mr. FLETCHER. The Commerce Committee reported out the merchant marine bills in 1916, in 1920, and in 1928.

Mr. WALSH of Massachusetts. Certainly no man in this country who is living to-day—and I make no exception, though, of the distinguished Senator who recently passed away, representing in this body the State of Washington, were here, I would have to include him—certainly no man in this country, since I have been a Member of the Senate, has shown more sincere interest in the American merchant marine and has given more attention and profound study to the problem than has the distinguished Senator from Florida, who has just interrupted me.

Now, I ask the Senator from Florida if it was not the Committee on Commerce which recommended this method of promoting the American merchant marine, namely, by having the Government enter into this kind of ocean mail contract?

Mr. FLETCHER. Yes.

Mr. WALSH of Massachusetts. They did it in 1916, 1920, and 1928; such contracts have been entered into on the basis of laws recommended by that committee and enacted by the Congress. I ask the Senator this question: Is any member of the Committee on Commerce of the Senate in sympathy with the motion of the Senator from Tennessee?

Mr. FLETCHER. I do not know of any.

Mr. WALSH of Massachusetts. So we have the Committee on Commerce, interested in the merchant marine, responsible to a considerable degree for those contracts, familiar with the manner in which they are operating, and obliged in conscience to inform us if they think the policy they suggested in 1928 has proven unwise, standing against this motion and asserting—indirectly at least, if not positively—that the proposal of the Senator from Tennessee means a very serious blow to the American merchant marine.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. WALSH of Massachusetts. I yield to the Senator from New York.

Mr. COPELAND. And more than that, may I say to the Senator, after the Commerce Committee formulated a policy which was brought to the Senate on three different occasions, in 1916, again in 1920, and again in 1928, the Senate, after due consideration, established the policy. In carrying out that policy we are not now doing anything different from what has been done heretofore.

Mr. WALSH of Massachusetts. If there is any fraud in these contracts, the next administration, which will take possession of the Government on March 4, may take steps to repudiate them. Is not that true?

Mr. COPELAND. That is true.

Mr. WALSH of Massachusetts. Mr. President, I have what might perhaps be termed some interesting testimony which I desire to present. I wish to be frank with the Senate. Representatives of the United Fruit Co., one of the largest coastwise steamship companies in the United States, operating steamships up and down the coast and to foreign ports, particularly to ports in the Caribbean Sea, called upon me. If it be permissible to say so of any capitalistic organization, I think I may say that the company referred to bears a favorable reputation among the steamship companies.

Representatives of this company expressed alarm over the proposal of the Senator from Tennessee. I frankly told the representative of the company that I was in favor of reducing the expenditures of the Federal Government; that I proposed to vote, so far as I could consistently do so, for reductions in various appropriations that would be submitted to the Senate, and I asked him to put in writing just what the relationship of his company was to these contracts, what obligations his company had assumed, and what would be the effect upon it of the adoption of the pending motion.

I am going to read the statement which he prepared and presented to me:

> On the strength of the ocean mail contracts entered into between the United Fruit Co. and the Postmaster General, the company has constructed six modern freight and passenger ships at a cost of over $20,000,000.

I ask the Senator from Florida to challenge any of these statements, because I am not familiar with the facts, but I know he is.

Mr. McKELLAR. Mr. President, if the Senator will yield, may I ask to what company he is referring?

Mr. WALSH of Massachusetts. The United Fruit Co.

The statement continues:

> These ships are now being operated on ocean mail routes 39 and 40. The mail pay to be received on these two routes during 10 years will not equalize the differential in cost between constructing these ships in foreign yards and operating them under the American flag instead of a foreign flag.

I inquire of the Senator from Florida is that a fair statement?

Mr. FLETCHER. I think it is.

Mr. WALSH of Massachusetts. I read further from the same statement:

> The company has assumed an obligation to the Shipping Board of approximately $15,000,000 as a part of the cost of constructing these ships, and there should be no reduction in the mail pay unless there is at least a corresponding reduction in the obligation which the company assumed to the Shipping Board.

In other words, I understand that in the building of these ships the mail contracts and the obligation to the Shipping Board for the money which the company borrowed with which to build the ships were correlated, and each contract had relationship to the other.

The Senator from Florida nods his head approvingly. So if we change these mail contracts, the assertion is made, as I gather from this statement, that we ought to change the contract this company has made with the Shipping Board. Is that a correct statement?

Mr. COPELAND. Yes; and let me say——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from New York?

Mr. WALSH of Massachusetts. Yes.

Mr. COPELAND. Let me say that we have outstanding over a hundred million dollars of loans to shipping companies.

Mr. WALSH of Massachusetts. And those loans were based upon a rate of interest that had a relationship to the mail contracts of those companies?

Mr. COPELAND. The Senator is correct.

Mr. WALSH of Massachusetts. I proceed with the statement:

> The fruit company built these ships only on the strength of the mail pay to be received, and it would be a gross injustice to cancel or reduce the mail pay and still leave the fruit company burdened with the large capital obligation involved in having constructed these ships.

I said to the representative of the company during the course of the conversation, "We are going to reduce the air mail contracts, and why should we not reduce these?" Here is the response he made to that inquiry:

> Unlike an airship, an ocean-going ship of this type involves an expenditure of over three and a half million dollars each, and its life is 25 years. The ships would never have been built except for the mail pay.

Does anybody challenge the assertion that these ships never would have been built but for the mail contracts? I hear no contradiction.

> Under present economic conditions, the loss involved in operating these ships is very large and, in addition to the capital and operating loss involved, the fruit company has had to tie up a much larger amount of American tonnage in order to keep these new mail-pay ships operating. It therefore also has to carry the cost of these laid-up ships.

There is the statement of that company. It is the statement of an interested party, and we have got to make allowances for it.

Mr. McKELLAR. Mr. President, when any concern is getting a subsidy from the Government, getting free money from the Government in these enormous sums, does not the Senator think it would get up some sort of excuse for holding on to it?

Mr. WALSH of Massachusetts. I should expect it to, but I have not taken its word. As I have read every paragraph of this statement, I have asked Senators of well-recognized personal integrity and of knowledge of this subject whether or not the facts stated in the statement were correct, and they have invariably vouched for all of these facts.

I now ask the Senator from Maine if this statement is a fair statement of the relationship that this and other companies have to the Federal Government as a result of these mail contracts.

Mr. WHITE. Absolutely so, Mr. President.

The PRESIDING OFFICER. The time of the Senator from Massachusetts has expired.

Mr. WALSH of Massachusetts. I will take some time on the bill, if the Chair please.

Mr. WHITE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Maine?

Mr. WALSH of Massachusetts. I yield to the Senator.

Mr. WHITE. I did not hear the statement in what the Senator read, but it is an interesting fact in connection with the United Fruit Co. that when this legislation was passed the United Fruit Co. probably had between three and four times as much foreign tonnage as it had American tonnage in terms of investment. To-day the United Fruit Co. has invested in American ships probably three times as much as it has in foreign ships. Roughly, it has increased its American tonnage by 67 per cent since this law was passed, and it has increased its investment in American ships by approximately 770 per cent since this law was passed.

Mr. WALSH of Massachusetts. I am pleased to have the statement.

I personally know none of the officials of this company. I have no political affiliations with them; but I must say that they enjoy a very excellent reputation in the community where their headquarters is located.

Mr. President, I have long been a great believer in building up the American merchant marine. I have advocated treating the merchant marine as an auxiliary to our Navy. I have favored reductions in naval appropriations with the expectation and hope that those moneys would be used for building up our merchant marine so that in time of war our merchant marine would be available and useful as an auxiliary to our Navy. I feel that the motion of the Senator from Tennessee, while well intended, is a very serious blow at the American merchant marine, and I therefore can not support the motion.

I want to say, however, in connection with this subject and in connection with the contracts we discussed the other day relating to the air mail, that it is regrettable that there is a feeling—subtle, underneath—that there has been some favoritism, if not something worse than favoritism, in the making of these contracts.

No evidence has been presented to us of anything improper; but it is regrettable and it is a reflection, not upon these companies, the beneficiaries of these subsidies, but upon the public officials who make these contracts. It is an indirect imputation upon their integrity as public officials.

There is no evidence of that kind before us. There is evidence of the harm that the violation of these contracts might do to these shipping interests, and there is evidence in these documents that have been read that the new administration will have ample opportunity to find out if there is anything improper or wrong.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. WALSH of Massachusetts. I yield to the Senator from Tennessee.

Mr. McKELLAR. As the Senator knows, the law requires that these contracts shall be let after very extensive advertising for bids, and shall be let to the lowest bidder, thereby attempting to secure competition in letting the contracts.

The Senator said there was no proof of anything wrong about the matter. Does the Senator consider the fact that in the case of 39 out of 44 contracts that have been let there has been no competitive bidding at all? The wording of the advertisement has brought about a condition by which only that one bidder can bid on that particular contract, thus doing away with competition and with the advertising that is necessary. Only 5 of the 44 contracts have been let on any kind of competitive bidding. Thirty-nine of the contracts show that they were let for one price to one bidder, and no other bids were asked.

Mr. WALSH of Massachusetts. I am not sufficiently familiar with that practice——

Mr. McKELLAR. Those are the facts.

Mr. WHITE. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator from Maine to answer the question in my time.

Mr. WHITE. The Senator is speaking of the United Fruit Co. Let me take that for an illustration in answering the query.

The United Fruit Co. had three contracts. In one case there was two years between the time of calling for the bids and the beginning of the contract. In another case there was three years. In another case there was a matter of months only; but there was a provision in the advertisement that the contract should begin at such a time or at such later time as the Postmaster General might fix.

The reason why these bids are limited is generally because there is an established line upon the route for which bids are called for, and also—and this is particularly true in the case of this line running down from San Francisco—because of the obligation which is imposed to build new ships.

This third United Fruit Co. contract, which ran from San Francisco, and which, I take it, is the one the Senator from Tennessee referred to, called for the building of three ships at a cost of about three and a half million dollars each; and that is the reason why there were no additional bidders on that contract—not because of any limitation upon the right to compete in bids, but because of that obligation to spend between eleven and twelve million dollars in new construction.

Mr. WALSH of Massachusetts. I appreciate the Senator's explanation.

Mr. McKELLAR. Mr. President, if the Senator will allow me for just one moment, take the lines of the United Fruit Co. which have just been suggested: I think it was those lines—I am quite sure it was—where the advertisements provided that only concerns with ships having proper refrigeration space—now, mind you, refrigeration space—were allowed to bid. It just happened that that concern was the only shipping concern that had the space required in the advertisement, and therefore no other bidder could bid on that contract.

Mr. WALSH of Massachusetts. What does the Senator from Maine say in answer to that?

Mr. WHITE. Mr. President, the answer to that is that we have 42 refrigerator ships of a total of about 215,000 or 220,000 tons, the owner of any one of which might, if he had seen fit, have bid on this advertisement and have assumed that obligation to spend between eleven and twelve million dollars.

Mr. WALSH of Massachusetts. Mr. President, I want to close by asking the Senator from Florida a question, and through him the Senator from Tennessee.

I understood the Senator from Florida to say to me a moment ago that a committee of the Senate had been appointed to investigate these contracts a year ago. Who is on that committee?

Mr. FLETCHER. It is the Committee on Post Offices and Post Roads.

Mr. WALSH of Massachusetts. That is a committee of which the Senator from Tennessee [Mr. McKELLAR] is a member. Now, I ask the Senator from Tennessee, having for a year the authority of the Senate to investigate these contracts, what evidence has he that they are fraudulent or improper?

Mr. McKELLAR. There are two sets of contracts that have been brought forward by that committee. My good friend the Senator from Nevada [Mr. ODDIE] is the chairman of that committee, and he has never been willing to call it together. Therefore, we have been precluded from making a further examination than was made by an agent whom we employed for that purpose. The result of it is found in this book of contracts, and the facts that have been adduced therein. I was in a minority on the committee, and, of course, could not control it.

Mr. WALSH of Massachusetts. Mr. President, much as I admire the Senator from Tennessee and commend his motives in proposing these reductions, I have concluded that I must follow the unanimous sentiment of the Committee on Commerce of this body, which committee is specially designated to promote and protect the merchant marine of America; and in view of their unanimous opinion that the adoption of this motion would result in grave harm to the American merchant marine, I must oppose the motion.

I yield the floor.

Mr. ODDIE. Mr. President, I should like to state to the Senator from Massachusetts and to the Senator from Tennessee, in reference to the questions and answers regarding the investigation, that the subcommittee of the Senate Appropriations Committee having charge of these appropriations covering the ocean mail had very extensive hearings last year. Those hearings were printed and filled a volume of something like 1,200 pages. The Senator from Tennessee had the opportunity, and availed himself of it, of closely questioning every shipping official who came before us, and a great many came before us. He questioned the officials of the Shipping Board and other Government officials. I refer the Senate to that set of hearings. They are very complete.

Then, in addition, the Senator from Massachusetts spoke of the legality or illegality of these contracts. I want to refer to a statement that has been previously referred to, in which it is shown what are the duties of the Comptroller General.

Section 505 of the act provides that all claims and demands whatever by the Government of the United States or against it, and all acts whatever in which the Government of the United States is concerned, either as debtor or creditor, shall be settled and adjusted in the General Accounting Office.

Section 313 of the act expressly provides that the Comptroller General shall specially report to Congress every expenditure or contract made by any department or establishment in any year in violation of law.

The law is clear that no payment can be made under any mail contract except by and through the General Accounting Office, which is under the control of the Comptroller General, whose express duty is specially to report to Congress any contract made in violation of law.

The fact is that the Comptroller General has not reported any mail contract as made in violation of law but has consistently approved the payments under the contracts.

Mr. BANKHEAD. Mr. President, it is not my purpose to enter into a discussion of the political philosophy involved in the policy of granting subsidies to shipping. Personally, I am opposed to that principle; and if this matter should come here as an original proposition, I should without hesitation record my vote against any subsidy for the maintenance of shipping, especially at this time.

I am confronted here, however, with the question not of the exercise of judgment or discretion in the matter of embarking upon or maintaining a principle of government, but whether or not we can adopt the amendment of the Senator from Tennessee [Mr. McKELLAR] without violating contracts entered into by the Government.

I am sure that all of us are very reluctant to cast a vote which has even the reasonable appearance of violating any obligation entered into by our Government. It is unnecessary to recall the denunciations that have recently been made here upon the floor of the Senate of actions by other countries in the matter of refusing to carry out their obligations. So, believing that we are all in accord upon that subject, the question is whether or not the amendment of the Senator from Tennessee will and does involve a violation of these shipping contracts.

I have not had the opportunity—and I have had no real interest in the subject—to make an examination of all of these contracts.

I have not been upon the committee. The question has arisen here, since this amendment came up for discussion on the floor. I have taken occasion to examine at least one of these contracts, that for the Waterman Steamship Co., operating out of Mobile. I am perfectly clear in my judgment, Mr. President, as a lawyer, that this amendment, or any other proposition which would reduce or change the provisions of that contract, without the consent of both of the contracting parties, would be a violation of the agreement. In my humble judgment, any lawyer upon this floor who will take the time to examine that contract will agree with that expression of opinion.

There may be some of the other contracts which can be changed without the consent of one of the contracting parties, but I can find nothing whatever in this contract that would justify Congress in doing that, except through the exercise of its arbitrary power, and not in accordance with any provision in the contract.

Briefly, this contract, after setting out the ports of call, says:

> The contractor is to be permitted to omit any port—

The Government has no right to require the contractor to omit any port, but—

> The contractor is to be permitted to omit any port or ports on each branch of the route, and with the approval of the Post Office Department may combine on one trip ports on different branches of the route, on a schedule approved by the Postmaster General, that shall include not less than 52 nor more than 72 trips per annum on the three branches of the route * * * the number of intermediate trips that shall be made between 52 and 72 per annum to be at contractor's option subject to the provisions of this contract.

Then it is further provided:

> In consideration of the faithful performance of the services and undertakings herein specified and upon receipt of satisfactory evidence thereof by the Postmaster General, the United States agrees to pay to the said contractor monthly, and as soon after the close of each month as accounts can be adjusted and settled, compensation based upon the mileage on the outbound voyages by the shortest practicable route between the ports specifically stated herein, for vessels of the classes authorized, or that may be authorized, at the following rates.

The only provision authorizing a change in this contract—and I speak of none of the others, because I have not examined them—is that upon the agreement of the Postmaster General and the contractor the rates of pay stipulated herein may be changed to accord with any law or laws which may hereafter be enacted by Congress. There is no authorization in the contract for shortening a route, for decreasing the number of routes, or reducing the pay, except by agreement of the parties.

The minimum is 52, and 72 is the maximum. The amendment of the Senator from Tennessee would cut the appropriation 50 per cent, which if uniformly applied to these contracts would require a reduction in pay of 50 per cent of all of them. It is impossible even if we reduce this contract to the minimum number of ships to bring the compensation under the contract down to 50 per cent of that required.

I submit, Mr. President, without taking further time at this late hour, that, notwithstanding my views upon the question of subsidies, notwithstanding my anxiety to reduce appropriations, I can not support this amendment. I have a consistent record upon that subject since I have first come

to the Senate. I have voted for every proposed reduction in appropriations that has been tendered upon this floor. I have voted against every proposed increase in appropriations that has been tendered. I have appealed to my colleagues who are in charge of matters to make the reductions, except in the matter of salaries, much larger than they have been made. So it is not a question of my attitude upon the question of reduction in the costs of government. It is only a question of whether or not we can attempt the exercise of reductions at a dangerous point which would involve in its execution a charge that the Government has not been faithful in the performance of its contracts; and, rather than do that, I am obliged to go on record in this case as casting my first vote since I have been in the Senate against a proposed reduction in appropriations.

I followed the leadership of my friend the Senator from Tennessee. I have been at his beck and call on all of these proposed reductions, and I would be happy if my friend and leader in the cause of economy would not press this proposition, which does violence to the consciences of at least some of us upon the subject of the duty of our Government to resolve doubts even in favor of the performance—the literal and full and complete performance—of its contracts, whether those contracts were justified in our judgment at the time of their making or not.

Mr. COPELAND obtained the floor.

Mr. ODDIE. Mr. President, will the Senator from New York yield?

Mr. COPELAND. I yield.

Mr. ODDIE. I ask the Senator whether he wants to continue to-night, or whether he would be willing that the Senate take a recess now and he continue to-morrow?

Mr. COPELAND. As far as I am concerned, Mr. President, I should welcome a recess.

RECESS

Mr. ODDIE. I move that the Senate take a recess until to-morrow at 12 o'clock.

The motion was agreed to; and the Senate (at 9 o'clock and 52 minutes p. m.) took a recess until to-morrow, Saturday, February 4, 1933, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 3 (legislative day of January 10), 1933

MEMBERS OF THE FEDERAL RADIO COMMISSION

John C. Jensen, of Nebraska, to be a member of the Federal Radio Commission for the unexpired portion of the term of six years from February 24, 1930, vice Charles McK. Saltzman, resigned.

Eugene O. Sykes, of Mississippi, to be a member of the Federal Radio Commission for a term of six years from February 24, 1933. (Reappointment.)

COLLECTOR OF INTERNAL REVENUE

Frederick W. Kavanaugh, of Waterford, N. Y., to be collector of internal revenue for the fourteenth district of New York, in place of Cyrus Durey, deceased.

PROMOTIONS IN THE REGULAR ARMY

To be colonel

Lieut. Col. Milton Garfield Holliday, Quartermaster Corps, from February 1, 1933.

To be lieutenant colonels

Maj. Robert Coker, Air Corps, from February 1, 1933.

Maj. Rufus Foote Maddux, Chemical Warfare Service, from February 1, 1933.

To be majors

Capt. Alexander Hunkins Campbell, Coast Artillery Corps, from February 1, 1933.

Capt. David Sheridan Rumbough, Field Artillery, from February 1, 1933.

Capt. Francis John Heraty, Infantry, from February 1, 1933.

Capt. Marvil Groves Armstrong, Coast Artillery Corps, from February 1, 1933.

To be captains

First Lieut. Ray Eric Cavenee, Infantry, from February 1, 1933.

First Lieut. Wade Darragh Killen, Infantry, from February 1, 1933.

First Lieut. Andrew Jackson Schriver, jr., Infantry, from February 1, 1933.

First Lieut. Frank James Lawrence, Infantry, from February 1, 1933.

First Lieut. Dorrance Scott Roysdon, Infantry, from February 1, 1933.

First Lieut. Hyatt Floyd Newell, Infantry, from February 1, 1933.

First Lieut. John Easton McCammon, Infantry, from February 1, 1933.

First Lieut. Cornelius John Kenney, Air Corps, from February 1, 1933.

To be first lieutenants

Second Lieut. Laurence Sherman Kuter, Air Corps, from January 25, 1933.

Second Lieut. William Perry Pence, Signal Corps, from January 28, 1933.

Second Lieut. Thomas Morgan Watlington, jr., Field Artillery, from February 1, 1933.

Second Lieut. William Lewis McNamee, Coast Artillery Corps, from February 1, 1933.

Second Lieut. Thomas John Hall Trapnell, Cavalry, from February 1, 1933.

Second Lieut. John Raymond Lovell, Coast Artillery Corps, from February 1, 1933.

Second Lieut. Raymond Wiley Curtis, Cavalry, from February 1, 1933.

Second Lieut. Kenneth Earl Thiebaud, Infantry, from February 1, 1933.

Second Lieut. Reynolds Condon, Field Artillery, from February 1, 1933.

Second Lieut. Charles Brundy Brown, Signal Corps, from February 1, 1933.

Second Lieut. Edward Gilbert Farrand, Field Artillery, from February 1, 1933.

Second Lieut. Mason Fred Stober, Field Artillery, from February 1, 1933.

HOUSE OF REPRESENTATIVES

FRIDAY, FEBRUARY 3, 1933

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, Thou hast taught us to pray, assuring us that it is the pathway to power and that the life built on prayer can not fail. Hearken, merciful Father, let us reach that altitude of faith in which all things work together for good to them that love God. Unlock every dark experience and disclose within it riches of unsearchable value. Be our savior by strengthening our powers of resistance, by giving us courage, vitality, and energizing our life forces. We beseech Thee, especially, be a force to mold our characters, that sets our ideas in order and that controls our conduct. Unite us in hand, mind, and heart with our brother man; may we be one with him in his toil, joy, and sorrow. In the work of to-day endow us with steady persistence, with passionate enthusiasm, and with moral and spiritual power that we may do good in Thy sight and serve wisely our country. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment a bill of the House of the following title:

H. R. 13959. An act to authorize the incorporated town of Fairbanks, Alaska, to issue bonds in any sum not exceeding

$100,000 for the purpose of constructing and equipping a public-school building in the town of Fairbanks, Alaska, and for other purposes.

INDEPENDENT OFFICES APPROPRIATION BILL—FISCAL YEAR 1934

The SPEAKER. On yesterday the House ordered a roll-call vote on what is known as the Bankhead amendment. Without objection, the Clerk will report the amendment.

The Clerk read as follows:

Page 22, line 8, strike out "$500,000" and insert in lieu thereof "$801,416."

The SPEAKER. The Clerk will call the roll.

The question was taken; and there were—yeas 165, nays 181, answered "present" 1, not voting 79, as follows:

[Roll No. 154]

Cochran, Pa.	Hall, Miss.	Manlove	Wolverton
Collier	Hall, N. Dak.	Mobley	Yates
Connolly	Hart	Oliver, N. Y.	

So the amendment was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Weaver (for) with Mr. Hollister (against).
Mr. Lindsey (for) with Mr. Wolfenden (against).
Mr. Burch (for) with Mr. Wolverton (against).
Mr. Sullivan of New York (for) with Mr. Bacharach (against).
Mr. Douglas of Arizona (for) with Mr. Hartley (against).
Mr. Kelly of Illinois (for) with Mr. Smith of Idaho (against).
Mr. Igoe (for) with Mr. Buckbee (against).
Mr. Stewart (for) with Mr. Culkin (against).
Mr. Sirovich (for) with Mr. McLeod (against).
Mr. Clague (for) with Mr. Shreve (against).
Mr. Hall of North Dakota (for) with Mr. Chiperfield (against).
Mr. Frear (for) with Mr. Beck (against).
Mr. Collier (for) with Mr. Connolly (against).
Mr. Dickstein (for) with Mr. Lehlbach (against).

Until further notice:

Mr. Ayres with Mr. Andrews of New York.
Mr. Byrns with Mr. McGugin.
Mr. Lozier with Mr. Cochran of Pennsylvania.
Mr. Schuetz with Mr. Wigglesworth.
Mr. Lambeth with Mr. Burdick.
Mr. Kennedy of New York with Mr. Cooper of Ohio.
Mr. Doughton with Mr. Golder.
Mr. Gasque with Mr. Shott.
Mr. Douglass of Massachusetts with Mr. Aldrich.
Mr. Underwood with Mr. Johnson of Washington.
Mr. Hart with Mr. Manlove.
Mr. Oliver of New York with Mr. Sullivan of Pennsylvania.
Mr. Abernethy with Mr. Yates.
Mr. Celler with Mr. Brand of Ohio.
Mr. Green with Mr. Snow.
Mr. Crump with Mr. William E. Hull.
Mr. Overton with Mr. Baldrige.
Mr. Hornor with Mr. Houston.
Mr. Stevenson with Mr. Free.
Mr. Mobley with Mr. Chase.
Mr. Brand of Georgia with Mr. Freeman.
Mr. Corning with Mr. Johnson of Illinois.
Mr. Larsen with Mr. Curry.
Mr. Tierney with Mr. Cooke.
Mr. Sumners of Texas with Mr. Finley.
Mr. Dominick with Mr. Hall of Mississippi.

Mr. BACHMANN. Mr. Speaker, the following Members, if present, would have voted against the amendment:

Mr. BALDRIGE, Mr. FINLEY, Mr. WILLIAM E. HULL, Mr. COOKE, Mr. SHOTT, Mr. GOLDER, Mr. ANDREWS of New York, and Mr. FREEMAN.

Mr. FREAR. Mr. Speaker, I am paired with the gentleman from Pennsylvania, Mr. BECK. If he were present, he would vote "no," and as I would vote "aye," I have answered "present."

Mr. COCHRAN of Pennsylvania. Mr. Speaker, I was necessarily detained at the time my name was called. If permitted to vote, I would vote "no."

The SPEAKER. The gentleman does not qualify.

Mr. COLLIER. Mr. Speaker, I would like to vote.

The SPEAKER. Was the gentleman in the Chamber, listening when his name was called?

Mr. COLLIER. I was not. If permitted to vote, I would vote "aye."

The SPEAKER. The gentleman does not qualify.

Mr. WOODRUM. Mr. Speaker, the gentleman from Arizona, Mr. DOUGLAS, is necessarily absent. If present, he would vote "aye."

Mr. GOSS. Mr. Speaker, the gentleman from New Jersey, Mr. HARTLEY, is unavoidably absent. He has requested me to announce that if he were present he would vote "no."

The result of the vote was announced as above recorded.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. WOODRUM, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. WOODRUM. Mr. Speaker, I ask unanimous consent that the Clerk may be authorized to correct the totals in the bill.

The SPEAKER. Is there objection?

There was no objection.

DAVID S. BARRY

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent to address the House for five minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. LAGUARDIA. Mr. Speaker, I would not have taken the time of the House, but I want to register a protest which I believe will meet with the approval of the membership of this House.

I have with me the February number of the New Outlook. I have the highest regard for the editor of the New Outlook, Gov. Alfred E. Smith. I have the highest regard for the publisher of the New Outlook, Mr. Frank A. Tichenor, who is a close personal friend of mine; but there is an article in this issue which I believe, without any justification or warrant, reflects upon the honor of the membership of this House. I shall not refer to the other body, as I assume they will be able to take care of themselves.

I only read five lines from an article entitled "Over the Hill to Demagoguery." The article opens in this way:

> Contrary, perhaps, to the popular belief, there are not many crooks in Congress; that is, out-and-out grafters, or those who are willing to be such. There are not many Senators or Representatives who sell their votes for money, and it is pretty well known who those few are.

Now, Mr. Speaker, I submit that a blanket statement of this kind——

Mr. BLANTON. Who wrote that kind of a lie?

Mr. LAGUARDIA. Is a reflection upon a body of hard-working men and women who, I believe, represent a splendid cross section of the American people.

Mr. O'CONNOR. Will the gentleman make it clear who is the author of the article?

Mr. LAGUARDIA. I am coming to that.

If the author of the article has this knowledge which he states—that there are any, or even one, who take money for their votes—and he knows them, I say that he ought to be compelled to make public the names and prove his statement.

Mr. Speaker, it so happens that the author of this article can be compelled to divulge the source of his information or made to admit he had no justification for his statement. He is not an officer of this body but he is an officer of the body across the Capitol. The author is David S. Barry, Sergeant at Arms of the United States Senate, and I call upon Mr. Barry to make good or to retract the statement and then apologize to this House. [Applause.]

LEGISLATIVE APPROPRIATION BILL, FISCAL YEAR 1934

Mr. SANDLIN, from the Committee on Appropriations, reported the bill (H. R. 14562) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1934, and for other purposes (Rept. No. 1960), which was referred to the Union Calendar and ordered printed.

Mr. HOLADAY reserved all points of order on the bill.

DISTRIBUTION OF GOVERNMENT-OWNED COTTON

Mr. JONES. Mr. Speaker, I call up the conference report on the bill (H. R. 13607) to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of distress, and I ask unanimous consent that the statement may be read in lieu of the report.

Mr. SNELL. Reserving the right to object, there is very little difference in the length of the report and the statement, and there is something important in section 3, and I think the report itself should be read.

The SPEAKER. The Clerk will read the report.

The Clerk read the report, as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13607) to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of distress, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 2.

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following substitute:

"SEC. 3. In so far as cotton is delivered to relief agencies by the Cotton Stabilization Corporation under this act the Federal Farm Board is authorized to cancel such part of its loans to such corporation as equals the proportionate part of said loans represented by the cotton delivered hereunder, less the current market value of the cotton delivered, and to deduct the amount of such loans canceled from the amount of the revolving fund established by the agricultural marketing act. To carry out the provisions of this act the unexpended balance of appropriations made for carrying out the provisions of the joint resolution entitled 'Joint resolution authorizing the distribution of Government-owned wheat and cotton to the American National Red Cross and other organizations for relief of distress,' approved July 5, 1932, is authorized to be made immediately available, and, in addition, the sum of $4,100,000 is authorized to be appropriated and made immediately available, to the Federal Farm Board to be used solely for the following purposes: For advancing to such corporation amounts to repay loans held by commercial or intermediate-credit banks against cotton which would be released for donations under this act and to retire all storage and carrying charges against cotton, including compression charges, at the time of the approval of this act; and for meeting carrying and handling charges, and interest payments on commercial or intermediate-credit bank loans, on or against cotton which would be released for donations under this act between the date of its approval and the delivery of the cotton to the American National Red Cross or other organization. Any additional amounts necessary for such purposes shall be paid from the revolving fund established by the agricultural marketing act."

And the Senate agree to the same.

MARVIN JONES,
H. P. FULMER,
G. N. HAUGEN,
Managers on the part of the House.

CHAS. L. MCNARY,
G. W. NORRIS,
E. D. SMITH,
Managers on the part of the Senate.

Mr. JONES. Mr. Speaker, there are certain commercial liens against this cotton aggregating $25 per bale. There are in addition storage, interest, and compression charges.

The House measure originally authorized an appropriation of sufficient funds to pay these charges, and specified that the fund should be used for no other purpose. The original Senate amendment authorized an appropriation covering the net market value of the cotton.

The discussion in the Senate would not indicate that. In fact, some Members of that body claim that their provision did not authorize any appropriations. In that claim they are manifestly mistaken. As proof I want to read just a sentence from the amendment.

SEC. 3. There is hereby authorized to be appropriated for credit to the revolving fund established by the agricultural marketing act an amount equal to the current market value of all cotton delivered to relief agencies under this act.

If that does not authorize an appropriation, I am a wooden Indian. It would have appropriated not only the payment of the liens but would have given the Farm Board the net value of the cotton, which would be more than the liens.

The conference report authorizes the payment of simply the commercial liens, and directs the Farm Board to pay any additional charges out of the revolving fund.

That appropriation is made up in this fashion: It authorizes the use of the unexpended balance of the appropriation made under the wheat and cotton distribution of last summer. It also authorizes a new appropriation of $4,100,000. The Farm Board has $33,000,000 in its revolving fund, but it has commitments of $31,000,000, so the only way to get the cotton, as a practical matter, is to pay off at least the commercial charges.

Mr. SNELL. Perhaps I may have misunderstood, but I understood at the time that there was no new appropriation involved, that we were merely turning over to the Red Cross the cotton that the Farm Board owned.

Mr. JONES. No new appropriation for the Farm Board, but there was an authorization of a new appropriation to pay off the commercial liens.

Mr. SNELL. There is to be $4,100,000 to be taken out of the Treasury. That was not given to the House when we passed the original act.

Mr. JONES. Oh, yes; that was explained—the provision was in the original act. The facts were brought out by questions on the part of the gentleman from Wisconsin and others. I am sure the gentleman will find that that is true if he reads the RECORD.

Mr. SNELL. I did not understand that there was anything to be taken out of the Treasury at that time. I want it made clear that we have to pay $4,000,000-plus, so that this does not come without expense to the Federal Government at the present time.

Mr. HARE. Mr. Speaker, will the gentleman yield?

Mr. JONES. Yes.

Mr. HARE. As I understand it, this act originally provided that this cotton should be turned over to the Red Cross, to be turned over to manufacturers, in order to give employment to the unemployed, and that then the product should be turned over to those people who may be in distress or naked. Was that the purpose?

Mr. JONES. That is the purpose of the act; and in further answer I may say that under the other provision for Red Cross cotton, 4,000,000 families were given relief and a great many of the unemployed were given work. A great many mills were able to operate, and they operated without a cent of profit. I will be glad to have anyone who is interested go to the committee rooms of the Committee on Agriculture and see the thirty-odd garments that were made by the New York unit, and that are on display there. Several hundred thousand of those garments, many of them costing only a few cents, and yet very valuable for the purposes intended, were used in this distribution.

Mr. HARE. And in addition to that the Red Cross was permitted, instead of turning it over to the manufacturers to be manufactured into cloth, to exchange it with the manufacturer for cloth already manufactured?

Mr. JONES. That enabled them sometimes to avoid the payment of freight, by the exchange of one for the other, but in every instance it was done without profit, and I say to the gentleman that much of the work was done without pay. These relief organizations distributed without compensation. For instance, in New York they used unemployed needleworkers, and thus they traded their work for supplies.

Mr. HARE. And that leads me to this other question. After the cotton was turned over to the Red Cross and given to the manufacturers in exchange for cloth, I am reliably informed the manufacturer then designated the Red Cross as its agent, and gave the Red Cross power of attorney to sell the cotton in its hands upon the markets of the world. I have in my mail this morning copy of a telegram from the Red Cross to an exporter offering to sell 500 bales at a price, I am told, at $2.85 per bale less than the market price.

Mr. JONES. I think the gentleman is excited. As a matter of fact, under the practical handling they used the cotton only in exchange. They might have sold and bought cotton goods, but they used in effect the total amount of goods which used up the amount of cotton. It might not have been the exact cotton, but it was the same amount of cotton. The Congress can not administer it. We have to trust somebody, and I think the Red Cross has done a magnificent piece of work.

Mr. HARE. I want to say to the gentleman from Texas [Mr. JONES] that I am not excited but deeply interested. The Red Cross tells me this morning that it is offering this cotton for sale to exporters. I do not charge it is in violation of the law, but it is certainly not in keeping with the spirit of the law.

Mr. JONES. Certainly, if they are using cotton and making cotton goods and distributing them in this country and exporting the actual cotton, the gentleman ought not to complain. In either event the actual amount of cotton is used up and that is an advantage to the market.

Mr. HARE. The point I make is this, that they are selling it to exporters at $2.85 a bale less than the market price.

Mr. JONES. I think that must be a mistake. I am sure they would not dispose of it for less than they are offered in the open market.

Mr. HARE. I want to know whether there is anything in this bill to prevent the further sale of cotton in the manner indicated.

Mr. JONES. They have given me different information. Naturally, they would want to get as favorable results as possible. That has been the history of all their transactions. I am sure if the gentleman will check up on his information he will be satisfied with the good faith of these operations.

Mr. HARE. You will understand I am not charging bad faith, but emphasizing only what seems to be a bad practice.

Now, in order to be more specific and make myself clear, although it will be necessary to repeat to some extent, let me say that if I understand this legislation correctly the Congress provided that as much as 500,000 bales of cotton in the hands of the Farm Board be turned over to the Red Cross to furnish clothing for people who may be in need or distress. The undertaking was planned to serve two purposes: First, the cotton was to be turned over to manufacturers to be made into cloth, and thereby give employment to the unemployed. In the second place, the cloth made was to be converted into clothing or turned over direct to those entitled to same.

I trust I may be mistaken in some of the facts reported to me, but I understand that instead of having manufacturers to start their mills, in some cases, the Red Cross simply contracted to exchange the cotton for so much cloth; and I am advised that in some instances, instead of delivering the cotton to the manufacturer, the Red Cross agreed to become sales agent for such manufacturers and proceeded to offer the cotton in its hands to brokers engaged in export.

In other words, the Farm Board had, we will say, 500,000 bales of cotton on hand and out of the channels of trade; but in order to get it where it would no longer be considered available for marketing, Congress proceeded to turn it over to the Red Cross to have it manufactured and the cloth distributed among the poor, but instead of doing this the Red Cross bought goods from manufacturers and placed the cotton on the market for export; that is, instead of decreasing the amount of cotton available for export, as contemplated by Congress, the Red Cross by its action has

actually taken cotton out of the hands of the Farm Board and placed it on the market in competition with cotton in the hands of the farmer or warehouseman.

I am in receipt of a letter this morning from a cotton broker, inclosing a copy of a telegram from the Red Cross offering 500 bales of cotton to an exporter of the same city, as the broker says, at $2.85 per bale less than the market price. It is alleged that when a sale of this kind is made the broker who buys the cotton sells an equivalent amount on the exchange, and results in what the brokers refer to in their daily reports as "Southern selling" of cotton.

I do not wish to be misunderstood and be placed in a position as protesting against an action of Congress in its effort to relieve suffering humanity by furnishing cloth to people who are in actual want and distress; but I am emphasizing the point that in the actual operation the Red Cross is not carrying out the spirit of the law, for such operation, if engaged in to any extent, will in a large measure fail to accomplish the purpose Congress intended. In the first instance, where the cotton is exchanged for cloth instead of having it manufactured, the unemployment situation is not relieved; and, in the second place, where the Red Cross becomes the sales agent for the manufacturer and places cotton on the market that was formerly out of the channels of trade, such action not only increases the competition with cotton in the hands of the producer but when, as a result of poor salesmanship, the cotton is offered for $2.85 per bale below the market price, there is no doubt but what the price of cotton will be reflected to that extent, particularly if any appreciable amount of the 500,000 bales are marketed in this way. Permit me to say that I do not know what proportion of the cotton has been sold in the manner indicated, but the charge was made in the letter referred to; and in a conversation over the telephone with representatives of the Red Cross, the report was verified. That is, the policy followed was verified.

Mr. CHINDBLOM. Mr. Speaker, will the gentleman yield?

Mr. JONES. Yes.

Mr. CHINDBLOM. Referring to the remarks of the gentleman from New York [Mr. SNELL] with reference to the appropriation, directly authorized, of $4,100,000, it is a fact, is it not, that the other $4,500,000 to be taken out of the revolving fund is also in the nature of an appropriation by the Federal Government.

Mr. JONES. Of course, and this and previous appropriations they have made out of the revolving fund all come out of the Treasury of the United States.

Mr. CHINDBLOM. And as a matter of fact the total cost to the Government is the entire amount which the Farm Board paid for this cotton when it was purchased.

Mr. JONES. No; the Government only has $4,100,000 new appropriation, and the Farm Board advises that the value of the cotton was $32.50 per bale, so that there is a considerable equity in it that the Farm Board would be able to use by selling the cotton and paying off the liens itself.

Mr. CHINDBLOM. That is the point I make—that the entire value of the cotton is a donation by the United States.

Mr. JONES. Yes.

Mr. LAGUARDIA. And this appropriation was made by the Congress to relieve the cotton market, and the cotton market was relieved by these 700,000 bales. The Government had these bales of cotton on hand, and they were a constant danger and did affect the price of cotton on the market; so that if they disposed of this cotton it should be charged up as an assistance to the cotton growers and an indirect and incidental assistance in using this cotton to make garments that otherwise could not be purchased.

Mr. JONES. Mr. Speaker, I call for a vote.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

PANICS

Mr. JENKINS. Mr. Speaker, I ask unanimous consent to extend my remarks by inserting in the RECORD a speech made by my colleague, Mr. FREE.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. JENKINS. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

SPEECH OF HON. A. M. FREE, OF CALIFORNIA, DELIVERED BEFORE THE ROTARY CLUB OF WASHINGTON, D. C., FEBRUARY 1, 1933

There recently came to my attention the following statement:

"It is a gloomy moment in history. Not for many years—not in the lifetime of most men who read this—has there been so much grave and deep apprehension. In our own country there is a universal commercial prostration, and thousands of our poorest fellow citizens are turned out against the approaching winter without employment.

"In France the political caldron seethes and bubbles with uncertainty. Russia hangs like a dark cloud and silent upon the horizon of Europe; while all the energies, resources, and influences of the British Empire are sorely tried, and are yet to be tried more sorely, in coping with the vast and deadly India situation, and with disturbed relations in China.

"Of our own troubles no man can see the end. If we are only to lose money and thus by painful poverty to be taught wisdom, no man need seriously despair. Yet the very haste to be rich, which is the occasion of this widespread calamity, has also tended to destroy the moral forces with which we are to resist and subdue the calamity."

Imagine my surprise when I discovered that this was a reprint from an article published in Harper's Weekly of October 10, 1857.

It then occurred to me that history is but repeating itself in the present depression and that a study of the panics in the United States during the last 100 years might be of value in determining their causes, in developing some plan to forestall them, and possibly in developing some suggestions as to how to work out of our present situation.

The United States has experienced nine major depressions in the last century.

Let us first study the panic of 1837:

THE PANIC OF 1837

In the early thirties the great financial institution of those days was the Second Bank of the United States at Philadelphia. It was the stronghold of United States finance.

Nicholas Biddle was the outstanding figure in this bank. He ruled the money world. He played the cotton market, financed canals and large land speculations. He was hated by President Jackson, and Jackson vetoed renewal of the charter of his bank. He, however, secured a charter from the State of Pennsylvania.

The bank had a capital of $35,000,000. This was indeed a large sum for those days.

He was a great speculator in lands. His friends and imitators began to gamble in city and county lands all over the United States. Cities were laid out in the western wilderness which were bought at $1.25 per acre. The speculators paid for them in notes issued by banks the speculators themselves had organized. The land office deposited the notes back into the banks, which again loaned them to the same speculators who used them in buying up more land.

The leading figures in Wall Street were J. L. and S. Josephs, enterprising Jewish boys from Richmond, Va., who had founded a banking house on a capital of $20,000. They got prestige in the financial world by being appointed the New York agents for the Rothschilds.

They like Biddle plunged into speculations in cotton and land. They controlled 634 banks throughout the country with loans of five hundred and twenty-five millions, and with specie back of the loans of only thirty-eight millions. In this precarious position they grew weaker day by day as the speculation proceeded.

President Jackson condemned the rush for public wild lands. He issued his specie circular, demanding that payment for land should be paid only in specie or specie value. He prohibited the deposit of Federal revenues in the United States Bank and distributed them among other banks favorable to his administration.

In December, 1835, fire destroyed the Merchants Exchange, the pride of Wall Street. Seventeen blocks of buildings were destroyed with a loss of $18,000,000. This brought about the financial ruination of many people who had investments in these buildings.

A rebuilding program started under a wave of false prosperity. Biddle encouraged this boom and loaned money in all directions. The whole country began to speculate in lands and cotton. Paper banks of the South and West turned out their own notes, which circulated as currency. Specie began to vanish.

By March, 1837, the panic was on. News arrived by packet in Philadelphia and New York that the great cotton houses of New Orleans had failed with losses totaling $200,000,000.

The land boom crashed; the cotton corner was broken.

The firm of J. L. & S. Josephs & Co. stopped payment.

Stocks took a decided drop. Many brokerage houses failed during one day. There were runs on banks, failures everywhere—352 in number. Silver and small change vanished, and hoarding of coin followed.

Financial convulsions engulfed the whole country. Investment of capital ceased. The whole South was bankrupt. British credit was withdrawn. Millionaires failed. Real estate would not yield cash. Specie payments were suspended. Lootings by the poor followed. People who were without employment and without money stormed the city hall in New York, and finally troops were called out to quell the disturbances.

Europe lost $150,000,000 in these losses.

Biddle had been called on and tried to come to the rescue, but it was of no avail.

By 1841 the powerful United States Bank, with a capital of $74,000,000, had been reduced to a capital of $12,000,000.

Biddle had resigned in 1839 and died in 1844, insolvent and broken-hearted.

The Josephs were ruined. They had liabilities of $5,000,000 which they could not meet. Even their office furniture was sold to pay their debts.

The public had become involved and had lost heavily.

Companies and individual owners, grocers, barbers—all went into the banking business on their own account. They issued shin plasters, being forced to this step by the necessity of making small change for their customers.

This panic lasted from 1837 to 1843—72 months.

Then followed a period of prosperity from 1843 to 1857. This period witnessed the Mexican and Crimean Wars with good markets, feverish building, booms in land, sugar, cotton, railway shares, and California gold-mining development.

THE PANIC OF 1857

Next let us consider the panic of 1857.

The early fifties brought into light men who were then obscure but who afterwards played a great part in the financial history of the United States. They were the future bonanza kings—Mackay, Flood, O'Brien, Collis P. Huntington, and Darius O. Mills.

Gold had been discovered in California, and the great stories which came across the continent led to the formation of mining corporations the stock of which was purchased by eastern investors.

There was great railroad expansion. Seven hundred million dollars in railroad stocks were bought, much of these with foreign capital.

Wall Street was prosperous. Stock sales amounted to as many as 40,000 shares a day. Eastern bankers forwarded speculation with free hands. They loaned on almost any sort of paper. Brokers with only fifteen hundred dollars on deposit drew checks from one hundred to three hundred thousand dollars.

Mining schemes, railway enterprises, guano speculations, sugar, cotton, and land speculations were the order of the day. So great was the demand for shares and so eager were speculators to press on their ventures that many companies issued spurious shares. The managers of the Vermont Central Railway did this to supply the needs of the road.

The Parker Vein Coal Co. flooded the market with a fraudulent stock issue of five times its authorized capital.

The end had to come. It began when the checks of Simeon Draper, jr., a prominent railroad banker, were dishonored. The Broadway Bank called his loans, and in his downfall he carried his brother brokers with him.

The manipulations of the Chicago & Mississippi Railroad next ruined Henry Dwight, jr., another banker.

Schuyler & Co., a large New York firm, failed because of the speculations of Schuyler. He had engaged in fraudulent stock manipulations in the New Haven Railroad. Schuyler fled to Canada. He had actually forged stock in his own road to the amount of two millions. He had swindled his close friends, including Vanderbilt.

Five thousand shares of the Harlem road have been overissued. The Ohio Life & Trust Co. failed because of its large advancements to railroads.

Brokers suspended and failed on all hands. Runs began on banks. Banks called in loans, and panics developed throughout the United States.

There was scarcely a dollar in the State of Indiana save free bank paper. Stock gambling had caused stealings and losses. Credit was gone, confidence lost, and the country denuded of money.

In August, 1857, the panic was on in full force. Banks everywhere closed their doors. Mills and factories had to close because they could secure no money to pay their workers.

We had a paper inflation of $2,000,000.

The financial district of New York was overrun with mobs demanding money. The Bank of New York, the strongest in the United States, failed. The socially well-to-do class was nearly extinguished. Families in the world of fashion, whose society had been courted, sank to lowly conditions.

It seems that not economic causes but the promotions of optimistic men caused the panic of 1857. The sudden disappearance of specie, the embarrassment of the banks, the outward flow of gold were the consequences of this superoptimism. Conditions continued bad from 1857 to 1860, a period of 24 months.

The period from 1860 to 1873 witnessed the Civil War, followed by a new era of factory building in the North, settlement of farm lands in the West by a million discharged soldiers. There was more railroad building and business expansion and another orgy of speculation.

THE PANIC OF 1873

The next panic was that of 1873.

Every panic is preceded by the speculation of some outstanding men.

In the seventies, Jay Cooke, the financier of the Civil War, proved to be the greatest speculator. He led forth a movement which others followed, and organizers plunged into the adventure of building metal highways. Their promotions were stimulated by bond subsidies and huge land grants.

Thirty thousand miles of railroads were built in 10 years, at a cost of $1,400,000,000.

Cooke engaged in carrying through the Northern Pacific from Lake Superior to Puget Sound.

The Union Pacific was promoted under the corporate title, Crédit Mobilier, Missouri, Kansas & Texas road was also promoted during this period.

The Civil and Franco-Prussian Wars had used up $6,000,000,000.

Strenuous promotions brought on credit inflation. Paper circulation increased to $750,000,000.

The Chicago fire in 1871 destroyed $150,000,000 in property, and in 1872 there was the Boston fire, with great losses. This made a great drain on the money resources of the country.

There was developed certain building scandals in the Union Pacific by which the promoters contracted with themselves to build the roads at terrific costs.

It all had to come to an end. The Missouri, Kansas & Texas road was unable to meet its loans. As a result many bond issues failed. There came on a period of failures, embezzlements, and speculations. Banks failed, and a frightful depression came on quite suddenly.

September 18, 1873, was the fateful day. Jay Cooke was at breakfast with President Grant when he learned that his Washington house and the First National Bank of New York, another of his houses, had closed. Stocks immediately began to tumble. There was an avalanche of failures everywhere.

The great firm of Richard Schell, and Robinson, and Suydam failed.

The New York & Oswego Midland Railway defaulted on its bonds. There was suspension after suspension in the business world. The choicest securities depreciated greatly.

Bankers in the clearing house in New York decided to issue $10,000,000 in certificates to be used instead of legal tender. This failed to stop the crash. There were runs upon the savings banks, and 36 firms suspended or failed within a few days. These included the Union Trust, the National Trust, and the Bank of the Commonwealth. So bad were the conditions that the stock exchange closed for a week.

Six weeks of downfall culminated with the failure of the great Sprague enterprises—10,000 of their employees in the hand mills, print shop, and mowing-machine companies were without employment.

A million wheels were checked throughout the country. There were 40,000 unemployed in New York. Rents fell 30 per cent.

The Northern Pacific became bankrupt. Seventy-two railroads were in default. Overdue interest on bonds amounted to $218,000,000, or 13 per cent of their funded debt.

This depression lasted from 1873 to 1878, a period of 72 months.

From 1879 to 1884 business was restored. The South began to recover from the war. There were good markets at home and abroad and generally good times.

THE PANIC OF 1884

Let us consider the panic of 1884.

The panic of 1884 again was brought on as other panics, by the manipulations of men in big industries. The eighties produced a man by the name of Seney. He built the Nickel Plate road and sold it to Vanderbilt at a personal profit of $1,500,000.

Seney organized the Seney Syndicate, got control of the Ohio Central, the East Tennessee, the Virginia & Georgia, and the Rochester & Pittsburgh Railways. He sold stocks cheap and widely. He was head of the Metropolitan Bank and used this in his own ventures.

The firm of Grant & Ward became big speculators in those days. Grant was the son of President Grant. They interested James D. Fish, who loaned them $4,100,000.

Fish was president of the Marine Bank.

In May, 1884, Grant & Ward failed. This broke Fish, closed the Marine Bank, and rendered ex-President U. S. Grant penniless.

Ward had turned out to be a crook.

Even such houses as Russell Sage lost heavily. The Seney Syndicate got into a bad way. Nelson Robinson & Co. suspended payments, owing two millions. Seney was connected with the Metropolitan Bank—in fact, owned three-fourths of its stock. The bank suspended payment.

Other banks and firms failed. John C. Eno, another operator, failed for $4,000,000 and escaped to Canada.

Matthew Morgan's sons failed and brought down old Henry Morgan.

The bond house of Hatch & Foote suspended. Alfred S. Hatch, junior member, had been elected president of the exchange only a few days before.

Russell Sage was caught badly. He was renowned for dealing in "puts and calls." He was bound to purchase great amounts of stocks and finally closed his office. He finally succeeded in com-

promising for 60 per cent of what he had promised to pay. He lost $2,000,000.

More bank failures followed.

One of the sad parts of the story is that it broke General Grant, who was backing his son, and who trusted Ward, who later went to prison penniless. General Grant wrote his memoirs to recoup some of his fortune.

The years of 1884 to 1886 were two years of contraction.

Eighteen hundred and eighty-six to 1893 were prosperous years. They were years of attempted monopolies—beer, bluestone and chemicals, sewer pipe, coke, copper, fruits, gas, guns, hides, linseed oil, lumber, matches, nails, paper, peanuts, rice, rubber, salt, school slates, silks, soaps, sugar, and storage warehouses.

The Whisky Trust, under the title of the Distillers & Cattle Feeders Co., had been preceded by the Cottonseed Oil Trust, but the most popular combinations were lead, sugar, pig iron, and cattle trusts.

A. A. McLeod, president of the Philadelphia & Reading Railroad, fostered a daring move to monopolize the output of anthracite; then to advance the price of black diamond. Wall Street at first backed him. He arranged leases of the Lehigh Valley and Jersey Central roads, gained control of the Lackawanna's coal business, and bought the New York & New England Railroad.

The Cordage Trust was the offspring of James M. Waterbury. He established a reputation for turning binding twine into gold with a whisk of his pen. By 1891 the Cordage Trust controlled 41 per cent of the output of cordage. He then reduced the price to freeze out other companies and bought 15 independent companies. It was not known, but he was losing money all of the time.

John Good had a large plant for which he was finally paid a $200,000 bonus and $7,000,000 on a $2,000,000 plant.

Waterbury reached out and drew in his social friends, who were later dragged down with him in his speculations.

THE PANIC OF 1893

Money had been drained from Wall Street for working supposed mines in South Dakota and buying Florida lands. The latter were to be unloaded on foreigners as future sugar plantations. New towns had been built.

Finally the cordage combine broke and a receiver was appointed. Default of other monopolies followed. Their plants were closed. Banks like the National Bank of Deposit in Broadway, the St. Nicholas Bank, the Canal Bank, closed, and the Madison Square Bank liquidated its affairs.

The Equitable Mortgage Co. and the Jarvis-Conklin Mortgage Trust Co. went into the hands of receivers. Banks failed everywhere. Twenty-five national depositories suspended in June, 78 in July, and 38 in August.

Wall Street brokerage houses went under one by one. They could not sustain margins for loans.

The industrial boom had been encouraged by currency inflation.

The Sherman Silver Purchase Act of 1890 had compelled the purchase of heavy amounts of silver. This was paid for in Treasury notes redeemable in gold.

Gold went out of the country as new notes were put into circulation.

Money trouble was the manifest peculiarity of the long-drawn-out panic of 1893. Money was not to be had. Unemployment was everywhere. Riots were common, particularly in New York and Chicago.

Certified checks were issued in small denominations to pay workers. Cashiers were frantic to get coin enough to make change. Everybody hoarded.

Money in small denominations was dealt in at a premium in Wall Street. Currency brought 2 per cent. In other words, $1,000 was good for $1,020 in money. Fifteen million dollars in real money was thus traded in Wall Street.

On the exchange one broker offered $50,000 in Government 4's at 110¾, payable in currency. This was finally taken up by a banker, who delivered coin in small denomination.

Alarmed by the flight of gold, Congress repealed the silver purchase act.

Coal syndicate stocks and McLeod's share in railroads were forced on the markets. The coal combination failed. A receiver was named for the Reading Railroad. The railroad earnings fell off tremendously.

The Erie Railway failed. The Northern Pacific became bankrupt. Receivers were appointed for the Atchison, the Union Pacific, and the New York and New England railway systems.

The panic of 1893 was caused by the ferment of promotions in the early nineties. The blame primarily rested upon McLeod and the bankers who encouraged his anthracite monopoly and upon Waterbury and the group of high gamblers who surrounded him in the Cordage combination.

The downfall of Cordage had merely accelerated the ball that had started rolling after the breakdown of the coal monopoly, also the operation of the Sherman Silver Purchase Act, followed by the flight of money.

Merger of binder twine plants into the Cordage combine; monopolies in anthracite coal, in whisky distilleries; a rage for trusts in sugar, cottonseed oil, lead, pig iron, cattle, rice, rubber, soap, and peanuts brought on the disaster.

The panic of 1893 lasted 25 months, from 1893 to 1896.

From 1896 to 1903 commodity prices increased.

The silver issue was defeated in 1900, and the United States again enjoyed a fair degree of prosperity.

THE PANIC OF 1901

In the panic of 1901 five men stood out conspicuously—J. Pierpont Morgan, James P. Hill, Jacob Schiff, John W. Gates, and Edward H. Harriman.

More combinations of capital had followed the panic of 1893.

John W. Gates was conspicuous in heading a group of financiers who undertook gigantic promotions. Morgan formed the Steel Trust, financed international merchant marine and the Harvester Trust.

James Jerome Hill, another of the group, bought the St. Paul & Pacific and built it up to the Great Northern system.

Morgan was the banker for Hill. They began the reorganization of the Union Pacific as the Northern Pacific fell into bankruptcy. They bought very heavily in Northern Pacific Co.

Edward H. Harriman was trying to get control of the Northern Pacific and the Burlington Railways. Harriman had linked the Union Pacific to the Southern Pacific. With the Morgan line of steamers he had made a continuous transportation system from New York to San Francisco, but the railroad monopoly of the Southwest was not all that he desired. Hill stood in his way.

Hill commanded the Northwest with his Great Northern and his control of the Northern Pacific. Neither Hill nor Harriman had an outlet to Chicago. The Burlington provided this.

Jacob H. Schiff, of Kuhn, Loeb & Co., was Harriman's banker. They decided to get control of the Burlington. They discovered that Hill was also trying to buy up the stock.

Hill and Morgan bought the Burlington for more than $200,000,000 and split up control of the Burlington between Great Northern and Northern Pacific. They then controlled the route to Chicago.

Morgan and Hill's control of the Northern Pacific was nominal. They held a minority interest. The real control was in outstanding stock.

Schiff and Harriman decided they could get control of the Great Northern, Northern Pacific, Burlington situation by accumulating Northern Pacific stock. They sold their Burlington stock and started to acquire $60,000,000 in Northern Pacific. By doing so they would control Northern Pacific and thus command one-half interest in Burlington and would be masters of the entire West from the Mexican border.

Morgan wired from Europe to buy 150,000 shares of Northern Pacific. This meant an expenditure of eighteen to twenty million dollars. Even Europe was scoured for the stock.

This brought on a terrific battle between Hill and Harriman for control of the Northern Pacific. Each side bought and brokers began making short sales. Each side of the contest had a majority of the stock under contract, but where was the stock to be bought. The market was swept clean on short selling.

Brokers then began to offer premiums in order to fill these short sales when they were demanded. As high as 10 per cent was offered for the loan of shares for a few days. This meant brokers would pay $1,000 for the privilege of borrowing 100 shares for 24 hours.

Millions in profits were made by those who loaned their stock. The stock finally advanced to $180 a share.

Those who had loaned the shares then called them in and as high as 85 per cent was offered for 500 shares, which meant they offered to pay $8,500 to borrow for a few hours stock of par value of $10,000. The stock leaped to $1,000 per share. There was then great trade in Northern Pacific, and in order for the brokers to get this they threw other stocks suddenly on the market. The situation got so bad that finally, in order to stop an entire breakdown of the financial centers of the United States, the short sellers were permitted to compromise by paying $150 a share for stock they could not deliver.

Even Europe shook from the transaction.

Hill and Morgan finally won out. The Northern Securities Co. was formed to control the Northern Pacific and Burlington. Three years later the Supreme Court annulled the Northern Securities Co. as being contrary to the antitrust laws.

This was just a Wall Street panic, only stock gamblers became involved, but many people lost great sums of money and became bankrupt. It was soon over and the country was on its way again to other big ventures.

THE PANIC OF 1907

This was the greatest panic the United States had witnessed to this date.

Henry H. Rogers, was president of the Standard Oil. Millions had been made by his company. These millions sought investments. He invested them in copper mines in Montana, organized the Amalgamated. The National City Bank of New York advanced $155,000,000. J. P. Morgan was behind the issue of stock.

The world went copper mad. Finally the price decreased to $70 a share and the copper pool was crashed.

F. Augustus Heinze, of Montana, was also interested in copper. He was crushed by Wall Street in the copper pool. He decided to fight on; got control of various properties, and Rogers finally bought him out for $15,000,000.

Heinze went to New York, fell in with Charles W. Morse, who owned the Hudson Navigation Co., the Metropolitan Life, the Eastern Steamship Co., the Ward & Clyde Lines, a fleet of 74 ships.

In order to carry on his financial transactions, Morse bought a string of banks. Then, followed mergers of steamship companies. Systems of branch and chain banks were established.

Morse used the stock and surplus of one bank in order to buy the next. He hypothecated and rehypothecated his securities in depositories in New England.

Heinze and Morse were joined by Russell Thomas, a young sportsman with large income. He had manipulated a $2,000,000 corner in cotton. He became a power in certain banks.

Charles T. Barney, another wealthy young man, joined the group. He was president of the Knickerbocker Trust Co.

Other financial interests in Wall Street, such as the National City Bank, the National Bank of Commerce, the First National, Hanover National, Farmers Loan & Trust, the United States Trust, the New York Trust & Guarantee Trust, an institution of the Standard Oil.

These were dominated by J. P. Morgan and his partner, Robert Bacon; William Rockefeller, the genial speculator; Rogers, of Standard Oil; and Stillman.

The years following were prosperous.

Western railroads sold big issues of their shares. The paper securities of the Great Northern, Northern Pacific, St. Paul, swept up to high levels.

Heinze exploited his new corporation, United Copper, with $50,000,000 capital. It shot up to a higher price than Amalgamated, owned by his rivals.

One factor that brought on trouble was the San Francisco fire, with a loss of $350,000,000. This made the financial world shiver to make good these losses.

Heinze then tried to corner United and asked for deliveries; but much to his surprise, offerings were made immediately, and he was unable to raise the cash to pay for them. Secret instructions went out to all banks to call loans on all securities of all companies with which Heinze, Morse, and Thomas were associated.

Heinze, Thomas, and Morse were ruined by this move of the Morgan, Standard Oil, City Bank group demanding payment of large amounts.

The banks which Heinze, Thomas, and Morse closed included the Knickerbocker Trust Co. American stocks dropped even in Europe.

A sly whisper apparently was sent out as to the stability of the Trust Co. of America. This caused a run on this company.

The Hamilton and Twelfth Ward banks suspended. Sixteen savings banks in Manhattan demanded 60 days' notice before the withdrawal of money.

The Union Trust of Providence suspended. Distress was everywhere. Call money was not to be had.

At a meeting of some of the financiers, $25,000,000 was pledged to stop the runs, but the runs continued just the same.

The Trust Co. of America had paid out $34,000,000 in a few days, and the Lincoln Trust, $12,000,000; then ultimatums were delivered to both that they must surrender their unpledged assets to the ruling bankers and then they would provide funds for the remaining depositors. They were forced to accept. This was done so the Morgan group could get control of the Tennessee Coal & Iron Co., which securities were held by the Trust Co. of America. Morgan thereby vanquished his enemy, John W. Gates, the steel king, from the Street.

Gates had been the promoter of the Tennessee Iron & Coal Co. When Gates came to New York he had not been accepted by the Morgan group. In retaliation he had put Morgan's southern railroad in peril. He had bought control of the Louisville & Nashville. Morgan had been forced to buy him out at a profit of $10,000,000 to Gates.

Gates controlled the Tennessee Iron & Coal Co. Morgan wanted this, and financial writers make the bold assertion that the run on the Knickerbocker was engineered for this purpose.

Morgan got control of the Tennessee Coal & Iron Co. and turned it over to the Steel Trust. He had had his revenge.

Bank failures continued. The Southern Steel Co. became bankrupt.

The Westinghouse Electric went under in Pittsburgh.

Western governors appointed holidays to protect State banks which could not meet their drafts. Out-of-town banks tried to recall the $800,000,000 on deposit in New York. Clearing-house certificates were issued to stop outgo of specie.

Philadelphia and Pittsburgh locked the doors of their own vaults. Chicago exchange on New York was almost unobtainable. Boston credits in New York were exhausted. The business centers of the country were frozen solid. People hawked cash in Wall Street.

Barney, in reality an innocent party in the matter, killed himself when his institutions went under.

It developed that the Knickerbocker Trust was absolutely solvent and had been deliberately ruined. After all obligations had been met, the bank had a balance on hand of $15,000,000.

The depositories of Heinze, Morse, and Thomas were permitted to fall into bankruptcy and were finally absorbed by the Morgan group. This was one of our greatest panics, although it lasted but 12 months.

The United States then went through a period of irregular improvement checked by the outbreak of the World War.

THE PANIC OF 1920–21

Prices during the war had reached especially high levels. Instead of contracting following the war, business purchased at these high prices were bound to come down.

Late in 1920 the collapse came, and business houses and farmers throughout the country had to take their losses, which were enormous.

For a short period prices of all commodities fell, but owing to a large demand from Europe we quickly recovered.

Business again was good, prices advanced, and we proceeded with great expansion, and investment reached its peak.

This continued until the fateful October in 1929.

THE PANIC OF 1929

The panic of 1929 is the most peculiar in our history. It was ushered in without the crashing of any large institutions. It broke suddenly and then slowly and progressively brought distress in its wake. It has been our worst—as our population has grown, our panics expand in force and volume.

To analyze its causes we must go back to 1914.

During the early part of that year there was a period of uncertainty and interrupted business.

Then came the outbreak of the World War. There was great demand for products of all kinds—agricultural and manufactured. A boom started and peace-time goods soared in price and in volume of demand.

All available acreage was planted to increase agricultural crops and factories expanded to meet increasing demands. Wages and prices soared to unusual levels. There was feverish development and production in all products.

Land values rose to a high peak and our people paid ridiculously high prices for land because of the high prices of agricultural products. Very often the land was mortgaged in an amount far in excess of its possible value in normal times.

This period of expansion and prosperity continued feverishly until 1920.

During and two years following the war there was great demand for our products, as the war had left all countries in need of replenishment of their inventories.

With our increased impetus we quickly filled these unusual demands, and then came a collapse of war-time prices and a liquidation of prices generally.

Farmers could no longer get returns on the high-priced lands which they had bought and merchants were forced to reduce prices on stocks on hand.

Large profits had been made during the war and readjustment was made quickly, except to those who had paid ridiculously high prices for land.

Except for this brief depression, which lasted about 14 months, we continued for seven years in a period of great prosperity—expansion, profits, and investments reached their peak.

This was a period of great mergers. Combinations were made in the motion-picture business, radio, steel, gas, banks, grocery stores, drug stores, cigar stores, airplane ventures, etc.

It was the great period of investment trusts. Financiers bought common stocks for the purpose of controlling industries. They loaned this collateral to bankers and bought more stocks.

Call money jumped to 20 per cent, and the carrying of these loads became oppressive to the financiers and hazardous to the bankers. Then the holding company was resorted to. All the stocks were pooled, deposited in safety vaults of trustees. Against the pooled paper were issued collateral trust bonds, cumulative, preferred, and common stocks.

Campaigns were started for the sale of stocks. This was done over the radio, through brokers, circulars, pamphlets, advertisements, and superstock salesmen.

Hundreds of thousands of people were persuaded to buy stocks. People sold their bonds, which became a drug on the market, and purchased stocks.

Stocks advanced from day to day. Fortunes, some paper and some actual, were made. Never before was there such feverish speculation in stocks. All classes of our people became involved from bootblacks to millionaires.

Stocks which started at a few dollars rose to hundreds and thousands of dollars per share. Financiers then split the stock in smaller denominations so the small investor would be attracted.

The earnings of the concerns which backed these stocks could not pay on the basis of the issues, so stock dividends were resorted to in place of cash dividends.

The Federal reserve bank tried to stop this by shutting off stock-market credit and increasing the rates of interest on loans, but the stock gamblers defied the Federal reserve and offered high rates of interest to small banks for money with which to continue this stock gambling.

There had to be an end. It came in October, 1929. Stocks which had been selling at from $300 to $700 per share slid to $70 almost overnight. Banks demanded payment of their loans—stocks of all kinds were offered in payment, but these failed to be adequate and the stock speculators lost everything they had and in most instances found themselves badly in debt. Land prices dropped, business declined, and banks had to take over lands and business to protect themselves.

Then followed a period of contraction. People who had been living in affluence had to economize. They ceased buying. This lessened demand. Stores discharged employees; factories curtailed production and thus had less need for labor. Unemployment became nation-wide, and with unemployment prevalent there was a decline in purchasing power and thus more unemployment.

Banks were filled with frozen assets and had to retain their currency to meet possible runs, and thus the money which ordinarily would be advanced to industry was curtailed.

Another factor entered into the situation. The war had cost billions of dollars. These debts had to be paid. Foreign countries extracted very high taxes from their peoples. This con-

tracted their purchasing power with the result that our foreign trade declined materially.

In 1930 we passed the Smoot-Hawley tariff bill which was intended to protect our home market for American producers. This is a big market. We ordinarily consume 94 per cent of what we produce in our own country, but another factor has entered into the situation. The currency of nearly all foreign countries has depreciated materially, and despite our tariff, foreign products—agricultural and manufactured—are pouring into our country and taking our own markets away from our own people, and thus causing more unemployment.

The precipitating cause of the panic of 1837 was the failure of the Josephs Bros. banking house, but the panic in reality resulted from the confident hopes of men who backed land and cotton ventures.

The precipitating cause of the panic of 1857 was the closing of the Ohio Life Insurance & Trust Co., but the actual cause was due to the manipulations of men who were overwhelmed in the unsettlements caused by an unheard of influx of gold.

The downfall of Jay Cooke was the apparent cause of the panic of 1873, but the actual cause was due to the schemes of men who succumbed to the hypnosis of railway projection.

The precipitating cause of the panic of 1893 was the collapse of the Cordage Trust, but the underlying cause was speculation in land, attempted monopolies of various products, and currency inflation.

The panic of 1901 was caused by the fight for the control of the Northern Pacific, behind which was the railroad control of the West.

The immediate cause of the panic of 1907 was the frustration of Heinze's united copper pool.

The cause of the panic of 1920 was the overdevelopment during and following the World War.

The panic of 1929 was caused by the undue optimism and speculation of our people.

What lessons are we to learn from this story? The first and outstanding lesson to be learned is that we have succeeded in weathering all these panics and have come out a stronger and more forceful nation. Out of the optimism of men, which has been a great factor in bringing on our panics, has been the advancement of our Nation.

"The riches of nations can be measured by the violence of the crises they endure."

LEGISLATIVE APPROPRIATION BILL—FISCAL YEAR 1934

Mr. SANDLIN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 14562) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1934, and for other purposes. Pending that motion, I would like to know if we can agree on time for general debate.

Mr. HOLADAY. I have requests for a little over two hours on this side. We could probably finish in two hours.

Mr. SANDLIN. Mr. Speaker, I ask unanimous consent that general debate on this bill be limited to four hours, the time to be equally divided between the gentleman from Illinois [Mr. HOLADAY] and myself.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

Mr. CONNERY. Reserving the right to object, I would like to ask the gentleman if he expects to start reading the bill, then, to-day?

Mr. SANDLIN. We hope to read a paragraph of the bill to-day and conclude the bill to-morrow.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The SPEAKER. The question is on the motion of the gentleman from Louisiana.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 14562, the legislative appropriation bill, with Mr. BULWINKLE in the chair.

The Clerk read the title of the bill.

Mr. SANDLIN. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. SANDLIN. Mr. Chairman, I yield to the gentleman from Illinois.

Mr. HOLADAY. Mr. Chairman, I yield 20 minutes to the gentleman from West Virginia [Mr. HOGG].

Mr. HOGG of West Virginia. Mr. Chairman, with the passage of the present measure, relating to the legislative establishment of the Government there will yet remain two or three regular appropriation bills in addition possibly to one covering deficiencies to be considered by the House before adjournment on March 4. This leads to the observation that in our present system of government, at least under conditions existing in recent years, practically all of the time of Congress is consumed in consideration of measures relating to the appropriation of money. This function of government has increased in staggering proportions. As a body, the Congress of the United States is severely indicted and criticized for its failure to deal with problems of reconstruction. It seems impossible for any time to be devoted to that purpose. The demands upon the Government with reference to the appropriation of money have become so great that the Appropriations Committee is in practically continuous session. They commence their hearings long in advance of the convening of Congress. They are in almost daily session. Their duties are so burdensome that it is necessary to apportion their work to various subcommittees because of the impossibility for each and every member of that committee to have first-hand and accurate information with reference to the particular needs of each and every department of Government. If members of the Appropriations Committee find themselves in a position where they can not have definite and accurate information personally obtained, what can be expected of a Member of Congress who is not a member of the committee? Of necessity he must rely upon the findings and the judgment of that committee. It is staggering to think of the details with which the House of Representatives deals in the appropriation of money. We are given a Budget containing 721 extremely large pages of fine type with 22 pages of index of 2,904 separate items. It is folly for anyone to expect to obtain even a smattering of detailed information on these varied subjects.

I do not make this statement as an indictment against any political party or our system of government. It is not the responsibility or the burden of one individual or one party that our Government has reached the staggering proportion which we now see. But the underlying trend of public thought seems to seek, through a destructive type of criticism, to fix responsibility for this state of affairs upon the present incumbents in office. This is unfair. The situation did not arrive overnight. It is the responsibility of the American people, neither individuals nor political parties. This outgrowth of bureaus and departments did not make its appearance except as a result of the insistence of some particular class of citizens demanding additional services from their Government. In many instances these same people charged with the responsibility of establishing some bureau or department are to-day loudest in their condemnation of the present system of government because of the existence of these very things which they sought and aided in creating.

While considering appropriations by the Seventy-second Congress it is interesting to observe the fundamental objects of appropriations made by the First Congress of the United States, as found in volume 1, United States Statutes at Large. That body dealt with constitutional fundamentals, such as the tariff and tonnage acts, navigation, the Indians, and the Postal Service. Since that time, however, there has been a constant increase in the objects of Federal financial policies. In that Congress the representation of the lower House was based upon a population of approximately 30,000 to each congressional district. In the intervening years that representation has increased until it now represents approximately a quarter of a million people. By this gradual process the American people for a time apparently have lost sight of individual responsibility to central government. The indirect sources of revenue from which central government has heretofore been supported have not made themselves felt as keenly as local taxes. For that reason the individual at times regards the Federal Government as a source of financial

exploitation. His demands for additional services from the central government have not been coupled with the realization of placing upon himself additional financial burdens. His prevalent belief has been that of a right to exact benevolence.

A calculation has been made as to the extent of financial demands made upon the Federal Government by the present Congress, which convened on the 7th day of December, 1931. Within three weeks bills of every kind and character had been introduced, calling for the expenditure of $29,000,000,000 of Federal funds. They represent, in some instances, gross extravagance; in others a service unquestionably of benefit and value. It is fair to assume, however, that in the introduction of these bills no great amount of consideration was given as to the manner and means of meeting these additional financial burdens. These requests for these enormous sums of money are but the further evidence of the demands of citizens of various localities for assistance to which they feel they are justly entitled. It is not to be construed as the personal demand of an individual Member of Congress but rather his reflection of the claims of his constituents. This has been the foundation for governmental expansion.

Our system for the appropriation of public funds is the most liberal of any legislative body in the world. Until 1920 any Member of this House was at liberty to introduce a measure creating some new Government function and appropriating funds from the Federal Treasury. He had the right to charge the Public Treasury with expenditures, but was not faced with the responsibility of raising the particular funds which he was spending. Such a procedure has been somewhat altered since 1920, or the time of the passage of the Budget bill. The practical effect, however, remains unchanged. A Member can now introduce a measure creating a separate Government function, but only authorizing the expenditure of Government funds. Under the rules of the House it is no longer possible to create a function by legislation and in the same measure appropriate money for its support. But the practical result is the same, because upon its authorization the Bureau of the Budget as a matter of common practice could not indirectly override legislative intent. In practice, a supplementary Budget estimate is then submitted to the House of Representatives, and the Appropriations Committee, feeling the moral obligation in the original authorization, generally appropriates the necessary funds involved. Yet the sponsor of this movement to make charges upon the Public Treasury has not felt the responsibility of devising means and methods of procuring the revenue to meet his obligation. This state of affairs can not exist in any other legislative body of the great powers of the world.

The appropriation of large sums of money for local enterprises has long been a subject of unsavory comment in the United States. It is notorious that activities along this line have been carried on by systems of traffic and trading—more so in the past than at present.

England, Canada, and Australia are relieved from these embarrassing features of legislation. A rather hasty examination of the legislative machinery of other foreign countries likewise indicates that they are not subject to such burdens. While not advocating the adoption of the parliamentary procedure of these foreign countries, it might be well nevertheless to consider some of the constitutional provisions, rules, and regulations standing between the people and some legislative defects noticeable in our own country.

It might be well again to summarize some of the influences which have made possible creation and growth of many governmental agencies. In practically every instance their inception can be traced to the agitation of some small group active and well organized. In practically every instance their appearance was accompanied with appropriations of money, possibly small in amount. Once established, their growth was rapid and their consumption of public funds enormous. Three conditions exist in our legislative branch of government extremely conducive to the growth of such bureaucracy:

First. Insistent demands of small groups, backed by local influence urging a new Government service.

Second. The comparative ease in obtaining under our legislative procedure consideration of bills calling for the appropriation of money.

Third. The legislative machinery involved in the consideration of these measures.

BUDGET THEORY OF THE UNITED STATES

We charge in theory the Executive with the successful operation of Government finances. Under our new budgetary system the executive department is charged with the responsibility of seeing that expenditures are held within the revenue. In the event of a fluctuation or change in these revenues, such as we have experienced in the past few years, the Executive is further charged with the duty of outlining the methods and means of raising sufficient revenue with which to carry on functions of government. After months of toil and thought the Executive may adopt a program which will accomplish this end. Yet this same program upon submission to Congress may be rendered valueless through indiscriminate appropriations neither authorized nor sanctioned by the Executive. In reality therefore the Executive is charged with the responsibility for Budget success but at the same time deprived of sufficient power by which he can accomplish such a financial program.

This situation does not exist under parliamentary procedure of any other English-speaking country, nor apparently in either France or Germany. Only in our own country, where we have such free and almost unhindered power in the matters of legislation, can such conditions exist. If we are to charge the Executive with these grave responsibilities, we should also enable him to safeguard public expenditures and to maintain a well-planned and well-conceived financial program.

Much of our legislative machinery has been patterned after that of England. Although making in many instances radical departure in the establishment of our system of government itself, nevertheless, in a great measure, we have borrowed from the English parliamentary procedure. We have, however, ignored many of the advances and changes which have been made by that body to safeguard the appropriation of public funds.

England, Canada, and Australia have thrown such regulations about their legislative procedure that a member can not as a matter of right introduce any kind of a bill or equivalent resolution without parliamentary permission. This is embodied in a motion for leave to introduce such a bill; and in the Canadian House of Commons, as announced in standing order No. 45, it is provided that 48 hours' notice shall be given for a motion for permission to present a bill.

In these same countries no one as a matter of right can obtain consideration of a measure appropriating public money without permission of the sovereign.

The most sweeping provision in English parliamentary procedure is standing order No. 66, relating to public business, found on page 34 of the Standing Orders of the House of Commons, which provides:

> This house will receive no petition for any sum relating to public service, or proceed upon any motion for a grant or a charge upon the public revenue, whether payable out of the consolidated fund or out of money to be provided by Parliament, unless recommended from the Crown.

Before appropriations can be made charges upon Government funds in England a motion must be made in a committee of the whole house for an address to the Crown, praying—

> that any money may be issued, or that an expense may be incurred.

Practically identical provisions prevail in both Canada and Australia.

In all of these countries the measures calling for the appropriation of public money are taken up for consideration with the utmost deliberation. Standing order No. 60 of the Rules and Forms of the House of Commons of the Dominion of Canada, standing order No. 243 of the House of Representatives of the Commonwealth of Australia, and also standing order No. 71, relating to public business of the House of Commons in England, provide:

If any motion made in the house for any aid, grant, or charge upon the public revenue, whether payable out of the consolidated fund or out of money to be provided by Parliament, or for any charge upon the people, the consideration and debate thereof shall not be presently entered upon, but shall be adjourned until such further day as the house shall think fit to appoint, and then it shall be referred to the committee of the whole house before any resolution or vote of the house do pass thereupon.

The motion referred to in this order relates to an address to the Crown, praying that any money may be issued or that any expense may be incurred. It will be remembered that no charge upon the treasury can be made except upon the recommendation of the Crown, and for this reason it is necessary to proceed by motion upon the part of the House of Commons for an address to the Crown for that purpose. Nor under this principle can any resolution or amendment to increase a charge upon the people be initiated except by a minister acting on behalf of the Crown. Also, amendments proposing any increase in a resolution reported from the committee on ways and means is out of order.

In the Standing Orders of the House of Representatives of the Commonwealth of Australia, order No. 153, relating to private bills, provides that every such bill—

shall be initiated either by a motion for leave to bring in the bill, specifying its intended title, or by a motion that not less than two members prepare and bring it in, or by an order of the house.

Standing order No. 171 of the same body provides:

No amendment for the imposition or for the increase of a tax rate or duty shall be proposed by any nonofficial member in any committee on any bill.

In Australia the inhibitions upon the appropriation of public money have gone farther than either in England or Canada. In the two latter countries the question has almost entirely been treated through standing orders of the legislative branches of government. In Australia, however, the constitution itself in article 56 provides that no appropriation of revenue or money shall be passed unless the purpose of the appropriation—

has in the same session been recommended by message of the governor general to the house in which the proposal originated.

It will thus be observed that of these three countries Australia has presented the most unyielding safeguard with reference to public expenditures.

LEGISLATIVE PROCEDURE AS TO PRIVATE BILLS IN OTHER COUNTRIES

A private bill in the English Parliament has a long and difficult route of travel. In the first place, a petition must be filed and this petition must be in strict conformity with the Standing Orders of the House of Commons which correspond to Rules of the House of Representatives in this country. An officer known as an "examiner of petitions for private bills" inspects the petition to verify the compliance with such standing orders. In the event of compliance he then refers the measure to the ways and means committee. This committee in turn is divided into subcommittees, those dealing with opposed measures and those with unopposed measures.

Order No. 2, Chapter I, of the Standing Orders of the House of Commons of England, dealing with private bills, provides for the appointment of—

one or more officers of this house, to be called "the examiners of petitions for private bills," who shall be appointed by the speaker.

Chapter II, dealing with private business, provides elaborate procedure and conditions to be fulfilled before a private bill can be considered by that body. In the first place, an application must be made to the House of Commons for leave to bring in such a private bill, and before such application is acted upon a notice must be published in a newspaper in the particular locality to be affected by the proposed legislation. In addition, there must be a limited publication in the London Gazette, and if the powers sought by the bill affect Scotland or Northern Ireland also there must be publication in the Edinburgh or Belfast Gazette. These notices must specifically inform the public as to the source of all necessary information in connection with the proposed legislation. In almost every instance where any attempt is made to procure the passage of a private bill notice by publication must be effected in order that anyone may be heard in opposition to the proposed measure.

Standing order No. 106, relating to private business, found at page 165 of the Standing Orders of the House of Commons, provides for the selection of "the committee of selection," consisting of 11 members, 3 of whom shall constitute a quorum, and order No. 110 provides that the committee of selection shall—

refer every opposed private bill which shall have been referred to them, or any group of such bills, to a chairman and three members not locally or otherwise interested therein.

Section 118, as a further safeguard against any effect of local interest, provides that each member of the committee before he shall be entitled to vote shall sign a declaration, as follows:

I do hereby declare that my constituents have no local interest and that I have no personal interest in such bill, and that I will never vote on any question which may arise without having duly heard and attended to the evidence relating thereto.

Even when there has developed no opposition to a proposed bill, standing order No. 145, page 178, provides:

No member, locally or otherwise interested, of a committee on any unopposed private bill shall have a vote on any question that may arise, but every such member shall be entitled to attend and take part in the proceedings of the committee.

EFFECTIVE GOVERNMENTAL REORGANIZATION DEPENDENT UPON LIMITATION OF POWER OF APPROPRIATION

For many years there has been an insistent demand for a curtailment of governmental activities. The practical difficulty is that the same influences responsible for their establishment prevent curtailment through legislative action. Absolute reorganization of governmental functions is impossible under the supervision of Congress alone. It will never be a reality until the Executive is given free and unlimited power to deal with this question. Authority must be delegated by Congress to the Executive without qualification. The action of the last session of Congress empowering the Executive to effect consolidations along this line, subject to the right of veto at the hands of Congress, has clearly demonstrated that this method is not practical. The bureaus and departments affected in every instance can arouse such local influence and bring to bear such political pressure upon the legislative branch of the Government that constructive results are impossible.

As a member of the minority party, I hope that ultimately the Executive will have ample power to deal with this question in a free and constructive manner. Only the Executive can accomplish the desired results.

We must not lose sight of the fact, however, that even after reorganization there is probability of the ultimate resurrection of these various functions. Their reappearance could be brought about by the same influences that have heretofore created them. If the Executive is to be intrusted with the reorganization of these executive departments, the same Executive should be intrusted with power to exercise some permanent control over the possibility of their subsequent reappearance. There is no more effective means of prevention than to place some safeguard upon legislative ability to make further indiscriminate charges upon public funds. For that purpose I do not advocate an amendment to our Federal Constitution. Such a program would be a reflection upon the American people themselves—a blight upon one of the branches of our Government. Resort might be made to the adoption of effective legislative rules of order. With precedents existing in England, Canada, Australia, and other countries, in some manner we can circumscribe the right to introduce measures for the appropriation of public

funds. Or we can make the consideration of such measures dependent upon their containing some feasible plan or program for obtaining the requisite revenue to meet the corresponding expenditure.

I am not advocating the English method of appropriating public funds. I merely make these observations as to the prevailing conditions in other countries in order that it may be seen just how difficult it is to charge the public treasury in those countries with indiscriminate appropriations. In this country it would not be necessary to adopt such strenuous methods. Further, I believe that such arbitrary Executive power would be contrary to our republican form of government.

It is well to consider, however, the practicability of adjusting the rules of our legislative bodies restricting indiscriminate appropriations covering items not contained in the Budget, unless there accompany such appropriations manner and means of raising the corresponding revenue. This would place upon the individual seeking these charges upon the Government finances the problem of devising ways and means by which to meet the particular obligations for which he is responsible.

Doubtless had such a financial program been established early in the history of this country, demands upon the Public Treasury would have been materially reduced. It would have awakened public interest in every appropriation bill considered by Congress. Instead of the public indifference which witnessed every appropriation, there would have been the corresponding public resentment against increased tax burdens.

The agitation of a well-organized minority, prompted possibly by local interest, would have been neutralized by popular indignation towards additional taxation.

The present agitation for the curtailment of departmental activities and Government bureaucracy will be of little permanent effect unless coupled with a revamping of legislative machinery restricting the future possibilities toward the same bureaucracy which we now seek to curb.

Let it also be remembered that the expenditure of enormous sums of money in what might be termed local projects has been made possible also through this same system of legislative machinery, a slight regulation of which would seem advisable with reference to appropriating public funds. [Applause.]

Mr. GARBER. Mr. Chairman, will the gentleman yield?

Mr. HOGG of West Virginia. I yield.

Mr. GARBER. Will not the gentleman also give credit to our system in this connection and mention the functions of our Committee on Appropriations which must act on all bills calling for appropriations?

Mr. HOGG of West Virginia. I was coming to that; I shall be pleased to.

Mr. GARBER. Will the gentleman yield?

Mr. HOGG of West Virginia. I yield.

Mr. GARBER. Would not the gentleman also charge it up to the demands of the several localities upon the Government to create agencies to do this, that, and the other thing?

Mr. HOGG of West Virginia. Absolutely. It is a responsibility of the American people, coupled with local interests.

Mr. JENKINS. I would like to ask the gentleman a question. The gentleman's remarks show that he has made a very careful study of this proposition, and I would like to know his final recommendation. Does the gentleman think something should be done whereby the legislative branch would surrender some of its authority or should something be done whereby the executive branch would be given more authority?

Mr. HOGG of West Virginia. I may say to the gentleman that I am not in a position to be conversant with the rules of either legislative body to such an extent as to make a specific recommendation. I want to make this statement. By way of precedent, however, it has been taken care of in the English House of Commons through their standing orders which are the equivalent of the rules of the House of Representatives.

Mr. EATON of Colorado. Will the gentleman yield?

Mr. HOGG of West Virginia. I yield.

Mr. EATON of Colorado. I was most interested in the gentleman's conclusion where he speaks of the ease of obtaining Government appropriations. Perhaps the experience of the gentleman has been different from mine, but I have attempted to obtain one or two very necessary appropriations and I have found it far from easy. I have found that full proof has to be made before committee after committee, day after day, and different Members satisfied that the project is correct, that the amount is correct, and even then we have had to wait from day to day and month to month to permit inquiry before we could get any place in having an appropriation made for a proper purpose.

Mr. HOGG of West Virginia. I would like the gentleman to understand that when I say "comparative ease," I mean in this legislative body in comparison with the legislative bodies of other countries.

I have in mind, specifically, various Government functions which have been initiated in the first instance for a small group of people, possibly, pervaded by local needs. This has usually been the beginning, and the matter has had a modest initiation, but in the intervening years it is gradually increased until it blossoms out and reaches into every section of the country and makes its influence widespread. I do not have in mind any particular item, but I mean as a general proposition in comparison with other countries in the way appropriations have been made.

Mr. EATON of Colorado. Would the gentleman say, then, that what is actually appropriated comes easy, but that everything else is either hard or impossible?

Mr. HOGG of West Virginia. The gentleman's statement is a little specious. I simply wanted to give this data with reference to the manner in which this has been done in other jurisdictions for whatever it may be worth.

Mr. EATON of Colorado. May I conclude with the statement that I simply want to point out it is not, in fact, easy to obtain a great number of proper appropriations? Many applications should never be considered at all except for the purpose of giving a hearing and disposing of the matter, and as to the general operations of the Government, this is a field where the appropriation appears to be easy and where many items have grown in a mushroomlike way.

Mr. JENKINS. Will the gentleman yield?

Mr. HOGG of West Virginia. Yes.

Mr. JENKINS. I would like to say to the gentleman that if he is interested in following further the theme of his address, he can find in the CONGRESSIONAL RECORD of a few days ago some comment by Senator WALSH of Massachusetts, made in the Senate, dealing with some of the phases of the question that has been gone into by the gentleman. Senator WALSH advances the theory that sometimes it is difficult for legislative bodies to apply rigid restrictions and that it is easier for an executive to hew to the line.

Mr. HOGG of West Virginia. Yes.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. HOGG of West Virginia. I yield.

Mr. SUMMERS of Washington. I think it ought to be stated that before any appropriation is made a bill authorizing such appropriation must be considered by a House committee and a Senate committee. It must have been reported on by the appropriate department of the Government and by the Budget, and it must be acted on by the House and by the Senate. Thus a bill even authorizing an appropriation is considered six times and must then be approved by the President. Then, when it comes to the matter of the actual appropriation, again it must be referred to the House and Senate Appropriations Committees, must be referred to the appropriate department of the Government, must be approved by the Director of the Budget, and must be acted upon by the House and by the Senate, and then approved by the President. So it has been considered and approved fourteen times before the actual appropriation is made and is available.

Mr. HOGG of West Virginia. And if I understand the gentleman correctly, that is by reason of the Budget Act of 1920.

Mr. SUMMERS of Washington. Yes. The procedure I outline is that followed since the Budget law of 1929 was enacted.

Mr. HOGG of West Virginia. I made specific reference to the origin of these bureaus and agencies which we are now seeking to contract, stating that the origin might be, and doubtless is, found in the fact that at some remote time they were created by some local influence backed up by insistent demands and hard work, we might say, which finally resulted in an appropriation.

As I understand, when Congress authorizes the appropriation of money or creates any kind of agency, the Committee on Appropriations feels a moral responsibility to carry out the intention of Congress. They can not sit as a monitor, and the responsibility is not on the Appropriations Committee.

Mr. SUMMERS of Washington. And still it often does not appropriate the full amount that has been authorized, and the committee is practically directed by the Congress.

Mr. HOGG of West Virginia. Yes.

Mr. SUMMERS of Washington. The gentleman has made a very interesting and instructive statement, but I thought it ought to be stated that consideration must be given by the Congress and by the committees and by the departments on at least several different occasions before money is actually appropriated. No one should believe it is easy to get money out of the Public Treasury.

Mr. HOGG of West Virginia. Yes; but I may say by way of observation that the power of the Appropriations Committee and its consideration of an appropriation bill can be rendered nugatory by indiscriminate additions to the appropriations which have even been recommended by the Committee on Appropriations; that is, the committee is not clothed with absolute power to deal with the appropriation.

Mr. SUMMERS of Washington. No; it is not; and, of course, through the legislative branch there should be many changes made and greater economies effected. However, the gentleman from West Virginia has made a very illuminating and valuable statement.

Mr. HOGG of West Virginia. I want to say to the gentleman, not by way of advancing any superior knowledge or any superior plan at all, I prepared this statement as a matter of general interest. [Applause.]

[Here the gavel fell.]

Mr. SANDLIN. Mr. Chairman, I yield 25 minutes to the gentleman from Indiana [Mr. LUDLOW].

Mr. LUDLOW. Mr. Chairman, I have arisen to call attention of this distinguished audience in this national forum to a phenomenon in governmental reform that is taking place in the State house at Indianapolis, under the inspiration and guidance of an Indiana statesman, Gov. Paul V. McNutt.

I do this primarily because I believe the Legislature of Indiana at this very time, under the direction of Governor McNutt, is furnishing to the country a rather impressive object lesson of what the Congress of the United States may reasonably accomplish at the coming extra session on a bigger stage and a much larger scale as relates to reform in the National Government under an aggressive leadership of President-elect Roosevelt.

I verily believe that the same wholesome philosophy that has actuated Governor McNutt in the accomplishment of notable results in Indiana and a repetition of his direct, speedy, dynamic method of applying that philosophy to the correction of existing abuses in the National Government would enable President-elect Roosevelt, with the sustaining support of public sentiment, to write "finis" to Federal bureaucracy, which is a consummation devoutly to be wished. [Applause.]

Paul McNutt has been Governor of Indiana less than one month, but during that brief time he has made a record of dramatic achievement. He has demonstrated leadership and statesmanship of a very unusual order. Having to deal with an overwhelming Democratic majority in both branches of the legislature—a majority that might easily have run away under a weak leadership—he has been able to obtain the full cooperation of that majority in a patriotic course that has magnificently subordinated political expediency to the public weal. As an Indiana Democrat, I am a little prouder of my party than I ever was before, and that is on account of the solidarity, the rhythm, the precision, the esprit de corps with which it is moving forward under the ægis of its capable governor to work much-needed reforms in the direction of simplifying our State government, reducing or abolishing extravagant commissions and boards, and lessening the load on the backs of the taxpayers. And I may add that I never before was quite as proud of our Republican friends and of the Republican newspapers of Indiana, because so many of them are forgetting partisanship and as citizens interested in good government are yielding to the dictates of patriotism in rendering to the governor the encouragement he so justly deserves in his great fight in behalf of the people of our State.

Governor McNutt has written a new meaning into our political platforms—a meaning that is expressed by the word "sincerity." For years, or almost until the memory of man runneth not to the contrary, political stump speakers roaming over Indiana in campaign times have inveighed against the boards and commissions with which our State government is ramified, to the great oppression of the taxpayers who have to pay the bills; but always the net result has been that after the election the legislature would add a few more offices, commissions, and tax-eating agencies to the bureaucratic structure that already was sapping the financial resources of the people.

On Governor McNutt rested a heavy sense of duty, and he set about immediately to redeem his solemn campaign promise that he would use the influence of his office to change this situation. He was sworn in as governor on January 9, and in less than one month he has brought forward and has secured legislative indorsement of a reorganization bill to take the government of Indiana away from the bureaucrats and restore it to the people. That plan no doubt has its flaws, but the fact remains that it is of epochal significance in the direction and impetus it gives to governmental reform in our State.

Seventy-three of the one hundred members of the house of representatives and 35 of the 50 senators—all but 42 of the 150 members of the legislature—have affixed their signed approval to legislation proposed by the governor, which gives him the power to wipe out all of the 86 boards and commissions and reorganize the State government into 8 departments in the interest of simple, direct, and efficient service with estimated annual savings running into the millions. Under the powers conferred upon the governor by this legislation, our Indiana bureaucratic Sampson is about to have his locks shorn. This reorganization measure is now on its way through the legislature, and the reaction to it throughout the State is generally favorable. It no doubt has defects, but these can be ironed out later. Possibly in its present form it concentrates too much permanent power in the chief executive of the State; but, if so, that can be corrected later by amendment. Objection is made to it on that score and some critics have called it a "Mussolini" bill, but the governor stoutly asserts that he has no intention to arrogate authority to himself. Most students of governmental reorganization believe the governor is the only official of a State who is powerful enough to force such an organization, and therefore the authority must be vested in him if the job is to be done at all. By the same token it is held that the President of the United States alone has the power to bring about a reorganization of the Federal Government, and that is the basis for the action of Congress which vests that authority in President-elect Roosevelt. It is essentially a 1-man job, whether in State or Nation. The important thing is that it is the first big step toward a real reorganization of the State government.

Already Governor McNutt's plan has been indorsed by the Indiana State Chamber of Commerce, the Indiana Farm Bureau, the Indiana Manufacturers' Association, the Indiana Federation of Labor, and other nonpolitical organizations that speak for powerful component elements of our

citizenship. More remarkable still, it has the unqualified indorsement of H. H. Evans, Republican floor leader of the Indiana House of Representatives, who says in a statement issued to the public:

Our trouble has always come from the appointive officials with boards and commissions that have constructed political machines to distribute patronage and keep themselves in office until we find ourselves surrounded by corruptionists of the worst sort who defy their removal. This bill, which gives the governor wide authority, would make it possible for the people to place responsibility.

While the mills of the gods are grinding in the interest of the people in Indiana, is it too much to hope that they will soon be grinding in the interest of all of the people of the United States in Washington? I think not. All that is needed to effectuate a reorganization of the National Government to curb bureaucracy and uproot overmanned, tax-consuming bureaus and commissions in Washington is the same sort and quality of leadership that Gov. Paul McNutt is displaying in Indianapolis. I believe we are assured of that leadership in the splendid, patriotic, able gentleman who has been chosen as our President during the next four years.

One thing for which I hope and pray is that President-elect Roosevelt will be able to have ready for presentation to Congress when it meets on the opening day of the special session in April a complete, well-considered, and drastic plan to reorganize the Federal Government, and that it will be pushed with the same celerity and force that is being exhibited in reorganizing the State of Indiana to meet the exigent public demand for less bureaucracy, less paternalism, and more economy in government. [Applause.]

It should not be overlooked that time is the essence of this situation. If the proposal can be presented on the opening day and pressed to immediate conclusion with all the power and energy that radiates from the rising sun, the incoming President will have a much better chance of success than if it is delayed until the multiplied elements of opposition and antagonism have time to marshal their forces against it. The game of the personal and group interests that profit by a maintenance of the existing bureaus, boards, commissions, and varied forms of privilege and graft will be to make a play for delay. Every day that passes without action will strengthen their hand.

Fortunately, the factors are already in view to enable the President elect to act with directness and thoroughness. The Congress of the United States, by an amendment to the Treasury and Post Office appropriation bill, is giving to Mr. Roosevelt, among other broad grants of power, the right "to abolish the whole or any part of any executive agency and/or the functions thereof."

Congress last year placed President Hoover in the anomalous and unfair situation of directing him to reorganize the Government without giving him legal authority to do the job. The enabling legislation carried in the economy act did not permit him to abolish even one of the great number of superfluous bureaus and useless tax-consuming agencies with which our Federal bureaucracy is honeycombed and the cost of which has fixed an unbearable burden on the taxpayers of the country. It was the same as if Congress had said to the President, "You are to build a new temple of government in this country, but you shall not have a single tool to do it with."

I have no criticism to offer against the President. I have the utmost faith in his integrity and honesty of purpose. He no doubt has done the best he could under the strict limitations of the power conferred.

It was simply not possible, under the strict legislative restrictions placed upon him, that he could bring forth a satisfactory plan of reorganizing the Government, and I submit to the oppressed taxpayers of the country this question:

What does a governmental reorganization amount to that does not abolish a bureau, fire a bureaucrat, or save a dollar?

It is worse than a pyrrhic victory over bureaucracy.

It is no wonder that Colonel Roop, Director of the Budget, the President's close friend and collaborator, suggested that the matter be allowed to go over, so that the President elect, operating under more ample powers, may do a more thorough job of reorganizing the Government.

Mr. EATON of Colorado. Will the gentleman yield?

Mr. LUDLOW. I yield, with pleasure.

Mr. EATON of Colorado. The President sent certain recommendations to Congress, and according to the hearings before the committee, Colonel Roop recommended that those recommendations of the President be not followed, and that the whole matter go over. Was not that a retraction by Colonel Roop of his previous attitude?

Mr. LUDLOW. I can not tell the gentleman, for I do not know what his previous attitude was. I know what he said to the committee. He recommended that the whole matter go over until the new administration comes in.

Mr. WHITTINGTON. Will the gentleman yield?

Mr. LUDLOW. Yes.

Mr. WHITTINGTON. I think the record will bear out the statement of the gentleman from Colorado.

Mr. LUDLOW. In my opinion no reorganization of the Government would be acceptable that does not eliminate at least two departments and many scores of bureaus, boards, commissions, and other tax-eating agencies, strike thousands of names off the pay roll, and reduce the charge on the taxpayers many hundreds of millions of dollars.

Fortunately, Mr. Roosevelt, in his great task of uprooting Federal bureaucracy and restoring government to a simplified and economical form, will not be held in check by any of the handicaps that have beset President Hoover. He is given authority to prepare and present to Congress a plan that will strike all of the bureaucratic excrescences off the structure of government, consolidate activities that are doing the same, or substantially the same, work, and reduce the Federal pay roll to the minimum. He has brought to his assistance one of the brightest minds in America. He has delegated the preparation of his reorganization plan to former Representative Swagar Sherley, of Kentucky, who for many years was chairman of the Appropriations Committee of the House, whose great intellect and inexhaustible knowledge of the Government's fiscal affairs are subjects of admiring comment among all of his friends and acquaintances.

The reorganization of the Government is, as I conceive it, the biggest job before the incoming national administration. It is a job where superficialities must be set aside and we must strive to attain the fundamentals. No slap on the wrist will suffice; it must be a major operation. It is stimulating to the pride of a Hoosier Congressman to believe at least that in this great undertaking a Hoosier governor and a Hoosier legislature have pointed the way. [Applause.]

Mr. SANDLIN. Mr. Chairman, I yield five minutes to the gentleman from Georgia [Mr. Cox].

Mr. COX. Mr. Chairman, we all know that we have before us for attention at some future date the business of determining what we are going to do with the Farm Board. I want to make a brief statement having some bearing upon this question.

When the board was set up it took on as its publicity man Edgar Markham. He continued in that position until something over a year ago, when the board was somewhat reorganized in the interest of economy, and Mr. Markham took the position as secretary of the board.

So, to-day, Mr. Markham knows more about the Farm Board and its operations than any other man in the country. About the middle of January, Mr. Markham gave notice that on the 1st day of February he would sever his connection with the board. He disclosed to no member of the board, or anyone else connected with this agency of the Government, what he would do after leaving the board.

But on the last workway of January he remained in his office until after everyone else had left, and on the next morning there was found on his desk a statement that he had taken employment with the committee of the Grain Exchange, which is made up of the Chicago Board of Trade and the Kansas City and Omaha Boards of Trade, and other

exchanges. The notice was that he was taking employment with that committee as its Washington legislative representative.

I merely call your attention to that in order that you may form some idea or in some way be informed as to the methods that are being employed on the part of certain private interests to destroy the one agency that Congress has set up to serve the agricultural classes of this country.

I venture the observation that no reputable competitor would under such circumstances do such a thing as this committee of the Grain Exchange did in this particular instance, and that is, in an underhanded manner, buy the confidential agent and representative of a competitor. The board is the only agency in this country offering any effective resistance to the operations of the exchanges. We must keep these things in mind in dealing with this problem. We can not afford to follow blindly the promptings of the private trader.

In this same connection—that is, as having a bearing upon the question of what Congress will do with the Farm Board and as to what is going to be the policy of the Congress hereafter—I beg your indulgence to read into the RECORD in my time a brief statement made by Lord Astor upon the occasion of his recent visit to the United States. He said:

Those who fear the result of assisting agriculture to a place of parity with industry should inform themselves on what is being done in other countries to give direct governmental assistance to the farmers. Only the last week in 1932 the French Government voted $12,000,000 to an embryo farm board to support the prices on a surplus of wheat carried over into the new year. From 1900 to 1928, the latest figures obtainable, the French Government loaned 1,168,557,951 francs to farmers, and of this amount 23.4 per cent was for long-term loans to cooperative-marketing associations. There are 5,730 farm-credit societies in France, having a membership of 383,000. There are 9,000 cooperative-purchase societies, with a membership of 1,225,000; 1,500 cooperative cheese-making societies, with 70,000 members; and 2,877 societies for cooperative marketing and production. In Germany, during the second half of the nineteenth century, in the face of an increase in the rate of rural depopulation, the sentiment grew that agriculture was not merely an industry but that it had a special claim upon the attention and assistance of the Government. A credit system both for long and short term loans was built up, which for efficiency and for terms which it was able to give was probably without parallel in any other country.

During recent years Germany has made a marked increase in the number of her cooperative societies, and these have played a large part in determining the economic status of that country's agriculture. At the beginning of 1930 there were 40,845 agricultural cooperative societies in Germany, having a membership of over 4,000,000 farmers, or one-third of her total farm population.

Over 40 countries of the world have laws paying bounties to or otherwise assisting agriculture, and 26 countries have some form of laws relating to compulsory cooperation.

Mr. LUDLOW. Mr. Chairman, I yield 15 minutes to the gentleman from Mississippi [Mr. WHITTINGTON].

REDUCTION IN CONGRESSIONAL SALARIES FIRST STEP TOWARD FURTHER REDUCTIONS

Mr. WHITTINGTON. Mr. Chairman, the chief problem confronting the country is the burden of taxation. There should be further reduction in the expenditures of government. It is estimated that the Federal Budget for 1934 is $3,775,884,000. Federal salaries and wages are estimated to be $1,250,000,000. If the economy act is continued, the reduction will be approximately $89,000,000. But the country has gone from bad to worse since Congress passed the economy act in 1932.

The Democratic platform announced that a party platform is a covenant with the people. It declared for an immediate and drastic reduction of governmental expenditures to accomplish a saving of not less than 25 per cent. It has been repeatedly said that it also declared for an immediate modification of the Volstead Act within the limits of the Constitution. I emphasize that at least the same immediate action was promised respecting reduction as was promised in the matter of modification. The reduction in salaries will not completely solve the perplexing problem confronting the country. But further reductions will be a distinct contribution. They are vital and essential.

President Hoover in December, 1932, recommended retaining the furlough and an additional reduction of 11 per cent, with an exemption of $1,000. The Bureau of Efficiency estimates that under his recommendation Federal salaries and compensation would have been further reduced $55,000,000. The salaries of Members of Congress would have been reduced from $9,000 to $8,120.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. In just a moment. I want first to complete my statement and then I shall be glad to yield.

What has the House done? What further decreases have been provided? What substitute for the decrease offered by President Hoover has the House proposed? Thus far we have provided to continue the economy act for another year. The people are not satisfied. They demand further reductions. It is time for action. We have talked economy enough.

There is a spirit of unrest and dissatisfaction among the people. Many have lost faith in the Government. There must be the tonic of self-sacrificing example.

I believe that all salaries should be further reduced. All employees of the Government receiving the same salaries as Members of Congress should have the same or greater reduction. I favor a progressive and graduated reduction, with a reasonable exemption. I advocate a larger percentage of reduction in the higher salaries.

I am a member of the Committee on Expenditures. I favored consideration and report on bills pending before that committee for general reduction. I supported the Economy Committee and voted for all reductions proposed. I have continued to advocate reductions. I have waited until the Committee on Appropriations proposed this session to continue the provisions of the economy act, and I remind the House that this was legislation upon an appropriation bill. It was made in order by special rule. I have introduced a bill not only to reduce salaries of Members of Congress but to reduce the salaries of all Government employees receiving more than $1,000, with reductions ranging from 10 to 30 per cent. I proposed a separate bill for reducing the salaries of Members of Congress to $7,500. The same reduction is made in the bill for reduction of all salaries. I waited until the other body had failed to make further reductions before I introduced bills to reduce.

The reductions I propose are as a substitute for and not as an addition to the furlough plan. The Bureau of Efficiency has estimated that the reductions proposed in the bill that I have pending before the Committee on Expenditures, with a minimum exemption of $1,000, will aggregate $170,000,000 if substituted for the furlough plan.

OBJECTIONS TO REDUCTIONS

I am familiar with the arguments in opposition to the further reduction of salaries. It is said that living expenses have not decreased in Washington. I answer that they will not decrease until Federal salaries have been further reduced. Moreover, there have been some decreases.

It is said that Members of Congress should receive $10,000. I answer that $7,500 in 1933 generally will go as far as $10,000 in 1925 or 1929. I also reply that reduced salaries generally will purchase as much as normal salaries in normal times. I know that the work of Members of Congress has increased during these times of stress and depression. If we were able to discharge our duties with the salaries and allowances in 1929, we can do the work on smaller salaries and allowances in 1933.

It is said that Federal employees have relatives in other sections of the country and family obligations. So have the clerks, so have the women who work in stores and offices throughout the land. It frequently happens that they are supporting aged parents or widowed mothers. It is said that the laborers who received wages from the Government should not have a reduction. The women who scrub the libraries and public buildings of the country have taken their reduction. I know of no good reason why the same reduction should not apply to Washington. Again all Federal salaries are not paid in Washington. Living expenses have decreased generally in the country.

It is maintained that corporations and big business insist that Congress make further reductions so that commercial institutions may reduce. The fact is that business and commerce have already reduced. Patriotic citizens in the store and on the farm and in commerce, have all reduced and their employees have expected reductions.

It is said that the buying power will be reduced by the reduction of Federal salaries. Salaries can only be paid by taxes. I assert that the buying power may be more widely distributed by reducing the salaries to enable the taxpayers to buy more of the comforts if not the necessities of life.

It was estimated during the consideration of the economy act in 1932 that for the previous two years wages generally in the country had been reduced 14 per cent, subordinate salaries 16 per cent, and executive salaries 20 per cent. It was estimated that Government employees receiving around $2,000 were receiving larger remuneration than those doing similar work in private life received. It is known that in the past year further reductions in salaries in civil life have been made.

Congress should take the first step. It is said that Members of Congress hesitate to make further reductions because they refuse to reduce further their own salaries. Let us meet the issue and we can meet it better by example than by talking. We can meet the issue better by taking the lead. If we reduce our own salaries first, we will be in position better to consider impartially further reductions. It is not so much a question of the amount of the reduction of Members of Congress but it is the fact of reduction, for there is a general feeling that Congress has evaded real reductions.

When congressional salaries were increased in 1925, increases in other governmental salaries followed. Members of Congress were reminded that they had increased their own. Others in the Federal service urged increases. If increases followed the increases of congressional salaries, decreases will follow their reduction.

It is urged that salary reduction is a legislative matter and that the Appropriation Committee is without jurisdiction. General reductions can be made in order in the House by a rule or attached as a rider in the Senate. But it is said that reductions should be considered by the legislative committee. They have been considered. The Committee on Expenditures has made no reports. The Economy Committee held long and extensive hearings. Their reports are available. More consideration was given to the reduction of salaries than to any other question.

It is said that all who receive the same salaries that Members of Congress receive should have their reduction at the same time. I agree to the principle. I think that Congress would make a mistake and do not believe the people of the Nation expect us to reduce our own salaries without following by reducing others. But I do believe that the country will applaud Congress taking the first step. I am reminded that congressional salaries were raised from $5,000 to $7,500 at a lame-duck session in an appropriation bill without general salary revisions, on February 26, 1907.

Mr. COX. Will the gentleman yield?

Mr. WHITTINGTON. A little later I will be glad to yield. I am also reminded that after the rules of the House were islate in 1925, and the same rule now obtains, congressional changed when the Committee on Appropriations did not legsalaries were raised by a rider attached to an appropriation bill in the Senate and by a lame-duck Congress.

If it be argued that the reduction of 25 per cent is too great, I remind you that previous increases have been in the sum of $2,500. We have reduced $1,000. We should reduce $1,500. Democratic Members of Congress should follow the platform of the party.

It is urged that the matter of further reductions should be for the new administration. If it was the immediate duty of Congress to consider repeal and beer, it is the immediate duty of Congress to consider reductions. Moreover, if the salaries of Members of Congress are reduced for the next fiscal year, such reductions can be made in other salaries during the present session or at the extraordinary session. Both would be effective during the next fiscal year.

The legislative committees have made no reports for further reductions. Bills have been pending for more than a year. Under the rules, we can reduce our own salaries in the legislative appropriation bill. Under the rules, the Senate can attach a rider reducing all governmental salaries. The House should set the example. The House passed the economy act first.

I am reminded that the adoption of the lame-duck amendment will reduce the term of the Members of Congress by two months. This is no information. Congress knew that such would be the case when the amendment was submitted. But Members of Congress and their successors must be paid. It is not a question of who receives the salary, but a question of the amount of salary paid. Nor do Members of Congress pay any more income taxes on their salaries than those receiving similar salaries in private life. We pay no State income tax on our salaries.

It is time for Congress to set the example to the country. It is time for Congress to assert its leadership. It is time for Congress to make good our own preachments by our own deeds. The people of the United States are now confronted with an emergency more serious than war. It is time for sacrifice. The best way to secure further reductions in the expenditures of Government is for Members of Congress to take the initiative in reducing their own salaries. Publicity should characterize all expenditures by Congress. The reduction of congressional salaries will give new hope and new confidence to the country.

What is the duty of Congress? It is time for Members of Congress to assert their leadership. When the people are without jobs, when citizens are losing their homes and their farms, it is time for Members of Congress to sacrifice. Oh, we can find excuses. Let us take the lead in really solving the problems of government.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. LUDLOW. Mr. Chairman, I yield five additional minutes to the gentleman from Mississippi.

Mr. WHITTINGTON. This is my thought: My colleagues are entitled to their own opinions. I am entitled to mine. If the Congress of the United States will set the example, if we will put our own house in order, if we will say we are willing to work more for less and to sacrifice, it will give the people of the country hope and cheer. It will create confidence in the Government as nothing else will do.

Mr. BOYLAN. Will the gentleman yield?

Mr. WHITTINGTON. In just a moment I will be glad to. I say, we should reduce our salaries in the pending legislative appropriation bill, as under the rules general salary reductions are not in order. Then, under the rules, the other body, the Senate, will be able to make general reductions so that all Government employees may have similar reductions.

I stand for further general reductions. But if we are unable to secure general reductions of all salaries, I favor Congress taking the lead. Then what will happen? In 1925, when we increased our salaries, other salaries and other allowances were increased, and they went higher and higher. I believe the increase was justified in 1925 and that the reduction is justified now. Federal salaries generally have been increased before Members of Congress increased theirs. There is no valid argument for increase in prosperous times if we do not reduce in periods of distress.

Mr. McKEOWN. Will the gentleman yield?

Mr. WHITTINGTON. In just a moment I will be glad to yield. I now assert that if we decrease our own salaries other reductions will follow.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. I yield.

Mr. BLANTON. The gentleman knows there are employees of this Government drawing salaries of $15,000, $16,000, $20,000, and even $30,000 a year. Is the gentleman willing to vote for a bill to fix a maximum of $7,500 a

year as the highest salary any official may draw, except the constitutional offices, which Congress can not control?

Mr. WHITTINGTON. I have introduced a bill that will not interfere with the constitutional offices at all. My bill proposes graduated reductions from 10 per cent to 30 per cent, and if the gentleman wishes to make them higher I will consider further reductions in the highest salaries. The bill is not perfect, but it will serve as the basis for general reductions. I only favor equal and fair treatment to all Government employees.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. I yield.

Mr. COX. The gentleman has somewhat anticipated my inquiry. I would like, however, to refresh his mind by stating that the raise of pay of Members of Congress followed the raise of pay of everyone else in the employ of the Government.

Mr. WHITTINGTON. What is the gentleman's question?

Mr. COX. It is this: The gentleman referred to two bills he has introduced. Could he not consolidate them in the interest of either one of the propositions he is advancing?

Mr. WHITTINGTON. Yes; that could be accomplished very simply if the leadership of this House will bring in a rule for the insertion of a paragraph no longer than the paragraph inserted legislatively on the Treasury appropriation bill, continuing the furlough plan, and I urge the Rules Committee so to do at once.

Mr. BOYLAN. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. I yield.

Mr. BOYLAN. I have great respect for the gentleman and for his opinions. I know he carefully examines matters that come before this House.

Mr. WHITTINGTON. Thanks; will the gentleman ask his question? I wish to conclude.

Mr. BOYLAN. The gentleman realizes we reduced our salaries last year 10 per cent.

Mr. WHITTINGTON. We did; and we reduced everybody else 10 per cent who received the same salary. What is the gentleman's question?

Mr. BOYLAN. I will ask it if the gentleman will give me an opportunity.

Mr. WHITTINGTON. I am perfectly willing that the gentleman shall ask his question, and I will very gladly answer it.

Mr. BOYLAN. Does the gentleman think a Member of Congress can maintain a home in his district, live half decently in Washington, and take care of the thousand and one demands made upon him for less than $9,000 a year?

Mr. WHITTINGTON. Answering the gentleman, may I say, I think Members of Congress, like other laborers, are worthy of their hire; and, as I have already said, I repeat again, if we could live on $10,000 a year in 1925 or 1929, when the salaries were increased, we can live on $7,500 in 1933, for if the costs of living have not yet decreased in Washington they surely will, and $7,500 will buy just as much as $10,000 bought seven or three years ago.

[Here the gavel fell.]

Mr. WHITTINGTON. Mr. Chairman, under leave to extend my remarks, I merely desire to say that the gentleman from Missouri [Mr. COCHRAN], chairman of the Committee on Expenditures, opposes further reduction in salaries, and I favor a further reduction. Several bills to reduce all governmental salaries were introduced during the present Congress. Some bills to reduce salaries of Members of Congress alone were introduced. The Committee on Expenditures tabled these bills. I have already stated that I waited for the Economy Committee last session. The Committee on Appropriations under a special rule this session provided for the continuance of the furlough plan. It was then said that there would be further reductions in the Senate. It is now apparent that the Senate will not make reductions. I have asked the Committee on Expenditures to consider the bills introduced by others. When it became apparent that other bills would not be considered, I introduced further bills myself as the basis of further reductions. I asked for hearings. I have never asked for an immediate report, without asking that any who wanted to appear in opposition might have the opportunity to do so, but I urged action and opposed delay. It comes with rather poor grace from the chairman [Mr. COCHRAN], the gentleman from Missouri, who, according to the Washington Evening Star of February 1, stated my bills would die in the committee, to state that I demanded immediate report, when he himself stated substantially that the bills were useless, as he objects to the bills being reported.

With respect to the bill that I introduced to provide for the reduction and change in the method of payment of clerk hire, I have this to say: I believe Members of Congress generally expend more than they are allowed in the discharge of their duties. But there is criticism of our system. I desire to improve our method. I am more interested in the method or system proposed in the bill I introduced than I am in the reductions suggested in the bill relating to the clerks. I so stated to the chairman of the committee and to the Committee on Expenditures. I believe that there can be an improvement in the method of handling the clerks' allowance. I went so far as to say to the chairman—and I say now—that if the committee will report the amendment substantially as I offered, I will offer it with the salary just as it is now fixed by law. The chairman of the committee utterly misunderstands H. R. 14488, which I introduced, with respect to the method of paying clerk hire. The purpose is to provide that all of the allowance except about $900 shall be paid by the month to the clerk or clerks employed. There is the provision that the remainder may be paid, not by the month, nor to the Member, but to the person named in the voucher, for services rendered, either in monthly installments or otherwise. My purpose was to improve the present method. If the salary remains just as it is, the effect of my amendment would be the same. It would provide that the difference between the maximum salary which could be paid to one clerk named in monthly installments would be paid on the order of the Member when and as required and be paid to the person named for services rendered, whether by the month or otherwise; not a single dollar of the entire allowance would be paid direct to the Members or to anyone except for services rendered as shown by written order.

The heart of the amendment with respect to clerks is to eliminate the provision that the supplemental allowance of approximately $900, whether under the present rate of compensation or in the salaries I suggest, and I am agreeable that reasonable salaries should be paid only to the person that does the work named in the written order on voucher when and as the work is done. If the present system can not be improved on, then my amendment is not entitled to consideration, but many Members, including myself, have said that the system should be improved. My purpose is to aid in improving the method, so that all payments may be made to regular clerks or clerks by the month and to supplemental employees when and as they do the work and not by the month.

I have heretofore referred to the bill I introduced for the reduction of all salaries, pay, and wages. In a word, this bill provides for the reduction of salaries from $1,000 to $1,500, 10 per cent; from $1,500 to $3,000, 15 per cent; from $3,000 to $5,000, 20 per cent; from $5,000 to $10,000, 25 per cent; and above $10,000, 30 per cent. The bill is intended as the basis for further general salary reductions, to be graduated and made progressive. There is a proviso in the bill that the salary rate of a position in one group shall not be reduced below the reduced rate provided for in the highest salary of the next lower group. Either this bill or similar bills, long and well considered by the Committee on Economy and Congress, could be made in order by the Committee on Rules in the pending legislative appropriation bill. The machinery to reduce generally is easy. The point is that Congress must first decide to reduce.

My whole thought is that all governmental salaries and wages should be reduced. I know that Congress has made economies otherwise. But that is beside the point. I know that other economies are essential. I know that reduc-

tions are vital. I am not to be misunderstood. I have made my contribution. I am not asking that the allowance for clerks be considered separately and independently from the allowance to other governmental employees. The clerks of Members are entitled to the same consideration that all other governmental employees are entitled to. If I am not able to secure consideration of an amendment to provide for general further reductions, I do not want Members to have the excuse that they do not favor reducing the salaries of clerks. I will present the concrete issue in an endeavor to meet the test, and ask that Members first reduce their own salaries, and I will urge that clerks allowances be considered when and in the same ratio that all other governmental clerks are reduced. Economy is better than taxes. Taxes are better than borrowing. Further reduction in governmental salaries and expenditures is the first step to economic recovery.

Mr. HOLADAY. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. LAGUARDIA].

Mr. LAGUARDIA. Mr. Chairman, at another time I hope to have the opportunity of replying to the gentleman from Mississippi, but I want to say at this time that one of the most important matters confronting this Congress which requires action before the session closes is the economic situation of the country. I have spoken on the subject many times. We must act.

Mr. Chairman, this depression has created a new class of profiteers, a small group of people who are able to exploit the misery of the American people and who are slowly but gradually increasing their holdings of the property of this country. Every foreclosure means that property is being concentrated into fewer hands in this country, and unless we bring a halt we shall find that we have here a system of absentee landlords, of tenant peasants, of exploited and impoverished working men and women that will destroy the very fundamentals of American institutions.

Mr. Chairman, several months ago, and again several weeks ago, I called the attention of the House to the necessity of reducing interest rates. If we can bring down interest rates, we will under existing law be able to save the homes of thousands and thousands of small owners and the farms of thousands and thousands of farmers throughout the country. Let us admit the facts. We can not ignore what has taken place in several sections of the country where government has broken down, where the mandates of the court dare not be enforced.

Mr. Chairman, do you realize what this condition means? And yet it is the accepted thing to do, as horrible as it may seem.

Mr. Chairman, when we come out of this crisis—and we can only come out of this crisis by bringing about an economic readjustment—when the history of this period shall have been written from a distant perspective, the farmers of Iowa who resisted to protect their homes will take their places in history along with the patriots who took part in the Boston Tea Party.

Mr. Chairman, several of the large financial institutions have accepted the inevitable. The New York Life, the Prudential Life, and the Aetna Insurance Co. have declared that they would bring no foreclosures in the State of Iowa. Naturally this will necessarily have to follow in other States, but that is not the final solution. We enacted the home loan bank law and every Member hoped, when he voted for that law and the appropriation of $125,000,000 for the stock of that bank, that it would bring comfort, relief, and protection to the individual home owner. To date it has relieved only the money lenders—the high-interest sharks.

Every mail delivered to my office, and I believe it is the same with every other Member of Congress, brings letters of splendid American citizens who are losing their homes, yet the only response we can get from the home-loan bank is that they are assisting building and loan associations and local banks.

Mr. BURTNESS. Will the gentleman yield?

Mr. LAGUARDIA. In just a moment.

I have a letter here from a citizen in New Orleans, La., who has been struggling since 1920 paying installments on his home. The mortgage on his home is owned by the Fidelity Homestead Association of New Orleans (one of these building-and-loan-association outfits). He has been paying his monthly payments since 1920. On January 17, 1933, he received this letter:

> This is to advise you that your payments on account of book number —— have not been satisfactory. We must now insist that you immediately bring your dues, amounting to $72, up to date, and beginning January 31, 1933, that you must make your regular monthly payment of $18. We wish to again remind you that you have failed to live up to your contract with reference to the payments due, and we must insist that from now on your payments be made regularly each month. Otherwise it will be necessary for us to take other action in the premises.

This man was informed that they would commence foreclosure action. He writes me as follows:

> I have been out of employment as a salesman for 12 months, and now you will see that the Homestead Association talks of taking my little home for $70.

This is the kind of homes Congress intended to protect. This splendid citizen, who through no fault of his own is now temporarily out of employment, must not lose his home. He and his family have stinted and saved for years. Since 1920 he has made regular monthly payments averaging $30 a month. I have his book right here. This case is typical. If this kind of citizen is permitted to perish, the country perishes with him.

Yesterday an elderly lady of culture and refinement sent her card in and I went out to see her. She has a little home in New Jersey that she has been maintaining for years, a home that has been in the family for years. She is threatened with foreclosure owing to her inability to keep up the interest payments. And it was the State of New Jersey in the other body which hailed the home loan bank law as the solution of our troubles and which went to every limit to defeat my amendment prohibiting usurious rates of interest.

This is only a sample of the number of letters (illustrating) that have come in in the last few weeks with reference to foreclosures on homes.

The other day when the Reconstruction Finance Corporation made its report in response to the Howard resolution, I found that the Prudence Corporation, of my city, had received loans from the Reconstruction Finance Corporation of some $18,000,000, and there is not a more despicable, lower gang of loan sharks and usurers in the whole country than that gang that controls and operates the Prudence Corporation. They are foreclosing every day on property on which the mortgage has been almost paid in. They are not the type of individuals or the nature of a business that should be aided. One of the officers of the Prudence Corporation was exposed by the Senate committee as a stock gambler, a stock rigger, and a short-sales expert.

Surely it is within the power of Congress to remedy that situation. Surely we can adjust the loans made by the Reconstruction Finance Corporation on satisfactory assurance that the relief will be reflected to the home owners and the farm owners, and not given to the companies charging usurious rates of interest. Surely we can direct loans to be made to new and productive and labor-employing enterprises. We are spending millions and millions of dollars, knowing that eventually we will have to absorb a percentage in losses. We do so to meet an emergency, but the benefits and the relief are not going where Congress intended they should go. We have outlived the period of 6 per cent interest, not alone 8 and 10 per cent, as some of these loan sharks are now charging. Six per cent interest to-day is just as obsolete and antiquated as the old debtors' law that would place a man in prison for debt. We outlived the pound-of-flesh provision in the debtors' bond; we must abolish the 6 per cent interest rate.

The people who control the money and property in this country had better realize this, and they are commencing to realize it.

I have seen but one ray of hope in a long time; it is very comforting, and I want to bring it to the attention of my colleagues for their consideration. I received a telegram from New York, strange as it may seem, stating:

FEBRUARY 2, 1933.

CONGRESSMAN LAGUARDIA,
House of Representatives, Washington, D. C.:

In an effort to save thousands of homes from foreclosure the mutual savings banks of New York are being strongly urged to reduce the interest charged borrowers on bond and mortgage, who in the main are small home owners, to 4 per cent. This will require these banks to reduce the interest paid depositors to 2½ per cent, and this will be impossible unless the interest paid by the postal savings bank is reduced, which should be done at the earliest moment. It is imperative that instant attention be given this matter.

WILLIAM M. CALDER,
2703 Avenue U, Brooklyn, N. Y.

Mr. William M. Calder is a former United States Senator from my State. He himself is engaged in the building industry and speaks with authority on this subject.

If the savings banks are really considering this, it is a very hopeful sign.

I am informed that these mortgages range from 5½ to 6 per cent. Six per cent is our legal rate of interest in New York. A reduction to 4 per cent is a step in the right direction. It will be a great help. Now, as to—

This will require these banks to reduce the interest paid depositors to 2½ per cent.

This is fair. There can be no objection to that, Mr. Chairman, because if we are demanding reduced interest rates we mean reduced interest rates all the way down; and then—

This will be impossible unless the interest rate paid by the postal savings banks is reduced, which should be done at the earliest moment. It is imperative that instant attention be given to this matter.

I believe this suggestion is worth very serious consideration. If the savings banks bring down their interest rate, if they in turn will bring down the interest rates on all outstanding mortgages to 4 per cent, I, for one, would be willing to vote to bring down the interest in the postal savings bank ½ per cent; and, mark you, no one has fought any harder for the postal savings bank than I have. But the whole interest structure has got to be brought down, because the longer this crisis continues the more property will be concentrated into a few hands. No matter what you may do with inflation after that, they will have the property.

I believe the Reconstruction Finance Corporation loans should be made, as I have said before, only to such institutions where assurance is given that the benefits will reflect to the borrowers and that the interest rate to such borrowers ought to be reduced to 3 per cent.

Mr. Chairman, what are we going to do about the farm mortgages? We passed a bankruptcy bill here the other day. The railroad reorganization will take care of the railroads, the corporation reorganization will take care of corporations; but, let us be frank, the provisions as to the individual will not entirely solve the problem of our farmers. The stay of execution or the stopping of judicial machinery can not continue indefinitely. We must substitute these farm mortgages.

I believe it will be difficult to refinance them. I do not know where we are going to get the money. I think there is about $11,000,000,000 of farm mortgages.

Mr. GILCHRIST. Nine and a half billion dollars of mortgages on land. Since the many foreclosures, about nine billion.

Mr. LAGUARDIA. But we can substitute those mortgages. What we ought to do, and what I believe will be done eventually, and we must not delay, is to provide machinery through the Federal farm-loan banks, if you please, or any other Government agency, to bring about the substitution of a new mortgage with a low rate of interest. A mortgagee who has been stayed does not know the future value of his mortgage. The insurance companies of my city or the banks of your State can not operate a farm and the American farmer is not adapted, and I am glad of it, to becoming a tenant peasant. Therefore, we can cause such farm mortgages to be exchanged for a new mortgage at not more than 2 per cent interest and 1 per cent amortization, or 2½ per cent interest and one-half per cent amortization. The interest could be guaranteed by the Federal Government. This, indeed, would permanently relieve the farmer and would be a fair way of solving the problem.

Mr. Chairman, we must provide this amortization. We can not take the hope away from the farmer. He must at least have the hope that his children will have the farm free and clear some day, and I say this after having given the subject many months of study, after realizing the condition this country is in. It is either 2 or 2½ per cent interest on the mortgaged farms or no interest at all. We might as well talk plainly.

Mr. STRONG of Kansas. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. STRONG of Kansas. Has the gentleman been advised that the commercial banks, in order to prevent the building and loan companies from joining the home-loan bank system, are serving notice on them that if they do join the system they must pay them every dollar they owe?

Mr. LAGUARDIA. All right, then; let the Reconstruction Finance Corporation get after those banks.

Mr. STRONG of Kansas. I just wanted to know whether the gentleman knew what the commercial banks are doing to try to restrict the organization of the system.

Mr. LAGUARDIA. Let the building and loan associations first bring down their interest rates and then let them bring the condition the gentleman states to the knowledge of the home-loan bank and let the home-loan bank coordinate with the Reconstruction Finance Corporation and we can stop that practice quicker than you can say "Jack Robinson."

Mr. STRONG of Kansas. I agree with the gentleman.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. SUMMERS of Washington. I agree with the gentleman that interest rates must be much reduced. They are not in harmony with commodity prices; but in view of the widespread misunderstanding of the people as to what Congress can do to control them, will not the gentleman discuss that question and state how far we can go and how much depends on the State legislatures? In most instances interest rates can only be lowered and foreclosures of mortgages prevented by the State legislatures.

Mr. LAGUARDIA. Yes. Our helplessness is pathetic. It is difficult for a farmer who is about to be dispossessed or a wage earner, such as our friend from New Orleans, to sit down and try to analyze constitutional questions as to the power of Congress. He has always looked upon his Federal Government as a strong, almighty government. So I believe we can do this. I believe, first, we can refinance all of the outstanding indebtedness of the United States and bring that interest down. No one will question the power of the Government to call in outstanding bonds and issuing new ones.

Mr. ARNOLD. Will the gentleman yield?

Mr. LAGUARDIA. Yes; but I want to answer the gentleman from Washington.

Mr. ARNOLD. Does the gentleman think that with that low rate of interest we can induce private capital to invest in farm mortgages? If not, then it means that the Government would have to assume the entire obligation of financing all mortgages, and how will the Government raise the money?

Mr. LAGUARDIA. The question propounded by the gentleman from Illinois is easy to answer, because the question is an old one. The answer is this, that if the bankers do not invest in securities carrying 2 or 3 per cent, they will have nothing to invest in. If the Government breaks down, private capital will lose all. The farmers will not lose their land. The capitalist, if he does not invest his money, can not eat it.

It is time to take an inventory. These are new conditions, and capital will have to adjust itself to new circumstances, and 3 per cent is most generous, because in 10 or 15 years it will be much less.

Now, the first step is to reduce the interest on Government investments by proper and intelligent refinancing of the national debt. Second, by using the tremendous power of the Reconstruction Finance Corporation in loaning money at a low rate of interest with the condition that those that they loan to must in turn charge a low rate of interest to their borrowers.

I have repeatedly said on the floor of the House and stated that the rate of call money—and call money is the brokers' loans, loans made to assist speculative transactions and gambling on stock and commodity exchanges—call loans are 1 per cent a year. That is fixed every morning, and if they can fix gamblers' rate of interest at 1 per cent, I submit that it ought to be possible to fix commercial loans by banks on mortgages at 3 per cent. The home-loan bank, the farm-loan bank, and the Federal reserve system should bring down the rate of interest. For instance, the discount rate of Federal reserve banks should be 2⅞ or 2¾ per cent and the banks charge the borrower on that paper not more than 3 per cent. When we do that it will be immediately reflected in business—in overhead and fixed charges—and will give new life to business and industry. As to farm mortgages, the same system could be followed for new loans, and for existing mortgages the exchange system I have stated a few moments ago. I have enough confidence in the honor of the American farmers that they would not default in the interest if it is a decent rate of interest.

Mr. MAY. Will the gentleman yield?

Mr. LAGUARDIA. I yield.

Mr. MAY. I am interested in the gentleman's scheme of refinancing, but does the gentleman know the amount that is held by the five or six great insurance companies; and if this system was set up as outlined by the gentleman, would they accept it?

Mr. LAGUARDIA. Of course, the large financial institutions have mortgages on their books and are carrying them on their face value by the grace of the insurance commissioners of the various States. Unless a changed system is brought about, the mortgages will be worthless. Having made a decrease in the interest, they would be justified in coming in and exchanging for mortgages at a less rate, knowing that the interest will be paid and the mortgage amortized.

Mr. MAY. Can the gentleman give us any information as to the amount carried by the insurance companies?

Mr. LAGUARDIA. Nine and a half or ten billion dollars cover all the farm mortgages. I understand the savings banks have something like $3,000,000,000 worth, and then there is a billion and a half in the hands of the insurance companies. The gentleman from Colorado [Mr. HARDY] assists me by saying there is one and a half to two billions with insurance companies.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. LAGUARDIA. Will the gentleman yield to me some more time. We have more time than money, anyway.

Mr. HOLADAY. Mr. Chairman, I yield two minutes more to the gentleman from New York.

Mr. LAGUARDIA. I would sooner call this a substitution of mortgages than a refinancing of mortgages, because the minute we go into refinancing we require this enormous amount of money, which might be very difficult to obtain at this time. Of course, it is a good investment to exchange these mortgages with new mortgages, which have a prospect of being paid by reason of lower interest and the amortization provisions. At the same time, it would reduce the cost to the farmer by nearly two-thirds. In bringing about a change, what I call an economic readjustment, if we bring down the value of money, then, of course, the carrying charges on the farm and the carrying charges on industry are thereby reduced. Our industries are in good condition physically; they are capable of quantity output. The trouble is that most of them are overcapitalized and overindebted. They can not meet these carrying charges. That is universal; it is not localized, it is universal. That being so, we have to adjust these conditions and put our industries on a sound financial basis, as we will have to put the railroads and the farmer. The farmer, too, will not have to slave to meet only his interest charges. He is entitled to something for his toil. We have to do that. When they are having rope parties on the doorsteps of the courts it is time that we looked the situation in the face and acted accordingly. We must save the country. Our country is worth saving, but we have to act, and act promptly. [Applause.]

Mr. LUDLOW. Mr. Chairman, I yield 10 minutes to the gentleman from Missouri [Mr. COCHRAN].

Mr. COCHRAN of Missouri. Mr. Chairman, regardless of how others feel, I am not going to be so mean as to charge that political expediency prompted the speech of the gentleman from Mississippi [Mr. WHITTINGTON]. It seems that within the last few days the gentleman from Mississippi has become very busy in connection with economy. In his remarks he spoke about the message of the President, addressed to this Congress in December, two months ago, wherein the President recommended an additional cut in the salaries of Government employees. What has happened since that time? The Treasury-Post Office apropriation bill was brought into the House, and Title II of that bill contained certain provisions that were carried in the economy bill of last session. Did the gentleman from Mississippi make any attempt by amendment or otherwise to have the House adopt the recommendations of the President? Such an amendment would have been germane. It seems to me that something must have happened in Mississippi in the last fortnight. What it is, I do not know.

On January 28, last week, the gentleman from Mississippi introduced a bill, H. R. 14487, providing for a reduction in the salaries of Members of Congress to $7,500, and on the same day he introduced another bill affecting the clerk hire of Members of Congress. On Monday he requested me to grant him a hearing before the Committee on Expenditures. On Wednesday he received his hearing. He made an excellent presentation to the committee from his viewpoint. He desired that the committee close the hearings and take up this bill for consideration on Wednesday.

Mr. WHITTINGTON. Mr. Chairman, will the gentleman yield?

Mr. COCHRAN of Missouri. In just a moment.

Mr. WHITTINGTON. I call the attention of the gentleman to the fact that I did not ask him to close the hearing. I wanted a continuance of the hearing.

Mr. COCHRAN of Missouri. I accept the gentleman's statement. I will admit that I am in error in order to proceed, but the gentleman wanted action on his bill immediately, so I understand "immediately" as meaning at once

Mr. WHITTINGTON. I do.

Mr. COCHRAN of Missouri. Several Members of Congress and some of the clerks, if you please, who also have a right to be heard, have asked to appear before the committee, and it has always been the policy of the committee since I have been chairman of it to grant a hearing to every Member of Congress who requests it, and that policy will continue. I see no reason to rush matters. Careful deliberation means better legislation.

What did the bill provide? First, let me say that on Tuesday I addressed a letter to three Members of Congress who have introduced bills of this character, namely, to the gentleman from Missouri [Mr. FULBRIGHT], whose bill provides for a 25 per cent reduction in the salaries of Congressmen; to the gentleman from Tennessee [Mr. MITCHELL], whose bill provides for a reduction in the salaries of Representatives and Senators to $5,000; and to the gentleman from Mississippi [Mr. WHITTINGTON], advising them that on Wednesday morning we would hold a hearing on the bill. Mr. MITCHELL appeared, as did Mr. WHITTINGTON. Mr. MITCHELL seemed to think that because eggs were selling

for 5 cents a dozen in Tennessee, the salaries of Members of Congress should be reduced to $5,000; but if he buys any eggs in Washington, he will find that you pay 40 cents a dozen for them here.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. COCHRAN of Missouri. Yes.

Mr. MITCHELL. It would be quite easy, would it not, to have eggs transported by parcel post even to Washington, in the District of Columbia, and thus aid the Government and the taxpayers of the country?

Mr. COCHRAN of Missouri. If the gentleman will go into the business of distributing eggs and open up some sort of place where we can get eggs for 5 cents a dozen, he will probably get many customers; but does that warrant a reduction in a Congressman's salary of $4,000 when we have already reduced the salaries $1,000? The gentleman from Tennessee would reduce our salary $4,000.

Mr. MITCHELL. And I ask the gentleman whether the price of all other commodities are not likewise reduced on the markets throughout the country.

Mr. COCHRAN of Missouri. I am discussing these bills now and defending my committee. Do not take me from my subject. We will speak about that later, if the gentleman desires. The gentleman from Mississippi by his legislation would save the Treasury of the United States $826,500 if he reduced the salaries of Members of the House and of the Senate to $7,500 a year. The gentleman from Mississippi was present when the War Department appropriation bill was pending in the House 10 days ago, when everything was being done to reduce Government expenses. We were fighting to support the committee recommendations. The gentleman from Mississippi was one of the leaders in the fight to increase the appropriations in that bill by nearly $30,000,000, to be used for flood control. That would help him in his district. Did he think of the taxpayers then? It would take 40 years to save that amount under his salary reduction bill. His plan is to save $836,500 one day and spend $30,000,000 another day.

Mr. BOYLAN. Mr. Chairman, will the gentleman yield?

Mr. COCHRAN of Missouri. Yes.

Mr. BOYLAN. The gentleman says that we would save $836,500 by the bill of the gentleman from Mississippi. How many points would that reduce tax rates?

Mr. COCHRAN of Missouri. I am not a statistician. I can not figure that out in a moment. Probably the gentleman can enlighten the House.

Mr. BOYLAN. It would not be one-millionth of 1 per cent.

Mr. COCHRAN of Missouri. Now, what has happened? There was an election in November. There will be a turnover of 165 Members on March 4 in this House. Do you not feel it is proper to let those 165 Members decide their own fate as to the salary they will receive, and not leave it to the votes of 165 men who are going to leave Congress? However, in justice to those 165 men who are here now, let me say I do not think there is a handful of them who will vote to reduce the salaries of the incoming Congress. They are willing for the new Members to make the reduction if they feel salaries should be reduced.

What does the gentleman from Mississippi [Mr. WHITTINGTON] desire to do with reference to clerk hire? I will say to the gentleman the bill will never get out of that committee with my vote, as long as I am a member of that committee. Why? The gentleman desires to amend the law with reference to the payment of clerks so that a Member can draw the amount of money through a clerk and through a voucher with the proper person on the pay roll, not monthly, but whenever he desires. There was a great deal of criticism directed at this Congress when Members of Congress were granted their clerk hire in a lump sum. The Congress very properly provided by law that their help should be placed upon the pay roll and that the help should draw the salary and that the Member of Congress should be responsible for the persons whom he appointed as clerks in his office. Under the terms of the bill introduced by the gentleman from Mississippi [Mr. WHITTINGTON] this is what could happen: You could have one clerk on the pay roll for 9 or 10 months and then when you went home to face your constituents at a primary or an election, you could put a lot of other people on the pay roll, who would be out doing political work for you, and pay them out of the clerk-hire allowance. That is just exactly what could be done under the bill offered by the gentleman from Mississippi. I do not propose to support such a bill. The clerk hire is for the purpose of handling Government business—not building political fences.

The gentleman from Mississippi also said he introduced another bill providing for a general reduction of all salaries. When did the gentleman introduce it—last night?

Mr. WHITTINGTON. Will the gentleman yield?

Mr. COCHRAN of Missouri. I yield.

Mr. WHITTINGTON. Is it not true we have had before our committee bills introduced by the gentleman from Nebraska [Mr. SHALLENBERGER], by the gentleman from Oklahoma [Mr. GARBER], and other bills that have been tabled?

Mr. COCHRAN of Missouri. Yes; that is correct. Hearings were held on the bills and the bills were tabled. Why were they tabled? Nobody on the committee could understand what the gentlemen who introduced the bills wanted to do. The Members who introduced the bills could submit absolutely no figures as to savings. They had absolutely no idea as to what their bills would accomplish. Other bills were in course of preparation, but the Economy Committee was created, and for the time being the Committee on Expenditures was not active on salary reduction bills. If I am not in error, the gentleman from Mississippi voted for the resolution creating the Economy Committee.

[Here the gavel fell.]

Mr. LUDLOW. Mr. Chairman, I yield five additional minutes to the gentleman from Missouri.

Mr. COCHRAN of Missouri. I thank the gentleman. The Committee on Expenditures was not active as to salary reduction bills, as the Economy Committee took over that work. Mr. WILLIAMSON, of South Dakota, and myself were on the Economy Committee representing the Expenditures Committee. We met night and day for weeks, and finally the Economy Committee brought in its report, and Government employees' salaries and also congressional salaries, as well as our clerk hire and other allowances, were reduced. So you see we have reduced our own salaries and other allowances, as every Member well knows.

Further than that, those who serve in the Seventy-third Congress, commencing March 4, will suffer another reduction. Their earning capacity during their term of service in the Seventy-third Congress, by reason of the ratification of the Norris resolution, is reduced $1,600. The term in the Seventy-third Congress will be 22 months, not 24 months. Has the gentleman ever thought of that?

And again, one of our colleagues told me yesterday he had figured up his income-tax return, based upon a salary of $9,000. He has no other income and neither have I, and he discovered he would have to pay about four and one-half times as much income tax as we paid last year. That is a little more that we are not going to be able to save or spend during the next two years. I know all citizens are similarly affected. I am not complaining, simply explaining.

The gentleman from Mississippi [Mr. WHITTINGTON] asks, What has the House done in regard to economy? The gentleman certainly should know without asking, but his mind is not clear, so I will refresh it. He should know the record in the last session and he should know that up to this hour we have passed appropriation bills in this House with reductions of $70,000,000 below the Budget estimates. The gentleman would have reduced this savings to $40,000,000 with the flood-control amendment, but those who favor economy would not let him. That, however, is what this House has done on economy at this session of Congress. We will pass other appropriation bills, and there will be further reductions; and when those bills return from the Senate they will be reduced further, and this House will agree to the further reductions. The gentleman from Mississippi by his speech, what I call a good Republican speech,

as he attacks his own party, would have the country believe we have done nothing.

The people of this country do not want this body to be a rich man's club. That is just what you are going to make it if you reduce the salary of Members of Congress to $7,500, or $5,000, as the gentleman from Tennessee suggests. Why not make Members $1 a year men and women if you want nobody but the rich to serve in this body?

Every minute of my time is given to my duties. There are five typewriters going in my office this minute, and I can not keep up with my mail. March 4 I will be 1 of 13 Members from my State representing the State at large. If I receive 200 letters a day now, what will I receive then? The people expect service from their Member of Congress, and that is what I endeavor to give them, not only in my office but on the floor of this House, where I can be found any hour the House is in session. Find, if you can, in the RECORD where I have ever been absent from the House during the seven years that I have been a Member. To give my constituents service I need clerical assistance and I am sure they want me to have it. After the close of the last session I returned to St. Louis. I found it necessary to secure three rooms, rent as many typewriters, also to secure additional office furniture; and I remained there from July until after the election, seeing my constituents at the rate of from 75 to 100 a day. Was I campaigning? No. Although a candidate at large, running throughout the State, I made but two speeches outside St. Louis and no speeches during the day, declining scores of invitations. The result of the primary with 56 candidates and at the election will disclose that the people of the State approved my past service in this body. The additional expense I am put to when I return home comes from my salary. I have no other income.

Hearings will be held on the bill to which the gentleman from Mississippi refers. All who desire will have an opportunity to be heard. When the proper time comes, if the committee wishes to vote on the bills, the members will have an opportunity to do so, but we will not be rushed simply because the gentleman from Mississippi [Mr. WHITTINGTON] decides overnight that he wants bills reported by our committee. The committee has been fair at all times to everyone, and I will not be one who will report measures until they have been properly considered and interested parties given the hearings to which they are entitled, and I will oppose any attempt to add bills as riders to appropriation bills while the proper legislative committee has the legislation under consideration.

Let me return to the clerk hire bill. I will never agree to changing the method, as the gentleman from Mississippi [Mr. WHITTINGTON] wants to change it, as regards the disposition of the clerk hire allowed Members of Congress. Here it will be the gentleman from Missouri that will be looking after the taxpayers' money, not the gentleman from Mississippi.

Mr. WHITTINGTON. Will the gentleman yield?

Mr. COCHRAN of Missouri. I yield.

Mr. WHITTINGTON. Is it not true that the bill for clerk hire simply provided that Members might, by order or voucher for services rendered, give written orders for the difference between the maximum salary and the maximum amount allowed, or about $900, on order for services rendered only to the person named, when and as required, instead of being required to draw it monthly, with the understanding that all allowances shall be paid only to clerks for services rendered and not to Members?

Mr. COCHRAN of Missouri. That is exactly what I said. I have not misrepresented the gentleman's bill. It is a bad bill and I will oppose it.

Mr. WHITTINGTON. I beg the gentleman's pardon. I understood the gentleman to say the whole amount could be used to pay for clerks at home.

Mr. COCHRAN of Missouri. I said the gentleman could go home and use part of it to pay people who were doing political work in the campaign if he wanted to under his bill, and that is just what he could do, and that is just what I am going to try to prevent.

The CHAIRMAN. The time of the gentleman from Missouri has again expired.

Mr. WHITTINGTON. Mr. Chairman, I ask unanimous consent to revise and extend my remarks and to include the bill I have offered as to reduction of salaries.

Mr. BOYLAN. Mr. Chairman, reserving the right to object, I do not see why the RECORD should be burdened with that kind of stuff.

Mr. HOLADAY. Mr. Chairman, I yield 20 minutes to the gentleman from North Dakota [Mr. BURTNESS].

Mr. BURTNESS. Mr. Chairman, before proceeding, I ask unanimous consent to revise and extend my remarks by including some quotations to which I expect to refer but which I shall not have time to read in full.

The CHAIRMAN. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. BURTNESS. Mr. Chairman, I presume no Congress, for a great many decades at least, has had to give more careful consideration than the present one to the various annual appropriation bills, including the one now under consideration. The problem before the Committees on Appropriations and the two Houses has been that of reducing expenditures to come within a reasonable Budget income, and the Budget-income problem has in turn been due to the fact that the usual income of the Government has been reduced to a pitiful fraction of what it was a few years ago.

Because of this situation we have had many suggestions and many earnest speeches on the floor of the House on many subjects more or less connected with the present depression. Among them are those we have listened to this afternoon of the gentleman from Mississippi [Mr. WHITTINGTON] proposing a reduction in the salaries of Members of Congress, and of the gentleman from New York [Mr. LAGUARDIA] urging drastic reductions of rates of interest, and I emphasize the rate of interest rather than the total interest burden on the indebtedness of the country.

The other day we passed an amendment to the bankruptcy law. The main object and purpose of the amendment seemed to be to allow an opportunity of staying foreclosure proceedings until this emergency is passed and possibly carrying with it a method by which the indebtedness of the country owing from one private party to another private party may be cut down in the terms of dollars, in the terms of our national monetary unit. These are far-reaching proposals, considered now not by accident but due doubtless to some fundamental causes. All of them deal with results from some serious economic maladjustments.

After all, what is the real underlying factor making necessary the discussion of the many problems before this and the last two or three sessions of Congress? Will you not agree with me in the statement that the reason these problems are before us, the reason it is difficult to obtain necessary revenues, the reason we have passed in this House a bill to increase arbitrarily prices on certain farm products, the reason it is necessary to cut the salaries of employees of the Government, the reason it is proposed to scale down private debts, to cut interest rates, the reason we are confronted with many questions of that sort is in the fact that the last three and a half years have brought upon us a tremendous and unprecedented decline in the general commodity-price level?

During the last three years our national plant as a whole, call it the United States if you will, a plant including our farms, our forests, our mines, our factories, our industries, our lands of every description, all our property engaged in production, has had the total valuation ordinarily placed upon it cut about in half. These elements are worth as much as ever in producing what the people need. They are efficient and by no means obsolete; yet, when priced in the terms of our monetary system, the American dollar, we are told that the whole plant is worth only about half as much as on July 1, 1929.

On December 8, 1931, some 14 months ago, I introduced a bill, H. R. 21, based upon the theory that many of these problems are related to our monetary system. For some years prior to that time I had legislation pending which, if enacted, I believe, would have provided a scientific monetary unit, and if enacted prior to July, 1929, would have prevented a decline in the dollar value of the plant as a whole. I introduced my original bill to stabilize the buying power of the dollar through the control of the gold weight thereof in accordance with the Tinnes plan at a time when the price level was considered normal in the sense that it had continued on a comparatively steady stage for a reasonable length of time. If that bill had been enacted, the then existing normal-price level would have been stabilized; that is, the general commodity-price level graphically represented and projected into the future would have been a straight line thereafter.

The general principle embodied in my bill was nothing new, startling, or extremely wild-eyed, as some seemed to think. It was not the mere idle vaporings of the "son of a wild jackass" from the radical West. It had been proposed from time to time by leading economists and students of monetary questions. The specific plan in the bill I sponsored was first evolved by D. J. Tinnes, of Grand Forks, N. Dak., before the silver campaign of 1896. Prof. Irving Fisher had brought the fundamental principle thereof to the attention of students in his book, Stabilizing the Dollar, published in 1920.

The first time that it was proposed in this country, as far as I know, was in an article by an excellent student, Simon Newcomb, published in the North American Review in 1879. Permit me to quote a few pertinent sentences from that article which succinctly explains the proposal better than I could do in my own words.

> The main point is that there is no reason why a standard dollar containing a fixed weight of the precious metals should remain of invariable value, but that, on the contrary, we have every reason to suppose that its value does fluctuate. * * * That a standard of value with the use of which no such thing as general fluctuations in price should be possible is one of the greatest social desiderata of our day no one will deny. * * * All we want is a dollar of uniform value as measured by the average of commodities. * * * The most obvious method of attaining the object is to issue a paper currency, which shall be redeemable not in gold dollars of fixed weight but in such quantities of gold and silver bullion as shall suffice to make the required purchases.

In any event, when I first introduced and discussed it, very few saw the need of such legislation. Was not the country as a whole prosperous? Why worry? Why think about the future? The fallacy involved in such an alibi was clearly shown by what the years 1929, 1930, and 1931 brought to us. By 1931 quite a lot of people commenced to think about our monetary system. Some farm editors demanded an "honest dollar." Wallace's "Farmer" referred to the Burtness bill for a compensated dollar. I picked up some courage, for people were beginning to think.

I restudied the legislation which some people had regarded as visionary, if not crazy. Naturally, I did not want to make permanent the low-price level existing in 1931, for the index number of the Bureau of Labor Statistics representing the general commodity-price level had gone down from 100 in 1926 to 70 in the summer of 1931. I regarded the weight control as a sound principle for stabilization; so why not use it to bring back the price level to a fair stage? If 23.22 grains of gold in a dollar bought too many commodities, why not reduce the content of the dollar sufficiently to bring prices up to a fair level?

So we revised my bill. Until a day or two ago that revision, H. R. 21, introduced in December, 1931, has been the only legislation pending before Congress specifically embodying the proposal which has recently been the subject of much general comment in the press of the country, namely, an immediate reduction in the amount of gold behind our monetary unit, the dollar. Putting it conversely, the proposal is simply to increase the present fixed statutory price of gold. I understand that a day or two ago the gentleman from Texas [Mr. DIES] introduced a bill embodying a similar proposal, connecting with it also some features relating only to silver. Of course, in H. R. 21 I propose the arbitrary change only till we get back to the desired level, then retain the original device of daily adjustments to prevent any fluctuations in the future.

I think there is nothing which has more of an illusion in it than our monetary system, or our notions of a dollar. I hope those who have not already done so will read the book entitled "The Money Illusion" written by Prof. Irving Fisher, sent you some time ago, for I know of nothing readily available that will bring to our minds in a clearer way just what money is, how its value in terms of what it buys may greatly change in any country including our own without the public recognizing it, how our present American dollar is very unstable in its most important function as a measure of value, and in fact how our present monetary system works. It is brief and very readable and you will enjoy it.

I have not found this in a textbook, but I think it is very elementary monetary economics to say that money serves two main uses. First, it must be a convenient unit of value, that is, simply a unit in which all commodities other than the particular commodity used for money may be priced so that you can say at any time, in a business transaction or otherwise, that a certain chattel, a certain piece of property, is worth so many marks, so many francs, or so many dollars. The second very important function the monetary unit performs is that of forming the basis on which contracts for deferred payments are made, whether the deferred payment be simply a time loan of the money itself or the purchase price of a commodity to be paid some time in the future in accordance with agreement.

When we come to the question of the stability of money, and when I use the word "stability" I refer to stability in its purchasing power, its real value, it is, of course, much more important to have the monetary unit, in this country the dollar, stable in connection with the second function of money, that is, its use as a basis for deferred payments, than in connection with the first use to which I referred. It may not be particularly important to people who are out of debt, to people who own their property free from encumbrance, who have no notes, bonds, mortgages, or any other investments payable in money, and who owe no money to anybody else, whether their house, their land, or their factory on a given date is listed at $20,000, or could be sold for $20,000, and on the general price level prevailing in the next year could be sold for only $10,000, or might be sold for $30,000. As long as they want to own the property, keep it and use it, it serves the same purpose. When they do sell they can generally buy about the same amount in other commodities. If they are not interested either as creditors or debtors, it does not make a great deal of difference to them, except as it is inconvenient and very confusing to find the valuation of a specific kind of property that has not become obsolete because of some new invention or otherwise changed in its true value, priced differently from year to year when measured or priced in the terms of the monetary unit of the country. We must all concede that it is desirable to have a stable unit of value even for this purpose. It is confusing to be advised that under our present system the dollar value of all the property in the United States is about only one-half of what it was four years ago. We spend much Federal money in our decennial census to ascertain the money value of various kinds of property in the country, but due to an unstable dollar we find that in a few years the values given must all be changed.

But the real harm done by a dollar of fluctuating value is that incurred by creditor and debtor classes alternately as the price level rises and falls. One party or the other to any note, mortgage, bond, or any other evidence of indebtedness must suffer when the dollar has changed in value between the time the obligation was incurred and its maturity. When a decline has continued abruptly for several years, as is now the case, not only are the debtors unfairly and severely burdened, but the creditors also often suffer as the equities of the debtors in the mortgaged property are

wiped out. In fact, no one benefits from resulting business stagnation and bankruptcies. The problem of maintaining a stable monetary unit for all deferred payments becomes, therefore, of the utmost importance. The general public good, as well as fair dealing between debtors and creditors, demands it.

Mr. PATMAN. Will the gentleman yield for a question?

Mr. BURTNESS. After a while I shall be glad to yield, but I prefer not to do so at this time.

What about the money illusion most of us have? It seems that the general public never realizes that the monetary unit of their own country changes in buying power. We are informed by monetary authorities that the German people did not realize that the terrific rise of prices in that country during the World War was due to any fluctuation in the real value of the German mark. We in this country knew the mark was falling. The Germans said the prices of all commodities were rising. They looked at international exchange rates and they assumed that the dollar in America was rising. That seems to us a plain case of "money illusion," which no one should be a victim of. But were only the German people the victims of the illusion?

Professor Fisher in his work gives a very good illustration with reference to an American woman who had property in Germany. She owed a debt in Germany secured by a mortgage on some property she owned over there. The mortgage was in the sum of 28,000 marks. Naturally she mentally converted that sum into the monetary system of her own country, that is, into dollars. In other words, she felt she owed $7,000, as that was the amount she had borrowed. After the mark fell, but before it had vanished into thin air, she was ready to pay off the mortgage. The banker that handled it for her told her she could pay it off for $250 in American money. She said, "That is not fair. I owe $7,000 and I want to pay $7,000."

But at that time even $7,000 did not have the same purchasing power as it had when she had borrowed that amount. She really wanted to do the right thing; she was fair; but I wonder what she would have replied if the banker had said to her, "If you really want to pay more than $250, or 28,000 marks, and actually repay money of the same purchasing power as that which you borrowed, then you ought to pay $12,000, for $12,000 in American money will now only buy, in the terms of general commodities, what $7,000 would have bought at the time the loan was made."

She probably would not have seen that point at all. In all probability she was a victim of "money illusion." The American dollar had fallen in the meantime, just as had the German mark. The difference was one only in degree. Before the World War was over the American dollar became a 40-cent piece as compared with the pre-war dollar in buying power.

Another good illustration is given by Professor Fisher in the book I have referred to. In a somewhat facetious vein one day during the war he asked a dentist, "By the way, how much more do you have to pay now for the gold that goes into dental work than you paid before the war started?" The dentist replied, "I do not know, but everything has gone up—my rent, the salaries I pay, supplies, and everything else I buy—and I am sure gold has also gone up." So, very seriously, the dentist asked his office girl to look up the invoices and see what he was paying for gold. In a few minutes the office girl reported back and said, "Doctor, you are paying no more for gold now than you ever did before; the price is exactly the same." The dentist was very much surprised, but not the professor.

Another illusion, of course, for the dentist did not realize that the dollar as it has been used in this country since 1837 has meant not a stable unit in buying power, but merely a constant weight of a specific commodity, namely gold. Regardless of its true value, what it would buy in other commodities, the gold had not changed in price. It puzzled the dentist; it ought to puzzle us? Do we have a monetary unit stable in buying power? If not, why not? Is not that the most essential factor in any proper money?

There is only one way in which we can properly measure the buying power of the dollar from time to time, and that is by what it has bought, not in one commodity like wheat or cotton or steel or anything else, but in the average of all commodities as they are sold in the trade and properly weighted in accordance with their importance. Until recent years we have not had a satisfactory gage for such a measurement. For a long time, however, the Bureau of Labor statistics has gathered information as to wholesale prices of the most important commodities, and has gradually perfected the price index which it keeps. For some time price quotations have been obtained on 784 commodities. The fluctuations in the value of the dollar are no longer guesswork.

I, therefore, want to call your attention to a chart which is similar to one which I used on this floor some months ago, which sets out graphically the general commodity price level from 1910 to 1932. It has been prepared by the Bureau of Labor Statistics, based upon price quotations of 784 commodities in recent years, but for a lesser number in earlier years.

For the purpose of this chart you will note that 1926 is taken as a base, and represented by the line 100 [indicating]. You will readily see what has happened during the period covered by the chart. You see the line here from 1910 up to 1915, running along about 70 as compared with 100 in 1926 [indicating]. You then see the tremendous rise in prices during and following the war, when the index number went up to 167 in May, 1920. Then [indicating] you see it come down, dropping very fast. By March, 1920, it had reached 102, and for the period from 1921 to July, 1929, it was not stable, but at least approaching general stability, fluctuating during that period between extremes of about 93 and 104 or 105. This was the period during which I was very anxious to have legislation enacted that would make the then existing level permanent. July, 1929, came along, and then what happened? On July 1 of that year the index was at 98, a fair average for an 8-year period. The index for the week ending January 28, 1933, last week, as given in the last publication of the Bureau of Labor Statistics, was 60.4. In other words, the average fall in prices since July 1, 1929, has been about 38 per cent.

I remember how just a year ago now, when we were enacting the Reconstruction Finance Corporation legislation, the Glass-Steagall bill, and other laws, it was then believed that such legislation was going not only to stop the downward decline of the general commodity-price level but was going to increase the price level, and that what some people called inflation was sure to come.

Mr. GOSS. Will the gentleman yield for a question?

Mr. BURTNESS. Yes.

Mr. GOSS. Do the figures on the gentleman's index of wholesale prices include commodities that are coming in from foreign countries?

Mr. BURTNESS. These are all the important commodities sold on the markets within the United States at wholesale.

Mr. GOSS. But they do contain considerable amounts of foreign products at depreciated currency.

Mr. BURTNESS. No; not many. They include none of the foreign prices at the import points. They embody the prices, as I understand it, of commodities sold in this country, whether produced here or whether they have come in, but sold in the wholesale markets of this country, weighted in accordance with their respective importance in trade. Of course, the foreign commodities included would have but slight effect upon the whole index.

Mr. GIFFORD. Will the gentleman yield?

Mr. BURTNESS. Yes.

Mr. GIFFORD. With reference to the 700 or more indexes, has the gentleman included interest, taxes, railroad fares, cost of physicians, and all those things that we are interested in?

Mr. BURTNESS. I can not go into any discussion of the relative merits of various types of indexes. This is a general

commodity index and the Bureau of Labor Statistics index is recognized by all of the economists of the world as being the best index available at this time. Commodity prices of themselves include charges of the general nature the gentleman refers to.

When we were passing the legislation a year ago, to which I referred when interrupted by questions, the index stood at 67.3. At that time the sharp decline was to a certain extent stopped. This is shown by the curve straightening out a little [indicating], but we have still remained, as you will note by the line, on a toboggan, but a slower one, ever since. Prices have continued downhill. To be exact, we have suffered a further decline of a little more than 10 per cent during the year immediately last past in the general commodity-price level as shown on this chart. A year ago the index stood at 67.3; last week it was 60.4.

[Here the gavel fell.]

Mr. HOLADAY. Mr. Chairman, I yield the gentleman 10 additional minutes.

Mr. BURTNESS. It is easy to convert this chart into the real value of the dollar, for it is merely the converse of the price level. This has been done graphically in the second or lower chart that I have here, to which I now direct your attention.

The second chart is on a somewhat smaller scale, for it covers a longer period, the time from 1890 to 1932, but, of course, as already stated, is otherwise just the converse of the other. You get the whole terrible picture at a glance. No one who sees it can claim our dollar is stable in buying power.

Let me read to you what Professor Kemmerer, one of the leading American economists of world-wide reputation, said in a speech to the Stable Money Association in 1927.

Those who do not see the charts, but who may read this speech, will be able to visualize the general picture accurately from Professor Kemmerer's summary. Among other things, he said this:

> The world sooner or later must either learn how to stabilize the gold standard or devise some other monetary standard to take its place. There is probably no defect in the world's economic organization to-day more serious than the fact that we use as our unit of value not a thing with a fixed value, but a fixed weight of gold, with a widely varying value. In less than half a century here in the United States we have seen our yardstick of value, namely, the value of the gold dollar, exhibit the following gyrations: From 1879 to 1896 it rose 27 per cent; from 1896 to 1920 it fell 70 per cent; from 1920 to September, 1927, it rose 56 per cent. If, figuratively speaking, we say that the yardstick of value was 36 inches long in 1879, when the United States returned to the gold standard, then it was 46 inches long in 1896, 13½ inches long in 1920, and is 21 inches long to-day.

Remember the speech quoted from was made in 1927. If made this afternoon, he could well have added that since 1927 the monetary yardstick has increased 60 per cent and therefore to-day has a length of about 33 inches.

Now, how do I propose in my legislation to bring back the price level to what it was during that period which, since war times, we regard as a relatively normal base; that is, to the stage existing from 1921 to 1929, or the approximate average of that period?

First, and this is the primary principle involved in connection with the first step to be taken, I propose that we cut the amount of gold in the dollar sufficiently to bring that price level back.

I am rather definitely a qualitative theorist as to money. Since 1837 our dollar consists of 23.22 grains of gold. Putting it conversely, an ounce of gold can always be sold for $20.67. The first section of the bill provides for the revaluation of the dollar by reducing its weight slightly more than one-fourth. We have adopted the metric system in the bill, for that system is more practical in computing changes from time to time in the permanent stabilization feature which is the heart of the measure. The real purpose of the bill is expressed in this short clause comprising its title:

> A bill to raise the commodity price level to the debt-incurrence stage and to stabilize it thereafter.

If we cut the gold behind the dollar one-fourth, all economists agree that its buying power will be cut proportionately. That in turn means that the general commodity price level will promptly rise about 33⅓. If the weight is cut one-third, the price level will rise 50 per cent. I have failed to hear one single individual who is not anxious to see an immediate rise in the price level. All have hoped it would come. All admit that the present dollar is too dear. The surest way to decrease its buying power is to cut its gold content. In other words, I want to "reflate" to a normal base.

Some have urged direct inflation by increasing the number of units of money, and bills for that purpose are pending. If no change is made in the gold content of the dollar, I do not believe you can—by adding a few hundred million dollars to the amount of the currency in circulation—materially affect the price level.

After all, the real value of the dollar must remain the exchange value of the particular commodity, whatever it may be, in which the dollar is redeemable. There is no commodity better fitted as a redemption metal than gold. What I primarily desire is a recognition of the economic fact that even gold changes in value from time to time, depending upon its supply and demand, its wantedness, and other economic factors.

Another danger of so-called inflation if attempted without sound brakes and made under political pressure on the part of interested groups or to meet temporary political views is the fact that no one knows what the end will be. Can anyone to-day say just how much additional currency we need to bring back the price level to the 1926 level? Do we need five hundred million or several billion? If additional issues work, what about the demand for more and more? Of course, I do not think that additional money anchored to the present gold weight can increase the price level except temporarily. But suppose it does. The inflation of the war period was almost as harmful as the deflation since 1929.

If we start the printing presses and issue currency not redeemable in gold, such currency will of necessity depreciate as compared with our other money. We would again have two values for money circulating side by side, as we did following the Civil War. No person wants that to happen, but some extreme propositions now made in good faith would probably bring about that result.

A strong point in our plan is that there can be no increase in the price level above that aimed at. When we reach the desired stage it stays there. If there be a tendency to further increase, it is stopped automatically by simply adding whatever additional weight may be required to the dollar. In other words, the price of gold will become that much less. With a proper index of commodity price levels the whole plan becomes automatic. It is not subjected to any political influences; it would not involve any human discretion. As I stated in a speech in the House some years ago, it is as fair as an adding machine.

Another class of bills is before Congress, namely, that of giving a mandate to the Federal Reserve Board to conduct its operations in such a way as to bring prices back to the 1926 level and stabilize them thereafter. That in substance was the Goldsborough bill passed by the House last session, still pending in the Senate. I voted for it, not because I thought it could possibly bring about that result, but that it might do some good. I discussed its weakness at that time. In that connection I commend for your consideration a paragraph from a speech of the Hon. Andrew W. Mellon, then Secretary of the Treasury, made before the Chamber of Commerce at Charlotte, N. C., on January 19, 1928. I quote as follows:

> The work which the Federal reserve system is doing is along sound, constructive lines. But the greatest mistake would be to expect the impossible. It is not a panacea for all the financial and economic ills which may befall the country. Neither the Federal reserve system nor any other system can control prices. The most that system can do is to influence to a limited extent, from time to time, the total volume of credit and its cost. While credit

is one factor in influencing prices, it is neither the only factor nor the controlling one; and it would be asking the Federal reserve system to perform the impossible if it is to be charged with the responsibility for controlling prices merely because it can exercise a limited control over the amount of credit available.

As it is conceded by nearly everyone that the public interest demands an increase in the price level—a decrease in the buying power of the dollar—the practical question for our determination becomes only that of deciding upon the most practical method. I have tried to show you the weaknesses of some schemes proposed. My bill deals with the subject directly. I trust many of you have read the public statement given out by the Senator from Texas [Mr. CONNALLY] on January 19. Let me quote a paragraph from that statement on this particular feature of direct instead of indirect approach. After taking the position that the value of the dollar must be reduced so commodities can advance in price and restore normal business conditions, Senator CONNALLY said:

Every plan for inflation has for its purpose the lowering of the dollar to increase commodity prices. Such action is indirect and may have the desired result or may not. The way to revalue the dollar is actually to revalue it. I propose that the amount of gold in a dollar be reduced by law. The Constitution of the United States provides that Congress shall have "the power to coin money and regulate the value thereof." This is a sovereign grant of power to Congress to regulate the value of money in relation to the prices of other commodities, and for the purpose of stabilizing such values. Under this power it is my contention that Congress may reduce the amount of gold in a dollar and make such cheaper dollar legal tender in the payment of all debts and make it the current money of the country.

Under permission to extend my remarks I will append all of Senator CONNALLY'S statement at the end of my speech, for it is a splendid summary showing the stern necessity of prompt action, and I am naturally pleased that he and I are in thorough accord as to the best method of approach.

Another convert in recent months to our method of attack is the powerful American Farm Bureau Federation. This is shown by the resolutions adopted at its annual convention on December 7 last, which convention was held in Chicago. I believe I betray no confidence when I say that several times during the period from 1923 or 1924 to 1929, I approached Mr. Chester Gray, the very able legislative representative of that organization, with a view of interesting him in the importance of stabilizing the buying power of the dollar. Mr. Gray recognized its importance, but always felt that the program of the federation was then so extensive as to make it impracticable to include another major problem.

Naturally, they were at that time more directly interested in what we might call general farm legislation, including credit legislation for agriculture. The result was that the farm bureau, like the general public, did not become earnestly interested until after the debacle of 1929. By 1931 its leaders recognized the tremendous importance of stopping the decline in price levels and getting them started up-grade. I believe they asked the President to appoint a commission to study the problem. The Farm Bureau Federation during that year appointed its own special committee, which held several sessions and did a lot of hard and important work. Our able colleague from Iowa [Mr. RAMSEYER] was a member of that committee, and representatives of the organization were active in hearings held by the Goldsborough subcommittee of the House Banking and Currency Committee last year.

At its annual meeting in 1931 it pointed out the need of an honest dollar. It did not, however, recommend a change in the price of gold or a change in the weight of the gold dollar. At that time a majority of its leaders seemed to think that the price level could be controlled by the Federal Reserve Board, and that a mandate to that board would accomplish results. It, therefore, threw its influence in favor of legislation along the lines of the Goldsborough, the Strong, and the Ramseyer bills.

Throughout all that time I contended strenuously that something more was needed. In other words, I have felt that Secretary Mellon was about right in his statement in the speech from which I have quoted that such a task would be impossible for the Federal Reserve Board to perform. Naturally I am pleased over the fact that the resolutions passed last December indicate that the federation is now definitely committed to my general view. In such resolutions the Farm Bureau Federation urged "that the price of gold shall be increased to $30 per ounce for fine gold, and that the redemption of all monetary units now in use in the United States shall be reduced to 16 grains to the dollar to conform thereto."

I have not time to quote the entire resolution, but under the leave granted to extend my remarks I shall also append the first one of the seventeen resolutions adopted, and which is given the appropriate heading of "Sound and Honest Money."

The other two large farm organizations, namely the National Grange and the Farmers Union, are also strongly urging legislation to obtain an "honest dollar." I do not mean to imply that either of them is as yet definitely committed to the general plan of my bill as is the farm bureau. The object desired to be obtained by them is, however, identical.

I have not time to refer to much splendid support that is coming from all sections of the country. Only a few days ago a rather conservative and a very able gentleman, Mr. Hammill, formerly Governor of the State of Iowa, published an article in the Des Moines Register, strongly approving our plan. The Iowa papers are now almost filled with favorable comment.

I feel justified in emphasizing over and over again that without such action as I am urging our country is confronted with two alternatives. One is continued liquidation, which would probably result in a complete change in the ownership of most of the property in the United States. Involved therein would be the scaling down of mortgages, bonds, and other evidences of indebtedness, including even bank deposits and life-insurance policies. Think of the difficulties that would be encountered not only by the Federal Government, but by States, school districts, and other municipal corporations in raising sufficient revenue under such a situation for the conduct of public business. The other alternative is a tremendous paper inflation to which the country would probably yield eventually. As large business interests realize this fact, surely they will have the good sense to see that the sensible method, call it a compromise if you wish, is that of reducing the value of the gold dollar so as to permit debts to be paid and to permit private business to survive, as well as make possible a continuance in an orderly way of the functions of our Federal, State, and local governments.

I know that some have derisively denominated movements of this kind as the establishment of a "rubber dollar." Can anyone truly say that a dollar consisting of 15 or 16 grains of gold will be a "rubber" one? From the charts that I have exhibited, will you not agree that our present monetary unit is the one that can be more appropriately called a "rubber dollar"? Surely, it has increased and decreased tremendously in its essential quality, buying power, during the last decades. Instead of asking for a "rubber dollar," I am demanding one which will be stable, one which will not fluctuate from time to time in its purchasing power. If adopted by appropriate legislation, the individual who owns tangible property and he who owns evidences of indebtedness payable in dollars will then soon recognize that the actual dollar value thereof does not change from month to month or year to year.

Some call attention to the fact that the price level has not appreciably increased in England since that country went off the fixed gold standard in 1931. Let me, however, call your attention to the fact that her price level has not declined since that time, but has advanced about 2 per cent. I presume we would call her present system a "managed currency." I do not know whether her leaders desired any particular increase in the price level. Obviously they wanted to prevent a further decline, and to that extent they have

been successful during the time that our price level has continued on a toboggan slide downward. As already pointed out, our price level has in the meantime decreased 15 per cent. As very pertinent to this observation, let me read a paragraph or two which appeared in Mr. Arthur Brisbane's column in one of the Washington papers recently. It is as follows:

This will really surprise "best financial minds." Reginald McKenna, chairman of the Midland Bank, biggest in Britain, advises England and America both to "inflate their currencies."

McKenna, great banker, whose views are taken seriously, says: "It is not the pound sterling, but gold that is unstable." The pound, he says, has remained stable, whereas the dollar has changed. That is truth, since the dollar is worth 60 cents more than it was in 1929, and is about sixty times harder to get.

Unless we are victims of the "money illusion," to which I adverted earlier in my remarks, we must admit that Mr. McKenna is right. The pound sterling has remained very nearly stable, while the American dollar has appreciated.

Mr. PATMAN. Will the gentleman yield?

Mr. BURTNESS. Yes.

Mr. PATMAN. What will you do with the paper money? Will the paper dollar be worth $2 or 50 cents?

Mr. BURTNESS. The bill provides that all outstanding money may be redeemed at the Treasury within a specified reasonable time, dollar for dollar, in Treasury notes of the new issue. Gold and silver dollars will also be converted; the present forms of currency, such as gold certificates and silver certificates, will no longer be used but will be redeemed at the Treasury in the new currency. A redemption fund is established consisting of both gold and silver. In that fund we give silver more liberal treatment than the present law. The exact percentage of gold and silver in that fund is a detail that I am not particular about. In general the new money will be redeemable in gold but not in any specific weight, but in whatever weight is prescribed at the time for the dollar. That weight under the permanent stabilization plan may vary slightly from time to time for it must be such weight as to keep the true value of the dollar the same.

Mr. PATMAN. Will the gentleman yield again?

Mr. BURTNESS. Yes.

Mr. PATMAN. What will the gentleman do with $124,000,000 of contracts payable in gold in a certain weight and fineness?

Mr. BURTNESS. I have no definite information as to the exact amount of such contracts in force. Of course, there are quite a number, and the gentleman's inquiry presents the most controversial question that arises when the bill is discussed. What is to be done about those contracts? The second paragraph in section 2 makes such a gold clause void as to the future. So far as obligations entered into since April 1, 1917, are concerned, we also provide that where the contract is made in money, it shall be satisfied by the payment of lawful money of the United States. Under the decision of the United States Supreme Court in the legal tender cases, and the reasoning of that court in those and other cases, though not entirely convinced, it is my honest opinion that such provision is constitutional. Even if held invalid as to such contracts, the makers thereof would be no worse off than at present, and, therefore, it is no argument against providing proper legislation for all others.

The exact cut of the dollar is a detail on which we might have some difference of opinion. Many people feel that the cut should be one-third, and that would be almost, but not quite, in proportion to the decline in prices since 1929. As stated already, I introduced my bill 14 months ago when I proposed a one-fourth cut. The additional decline since would in my judgment warrant the larger cut. Some people, however, feel that the cut ought not to be so great.

It becomes largely a question as to what consideration Congress feels should be given to debts contracted during the last three years. Illustrating again, if the cut be one-third, that would mean the present price level would increase 50 per cent, or rise on this chart to about 93. It would still be below July 1, 1929, when the index was 98. It becomes a proposition as to what figure would be for the best public interest—what will be for the best interest of most of the people involved with a proper regard for fairness to all classes. Remember, that anything you do is infinitely fairer than the present situation, where a man who borrowed money in 1919 must pay his debt in a dollar worth almost three times as much as it was when the debt was contracted. Nothing can be more manifestly unjust than the present arrangement is to all debtors who signed notes, mortgages, bonds, or other paper between 1917 and the latter part of 1929. We know too the harvest we are reaping—bankruptcies, loss of homes, unemployment, poor relief in every community, a tremendous tax burden, lower wages causing disputes right at the door of the Capitol, and many other economic and social ailments, including even an epidemic of suicides.

Mr. FIESINGER. Mr. Chairman, will the gentleman yield.

Mr. BURTNESS. Yes.

Mr. FIESINGER. Does the gentleman believe in staying on the gold standard?

Mr. BURTNESS. Yes; I believe in staying on a gold standard, but not the fixed gold standard of to-day. I am not a fiat-money man in any sense of the word. I believe it is absolutely essential that we have a monetary unit that is redeemable in something that is convenient, something of permanent and specific value, something that is wanted throughout the world; and gold serves the purpose of redemption as well as any other metal, if not better. I have no objection to the use of silver in part, but I do object to the use of either silver or gold at any arbitrarily fixed price. That price upsets the whole economic structure whenever the true value of the metal changes. Most Members of Congress are conservative and are opposed to arbitrary and general price fixing, and yet what have we done? In 1834 and again in 1837 Congress passed a law fixing the price of one particular commodity, gold. That price has stayed the same ever since 1837, despite of new discoveries of gold or reductions in the production thereof; and, of course, the result has been that while gold has fluctuated in real value, depending upon the supply of it and the demand for it and every other economic factor entering into its supply and demand, it has not changed in price; but such treatment of it has simply changed the price of every other commodity in the country. The general commodity-price level has fluctuated instead.

When it is suggested that silver should be included in our monetary system at an arbitrary ratio to gold, I submit to men who are behind the Wheeler bill and legislation of that type that to do so would simply be making the same kind of mistake with reference to silver as we have made with reference to gold, except that perhaps the situation would be somewhat worse, when we take a commodity now at a ratio of about 80 to 1 with gold and want to put it in at a value of 15 or 16 to 1. I have no objection to the use of silver at its actual market value in relation to other commodities, including gold. Its greater use in our monetary system would, of course, increase its general use; therefore its wantedness, and in turn its relative price.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. HOLADAY. Mr. Chairman, I yield the gentleman three minutes more.

Mr. FIESINGER. Mr. Chairman, will the gentleman yield?

Mr. BURTNESS. Yes; for a short question.

Mr. FIESINGER. It will take some time in order to get legislation of that kind through Congress.

Mr. BURTNESS. I know what the gentleman has in his mind without his finishing question. If the gentleman will read my bill, he will find that the Treasury is protected against redemption of currency while the bill is under consideration. The method is harsh, it is true, but we propose to protect the redemption fund against withdrawals while legislation is being considered by later taxing away the profits that would be made by those who would rush down to the Treasury and attempt to make profits through with-

drawals. That is set out more in detail in my speech of last April 14, to which I invite the attention of those interested. I can furnish reprints thereof. Because the bill is explained in that speech, section by section, I will not do so again to-day.

There are two or three sections in the bill (H. R. 21) which provide for the issuance of Treasury notes, their redemption and reissuance from time to time. The notes are to be placed in circulation by purchase of United States bonds; and, of course, notes will also be issued on the purchase of gold for the redemption fund. Treasury notes are always redeemable in gold at the then current mint rate, which is changed automatically, or in silver at its current market price. The general purpose is to synchronize issues in such a way as to meet the minimum demands of business. The Federal reserve system is retained, as now, to provide the necessary elasticity in furnishing credit to accommodate the needs of commerce.

Mr. HOGG of Indiana. Mr. Chairman, will the gentleman yield?

Mr. BURTNESS. Yes.

Mr. HOGG of Indiana. I would like the gentleman to explain how the operation of his bill, with which I am somewhat in sympathy, would increase the credit extended by banking institutions to their customers.

Mr. BURTNESS. The first thing that is needed to get people to do business in this country to-day, in my judgment, is to start an upward rise in the price level. The difficulty with the Glass-Steagall Act, the Reconstruction Finance Corporation act, and other acts of that sort is that they were all intended to provide additional credit; but until the people of the country have confidence that price levels will increase, the bankers will not avail themselves of such additional privileges, that is, they will not make loans to people who might desire to go into some new venture, because, unfortunately, both the banker and the business man do not now see any future in expanding present business or in starting a new one. We went through a rather useless performance here in increasing the amount of paper eligible for discount with the Federal Reserve Board when, as a matter of fact, there are millions of dollars of paper already eligible stored in many of the banks of the country, which are not now being used for rediscount purposes under prior laws. You start commodity prices going up and the girl in your office will be buying a new dress for fear that it will cost more later; orders will go from the retailer to the jobber and in turn to the factory; the person who wants to buy an additional piece of land to add to his holdings, but who still thinks that there may be a further deflation, will do so, and so on down the line. As this proceeds the necessary expansion of credit will be obtained from present agencies, more particularly through the Federal reserve system.

Inasmuch as I have referred to farm prices, let me say that this will do more than simply raise them 50 per cent to the farmer. Why do I say that? Our taxes, our interest, our transportation costs, and many other charges are fixed on the old standard of high levels. Increase the price of wheat at the terminals, Chicago or Minneapolis, by 50 per cent. What happens at the local elevator? The same increase takes place not in percentage but in cents. Assuming wheat is now 50 cents at the terminals, that means an increase of 25 cents on the farm as well as at the terminal, which means doubling the price on the farm under present conditions. The farmer to-day suffers from a system under which freight charges from the farm to his markets are based on the level existing several years ago. We want to bring the old relationship back, not by decreasing labor and transportation costs but by bringing the prices on farm products back to the former level.

The CHAIRMAN. The time of the gentleman from North Dakota has again expired.

Mr. PATMAN. Will the gentleman from Indiana yield the gentleman one minute more, so that I may ask him a question?

Mr. LUDLOW. Mr. Chairman, I yield the gentleman one minute.

Mr. PATMAN. The gentleman stated that he believes his proposal to be constitutional. He realizes, I know, that the Constitution of the United States is a grant of power. I would like the gentleman to state the particular section of the Constitution that grants him the right to impair the obligation of a contract.

Mr. BURTNESS. Section 10, Article I, of the Constitution provides that—

> No State shall * * * pass any * * * law impairing the obligation of contracts.

There is no such inhibition upon the Federal Government. Of course, we must remember that in dealing with monetary questions we are proceeding under a direct grant of power given to Congress in section 8 of the same article, "to coin money" and to "regulate the value thereof," an unlimited and a tremendous power in dealing with money or contracts made in terms of money. Our Supreme Court has upheld the right of Congress to impair contracts, and the latter provision of the Constitution has been considered and given a broad interpretation, as already indicated, by the court in the legal tender cases. [Applause.]

The CHAIRMAN. The time of the gentleman from North Dakota has again expired.

Mr. BURTNESS. Under leave to extend my remarks I submit herewith the splendid and illuminating public statement of Senator CONNALLY, which he handed to the press on January 19. Within a few days thereafter he discussed these same questions on the floor of the Senate and his speech may be found in the RECORD:

> The value of the gold dollar must be reduced. It has attained an unnatural and artificial value measured in the price of commodities and measured by the indebtedness of the people, States, counties, and subdivisions. The enhancement of the value of the dollar has been brought about largely by the action of governments. The placing of India on a gold standard cheapened silver and unduly enhanced the price of gold. When England went off the gold standard her currency was cheapened and the value of gold enhanced. The depreciated currencies of foreign countries has made the dollar dearer and has helped to ruin our foreign trade. Since all other values have dropped, this indicates that the drop in values is due to appreciation of the value of gold.
>
> Our people who owe debts contracted when wheat and cotton and other commodities were worth three times their present value can not pay their debts on the basis of the present value of the gold dollar. Unless the value of the dollar is decreased, home owners and farmers will lose their property by foreclosure, many insurance companies and mortgage companies will become insolvent, and almost universal bankruptcy may ensue because of the inability to discharge the indebtedness hanging over the people of the United States. The price of commodities is measured by the gold dollar as fixed by law. If the value of the dollar is reduced, the price of commodities will advance. If the American dollar is reduced, our foreign trade will revive. With the rise in commodity prices of wheat, cotton, and other commodities business will begin to improve. Through the reduced value of the dollar the ability of debtors to pay their debts will be measurably restored and normal activities will be resumed. It will also facilitate payment of taxes. Creditors will actually be benefited by a cheapened dollar. With present values, the creditor who forecloses is the loser. The property is worth less in his hands than in the hands of the debtor. Moreover, with the dollar properly revalued, creditors would receive as much as they loaned in actual value.
>
> Every plan for inflation has for its purpose the lowering of the dollar to increase commodity prices. Such action is indirect and may have the desired result or may not. The way to revalue the dollar is actually to revalue it. I propose that the amount of gold in a dollar be reduced by law. The Constitution of the United States provides that Congress shall have "the power to coin money and regulate the value thereof." This is a sovereign grant of power to Congress to regulate the value of money in relation to the prices of other commodities, and for the purpose of stabilizing such values. Under this power it is my contention that Congress may reduce the amount of gold in a dollar and make such cheaper dollar legal tender in the payment of all debts and make it the current money of the country.
>
> It may be said that such a course is drastic action. The country is faced by a critical situation. The welfare of the whole people must be paramount. In such an emergency the Government is authorized to exert its sovereign power to restore values and to prevent wholesale bankruptcy. Heretofore in the history of the United States the gold content of the dollar was changed by law. It is unjust and unfair that the $5,000,000,000 of gold in the United States, through its artificial enhancement, through the action of Government, and through its hoarding, should de-

stroy many billions of values and property in the hands of citizens throughout the United States. This result can be prevented by the revaluation of the dollar and the restoration of the fair balance between it and commodities and debts.

Adjustments of salaries and wages will, of course, automatically follow, and they will also have the benefit of great relief in the general revival of business, which will reduce unemployment and make workers more prosperous.

Dr. G. F. Warren, professor of agricultural economics at Cornell University, has rendered yeoman service in this cause. Extracts from his treatise were inserted in the CONGRESSIONAL RECORD by Senator THOMAS of Oklahoma and can be found beginning with page 3263. It deserves your careful study. Let me insert here three short paragraphs under the heading "The Compensated Dollar":

THE COMPENSATED DOLLAR

The compensated dollar is a proposal to establish by law a currency redeemable in gold, but the weight of gold for which the dollar would exchange would vary with the index number of wholesale prices of all commodities, that is, if prices rose 1 per cent, the weight of gold for which the dollar would exchange would rise 1 per cent. If prices fell 1 per cent, the dollar would exchange for 1 per cent less gold. The gold would be kept in bars in the Treasury and central banks. This would keep the dollar stable in buying power for the average of all commodities.

The dollar has to be "rubber" either as to weight or as to value. It can not have a fixed weight and also have a fixed value. This proposal would give it a fixed value and a "rubber" weight. It raises the fundamental question as to whether a medium of exchange should be fixed in weight or fixed in value.

A scientific money is one with a constant buying power for all commodities rather than a fixed weight of one commodity. Our whole tax and debt structure rests on commodity prices. If this structure is to be kept sound either for the creditor or the debtor, it is commodity prices that need to be kept stable, not the weight of gold for which a dollar will exchange.

Unless Congress performs its constitutional duty and regulates the value of money in the meantime, the next presidential campaign may well be fought out on the issue of monetary reform. It is not a question which should be settled through popular prejudice or passion but only by the application of close study and sound methods. Congress has the necessary ability and power to provide a solution if it will devote itself seriously to the task.

The text of the resolution on money passed by the delegates of the American Farm Bureau Federation at the annual convention held in Chicago on December 7, 1932, is in part as follows:

SOUND AND HONEST MONEY

We reaffirm our position upon the money question taken at the 1931 annual meeting. The Glass-Steagall bill liberating the rediscount privileges of the Federal reserve system, made it possible only to relieve the strain on the banks, but failed utterly to stay the trend of falling commodity prices.

The consensus of opinion of those in charge of the administration of the Federal reserve system in opposing the Goldsborough bill mandating the Federal reserve system through open market operations to raise the price level of commodities, to the level of 1926, and to maintain them at that point, was that the Congress was requiring the Federal reserve bank to perform the impossible thereby admitting the inability of that system through currency and credit effectively to raise and stabilize commodity prices.

Since that time commodity prices have continually fallen and conditions have now become so acute that unless arbitrary and effective measures are taken to reduce the purchasing power of the dollar to a point where commodity prices are restored to the level where major portions of long-term public and private debts were contracted, greater disaster and distress are sure to come upon our people.

Unimpeachable statistical evidence from both English and American sources shows beyond doubt that the purchasing power of the monetary units, which are based upon gold in all countries that are on the gold basis, followed directly in line with the gold production of the world. For nearly 100 years there has been but very slight variation and that, at times of upheaval due to war.

These facts clearly indicate that the unit of gold containing a definite amount fluctuates greatly in actual value, and, therefore, in its purchasing power. We, therefore, urge that the act of 1834 be immediately amended so that the price of gold shall be increased to $30 per ounce for fine gold and that the redemption of all monetary units now in use in the United States shall be reduced to 16 grains to the dollar to conform thereto; that all the gold coinage immediately cease; that all existing American gold coins shall be reclaimed by the Treasury Department and converted into bars of convenient size and weight to be used for redemption and exchange purposes; that the index figure of the average commodity prices prevailing from 1920 to 1929 shall be adopted as the base for calculation at 100; and that it shall be the policy of the United States to establish and maintain the commodity-price level at that point as near as is humanly possible.

In order to accompish these results, we recommend that there be established within the Treasury Department a stabilization bureau absolutely free from any bank or other influences. The bureau shall use index figures of commodity prices as computed by the Bureau of Statistics of the Department of Labor, and upon the base of 100 shall advance or lower the price of gold so the price level shall be maintained to within 5 per cent of the index base. Whenever such change in the price of gold is made, it shall be strictly in accordance with such provisions. It shall be the further duty of the director of the bureau upon such determination to broadcast through all channels the market price of gold thus fixed and state the redemption value of the dollar in grains of gold.

We believe the above method is the only way to perpetuate the gold standard.

With a view of giving those interested a clearer picture of the information furnished by the Bureau of Labor Statistics, I include herewith a copy of the latest weekly bulletin. In addition to the weekly changes in the general commodity-price level, it also shows the price index for various classifications of commodities which in turn make up the whole. Note, for instance, how farm commodities have suffered more from price declines than any other group.

UNITED STATES DEPARTMENT OF LABOR,
BUREAU OF LABOR STATISTICS,
Washington, D. C.

WHOLESALE PRICES FOR WEEK ENDING JANUARY 28, 1933

The Bureau of Labor Statistics of the United States Department of Labor announces that its index number of wholesale prices for the week ending January 28 stands at 60.4, as compared with 61.2 for the week ending January 21, showing a decrease of approximately 1¼ per cent. These index numbers are derived from price quotations of 784 commodities, weighted according to the importance of each commodity, and based on average prices for the year 1926 as 100.

The accompanying statement shows the index numbers of groups of commodities for the weeks ending December 31, 1932, and January 7, 14, 21, and 28, 1933.

Index numbers of wholesale prices for weeks of December 31, 1932, and January 7, 14, 21, and 28, 1933

(1926=100)

	Week ending—				
	Dec. 31	Jan. 7	Jan. 14	Jan. 21	Jan. 28
All commodities	62.2	61.9	62.0	61.2	60.4
Farm products	43.7	43.8	45.2	43.0	41.3
Foods	57.9	58.1	58.2	56.0	54.1
Hides and leather products	69.1	68.9	69.2	69.0	68.6
Textile products	52.5	52.7	52.3	51.9	51.8
Fuel and lighting	69.0	68.1	67.8	67.6	65.2
Metals and metal products	79.3	79.1	79.0	78.2	78.2
Building materials	70.8	70.7	70.6	70.3	70.2
Chemicals and drugs	72.2	72.0	72.1	71.9	71.9
House furnishing goods	73.5	73.3	73.3	72.8	72.8
Miscellaneous	63.1	61.4	61.5	60.8	60.8

By way of fortification of my answer to the gentleman from Texas [Mr. PATMAN] with reference to the so-called gold clause "of current weight and fineness" in some bonds and mortgages, I submit a few authorities to which many more could be added.

In the famous and fundamental case of McCulloch *v.* Maryland (4 Wheat. 316) Chief Justice Marshall said:

The Government of the Union, though limited in its powers, is supreme within its sphere of action; * * * its laws, when made in pursuance of the Constitution, form the supreme law of the land. * * * Among the enumerated powers of government, we find the great powers to lay and collect taxes, to borrow money, to regulate commerce, to declare and conduct a war, and to raise and support armies and navies. The sword and the purse, all the external relations, and no inconsiderable portion of the industry of the Nation are intrusted to its Government. (4 Wheat. 405, 406, 407.)

I quote further from the opinion in that case:

We admit, as all must admit, that the powers of the Government are limited, and that its limits are not to be transcended. But we think the sound construction of the Constitution must allow to the National Legislature that discretion, with respect to the means by which the powers it confers are to be carried into execution, which will enable that body to perform the high duties assigned to it in the manner most beneficial to the people. Let the end be legitimate, let it be within the scope of the Constitution, and all means which are appropriate, which are plainly

adapted to that end, which are not prohibited, but consist with the letter and spirit of the Constitution, are constitutional. (4 Wheat. 421.)

From the Legal Tender cases (110 U. S. 421) I quote the following extracts from the opinion of Mr. Justice Gray:

The power of making the notes of the United States a legal tender in payment of private debts being included in the power to borrow money and to provide a national currency is not defeated or restricted by the fact that its exercise may affect the value of private contracts. If upon a just and fair interpretation of the whole Constitution a particular power or authority appears to be vested in Congress, it is no constitutional objection to its existence or to its exercise that the property or the contracts of individuals may be incidentally affected. The decisions of this court already cited afford several examples of this. * * *

So, under the power to coin money and to regulate its value, Congress may (as it did with regard to gold by the act of June 28, 1834, ch. 95, and with regard to silver by the act of February 28, 1878, ch. 20) issue coins of the same denominations as those already current by law, but of less intrinsic value than those by reason of containing a less weight of the precious metals, and thereby enable debtors to discharge their debts by the payment of coins of the less real value (110 U. S. 448, 449).

That the majority opinion of the court in the Legal Tender cases went so far as to uphold Congress in "the power to alter the condition of contracts between private parties and authorize their payment or discharge in something different from that which the parties stipulated" is plainly shown by the dissenting opinion of Mr. Justice Field (110 U. S. 451).

The Federal Government is not specifically included within the constitutional prohibition which prevents the States from enacting legislation impairing the obligation of contracts. In the case of Mitchell *v.* Clark (110 U. S. 633) Mr. Justice Miller, speaking for the court, says:

It is no answer to this to say that it interferes with the validity of contracts, for no provision of the Constitution prohibits Congress from doing this, as it does the States; and where the question of the power of Congress arises, as in the Legal Tender cases and in bankruptcy cases, it does not depend upon the incidental effect of its exercise on contracts but on the existence of the power itself. (110 U. S. 643.)

In one of the earlier Legal Tender cases (79 U. S. 457) the opinion of the court included the following extracts:

We come next to the argument much used, and, indeed, the main reliance of those who assert the unconstitutionality of the legal tender acts. It is that they are prohibited by the spirit of the Constitution, because they indirectly impair the obligation of contracts. The argument, of course, relates only to those contracts which were made before February, 1862, when the first act was passed, and it has no bearing upon the question whether the acts are valid when applied to contracts made after their passage. The argument assumes two things—first, that the acts do in effect impair the obligation of contracts; and, second, that Congress is prohibited from taking any action which may indirectly have that effect. Neither of these assumptions can be accepted.

* * * * * * *

Nor can it be truly asserted that Congress may not by its action indirectly impair the obligation of contracts if by the expression be meant rendering contracts fruitless or partially fruitless. Directly it may, confessedly, by passing a bankrupt act, embracing past as well as future transactions. This is obliterating contracts entirely. So it may relieve parties from their apparent obligations indirectly in a multitude of ways. It may declare war, or, even in peace, pass nonintercourse acts, or direct an embargo. All such measures may, and must operate seriously upon existing contracts, and may not merely hinder, but relieve the parties to such contracts entirely from performance. It is, then, clear that the powers of Congress may be exerted, though the effect of such exertion may be in one case to annul and in other cases to impair the obligation of contracts. And it is no sufficient answer to this to say it is true only when the powers exerted were expressly granted. There is no ground for any such distinction. It has no warrant in the Constitution or in any of the decisions of this court. (79 U. S. 547, 548, 549, 550.)

Naturally there is no decision directly holding that Congress has the constitutional power to abrogate the "current weight and fineness" clause used in some bonds, for no such attempt has been made. The practice to include such clause arose subsequent to the Legal Tender cases.

There are, however, analogous decisions to aid us in reaching our conclusion. For instance, the Constitution gives to Congress the power to regulate interstate commerce. In exercising that power it has often impaired the obligations of existing contracts, including even charters entered into between States and transportation corporations. The following is from the opinion of Mr. Chief Justice Taft in the case of State of New York et al. *v.* United States, Clark, et al. (257 U. S. 591):

The next objection is that the State has a charter contract with the New York Central Railroad Co. by which the latter is bound not to charge more than 2 cents a mile for passenger carriage between Albany and Buffalo, and that, if the transportation act permits the Interstate Commerce Commission by such an order to enable the railroad company to violate its contract, it impairs the obligation of a contract in violation of section 10, Article I, of the Federal Constitution. That section provides that "no State shall * * * pass any * * * law impairing the obligation of contracts," and does not in terms restrict Congress or the United States. But it is said that it deprives New York and her people of property without due process of law. We said in Addyston Pipe & Steel Co. *v.* United States (175 U. S. 211, 230): "Anything which directly obstructs and thus regulates that commerce which is carried on among the States, whether it is State legislation or private contracts between individuals or corporations, should be subject to the power of Congress in the regulation of that commerce." Louisville & Nashville Railroad Co. *v.* Mottley (219 U. S. 467). See also Scranton *v.* Wheeler (179 U. S. 141, 162, 163); Union Bridge Co. *v.* United States (204 U. S. 364, 400; 257 U. S. 600, 601).

The direct grant of power given Congress to "regulate commerce with foreign nations and among the several States" is surely no broader in principle or purpose than the grant to "coin money and regulate the value thereof." All parties to contracts are legally bound to know that Congress may in the future exercise its authority to enact legislation that may affect or even impair the obligations thereof.

That the members of the Constitutional Convention did not intend to prohibit the discretion of Congress to enact legislation in the public interest, even though it might impair the obligations of contracts, seems clearly shown by the careful arrangement of the sections and articles of the Constitution itself. Section 8 of Article I sets out in detail the powers of Congress. Among them are the grants hereinbefore referred to. Section 9 of the same article sets out eight specific inhibitions upon the power of Congress and section 10 about the same number of inhibitions upon the respective States.

Included in section 10 is a specific provision that "no State shall * * * pass any bill of attainder, ex post facto law." In section 9 we have a similar limitation on Congress in the language "no bill of attainder or ex post facto law shall be passed." Nothing is left to speculation in that regard. Section 10, dealing with States, says, "No State shall * * * pass any * * * law impairing the obligation of contracts." No similar language can be found in section 9, the section specifically limiting the powers of Congress. This is most significant and indicates very definitely to me that it was not the intention that Congress in its discretion, acting under the express and implied powers granted to it, should be prevented from passing laws impairing the obligation of contracts. In other words, that inhibition, in my opinion, applies only to States.

In closing, I feel justified to quote the last two paragraphs of my speech of April 14, 1932:

I confidently submit H. R. 21 as well-thought-out legislation, based upon sound economics for immediate enactment. Its passage would permit debtors to retire their indebtedness, would safeguard the securities held by creditors, including all financial institutions, would greatly minimize the age-old struggle between capital and labor by doing away with changes in the cost of living, would reduce the hazard of all business enterprises by taking out the gamble involved in fluctuating general price levels—fluctuations in the value of gold, would remove the key log in the jam blocking restoration of prosperity, would end the tremendous losses incurred by creditor and debtor classes in the past whenever the price level has increased or decreased, and would greatly minimize, if not absolutely prevent, recurring depressions in the future.

These and many more will be the good results of any legislation permanently providing a monetary unit constant and stable in buying power. Congress and the country are confronted with no task of as transcending importance as that of providing at once, and for all time to come, an "honest dollar."

Mr. LUDLOW. Mr. Chairman, I yield 30 minutes to the gentleman from Texas [Mr. BUCHANAN].

Mr. BUCHANAN. Mr. Chairman and gentlemen of the committee, the question before the House is, When is a

budget not a budget? On the 17th of last month this House was regaled with a message from the President of the United States stating that the House paid no attention to his economy program and that the House in the bills so far passed and reported by the Committee on Appropriations has exceeded his estimates by $163,000,000.

Upon that occasion he gave a statement to the newspapers to the same effect.

I hold in my hand another statement given out at a later date, in which he said that the annual appropriation bills already reported to the House would be an increase of $163,000,000 over and above the President's Budget recommendations.

On the other hand, the bills that have been reported and passed by the House show a decrease in the estimates contained in the President's Budget of $54,000,000. That brings up the question, What is the Budget, or which is the Budget?

I would not have paid much attention to this propaganda if it had not been for the fact that a Member of this House, a member of the Committee on Appropriations, a gentleman who had served on that committee for over 15 years, and who had been chairman of that committee for 3 years, had not taken up the subject, agreed with the President, and castigated the House and the Committee on Appropriations for not paying attention to the program contained in the President's Budget. Let me review the gentleman's remarks. I refer to the gentleman from Indiana [Mr. WOOD]. I advised him I intended to reply to his speech, but unfortunately the gentleman is not upon the floor of the House at this time.

The gentleman said:

> There is nothing in the bills reported by us to the House presented here that shows anything whatever with reference to permanent appropriations. There is nothing in the bill that shows anything whatever with reference to nonrecurring items. I think that either the bill or the report should show the permanent appropriations.

Now, this gentleman has been a member of the Committee on Appropriations for over 15 years. He has been chairman for three years. If the great reform he suggested was commendable and worth while, why did he not inaugurate it when he was chairman of the committee and had a majority of his party on the committee and in the House for three years? However, the gentleman has forgotten. He is mistaken, because every report of every subcommittee contains a complete list of the permanent appropriations. I make this statement to correct the gentleman's record and the record of the Appropriations Committee.

The gentleman from Indiana, in discussing the Budget, said:

> Had the gentleman read that message in its entirety, accusing us of not paying any attention to the Budget and overriding the Budget, he would have seen what the President was complaining about was that we did not stop at the maximum, that we did not adhere to the maximum, but we paid no attention to economy recommendations.

Now, what is the Budget? What is the Budget submitted to this Congress, and the amount thereof? I am going to read the Budget law:

> The President shall transmit to Congress on the first day of each regular session the Budget, which shall set forth in summary and in detail, (a) estimated expenditures and appropriations necessary, (b) his estimates of receipts to the Government during the ensuing fiscal year (1) under laws existing at the time the Budget was transmitted and also (2) under revenue proposals, if any.

The Budget law further provides that if his estimates exceed the estimated revenue for that coming year, together with the amount available in the Treasury to pay those appropriations, then he shall recommend to the Congress some means of raising the money to balance the Budget for that fiscal year.

Section 204 of the Budget Act reads:

> Except as otherwise provided in this act, the contents, order, and arrangement of estimates of appropriations and statement of expenditures and estimated expenditures contained in the Budget or transmitted under section 203, and notes summarized therein, shall conform to the requirements of existing law.

In other words, if the President makes a Budget and transmits it to Congress, he must make those estimates under the requirements of existing law.

Mr. BOYLAN. And not "phantom laws"?

Mr. BUCHANAN. No; not phantom laws or changes of laws that he may have in his imagination. In other words, remember, his estimates submitted to Congress under the Budget law must be based on existing laws and existing authorizations.

Now, understanding the law creating the Budget system, what do we have here? Here is the Budget estimate. We have, first, the column which is the regular Budget, showing the total estimates $4,403,178,032. That is the real estimate. That is his Budget. Why? Because it is followed in the body of the Budget by a detailed statement of every appropriation allotting that exact amount to the different departments, the different bureaus and the different subbureaus or organizations in that department. Four billion four hundred and three million one hundred and seventy-eight thousand dollars. That is the Budget. Do you see this document? That happens to be the appropriation bill for the Department of Agriculture, printed by the subcommittee of the Committee on Appropriations dealing with agriculture. A similar document to that is printed for every subcommittee of the Committee on Appropriations. It contains figures as contained in this first column of the Budget, allocating that amount throughout each department in this bill—$4,403,178,000. Can there be any question but what that is the Budget? We have reduced that Budget $56,000,000 or $57,000,000, and yet the President sends a message to Congress that we have increased his Budget $163,000,000.

Mr. FIESINGER. Will the gentleman yield?

Mr. BUCHANAN. I yield.

Mr. FIESINGER. Are not the words or the phrase "balance the Budget" rather a misnomer? Do we not mean by that to balance the expenses with income?

Mr. BUCHANAN. We mean by that, that for the appropriations we make we must provide the revenue to meet them. That is what the law says.

Mr. FIESINGER. It is really a balancing of the appropriations rather than balancing the Budget the gentleman has spoken about.

Mr. BUCHANAN. I mean to balance the Budget for that year, to balance the appropriations; but the law says that when he sends his estimates in his Budget, if those estimates exceed the revenue, then he must advise the Congress of some way to raise that revenue in order to make the receipts practically the same amount as the expenditures.

Mr. FIESINGER. We are not trying to balance the Budget the President submits. As I understand, we have been going lower than the Budget estimate in these appropriations.

Mr. BUCHANAN. All the time. Let me tell something that happened in the last session of this Congress. We decreased the estimates contained in the present Budget $185,000,000. In this session of Congress so far we have decreased the estimate of the President as contained in the Budget over $56,000,000, making for this Congress a decrease in the President's estimate of what he requested Congress to appropriate of over a quarter of a billion dollars, yet he says we have increased his Budget this session.

Now, let us see upon what he bases that. Here is the second column, and he calls it—

> Fiscal year 1934 estimates as modified by additional recommendations in the Budget's message.

In other words, he sends his Budget, as set forth in column 1, amounting to $4,403,000,000, and then sends a Budget message to modify the Budget. What is that Budget message?

> I recommend to Congress that they decrease the compensation to Government employees an additional 11 per cent.

Mind you, the salaries of Government employees are fixed by law and it takes legislative action to decrease them.

> I further recommend that you take $127,000,000 off the compensation due veterans of the World War.

Recommendations to Congress for legislation to reduce the governmental expenses by those two items; yet he claims that is his Budget!

There is no such thing as two budgets. There is no such thing as an alternate budget, because the law prohibits it.

Mr. BOYLAN. Mr. Chairman, will the gentleman yield?

Mr. BUCHANAN. Yes.

Mr. BOYLAN. We were confronted this year, then, by a real Budget and by a phantom budget, were we not?

Mr. BUCHANAN. Oh, it is not even a phantom budget. It is not a ghost budget. It has no resemblance to a budget.

Mr. BOYLAN. But our work was based on his Budget estimate and not on the ghost budget.

Mr. BUCHANAN. Well, he has not even got a ghost to base it on. Let me speak frankly. This regular Budget I have been discussing was made up and sent to the printer and the most of it set in type before this phantom budget, miracle budget, or ghost budget was ever conceived.

Mr. SHALLENBERGER. Mr. Chairman, will the gentleman yield?

Mr. BUCHANAN. Yes.

Mr. SHALLENBERGER. I am very much interested in this point. Is it a fact the Budget recommends appropriations to carry out laws already in effect?

Mr. BUCHANAN. Absolutely.

Mr. SHALLENBERGER. Yet the savings he recommends can not be carried out without the change of existing laws, which the Committee on Appropriations have no power to do.

Mr. BUCHANAN. That is absolutely correct. There is no way the Committee on Appropriations could have done it; it requires legislation, and comes under the constitutional requirement that the President shall advise the Congress of the state of the Union.

Mr. SHALLENBERGER. That is the reason the gentleman said it is not a Budget at all, but merely a recommendation.

Mr. BUCHANAN. Absolutely, a recommendation to be classed with any other recommendation he might make for legislative action.

Mr. OLIVER of Alabama. Mr. Chairman, will the gentleman yield?

Mr. BUCHANAN. Yes.

Mr. OLIVER of Alabama. In connection with the very interesting statement the gentleman is making, attention should also be called to what we find in reference to the President's Budget recommendations as to appropriations for the Navy Department. Since 1930 the President has refused to permit the Wage Scale Board to meet. Last year the economy bill carried a provision to this effect. However, the President in submitting what has been termed his ghost estimate for the Navy in the last days of November undertakes to cut the pay of all laborers in navy yards 30 per cent. In other words, he suggested that during 1934 they should be cut 38⅓ per cent, based on an assumption that in 1934 the Wage Board would be allowed to meet, which he had denied them in past years, and that when they met they should find that the disparity between the amounts paid in navy yards and on the outside was 30 per cent, and on such assumption he bases his estimate.

Mr. BUCHANAN. That is correct. Now, let me call attention to something else. The gentleman from Indiana [Mr. WOOD] said, as did the President, that we have increased the President's Budget $136,000,000 plus. I quote Mr. WOOD's language:

> This occurred in very many different ways. It has occurred by reason of the appropriations being made that might have been deferred. It has also occurred by reason of deferred appropriations that should have been made, which simply postponed the evil day. These, if you please, together aggregate $136,000,000 in the bills already provided for.

Some more legerdemain! In other words, $163,000,000 in excess of the Budget has been caused by making some appropriations we ought not to have made, and by refusing to make other appropriations we should have made. In other words, if we make an appropriation of $100,000 that we should not make and refuse to make an appropriation of $100,000 we should have made, the sum total must be $200,000, according to Mr. WOOD, when, as a matter of fact, the sum total would be a zero, with the mark rubbed out. Why, as Mr. WOOD said, $38,000,000 of actual reductions we are making is merely a paper reduction, merely postponing to the future Congress the necessity of appropriating the money in a deficiency bill.

Have you forgotten, have the gentlemen on the Republican side of the House forgotten, when we were reducing the President's estimates in the last session of Congress $185,000,000, that the gentleman from Nebraska [Mr. SIMMONS] got up and complained that such were paper reductions, were merely postponing a necessary appropriation for political effect as we approached the elections; and he predicted that the deficiency bill this year would be one of the greatest in the recent history of this Congress.

We reduced the appropriations under the Budget estimates in the last Congress $185,000,000. This Congress has met; the first deficiency bill has been submitted, acted upon, and passed, and how much do you reckon it carried? Four million dollars. This is one of the smallest deficiency bills ever enacted in the recent history of this Government, and not a single item of our $185,000,000 reduction was included therein. This was a prophecy.

Now another prophet has arisen, Mr. WOOD of Indiana. He says that we will have to make at the next session of Congress these appropriations that we decreased. He criticizes us for not making appropriations and then criticizes us for making appropriations. He blows hot and cold out of the same mouth, almost the same breath, and the Good Book says, "Spew him out."

And let me refer to a few figures. Take the agricultural bill. Mr. WOOD says the total Budget estimate is $115,883,000. In fact, it is one hundred and eighteen million and some odd dollars. He said we increased this bill $2,931,000 above the Budget estimate, when, as a matter of fact, we decreased it $7,883,000 below the Budget estimate.

Take the Interior Department bill. He says we increased the Interior Department bill $1,506,000 above the Budget estimate, when, as a matter of fact, we decreased it $2,917,000. And so on down the line. I could read you more figures. It is unnecessary. Our deductions under the Budget aggregate $54,000,000 in the bills already passed.

There is a decrease of $38,000,000 in the specific items of the President's Budget estimates that Mr. WOOD says are merely paper savings; that is, they are merely deferred to another session of Congress.

Mr. WOOD is a good man. I have served on the Appropriations Committee for many years. Mr. WOOD, if let alone, is a real economist, believes in economy, acts for economy, and when he was chairman of that committee he voted for economy. I will say that much for him. But he has been imposed upon by a set of figures which he placed in the RECORD on February 1 undertaking to show that certain reductions made by the Appropriations Committee under the Budget estimate are not real savings, but merely postponements. He is too old a man to take these statements seriously, as he appears to take them. Were he chairman, instead of playing the rôle of critic for a once distinguished but now extinguished President, he would pay no attention to such statements.

Mind you, when I told you the last session of Congress we reduced the estimates $185,000,000, I was not including in that figure economies obtained by the economy act. That is $150,000,000 more, or making for the last session of Congress a total reduction of $400,000,000.

I am going to review just a few of these cuts that the Appropriations Committee made and the House confirmed that Mr. WOOD says are merely postponing the day of reckoning and will have to be made in the next Congress. The list contains an item $13,000,000 reduction in the estimate of payment for tax refunds. Mr. WOOD says that in the next session of Congress in a deficiency bill we have got to make that appropriation.

Now, let us see what the facts are. The President asked for $68,000,000, and the House allowed $55,000,000 expenditures for this purpose in the first four months of the present year, totaling $18,000,000, and at that rate it would equal $54,000,000 for the year, and the committee allowed $55,000,000.

In other words, we allow them for the next fiscal year the same rate of expenditure that they needed and are expending for this fiscal year, and yet Mr. WOOD says that this is an appropriation that will have to be made at the next session of Congress and we are making a mere paper saving. I may remind you that Mr. WOOD is a member of this committee, and sat on the committee, and we heard no such statement from him at that time or at any other time in the consideration of this bill in the committee until he was furnished with these mythical figures by the miracle President in a phantom budget.

Included in the cuts criticized by the gentleman from Indiana is one of $200,000 for enlarging public buildings, and he says that there will be appropriations later for this same purpose. How does he know? The buildings may not need to be enlarged, or, if they need enlargement, it may be they can wait until the country emerges from this depression; and yet Mr. WOOD of Indiana, the spokesman of the President on this floor, criticizes us when he says we exceed the Budget and then condemns us for not making such appropriations. I know he did not read the great list of figures furnished him by the Budget or the President or probably by both, and the statement is simply based on a deceptive program to mislead the people and to deceive them.

Let me tell you something else, and this is serious: I do not think any man occupying a high station of honor, trust, and confidence in our Government should join the corps of calamity howlers who are undermining the confidence of the American people in their Government. Public sentiment is a dangerous thing, not only to individuals in their respective communities and not only to cities, towns, and counties, but is dangerous to the Nation itself.

[Here the gavel fell.]

Mr. SANDLIN. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. BUCHANAN. So we have a peculiar situation in our country to-day when the man occupying the highest station in the gift of the people has joined the calamity howlers in certain sections of our country who are trying to undermine the confidence of the people in their own Congress and in their own Government.

I may say, and this may be unkind, that the confidence of the people in the President himself has already been evidenced. His is one branch of the Government about which the people have spoken, and now he is undertaking to undermine their confidence in another branch of the Government, when you know that we, by effort of head, hand, and heart, are striving to reduce appropriations and making substantial progress.

Mr. OLIVER of Alabama. Will the gentleman yield?

Mr. BUCHANAN. Yes.

Mr. OLIVER of Alabama. The gentleman has shown how inaccurate, unfair, and misleading are these public statements by the President. I wish to call the gentleman's attention to the last statement, which is even more unfair and misleading than others, because he coupled the appropriations which the House recently approved for the Departments of Justice, State, Commerce, and Labor with that for the Veterans' Bureau, the savings in the Veterans' Bureau being predicated, as you state, on legislation not yet considered, when the President should have known and the Bureau of the Budget did know that the appropriations which this House approved last week for these four departments were $2,000,000 under what they would have been had all legislation recommended by the President passed the House. The appropriations for these four departments is coupled with that for the Veterans' Bureau, when standing alone they would show a saving of $2,000,000, even under these "phantom estimates" of the President, and $5,700,000 under his Budget estimates.

Mr. BUCHANAN. Absolutely.

Mr. Chairman, I have only a little time remaining, and I am going to refer to Mr. WOOD of Indiana and quote from his speech, where he says that he believes in a balanced Budget. I join him in this belief. I believe the Congress of the United States by all means, as a primary necessity for national prosperity, should maintain the credit of our great Nation, because unless the Nation has this credit the individuals who compose the Nation will not have confidence in it.

I am not going to discuss means of balancing the Budget; but here is what Mr. WOOD states in conclusion, after discussing the question of balancing the Budget:

> If this is not done by this Congress, I fear it will not be done by the next one. God alone knows what that Congress will do. We can only hope for the best.

I wonder if the influence in Mr. WOOD's mind that caused him to make this statement is the fact that the next Congress is Democratic. Whether this may be true or not, I will tell Mr. WOOD one thing that the next Congress will do. They will put this Government upon a real economical basis and quit squandering the money of the people. This is one thing they will do, and, probably, the first thing they will do.

The second thing they will undertake, and I believe will accomplish, is an international agreement to remove the barriers that have obstructed and destroyed our commerce with the other nations of the earth.

Another thing I believe they will do is to refinance the farm mortgages of this country and instill hope in the hearts of the millions who till the soil. [Applause.]

[Here the gavel fell.]

Mr. HOLADAY. Mr. Chairman, I yield 40 minutes to the gentleman from Massachusetts [Mr. TINKHAM].

Mr. TINKHAM. Mr. Chairman, the time has come to handle without gloves those who would denationalize the United States.

The time is here to unmask those disloyal and seditious organizations and individuals who are attempting to destroy the independence of the United States, to subvert her national integrity, and to involve her in advance in the next European war.

The time is here fully to disclose to the American people the iniquitous intrigue against the public safety and the sovereignty of the United States.

One of the fundamental policies of the United States in relation to her foreign affairs was to refrain from interference or participation in the political affairs of Europe.

In 1917 the United States entered the World War in violation of this fundamental policy. It is clear that the present economic prostration of the United States, her increasing social disorders, and the menacing challenges to her institutions are due in large part to the abandonment of this traditional and salutary policy.

The activities in the United States of the agents and sympathizers of the European belligerents and of American international banking and business interests had much to do with promoting the public opinion which in 1917 hurled us into the European cataclysm and thereby precipitated our present ruin.

These activities were accompanied by a vast expenditure of money and the dissemination of unlimited propaganda. These same methods are now being employed by those disloyal and seditious organizations and persons who would denationalize the United States and involve her forever in the affairs of Europe, a continent of political instability, militaristic policies, and financial irresponsibility.

The manipulation of public opinion by high-cost organized propaganda from sources which do not represent the general public will has become the poisoned cup from which the American Republic will perish.

The ballot in the United States has become a negligible factor in expressing public opinion and in influencing national legislation and party platforms.

In 1916 the American people voted against entry into the European war. Early in 1917 the United States entered the war.

Since 1920 the American people have voted repeatedly against political interference or participation in the political affairs of Europe. They have again and again expressed themselves decisively as opposed to political internationalism. Notwithstanding, they have seen party platforms and elected and appointed American officials repeatedly nullify their expressed will. This has occurred because the public opinion which writes party platforms and influences Government officials is subtly manipulated by high-cost propaganda, emanating from disloyal, seditious, and alien-minded sources, and from sources of self-interest and personal gain.

The subtle and high-cost propaganda which initiates Federal legislation and directs American policies is the invisible Government of to-day. It is cynically agreed in Washington that cost alone limits the delivery of public opinion in any direction upon any issue.

It is the preeminent duty of the Congress of the United States to preserve American independence, to safeguard American nationality, and to keep the United States out of war.

The Congress can perform this duty only by throwing the bright light of publicity upon the foul intrigue now being perpetrated against the American people. The activities and vast expenditures of the disloyal and seditious organizations, which are now poisoning American public opinion at its source, demand complete exposure. Their purpose and methods should be disclosed. Their expenditures for the pollution of the pulpit, the platform, institutions of learning, and the press of the country should be uncovered. Those who are being paid should be named and identified.

The foreign policy of the United States is a political question and these subversive organizations have a political platform concerning the foreign policy of the country which places them within the scope of a congressional investigation.

Their platform, briefly stated, consists of four planks:

First. The entry of the United States in the Permanent Court of International Justice of the League of Nations.

Second. The entry of the United States into the League of Nations.

Third. The disarmament of Europe, but first the disarmament of the United States.

Fourth. The destruction of American neutrality by an affirmative commitment under the so-called Kellogg-Briand pact.

The Permanent Court of International Justice of the League of Nations is a political court, which was inevitable on account of its subordination to the League of Nations, and which was demonstrated again recently by its decision on the proposal for the economic union of Germany and Austria. It is the bureau, organ, political instrumentality, agent, and servant of the League of Nations. The judges of the principal European powers are selected for their mastery of crafty European diplomacy.

For the United States to join this court would be to submit her questions to European decisions and to become involved for all time in the political affairs of Europe. To join this political court would be an intermediate step toward joining the League of Nations, and is so asserted by the internationalists.

The League of Nations is a British conception and not an American conception. In Papers Relating to the Foreign Relations of the United States, 1915: Supplement; the World War, published by the Department of State, we find on pages 64 and 65 a letter written to Secretary of State Lansing from The Hague on September 7, 1915 (which was long before the United States entered the war) by the minister in the Netherlands, Dr. Henry Van Dyke, in which it is reported that Sir William Tyrrell, secretary to Sir Edward Grey, British Secretary of State for Foreign Affairs, stated to Doctor Van Dyke "that he thought a 'league of nations' should be formed to prevent the recurrence of such a war as this."

The League of Nations is a European political mechanism, the pawn of the principal European powers, bankrupt morally and physically by its conduct in relation to Japan, financially by default of its guaranteed loans, and intellectually by its abandonment of reality for the pursuit of vain futilities.

The League of Nations exists for the enforcement of the Versailles treaty. The Versailles treaty was a treaty of force, hate, oppression, and chaos. It has already been vitally amended by agreement. It must be further vitally amended by negotiations or it will be by war. It would have been an eternal dishonor for the United States to have signed the Versailles treaty as originally proposed. Should the United States now join the League of Nations, she would be involved without choice in the next European war. The decision would not be hers.

Should the European nations disarm upon the insistence of the United States, the United States would be morally committed to intervention in the next European quarrel.

Any affirmative commitment under the so-called Kellogg-Briand pact would destroy American neutrality, which has been the priceless heritage and safeguard of the United States since the founding of the Republic, and inevitably would mean war in support of one group of the belligerent European nations in the next war. The United States should remain the great neutral nation.

The largest and most formidable promoters of the subversive, disloyal, and seditious movement against American independence and American neutrality are (1) the so-called Carnegie Endowment for International Peace, which has an endowment of $10,000,000, supplemented by the endowment of $125,000,000 of the Carnegie Corporation, and (2) the John D. Rockefeller interests and the Rockefeller Foundation, with an endowment of $165,000,000.

These organizations not only are spending vast sums of money directly to involve the United States in Europe, but they are also subsidizing many other organizations and activities having the same purpose. The interlocking directorships and memberships of many of these organizations are significant.

The question of paramount importance at the moment is: Shall the Congress of the United States and the American people allow its foreign policy, its independence, and its neutrality to be dictated by $300,000,000 of Carnegie and Rockefeller money? Shall American independence and neutrality be put upon the auction block like merchandise to be bought and paid for?

Andrew Carnegie was alien born and alien minded. What he thought of American independence and what his plans and aims were may be seen from the following statements which he made at various periods of his life.

In "An American Four-in-Hand in Britain," written by Andrew Carnegie and published in 1883, we read:

> * * * O Scotland, my own, my native land, your exiled son returns with love for you as ardent as ever warmed the heart of man for his country. It's a God's mercy I was born a Scotchman, for I do not see how I could ever have been contented to be anything else.

In an address delivered at Grangemouth, England, on September 14, 1887, Mr. Carnegie declared:

> If I have any aspiration in the world, it is that during my life I may do something * * * to bring about the union of the two great branches of the same people with which I have the honor and the privilege to be connected.

In his book, "Triumphant Democracy," published in 1893, Mr. Carnegie stated:

> Briton and American being now fully agreed that those who made the attempt to tax the colonists without their consent were wrong, and that in resisting this the colonists vindicated their rights as British citizens, and, therefore, only did their duty, the question arises, Is a separation thus forced upon one of the parties, and how thus deeply regretted by the other, to be permanent?

I can not think so, and I crave permission to adduce some considerations in support of my belief that the future is certainly to see a reunion of the separated parts and once again a common citizenship.

There follow six reasons, and then Mr. Carnegie goes on to say:

* * * Some day, therefore, delegates from the three now separated branches will meet in London and readily agree upon and report for approval and ratification a basis for the restoration of an indissoluble union of indestructible states.

Let men say what they will, therefore, I say that as surely as the sun in the heavens once shone upon Britain and America united, so surely is it one morning to rise, shine upon, and greet again the reunited state, "The British-American Union."

In an article written by request for the London Express, October 14, 1904, entitled "Drifting Together—Will the United States and Canada Unite?" Mr. Carnegie had the following to say:

Canada's destiny is to annex the Republic, as Scotland did England, and then, taking the hand of the rebellious big brother and that of the mother, place them in each other's grasp, thus reuniting the then happy family that should never have known separation.

In "The Life of Andrew Carnegie," by Burton J. Hendrick, published in 1932, we read that in December of 1868 Andrew Carnegie drew up a memorandum as a plan of life in which appeared this statement:

Settle then in London and purchase a controlling interest in some newspaper or live review and give the general management of it attention. * * *

Later in the book it is stated that Mr. Carnegie in after years became "the proprietor of 15 or 20 organs of public opinion, for the most part in England and Scotland."

As may be seen from his own statements, Mr. Carnegie never believed in American independence, American sovereignty, American neutrality.

When in 1910 Mr. Carnegie determined to enter the American political field and to dictate American foreign policy, and established for this purpose a $10,000,000 endowment, he chose to name it the "Carnegie Endowment for International Peace," and not the "Carnegie Endowment for the Abolition of American Independence." For the Washington headquarters of his political activities there was chosen a site just across the street and half way between the White House and the Department of State, whose policies he was determined to dictate. The lobbyists of his endowment have always had ready access to and have constantly frequented both of these Government establishments, where the foreign policy of the United States is largely fixed. It can be proved that nearly all the agitation and vast expenditures made for the propaganda for American adherence to the Permanent Court of International Justice of the League of Nations were directed and managed by this organization. The inclusion in both the Republican and Democratic platforms last year of identical planks favoring entry of the United States into the Permanent Court of International Justice of the League of Nations and for the surrender of American neutrality were the direct results of the activities of this organization. Never before have identical planks on a highly controversial issue been adopted by the two political parties except in the case of the prohibition planks adopted by both parties between 1920 and 1930, which planks were dictated by the Anti-Saloon League. The exposure of the propaganda methods and the vast expenditures of this organization by two congressional investigations brought about the downfall of the tyranny of prohibition. A congressional investigation of the propaganda methods of the Carnegie Endowment and of its allies will insure preservation of American independence and American neutrality.

Until 1920, due primarily to the World War, the activities of this Endowment were astutely directed largely to the promotion of arbitration, a sound American policy. Since 1920, with increasing intensity, this Endowment has sought by every means, by vast expenditures for publicity and for subsidizing, to involve the United States in the political affairs of Great Britain and Europe.

The methods employed by this Endowment, with its vast financial resources, are varied. It organizes and finances international clubs; it publishes international literature; it establishes "international mind alcoves" in libraries, even for children; it imports foreign propagandist speakers and lecturers; it pays American professors and students liberal amounts, which go under the name of honoraria, for the promotion of the political policies of the Endowment. It sends American economists and social scientists to Europe, and particularly to Geneva, as guests of the Endowment, thereby placing them under obligation upon their return to be propagandists for what the Endowment advocates and to instruct their pupils as to the desirability of the entry of the United States into the League of Nations. It finances the organization of public mass meetings throughout the United States on Armistice Day to preach the political platform of the Endowment. It has set up in Geneva an American committee of the League of Nations Association and distributes political literature. In relation to this activity we read on page 65 of the 1932 yearbook of the Endowment:

Literature of various international American and British organizations is on display, and a staff of assistants is ready to make plans and give information to the many visitors who come in for advice.

On pages 66–67 of the yearbook we learn that the Endowment supplies funds to the Geneva Institute of International Relations and to the National World Court Committee; also that it appoints and finances an American "to act for one year as American representative of the Endowment and the League of Nations Association in Geneva." On page 67 there appears the following concerning this American representative:

He is maintaining contact with officers of the league and is a member of the committee in charge of the Geneva Institute of International Relations. This involves correspondence from Geneva with committee members in the United States and Great Britain * * *.

The Endowment finances a National Student Forum on the pact of Paris, and on page 70 of the yearbook we read:

The national committee in charge of the National Student Forum is composed of approximately 300 State and city superintendents of education, high-school principals and teachers, editors of educational publications, and leaders in educational and religious organizations. In each State there has been organized a working committee of superintendents and high-school principals which promotes the work of the forum in the high schools of the State. * * *

The yearbook goes on to say that—

In 1931–32 it is hoped to assist 5,000 high schools and to reach approximately 300,000 students.

The Endowment maintains in England an international house, known as the Dunford House, where internationalists, American and English, and others devoted to the theory of free trade, meet regularly.

The Endowment finances "international relations clubs." On page 78 of the yearbook we read:

At the close of 1931, there were 319 clubs in the United States, an increase of 99 since the last annual report was written. These new clubs are distributed throughout 37 States.

And on page 79 we read:

Some of the clubs listen regularly to broadcasts on international subjects by the Foreign Policy Association and the Institute of Pacific Relations.

Paid representatives of the Carnegie Endowment attend conferences of these clubs, which organize "League of Nations assemblies." On page 85 of the yearbook it is stated that—

A party of British students and their faculty advisers came to the United States as guests of the endowment to attend a British and American students conference, held at the University of Michigan, Ann Arbor, July 12–19, 1931.

On page 86 of the same publication it is stated:

There are 15 active clubs in the British Isles. As authorized by the directeur-adjoint of the Centre Européen in the summer of 1931, Mr. Norman H. Poole, secretary of the British Universities League of Nations Society, is now in charge of the International Relations Clubs in the British Isles, reporting directly to

the executive secretary at New York in order that the club work may be carried on under one head throughout the world.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. TINKHAM. I yield.

Mr. SUMMERS of Washington. Does the gentleman know whether the Carnegie Foundation advocates the recognition of Soviet Russia by the United States?

Mr. TINKHAM. Not that I know of.

The president of the Carnegie Endowment for International Peace, the chairman of its executive committee, and the director of its first political propaganda division, known as the Division of Intercourse and Education, is Nicholas Murray Butler, who is also chairman of the advisory council of the League of Nations Association (Inc.), and whose attitude toward his country, I have no hesitation in designating as disloyal and seditious.

The director of the second political propaganda division, known as the Division of Economics and History, is James Thomson Shotwell, an expatriated British subject.

We descendants of old Americans refuse to submit to these dictators of the foreign policy of the United States, whose purpose it is to denationalize the United States, to destroy her independence, to involve her in European political affairs by entering, first, the Permanent Court of International Justice of the League of Nations and then the League of Nations, and to abolish her neutrality.

We descendants of those who established civilization upon this continent, fought the battle of Bunker Hill, died at Valley Forge, saw the rising of the sun at Yorktown, and drew up the Constitution of the United States; we whose ancestors flew the American flag upon the seven seas in 1812, are ready here and now to fight again the battle of the Republic, without quarter and without cease, by all the means that lie within our power, to expose the plotters against American independence, American sovereignty, American neutrality, and American safety. We accept the gage of battle which has been flung in our faces.

Nicholas Murray Butler states he is for peace. There will be no peace on the American continent unless he retires to England or fights the second battle of Bunker Hill.

The Congress of the United States can save the American Republic by an investigation of its enemies, who are plotting against its independence, its neutrality, and its safety.

If no action is taken at this session upon the resolution which I am introducing to-day, I shall reintroduce it in the next Congress and press for its adoption. [Applause.]

Mr. TINKHAM submitted the following resolution, which was referred to the Committee on Rules and ordered to be printed:

Resolution

Whereas certain organizations, foundations, endowments, and associations are attempting by disloyal and seditious propaganda and vast expenditures of money to influence the foreign policy of the United States and have a political platform which is a menace to the independence and neutrality of the United States: Now, therefore, be it

Resolved, That the Speaker is authorized and directed to appoint a select committee, to be composed of five Members of the House, one of whom he shall designate as chairman. The committee is authorized and directed to investigate the political activities of all organizations, foundations, endowments, and associations which have attempted or are attempting to influence political opinion and political action by any means whatsoever, with reference to the foreign policy of the United States.

Said committee shall have the power to subpœna witnesses, administer oaths, send for books and papers, to employ a stenographer, and to report such hearings as may be had on any subject before said committee.

The committee shall, as soon as practicable, report to the House the results of its investigation, together with such recommendations for legislation as it deems advisable.

Mr. LUDLOW. Mr. Chairman, I yield five minutes to the gentleman from Georgia [Mr. LANKFORD].

Mr. LANKFORD of Georgia. Mr. Chairman, there has recently been much discussion in reference to the Federal Farm Board. To my mind, there is great danger that Congress may make a mistake if this agency is destroyed without retaining some agency to act along the line covered by it.

While I sincerely feel that the Federal Farm Board has rendered a real service to the farmers of this country, I never have believed that the Farm Board act was anything like perfect. My mind has not been changed with reference to this matter. I am not a new convert to the idea that this agency can not function effectively in the matter of elevating and stabilizing the prices of farm products. When the Federal Farm Board act was passed several years ago, I stated that it would be a failure; that failure was written on its every page because it did not provide for an effective control of production and marketing so as to elevate and stabilize the price of cotton, tobacco, wheat, and other agricultural commodities.

I feel that Congress is much more to blame for the failures of the Farm Board than are the members of the Farm Board. I did not feel at the time the bill was enacted that it would give the relief that both the Democratic Party and the Republican Party had promised the farmers of the Nation. I shall be very much disappointed if this Congress or the next Congress repeals the act outright and admits that nothing can be done along these lines for the farmers of the country.

Most of the opposition to the Federal Farm Board comes from those who oppose any sort of control of the marketing activities of the farmer so that the profiteers may exploit the farmer and make unconscionable profits out of the farmer's products.

I can see no reason why the activities of the Federal Farm Board should be transferred to the Department of Agriculture. I am afraid of the centralization in any one department or any one bureau of too much political power. This is one serious objection to the allotment plan of farm relief as it passed the House. I would rather the Federal Farm Board be retained and for the act to be modified so as to overcome the vicious provisions of the act, if there are such, and thus perfect the legislation so as to make it a real agency for the protection and benefit of the farmers of the country.

The opponents of real farm relief will hail as a signal victory the repeal of the Farm Board act. No great piece of legislation is perfect in the beginning; the Federal Farm Board act is not an exception. I have repeatedly pointed out how this act can be amended so as to become a real Federal agency for genuine farm relief. It should not be repealed outright unless simultaneously there is enacted a better bill, providing a more perfect farm-relief program.

No Member of Congress has the right to fight the present Farm Board act in the name of the farmer unless he has a better plan to suggest in its stead. In its present form it is much better than the equalization-fee plan which it superseded. The defects in the operation of the present Farm Board plan should not be construed as an estoppel against the enactment of real, honest-to-goodness farm-relief legislation.

Let us not be too hasty to destroy this act unless we have a more perfect plan to propose for the relief of the farmers of our country.

Mr. SANDLIN. Mr. Chairman, I yield 15 minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Chairman, I want to compliment my friend from Mississippi [Mr. WHITTINGTON] on the good work that he is attempting to do in this session for economy. I am sure that we will all go along with him on any proposition which he has to offer which begins up at the topnotchers and goes down, and I believe that he would help us get more support for economy if he would watch his own votes a little more closely and see that they are always in accord with the efforts being made for economy. I am afraid that my friend is expending too much of his energy and endeavors to save at the spigot and waste at the bunghole. He must stop the big waste as well as the little extravagances.

If we were to eliminate all of our salaries for all of the 435 Members of the House, so that no Member would draw a dollar, and if we were to take away every bit of the mileage that Members get, so that they would get no mileage,

and if we were to take away all of the clerk hire, so that we would have no clerks, and if we were to take away all of the stationery allowance, so that no Member would have any, and stop every bit of the maintenance expense of the House Office Building, does he know how much we would save? Just six and a half million dollars, for all of the above, I will advise him, amounts to less than six and a half million dollars.

I happen to remember that last May on this floor we tried to get our friend from Mississippi [Mr. WHITTINGTON] to go along with us in support of the economy bill that the Economy Committee had worked out to save millions of dollars. For instance, there was a provision in that bill, section 308, to discontinue the Army Transport Service, upon which some Representatives and Senators ride. We wanted to abolish it and save money, and to my great surprise my friend from Mississippi [Mr. WHITTINGTON] voted against abolishing it. He voted against the Economy Committee's provision on that, and then when we came down to paragraph 309, directing the Secretary of the Navy to discontinue the operation of the Navy transport service, upon which some Senators and Representatives ride to foreign countries, to my great surprise my friend Mr. WHITTINGTON, who I thought would go along with us for economy, voted not to discontinue it, voted to keep it on, and he helped to defeat the Economy Committee on that provision of our bill.

Then we came along down to section 312 of that economy bill directing that the Panama Railroad Co. shall discontinue the operation of the Panama Railway Steamship Line, which takes some Representatives and some Senators, and their families, to Panama. I thought surely that he would be with us and stop that, but he was not. He voted against us on that, and helped to defeat the economy bill in that particular. I have never been to Panama yet, and during the 16 years I have been in Congress I have never spent one single dollar of any kind of a junket for myself or any member of my family. I go about the country a lot, but I go at my own expense. I thought Brother WHITTINGTON would surely help us stop that, but he was against us on that economy.

Then I remember that the Economy Committee, headed by my good friend from Alabama [Mr. MCDUFFIE], brought in a proposition that I have been working on for 12 years, and which was fostered by our good friend from Tennessee [Mr. BYRNS], to consolidate the Army and Navy, and Mr. BYRNS had evidence before us to show that that consolidation would save, not merely the six and a half million dollars a year, which is the total cost of all 435 Congressmen, but it would have saved $100,000,000 a year and would have brought about greater efficiency in both our Army and Navy. I said to myself when that record vote came on, on May 3, 1932, that surely my friend WHITTINGTON would help us on that, because surely he is for economy; but he voted with the spenders and the raiders to keep from consolidating the Army and the Navy Departments.

Mr. WHITTINGTON. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes. If the gentleman has any excuse to offer, now is the time to offer it.

Mr. WHITTINGTON. I say, for the gentleman's benefit, that I made my position known, spoke on the subject, and I made my statement very clear, stating that I was a member of the Committee on Expenditures and that neither Mr. BYRNS nor anybody else proved that there would be any such economy, or any economy except purchases of supplies, which is authorized in the economy bill, for which I voted. I thought from the evidence that the abolition of the transport and railway, urged by the Steamship Trust, would be more expensive to the Government.

Mr. BLANTON. If the gentleman will come to my office when we adjourn, I will convince him in 15 minutes by reliable and decisive data that I have been collecting for 12 years from the Navy and Army experts, that such a sane consolidation would save $100,000,000 annually for this Nation. And the Economy Committee assured us all that the abolishment of the Army transport service and abolishing the Navy transport service and abolishing the Panama Steamship Line would all save our Government enormous sums each year. And the Economy Committee tried to abolish these matters of waste and extravagance, but the gentleman voted against the committee's proposals.

I want to go along with my friend on all economies, and I want him to go along with us. What he said here this evening on the floor about the necessity to reduce is the truth. We have to cut down expenses, but we want to begin at the big expenses and reduce them as well as the little infinitesimal bagatelles. If my friend will come to my office and see my files that I have collected on these wasteful and expensive bureaus, scores of them here in Washington that ought to be abolished, and if he would work along that line and help us to abolish them and help us take the waste out of the good ones, we would save another $100,000,000 every year.

I called attention here the other day to Major Hoffman, in one of the bureaus of the War Department, swiping somebody else's idea on a parachute and developing it and spending thousands of Government dollars, so his company advertises publicly, of Army money to develop it, and of his having been given $23,500 of stock, and of his company advertising that it has cost the Army thousands of dollars to carry on the company's project, and that they would have his services to help them further. I called attention to that, and I think my friend Mr. WHITTINGTON ought to help us get that stopped.

Then I called attention the other day to these long-haired scientists—and, by the way, do you catch the significance of that phrase, "long-haired scientists"? The real scientist has no hair at all. He is like my other friend from Mississippi [Mr. COLLIER]. The real scientist has no hair at all, but the so-called scientists, these potato scientists, if you please, have long hair. I called attention to the fact that they have spent $250,000 since 1910 breeding potatoes, and thus far they have developed only one commercially that they would put on the market, and that was the Katahdin. Then they came out the other day in the Washington Star of Wednesday, with a big, double-column explanation in defense of the situation. I want the gentleman from Mississippi [Mr. WHITTINGTON] to take this home with him to his farmers of Mississippi. One of the excuses they put in here to explain that $250,000 spent for breeding potatoes was this:

Our explorers—

The Department of Agriculture—

Our explorers have been sent into Mexico and South America in a search for the wild ancestor of the potato, in the hope that from it could be obtained some original disease-resistant qualities which have been lost in its countless generations of domesticated descendants.

[Laughter.]

Mr. WHITTINGTON. Is that the same potato or a different potato the gentleman spoke about the other day?

Mr. BLANTON. That is the same potato, that $250,000 one. What right has the Department of Agriculture to send these long-haired scientists to the wilds of Mexico and South America to hunt up the original wild potato in this time of depression? Spending thousands of dollars! It ought to be stopped. If my friend would work along that line he could do signal service to the people he represents and to the people of the Nation. [Applause.]

In that same Washington Star, I want to show the gentleman what these other scientists, who are always writing letters to the papers from the Department of Agriculture, said. This is a whole-column article. It reads:

Higher grades of bent for greens now developed at the Arlington farm—

That is a Government farm over here in Virginia—350 acres. Listen to what they say the scientists have done for the golf courses of America, breeding special grasses for their golf courses in this time of depression. This is written by W. R. McCallum, one of their special-feature writers:

Did you, Mr. Golfer, know that the course over which you play has been vastly improved by the earnest efforts of a group of

scientists working for golf-course improvement through the Department of Agriculture? * * *

Did you know that Washington is the center, the heart of a mass of scientific information on golf courses? * * *

Or that over in Arlington County, on a little plot of ground owned by the Government, turf and grass problems are being worked out that may result in ridding golf courses of those pests which infest them during the warm months?

Or that more than $40,000 a year is being spent in research work in the art of turf growing?

Do the farmers of Mississippi, I ask my economic friend [Mr. WHITTINGTON], want $40,000 of their hard-earned tax money spent each year by these long-haired scientists in the Department of Agriculture developing special turf greens for the golf courses of America? [Applause.]

Mr. LUDLOW. Will the gentleman yield?

Mr. BLANTON. I yield.

Mr. LUDLOW. Has the gentleman directed his keen and scintillating mind to the Department of Agriculture bulletin on the mule? If not, he has something coming to him.

Mr. BLANTON. I am going to furnish our President elect when he comes here some intimate, concise, authentic, correct data on more wasteful, unnecessary bureaus of the Government than he ever dreamed existed in the United States. I have enough confidence in him to believe he is going to abolish two-thirds of them and he is going to reorganize the balance of them and take the waste out of them. I want to incite my friend from Mississippi [Mr. WHITTINGTON] to use his splendid qualifications here in trying to save the big wastes, in trying to keep out of this Government expense these millions and hundreds of millions of dollars that are wasted here, most of it wasted in Washington.

Let me read a letter that I got from a man who knows. I can not give his name because if I did he would lose his job to-morrow. Just listen to what he says:

Scientists in the Agricultural Department have a pet racket of their own. They write and sell articles to the newspapers. They use Government time and Government stenographers to write those articles. The Agricultural Department has scores of traveling representatives who travel to the South in winter and to Maine and Wisconsin and foreign countries in the summer.

[Here the gavel fell.]

Mr. SANDLIN. Mr. Chairman, I yield five additional minutes to the gentleman from Texas.

Mr. BLANTON (continuing reading):

They cost the Government $5,000,000 annually.

That is more than all the salaries of Congressmen, their mileage, and clerk hire, and stationery allowances all put together. Did the gentleman know that? Most of these scientists of the Department of Agriculture who are wasting the people's money every year are worthless parasites, and their bureaus should be abolished.

In this letter he states further:

When the payless furlough of President Hoover was first inaugurated the Department of Agriculture had scientists sent from Washington and other points on Government transportation and on per diem allowances, to relieve the field scientists, so that they could come to Washington. Their furlough will end in the taxpayers losing money.

Let me say in conclusion I want to work with my friend from Mississippi [Mr. WHITTINGTON], and if he will just let me help him we can save at least $200,000,000 in the next Congress. That is a pretty good sum. If he will fight and vote to stop the big wastes as well as against the small items, we can save millions, for all of us want to cut down these expenses, and we will do it.

Let me call attention to the most ridiculous situation that ever existed in the the United States Capital.

We have 15,000,000 Americans in the United States out of employment, walking the streets, their families, wives, and little children hungry. They would be glad to get a job here at $2 a day, yet we have several thousand employees in Washington working on Government buildings who, because they have been served with notice that their wages were going to be cut from $11 a day to $8 per day, are going to strike. They all quit work at 4 o'clock p. m., and all get half of every Saturday. I have a good deal of sympathy with those with whom these contractors have already contracted with the Government on a basis of that $11 a day. The contractors in such cases should be made to pay them $11 a day, because they were allowed that by the Government. I would back them up in making the contractors stand up to the lick log and take their medicine, but where it is to come out of the Government it is an outrage to pay men in Washington $11 a day when other men here will gladly work for $8, and men all over the Nation would be glad to get work at almost any wage.

Why, the Inaugural Committees are building some grandstands here for the inaugural ceremonies. Several hundred men are to be employed. Do you know they want to work for $8 a day? Do you know that this money comes out of the Government and out of the people of Washington? Do you know there are organizations right now that are preventing these men from taking jobs at $8 a day, insisting that they must demand and receive $11 a day for building grandstands out of third-class lumber? Any farm boy out on your farm, in your State, Governor, who is a saw-and-hammer man could build these stands. Any saw-and-hammer man on any ranch or farm in the United States could build them. It does not take skilled labor, and it is an outrage for organizations here to insist on men getting $11 a day to build grandstands, the cost coming out of the people. The organizations should be glad to see the men get $8. I want to say this to the men who have it in charge: Every single man who refuses to work at $8 a day ought not to get a job. He ought to be turned out, because there are hundreds of men who would gladly take jobs at $8 a day.

Mr. ALLGOOD. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. I yield.

Mr. ALLGOOD. I wish to commend the gentleman for the stand he has taken in regard to appropriations for the Department of Agriculture. When the agricultural appropriation bill was before the House, I offered amendment after amendment to cut down those expenditures that are not needed at this time and right along the line the gentleman has been speaking of. I commend him for it.

Mr. BLANTON. I thank my colleague for his commendation—the newspapers here never give me any. I want to say this to Brother BOYLAN—you will be here probably when I am dead and gone—when I am dead do not let a single newspaper say a kind word about me. If they can not say kind words about me when I am alive, I do not want them to say kind words about me when I am dead.

Mr. BOYLAN. I do not see how they could say anything but kind words about the gentleman.

The CHAIRMAN. The time of the gentleman from Texas has expired.

The Clerk will read the bill for amendment.

The Clerk read the first paragraph of the bill.

Mr. SANDLIN. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. BULWINKLE, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 14562) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1934, and for other purposes, had come to no resolution thereon.

TERMS OF PRESIDENT, VICE PRESIDENT, AND SO FORTH

The SPEAKER laid before the House a communication from Eugene Talmadge, Governor of the State of Georgia, announcing that the General Assembly of Georgia had ratified and approved the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. LOZIER, for two days, on account of important business.

To Mr. BIDDLE, for two days, on account of important business.

ENROLLED BILLS SIGNED

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 13959. An act to authorize the incorporated town of Fairbanks, Alaska, to issue bonds in any sum not exceeding $100,000 for the purpose of constructing and equipping a public-school building in the town of Fairbanks, Alaska, and for other purposes.

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 243. An act for the relief of S. F. Stacher;

S. 433. An act to authorize the posthumous award of a distinguished-flying cross to Eugene B. Ely;

S. 2058. An act for the relief of William C. Rives;

S. 2982. An act for the relief of J. G. Seupelt; and

S. 4381. An act authorizing the President to transfer and appoint Lieut. Morris Smellow, United States Navy, to the grade of passed assistant paymaster, with the rank of lieutenant, in the Supply Corps of the United States Navy.

ADJOURNMENT

Mr. SANDLIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 46 minutes p. m.) the House adjourned until to-morrow, Saturday, February 4, 1933, at 12 o'clock noon.

COMMITTEE HEARINGS

Tentative list of committee hearings scheduled for Saturday, February 4, 1933, as reported to the floor leader:

RULES

(10.30 a. m.)

Hearing on extending moratorium on New Mexico irrigation project.

COINAGE, WEIGHTS, AND MEASURES

(10 a. m.)

Continue hearings on silver bills.

BANKING AND CURRENCY

(10.30 a. m.)

Hearings on several matters.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

911. A communication from the President of the United States, transmitting a letter for the consideration of Congress and, without revision, a supplement estimate of appropriation pertaining to the legislative establishment, House of Representatives, in the sum of $2,500 (H. Doc. No. 537); to the Committee on Appropriations and ordered to be printed.

912. A letter from the Reconstruction Finance Corporation, transmitting a report, pursuant to the provisions of section 15 of the Reconstruction Finance Corporation act, covering its operations for the fourth quarter of 1932, October 1 to December 31, 1932, inclusive, and for the period from the organization of the corporation on February 2, 1932, to December 31, 1932, inclusive (H. Doc. No. 538); to the Committee on Banking and Currency and ordered to be printed.

913. A letter from the Secretary of the Treasury, transmitting a letter with a draft of a proposed bill, the purpose of which is to authorize the Secretary of the Treasury to accept titles to any sites acquired under the provisions of the emergency relief and reconstruction act of July 21, 1932, and subsequent acts; to the Committee on Public Buildings and Grounds.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. SANDLIN: Committee on Appropriations. H. R. 14562. A bill making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1934, and for other purposes; without amendment (Rept. No. 1960). Referred to the Committee of the Whole House on the state of the Union.

Mr. HILL of Alabama: Committee on Military Affairs. H. R. 12769. A bill to provide an additional authorization for the acquisition of land in the vicinity of Camp Bullis, Tex.; without amendment (Rept. No. 1961). Referred to the Committee of the Whole House on the state of the Union.

Mr. FULLER: Committee on the Public Lands. H. R. 14302. A bill to provide for the creation of the Morristown National Historical Park in the State of New Jersey, and for other purposes; with amendment (Rept. No. 1962). Referred to the Committee of the Whole House on the state of the Union.

Mr. ALMON: Committee on Public Buildings and Grounds. H. R. 14321. A bill to authorize the Secretary of the Treasury, in his discretion, to acquire a new site in Huntsville, Ala., and to construct a building thereon for the accommodation of the courts, post office, and other Government offices; without amendment (Rept. No. 1963). Referred to the Committee of the Whole House on the state of the Union.

Mr. LANHAM: Committee on Public Buildings and Grounds. House Joint Resolution 583. Joint resolution to provide for a change of site of the Federal building to be constructed at Binghamton, N. Y.; without amendment (Rept. No. 1964). Referred to the Committee of the Whole House on the state of the Union.

Mr. ALMON: Committee on Roads. H. R. 13025. A bill to extend the time during which the emergency appropriation for Federal-aid highways shall be available for expenditure; without amendment (Rept. No. 1971). Referred to the Committee of the Whole House on the state of the Union.

Mr. LANHAM: Committee on Public Buildings and Grounds. H. R. 14489. A bill relating to the construction of a Federal building at Mangum, Okla.; without amendment (Rept. No. 1972). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. MARTIN of Oregon: Committee on Irrigation and Reclamation. H. R. 14127. A bill providing for an exchange of lands between the Colonial Realty Co. and the United States, and for other purposes; without amendment (Rept. No. 1965). Referred to the Committee of the Whole House.

Mr. KENNEDY of Maryland: Committee on Claims. H. R. 5900. A bill for the relief of H. A. Soderberg; with amendment (Rept. No. 1966). Referred to the Committee of the Whole House.

Mr. BLACK: Committee on Claims. H. R. 6126. A bill for the relief of Oscar P. Cox; with amendment (Rept. No. 1967). Referred to the Committee of the Whole House.

Mr. PITTENGER: Committee on Claims. H. R. 10900. A bill for the relief of Julia E. Smith; with amendment (Rept. No. 1968). Referred to the Committee of the Whole House.

Mr. HARLAN: Committee on Claims. H. R. 13292. A bill for the relief of W. C. Garber; with amendment (Rept. No. 1969). Referred to the Committee of the Whole House.

Mr. PITTENGER: Committee on Claims. H. R. 14347. A bill for the relief of Mary Byrkett Sinks; with amendment (Rept. No. 1970). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. SANDLIN: A bill (H. R. 14562) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1934, and for other purposes; to the Committee of the Whole House on the state of the Union.

By Mr. SMITH of Idaho: A bill (H. R. 14563) amending an act of February 4, 1931 (46 Stat. L. 1061–1063), entitled "An act authorizing the construction of the Michaud division of the Fort Hall Indian irrigation project, Idaho, an appropriation therefor, and the completion of the project, and for other purposes"; to the Committee on Indian Affairs.

By Mr. HARE: A bill (H. R. 14564) relating to the enactment of laws in the Virgin Islands; to the Committee on Insular Affairs.

By Mr. BUCHANAN: A bill (H. R. 14565) to enable the Secretary of Agriculture to assist in effecting voluntary readjustments of farm-mortgage terms and conditions; cooperate with other Government agencies in refinancing farm-mortgage indebtedness, delinquent interest, and tax payments; and to provide facilities with which to refinance such indebtedness; and for other purposes; to the Committee on Banking and Currency.

By Mr. MEAD (by request): A bill (H. R. 14566) to authorize the delivery of surplus forfeited vessels of the Treasury Department to the Boy Scouts of America for use in sea-scout training; to the Committee on the Judiciary.

By Mr. JOHNSON of Oklahoma: A bill (H. R. 14567) to reduce and adjust the retired pay of World War emergency officers and of commissioned officers of the Army, Navy, Marine Corps, and Coast Guard, and for other purposes; to the Committee on Military Affairs.

By Mr. McMILLAN: A bill (H. R. 14568) to establish a commercial airport for the District of Columbia; to the Committee on the District of Columbia.

By Mr. DAVIS of Tennessee: A bill (H. R. 14569) to regulate the importation of milk and cream and milk and cream products into the United States for the purpose of promoting the dairy industry of the United States and protecting the public health; to the Committee on Agriculture.

By Mr. TINKHAM: Resolution (H. Res. 368) providing for the investigations of the political activities of all organizations, foundations, endowments, and associations which attempt to influence political opinion and political action with reference to the foreign policy of the United States; to the Committee on Rules.

MEMORIALS

Under clause 3 of Rule XXII, memorials were presented and referred as follows:

Memorial from the Board of Aldermen, St. Louis, Mo., memorializing the President of the United States and Congress that the Postmaster General be authorized to issue a special series of 3-cent postage stamps commemorative to Brig. Gen. Thaddeus Kosciusko; to the Committee on the Post Office and Post Roads.

Memorial from the General Assembly of Indiana, memorializing Congress to pass Senate bill No. 1197; to the Committee on Banking and Currency.

Memorial from the Senate of South Carolina, memorializing Congress to amend the law creating the Reconstruction Finance Corporation in order that States and subdivisions thereof may borrow directly money to meet the need of the said States and subdivisions thereof; to the Committee on Banking and Currency.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CARTER of California: A bill (H. R. 14570) for the relief of Evelyn Jotter; to the Committee on Claims.

By Mr. HART: A bill (H. R. 14571) for the relief of Frank P. Church; to the Committee on Claims.

By Mr. JENKINS: A bill (H. R. 14572) for the relief of Fanny Reuter Shafer; to the Committee on Claims.

By Mr. MARTIN of Massachusetts: A bill (H. R. 14573) for the relief of Esther Fountain; to the Committee on Claims.

By Mr. RAGON: A bill (H. R. 14574) for the relief of Alpha Vint; to the Committee on Claims.

Also, a bill (H. R. 14575) for the relief of C. C. Young; to the Committee on Claims.

By Mr. SWING: A bill (H. R. 14576) authorizing the sale of portions of the Pueblo lands of San Diego to the city of San Diego, Calif.; to the Committee on Military Affairs.

By Mr. STALKER: A bill (H. R. 14577) granting an increase of pension to Fannie R. Saylor; to the Committee on Invalid Pensions.

By Mr. UNDERWOOD: A bill (H. R. 14578) granting a pension to Nannie E. Bass; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10152. By Mr. CROWTHER: Petition of citizens of the thirtieth congressional district of New York, urging passage of the stop-alien representation amendment to the United States Constitution; to the Committee on the Judiciary.

10153. Also, petition of citizens of Schenectady, N. Y., protesting against reduction of the enlisted strength of the United States Marine Corps; to the Committee on Appropriations.

10154. Also, petition of residents of the District of Columbia, opposing the repeal of the eighteenth amendment and opposing the return of the liquor traffic in the District of Columbia in any form; to the Committee on the District of Columbia.

10155. By Mr. CULLEN: Petition of the board of direction of the American Society of Civil Engineers, urging the President and the Congress of the United States to amend Title II of the emergency relief and construction act of 1932; to the Committee on Ways and Means.

10156. By Mr. DELANEY: Petition of the Monterey Sardine Canners Association, Monterey, Calif., urging the passage of House bill 13999; to the Committee on Ways and Means.

10157. Also, petition of the American Society of Civil Engineers, recommending that Title II of the emergency relief and construction act of 1932 be amended, modifying and removing some of the restrictions of the act, thereby giving more power to the directors of the Reconstruction Finance Corporation; to the Committee on Ways and Means.

10158. By Mr. HUDDLESTON: Petition of numerous residents of the District of Columbia, opposing the sale of liquors in the District; to the Committee on the District of Columbia.

10159. By Mr. PATMAN: Petition of Mary E. Gordon and 216 other residents of the District of Columbia, opposing the return of the liquor traffic in any form in the Nation's Capital; to the Committee on the District of Columbia.

10160. By Mr. EVANS of Montana: Senate Joint Memorial No. 1 of Montana's Twenty-third Legislative Assembly, being a memorial to the Interstate Commerce Commission of the United States, advocating a reduction of freight rates on gasoline from midcontinent points to Montana Points; to the Committee on Interstate and Foreign Commerce.

10161. By Mr. FITZPATRICK: Petition of Westchester County (N. Y.) District Council, United Brotherhood of Carpenters and Joiners of America, urging the passage of legislation to protect interstate protection of a 6-hour day, 30-hour week; to the Committee on Labor.

10162. By Mr. GLOVER: Petition of Woman's Christian Temperance Union of the District of Columbia; to the Committee on the District of Columbia.

10163. By Mr. JENKINS: Petition signed by about 204 residents of the District of Columbia, protesting against the return of the liquor traffic in any form in the Nation's Capital; to the Committee on the District of Columbia.

10164. By Mr. LAMBERTSON: Petition of the Woman's Temperance Union of Everest, Kans., signed by its president, Mrs. W. J. Miller, and its secretary, Mamie Eyer, favoring the improvement of the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

10165. By Mr. KNIFFIN: Petition of the Woman's Christian Temperance Union of Grover Hill, Ohio, signed by its president, Mrs. S. B. Gauvey; W. A. Piper, pastor Grover Hill Methodist Episcopal Church; and G. L. Mericle, superintendent Grover Hill Methodist Episcopal Sunday School, opposing all legislation intended to nullify, weaken, or repeal the eighteenth amendment and the Volstead Act; to the Committee on the Judiciary.

10166. By Mr. LAMBERTSON: Petition signed by Rev. W. S. Abernethy, of Washington, D. C., together with 202 other petitioners, praying that there shall not be any return of the liquor traffic in any form in the Nation's Capital; to the Committee on the Judiciary.

10167. By Mr. LINDSAY: Petition of Monterey Sardine Canners Association, Monterey, Calif., favoring House bill 13999; to the Committee on Ways and Means.

10168. Also, petition of American Society of Civil Engineers, New York City, recommending modification in Title II of the emergency relief and construction act of 1932; to the Committee on Banking and Currency.

10169. By Mr. LAMBERTSON: Petition of the Lottie A. Case Woman's Christian Temperance Union, of Topeka, Kans., signed by its president, Mrs. H. W. Bomgardner, and its secretary, Mrs. P. N. Franzen, favoring the improvement of the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

10170. By Mr. McFADDEN: Petition of 170 citizens of the District of Columbia, presented by Jennie Bailey Wadleigh, president, and Izora Scott, legislative director, Woman's Christian Temperance Union of the District of Columbia, opposing the return of beer, the repeal of the eighteenth amendment, and the return of the liquor traffic in the District of Columbia in any form whatever; to the Committee on the District of Columbia.

10171. By Mr. REILLY: Joint resolution of the Legislature of Wisconsin, relating to the 5-cent glass of pure beer, expected and desired by the citizens of Wisconsin; to the Committee on Ways and Means.

10172. By Mr. RUDD: Petition of the board of directors, American Society of Civil Engineers, New York City, favoring certain amendments to Title II of the emergency relief and construction act; to the Committee on Banking and Currency.

10173. By Mr. SPARKS: Petition of the citizens of Ionia, Esbon, Mankato, and Jewell, Kans., submitted by W. H. Loomis, of Ionia, Kans., and signed by 36 others, favoring the passage of the stop-alien representation amendment to the United States Constitution; to the Committee on the Judiciary.

10174. Also, petition of the citizens of Downs, Kans., submitted by Mrs. John Schweitzer and Mabel L. Plumer, and signed by 121 others, favoring the Sparks-Capper stop-alien representation amendment to the Constitution of the United States; to the Committee on the Judiciary.

10175. Also, resolution of the Woman's Home Missionary Society of Beloit (Kans.) Methodist Episcopal Church, submitted by Minnie M. Sorensen and Mabel Fulton, and sanctioned by all the members of the society, favoring Federal supervision over the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

10176. By Mr. SPENCE: Petition in the nature of a resolution of the mayor and Board of Council of Georgetown, Ky., favoring the revision of Senate bill 36, so as to remove restrictions against using Federal money on municipal streets where the streets are a part of the Federal system of roads; to the Committee on Roads.

10177. By Mr. STALKER: Petition of Rev. William H. Perry and 50 members of the Union Presbyterian Church at Almond, N. Y., urging support of the stop-alien representation amendment to the United States Constitution to cut out aliens and count only American citizens when making future apportionments for congressional districts; to the Committee on the Judiciary.

10178. Also, petition of the members of the Woman's Christian Temperance Union of Washington, D. C., opposing the return of beer and the liquor traffic in the District of Columbia in any form whatever, as well as repeal of the eighteenth amendment; to the Committee on the District of Columbia.

10179. Also, petition of Mrs. G. F. Roody, secretary of the White Bible Class of the First Methodist Episcopal Sunday School of Corning, N. Y., opposing the return of beer and repeal of the eighteenth amendment; to the Committee on Ways and Means.

10180. By Mr. STRONG of Pennsylvania: Petition of the citizens of Hallton, Pa., favoring the proposed amendment to the Constitution of the United States to exclude aliens, and count only American citizens, when making future congressional apportionments; to the Committee on the Judiciary.

10181. By Mr. SWICK: Petition of Mrs. Fred Pryor, Rose Point, Lawrence County, Pa., and 38 other residents of that vicinity, urging the retention and enforcement of all laws to safeguard the sanctity of the Sabbath; to the Committee on the Judiciary.

10182. Also, petition of Rev. Bertrand Brookman and 36 members of St. Fidelis Seminary, Capuchin Fathers, Herman, Butler County, Pa., urging revaluation of the gold standard, curtailment of financial abuses of international bankers, and mass production; to the Committee on Banking and Currency.

10183. By Mr. WOOD of Indiana: Petition signed by residents of the second congressional district, State of Indiana, urging that the eighteenth amendment be not modified or repealed; to the Committee on the Judiciary.

SENATE

SATURDAY, FEBRUARY 4, 1933

(Legislative day of Tuesday, January 10, 1933)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Chaffee, one of its clerks, announced that the House had passed a bill (H. R. 14458) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1934, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H. R. 13959) to authorize the incorporated town of Fairbanks, Alaska, to issue bonds in any sum not exceeding $100,000 for the purpose of constructing and equipping a public-school building in the town of Fairbanks, Alaska, and for other purposes, and it was signed by the Vice President.

CALL OF THE ROLL

Mr. COPELAND obtained the floor.

Mr. FESS. Mr. President, will the Senator yield to enable me to suggest the absence of a quorum?

The VICE PRESIDENT. Does the Senator from New York yield for that purpose?

Mr. COPELAND. I do.

The VICE PRESIDENT. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Cutting	Johnson	Russell
Austin	Dale	Kean	Schall
Bankhead	Davis	Kendrick	Schuyler
Barbour	Dickinson	Keyes	Sheppard
Barkley	Dill	King	Shipstead
Bingham	Fess	La Follette	Shortridge
Black	Fletcher	Lewis	Smith
Blaine	Frazier	Logan	Smoot
Borah	George	McGill	Steiwer
Bratton	Glass	McKellar	Thomas, Idaho
Brookhart	Glenn	McNary	Thomas, Okla.
Bulkley	Goldsborough	Metcalf	Townsend
Bulow	Gore	Moses	Tydings
Byrnes	Grammer	Norbeck	Vandenberg
Capper	Hale	Norris	Wagner
Caraway	Harrison	Oddie	Walcott
Clark	Hastings	Pittman	Walsh, Mass.
Connally	Hatfield	Reed	Walsh, Mont.
Copeland	Hayden	Reynolds	Watson
Costigan	Hebert	Robinson, Ark.	White
Couzens	Hull	Robinson, Ind.	

Mr. FLETCHER. I wish to announce that my colleague the junior Senator from Florida [Mr. TRAMMELL] is necessarily detained from the Senate by a death in his family. I ask that this announcement may stand for the day.

Mr. FESS. I wish to announce that the Senator from Missouri [Mr. PATTERSON] is necessarily absent from the Senate because of a death in his family. I ask that this announcement may stand for the day.

I also wish to announce that the Senator from Wyoming [Mr. CAREY] is detained from the Senate, and will be detained for several days, on official business connected with the Senate. I will let this announcement stand for the day.

Mr. NORRIS. I desire to announce that my colleague the junior Senator from Nebraska [Mr. HOWELL] is absent on official business of the Senate.

The VICE PRESIDENT. Eighty-three Senators have answered to their names. A quorum is present.

CHANGE IN DATE OF INAUGURATION

The VICE PRESIDENT laid before the Senate a letter from the secretary of state of the State of Wisconsin, transmitting certified copy of a joint resolution ratifying an amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress, which, with the accompanying papers, was ordered to lie on the table and to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Madison, Wis., January 28, 1933.

Hon. CHARLES CURTIS,
President of the Senate, Washington, D. C.

MY DEAR MR. CURTIS: At the request of the Legislature of Wisconsin I have pleasure in sending you, herewith, certified copy of Joint Resolution No. 5 of 1933, ratifying an amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress.

Will you kindly acknowledge receipt?

Very truly yours,

THEODORE DAMMANN,
Secretary of State.
By GEO. BROWN,
Division of Records and Elections.

UNITED STATES OF AMERICA,
STATE OF WISCONSIN,
DEPARTMENT OF STATE.

To all to whom these presents shall come:

I, Theodore Dammann, secretary of state of the State of Wisconsin and keeper of the great seal thereof, do hereby certify that the annexed copy of Joint Resolution No. 5, 1933, has been compared by me with the original enrolled joint resolution as filed in this department and that the same is a true copy thereof, and of the whole of such joint resolution.

In testimony whereof, I have hereunto set my hand and affixed the great seal of the State, at the capitol, in the city of Madison, this 28th day of January, A. D. 1933.

[SEAL.] THEODORE DAMMANN,
Secretary of State.

Joint resolution ratifying an amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress and fixing the time of the assembling of Congress

Whereas both Houses of the Seventy-second Congress of the United States of America, at its first session, by a constitutional majority of two-thirds thereof, proposed the following amendment to the Constitution of the United States:

"ARTICLE —

"SECTION 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

"SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

"SEC. 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

"SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice have devolved upon them.

"SEC. 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission":

Therefore be it

Resolved by the senate (the assembly concurring), That the aforesaid proposed amendment to the Constitution of the United States be and the same is hereby ratified by the Legislature of the State of Wisconsin; and be it further

Resolved, That copies of this joint resolution certified by the secretary of state be forwarded to the Secretary of State at Washington, and to the presiding officers of each House of the Congress of the United States.

THOS. J. O'MALLEY,
President of the Senate.
R. A. COBBAN,
Chief Clerk of the Senate.
CORNELIUS YOUNG,
Speaker of the Assembly.
JOHN J. SLOCUM,
Chief Clerk of the Assembly.

The VICE PRESIDENT also laid before the Senate a duly certified copy of a concurrent resolution of the Legislature of the State of Colorado, which was ordered to lie on the table and to be printed in the RECORD, as follows:

Senate Concurrent Resolution 5 (by Senators Kettering, Quiat, and Ammons; by Representatives Rogers, Aspinall, Vincent, England, and Kavanagh). Ratifying the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress and fixing the time of the assembling of Congress

Whereas at the first session of the Seventy-second Congress of the United States of America it was resolved by the Senate and House of Representatives of the United States in Congress assembled (two-thirds of each House concurring therein) that the following article be proposed as an amendment to the Constitution of the United States, which, when ratified by the legislatures of three-fourths of the several States, shall be valid to all intents and purposes as part of the Constitution, viz:

"ARTICLE —

"SECTION 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

"SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January unless they shall by law appoint a different day.

"SEC. 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

"SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

"SEC. 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission":

Therefore be it

Resolved, That the General Assembly of the State of Colorado does hereby ratify the above-proposed amendment to the Constitution of the United States; and be it further

Resolved, That certified copies of the foregoing preamble and resolution be forwarded by the Governor of the State of Colorado to the President of the United States, the Secretary of State of the United States, the President of the Senate of the United States, and the Speaker of the House of Representatives of the United States.

RAY H. TALBOT,
President of the Senate.
BYRON G. ROGERS,
Speaker of the House of Representatives.

Approved January 27, 1933, at 12.45 p. m.

ED. C. JOHNSON,
Governor of the State of Colorado.

REPORT OF RECONSTRUCTION FINANCE CORPORATION

The VICE PRESIDENT laid before the Senate a report of the Reconstruction Finance Corporation, submitted pursuant to law, covering the operations of the corporation for the fourth quarter of 1932, October 1 to December 31, 1932, inclusive, and for the period from its organization on February 2, 1932, to December 31, 1932, inclusive, which, with the accompanying 14 tables, was referred to the Committee on Banking and Currency.

TITLE TO SITES FOR CERTAIN PUBLIC-BUILDING PROJECTS

The VICE PRESIDENT laid before the Senate a letter from the Secretary of the Treasury, submitting draft of a proposed bill to authorize the Secretary of the Treasury to accept titles to any sites acquired under the provisions of the emergency relief and construction act of July 21, 1932, and subsequent acts, subject to the reservation of all ore or mineral rights on the lands, with the right of mining, which, with the accompanying paper, was referred to the Committee on Public Buildings and Grounds.

BALANCE SHEET OF WASHINGTON RAPID TRANSIT CO.

The VICE PRESIDENT laid before the Senate a letter from the treasurer of the Washington Rapid Transit Co., Washington, D. C., transmitting copy of the balance sheet of the company as of December 31, 1932, which, with the accompanying paper, was referred to the Committee on the District of Columbia.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate the following joint memorial of the Legislature of the State of Idaho, which was referred to the Committee on Banking and Currency:

STATE OF IDAHO,
DEPARTMENT OF STATE.

I, Franklin Girard, secretary of state of the State of Idaho, and legal custodian of the original enrolled copies of all acts passed at the various sessions of the Legislature of the State of Idaho, do hereby certify that the annexed constitute a full, true, and complete transcript of the original enrolled copy of Senate Joint Memorial No. 3, enacted by the twenty-second session of the Legislature of the State of Idaho, and filed in this office the 30th day of January, 1933.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State. Done at Boise, the capital of Idaho, this 31st day of January, A. D. 1933.

[SEAL.]

FRANKLIN GIRARD,
Secretary of State.

IN THE SENATE.

Senate Joint Memorial 3 (by Mines and Mining Committee)

A joint memorial to the Senate and House of Representatives of the Congress of the United States of America.

Received and filed January 30, 1933.

FRANKLIN GIRARD,
Secretary of State.

IN THE SENATE.

Senate Joint Memorial 3 (by Mines and Mining Committee)

To the Senate and House of Representatives of the Congress of the United States of America:

We, your memorialists, the Senate and House of Representatives of the State of Idaho in legislative session duly and regularly assembled most respectfully present the following petition, preamble, and resolutions, to wit:

Whereas the people of our State, in common with our country, have, with waning hope and expectancy continued to carry on during an avalanche of economic misery and paralysis of trade and exchange of commodities during the preceding three years, as the result of a managed currency system based on the single gold standard, and imposed on the people by the cooperation of our Government and the chain of international and central banks of the world; and

Whereas the accumulated crushing indebtedness riding on the backs of the taxpayers of the United States, involving farmers, industrialists, transportation, public utilities, and governmental units, amounting to the appalling sum of more than $200,000,000,000, all payable in gold against a contingent supply of $4,000,000,000 in gold, or about 2 cents of reserve money for each dollar of debt outstanding, thus creating a bull market or a monopoly in that metal to the advantage of the creditor approaching confiscation, for which there is no precedent in all recorded history of the world; and

Whereas economic stabilization and the capacity to pay debts through restoration of the purchasing power of the people is hopeless of attainment without an adequate profitable price level for basic commodities of the farms and mines; and

Whereas the single gold standard as a reserve for a stabilized currency system and the maintenance of monetary equilibrium has broken down and no longer functions as a practical measure of value as shown by its current disparity with world-wide price of basic commodities, but on the contrary has proved to be capricious, unstable, erratic, and subject to distortion and wide fluctuation, and demonstrably uncontrollable by world's central banks, including our own Federal reserve; and

Whereas the deliberate destruction by the western nations (including our own United States) of silver as money and as a world-wide working partner with gold, the sole medium of exchange and store of value and the measure of property and possessions of three-fifths of the people of the world, is the supermajor factor in energizing and continuing the economic cyclone now upon us, which unless reversed, and reversed right soon, threatens wholesale repudiation of private and public debts through utter inability to pay. That we are face to face with appalling further suffering and despair is evident, foreshadowing revolution of the social order as currently forecast (January 2, 1933) by the distinguished Research Committee on Social Trends, appointed by the President of the United States in 1929, and just published: Therefore be it

Resolved, That as a definite forward and fundamental first step toward reflation of price of commodities, where profits and the American standard of living can be regained, the slack of unemployment be taken up and absorbed, and taxpaying capacity of the producer can be revitalized, we hereby urge the Congress to immediately pass Senate bill No. 3606, by the Hon. KEY PITTMAN, United States Senator from Nevada, which provides for the deposit of all domestic silver bullion, the product of the mines of the United States, at any United States mint for sale at the market price, payment for same to be made in silver certificates which shall be legal tender in payment of all debts, public and private, except where otherwise stipulated in the contract. Such certificates, when held by any national banking association or Federal reserve bank, may be counted as part of its lawful reserve; and be it further

Resolved, That we hereby approve and commend the promise and commitment of President-elect Roosevelt in calling a world conference for immediate consideration of remonetization or stabilization of silver at a scientific ratio with gold through an international agreement.

This senate joint memorial passed the senate on the 23d day of January, 1933.

GEO. E. HILL,
President of the Senate.

This senate joint memorial passed the house of representatives on the 26th day of January, 1933.

ROBERT COULTER,
Speaker of the House of Representatives.

I hereby certify that the within Senate Joint Memorial No. 3 originated in the senate during the twenty-second session of the Legislature of the State of Idaho.

M. J. HAMMOND,
Secretary of the Senate.

The VICE PRESIDENT also laid before the Senate resolutions adopted by the Eighth Women's Patriotic Conference on National Defense, assembled at Washington, D. C., favoring the prompt building up of the Navy to the strength permitted under the London and Washington treaties, and the making of necessary appropriations to accomplish such re-

sult, which were referred to the Committee on Appropriations.

He also laid before the Senate a resolution adopted by the Woman's Christian Temperance Union of Pittsburgh, Pa., remonstrating against the repeal of the eighteenth amendment of the Constitution or the repeal or modification of the national prohibition law, which was ordered to lie on the table.

Mr. ROBINSON of Arkansas presented a letter addressed to him from Representative C. G. SELVIG, of Minnesota, with an inclosed letter addressed to Mr. SELVIG by A. D. Stephens, of Crookston, Minn., relative to a maximum limit of loans to farmers in connection with pending legislation, which, with the accompanying paper, was referred to the Committee on Banking and Currency.

Mr. SHEPPARD presented memorials and communications in the nature of memorials signed by 6,300 citizens of the counties of Taylor, Dallas, Bowie, Brown, Runnels, Ellis, Shelby, Red River, Gaines, Hopkins, Gillespie, Bosque, Lipscomb, Tarrant, Rockwall, Concho, Coryell, Grayson, Cooke, Fisher, Atascosa, Lamar, Grimes, Harris, Foard, Burleson, Dallam, Uvalde, McLennan, Victoria, Washington, Tom Green, Nueces, Smith, Anderson, San Patricio, Montgomery, Denton, Cass, Travis, Erath, Walker, Robertson, San Sabe, Wharton, Matagorda, Jackson, Bexar, Callahan, Collins, Young, Stephens, Austin, Falls, Hunt, Lampasas, and Kaufman, all in the State of Texas, remonstrating against the repeal of the eighteenth amendment of the Constitution or the modification of the Volstead Act, which were ordered to lie on the table.

Mr. CAPPER presented memorials of sundry citizens of Independence and Crawford County, in the State of Kansas, remonstrating against the repeal or modification of the national prohibition law, which were ordered to lie on the table.

He also presented a resolution adopted at a mass meeting, sponsored by the Woman's Christian Temperance Union, of citizens of Edgerton, Kans., protesting against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which was ordered to lie on the table.

He also presented resolutions adopted by local chapters of the Woman's Christian Temperance Union of Everst, Leoti, and Parsons; the Home Woman's Christian Temperance Union, of Kansas City; and Lottie A. Case Woman's Christian Temperance Union, of Topeka, all in the State of Kan , favoring the passage of legislation to regulate and supervise the motion-picture industry, which were ordered to lie on the table.

Mr. BROOKHART presented the memorial of L. E. Aronson and sundry other citizens of Earlham, Iowa, remonstrating against the shipment of arms to countries at war, which was referred to the Committee on Foreign Relations.

He also presented the petition of Mrs. K. A. Brunsvold and sundry other citizens of Northwood, Iowa, praying for the passage of legislation to regulate and supervise the motion-picture industry, which was ordered to lie on the table.

Mr. COPELAND presented a resolution adopted by the Blasdell Woman's Christian Temperance Union of Erie County, N. Y., protesting against the repeal of the eighteenth amendment of the Constitution or the repeal or modification of the national prohibition law, which was ordered to lie on the table.

He also presented a resolution adopted by the Rockland County (N. Y.) Chapter of the Reserve Officers' Association of the United States, favoring amendments to the War Department appropriation bill to correct alleged inequalities to officers of the Regular Army, the National Guard, and the Organized Reserves, which was referred to the Committee on Appropriations.

He also presented resolutions adopted by the board of directors of the American Society of Civil Engineers at New York City, N. Y., favoring amendment of the emergency relief and construction act of 1932 so as to liberalize its provisions relating to loans by the Reconstruction Finance Corporation, which were referred to the Committee on Banking and Currency.

He also presented a resolution adopted by the New Hudson Association of the Dairymen's League Cooperative Association (Inc.), Black Creek, N. Y., favoring the suspension of gold payments and the revaluation of the dollar, which was referred to the Committee on Banking and Currency.

He also presented a petition of sundry citizens of Olean, N. Y., praying for the passage of legislation providing a shorter work week, unemployment insurance, relief of the needy, and the revaluation of the gold currency, which was referred to the Committee on Education and Labor.

He also presented a resolution adopted by the Federation of Jewish Women's Organizations (Inc.) at New York City, N. Y., favoring the passage of legislation to exclude licensed physicians and duly authorized medical schools, journals, or associations from the application of laws relating to birth control, which was referred to the Committee on the Judiciary.

AUTHORITY TO ENACT THE "THREE WAY FARM RELIEF BILL"

Mr. BARBOUR. Mr. President, I ask unanimous consent for the printing in full in the RECORD of a letter and a memorandum prepared by Mr. Arthur J. Edwards, of Montclair, N. J., with reference to the authority of Congress to enact the so-called "three way farm relief bill," and request that the matter be referred to the Committee on Agriculture and Forestry.

There being no objection, the letter and memorandum were referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

MONTCLAIR, N. J., *January 31, 1933.*

Senator W. WARREN BARBOUR,
United States Senate, Washington, D. C.

MY DEAR SENATOR: In accordance with your recent request, I have examined carefully the principles of the law which would be involved in the enactment of the so-called "three way farm relief bill," debated at length in the Senate last June and reintroduced as S. 5027 in December, and now under consideration by the Committee on Agriculture and Forestry.

This bill takes on added importance because Title III is a simplified form of the "allotment plan," and because of the belief that in case H. R. 13991, the domestic allotment plan bill, is not approved, the Senate is likely to again turn to the special consideration of S. 5027.

This memorandum with the recently published memorandum on H. R. 13991 together constitute a commentary on the field of law necessary to be considered in connection with this type of legislation. It is, I believe, of timely interest for that reason, both in this session and in the probable special session to follow. It will at least furnish a basis of discussion and a rallying point for those of like mind.

Yours very sincerely,

ARTHUR J. EDWARDS.

Memorandum on the authority of Congress to enact S. 4536 (72d Con., 1st sess.) and S. 5027 (2d sess.), practically identical, both entitled "A bill to amend the agricultural marketing act approved June 15, 1929," and commonly known as the three way farm relief bill

(Memorandum 2)

XX. In as serious a discussion as this is intended to be, it is not inappropriate that a text be chosen, hence the words of Hon. JAMES M. BECK: "There is no cause, no matter how great its appeal to human sympathy, that justifies a violation of the Constitution of the United States." (The Supreme Court To-day and To-morrow, in Lectures on Legal Topics before the Association of the Bar of the City of New York, vol. 6, p. 266.) We will endeavor to justify this text.

FUNDAMENTALS

XXI. This memorandum discusses the authority of Congress to enact S. 5027, now referred to and being considered by the Senate Committee on Agriculture and Forestry. It is well to establish certain fundamental relationships upon which to build the discussion. The Constitution, as now interpreted by the Supreme Court, like the tables of stone of old, has these commandments to Congress:

I. Thou shalt not undertake to regulate agriculture and manufacture, for such is reserved to the States.

II. Thou shalt not impose taxes as an instrument of regulation of agriculture and manufacture.

III. Thou shalt not impose regulations upon interstate commerce directed to and clearly purposed for the regulation of agriculture, manufacture, and local trade and carriage.

IV. Thou shalt not delegate the power of taxation given thee to the discretion of the executive branch.

V. Thou shalt not deprive a man of his liberty or his property without due process of law, nor take his private property for public use without just compensation.

VI. Thou shalt not assume to thyself powers reserved to the States because of the presumption that the national interest demands it.

Three of the greatest contacts of Congress with the people are involved in:

1. The power to tax—to take a man's property for the support of the Government and for its services.

2. The spending power—to make appropriations.

3. The power to regulate—to say "do" and "do not" in the conduct of affairs.

On account of the diffuse and impersonal character of the spending power "it droppeth as the gentle rain from heaven upon the place beneath"—it is difficult to judicially test specific acts of government in this field.

However, as to the other two powers—the power to tax and the power to regulate—these are based on the very foundations of our Union, our liberty, and jurisprudence, and the full force and vigor of the courts are promptly available to restrain any invasion of the rights or property of individual persons or of the States in matters reserved to them. These are mentioned because of their application hereafter.

XXII. Continued discussion of principles of law applicable to farm-relief legislation.

This memorandum continues the discussion of the law as applicable to various plans for dealing with the farm-relief problem and supplements A Memorandum on the Authority of Congress to enact H. R. 13991, "A bill to aid agriculture and relieve the existing national economic emergency," printed in the minutes of the Senate, CONGRESSIONAL RECORD, January 23, 1933, on pages 2359–2364, which is referred to herein as Memorandum I. For convenience, the section numbers of this Memorandum II follow consecutively after those of Memorandum I.

We consider herein S. 5027 and S. 4536, referred to interchangeability herein, commonly known as the three way farm relief bill, with the three plans therein proposed:

Title I. The equalization-fee plan.

Title II. The export-debenture plan.

Title III. The allotment plan, in its original simpler form.

Title I. The equalization-fee plan

XXIII. In my opinion, Title I is not within the authority of Congress to enact for the following principal reasons:

1. It regulates trading or commerce in commodities within the several States, and is therefore invalid as an interference with the affairs of the several States.

2. The schedule of transactions proposed to be taxed, the transportation, processing, and sale of commodities are not matters of interstate or foreign commerce, except as to those common carriers who accept commodities for interstate transportation, but are otherwise all matters for State regulation, and Congress is without authority in this field.

3. The levy and assessment of the equalization fee "as a regulation of interstate and foreign commerce" affects so many transactions which are not interstate commerce and which it does not regulate that it can not possibly be conceived of as falling within this taxation classification and must be considered wholly invalid.

4. If, however, the equalization fee is not a form of taxation, as many of its proponents contend, then by elimination of all ascertained alternatives it appears that it must be a monetary exaction or property-taking action of a sort which deprives the fee payer of "property without due process of law," repugnant to the fifth amendment of the Constitution.

5. The delegation by Congress to an administrative agency of the power to levy and collect taxes is made with no certain rules of decision and with reliance upon the discretion of the administration for the economic assumptions which must control the mathematical determination of the tax, and as such is an illegal delegation of the congressional power to levy taxes.

6. The equalization fee is a national burden upon exportations and as such repugnant to section 9 of the Constitution providing "no tax or duty shall be laid on articles exported from any State."

7. The payment by the United States of losses incurred by contracts for the purchase of commodities in this country and their sale at a lower price abroad is in effect a bounty or grant upon the export of such products, in the language of section 303 of the tariff act of 1930, which in all probability would result in the levy of countervailing duties and "retaliation on the ground of dumping" by so many foreign countries to which the commodities would be exported, as to render the plan economically futile for reasons outlined in discussion of Title II.

8. If, as I analyze it, this is a "bill for raising revenue," it did not "originate in the House of Representatives." (Art. I, sec. 7, Constitution.)

XXIV. The new legal terminology: Both the bill under discussion, S. 4536, and also H. R. 13991, the pending domestic allotment bill, are shot through with new words and phrases which are not elsewhere technically defined and the legal meaning and implication of which have not been explained and defined by the courts. Typical of such phrases are "orderly marketing," "equalization fee," "adjustment charge," "tariff benefits," "stabilization fund," "price-insurance agreements," "each marketed unit shall contribute ratably its equitable share of losses, costs, and charges," "debenturable commodities," "export debenture," "parity basis." Before any clear comprehension can be had of these it is necessary to know something of the economical and philosophical background of these bills and the extent to which this economic philosophy is sought to be put in effect by the mechanics of the bill, and then a legal suit of clothes with constitutional justification fitted to it afterwards.

XXV. Title I a lineal descendant of the McNary-Haugen bills: Title I is of the fifth generation, a direct lineal descendant of the McNary-Haugen bills of 1924, 1926, 1927, and 1928 with the typical "equalization fee" collected to pay the costs and losses incurred by the purchase of commodities in the domestic market and their export and sale in other countries, but simplified by the omission of any nongovernmental control and in other respects.

In December, 1921, Mr. George N. Peck and Gen. Hugh S. Johnson, at a reunion meeting of the War Industries Board, discussed their recently conceived plan for farm relief and early in 1922 published it to the world in a brief, Equality for Agriculture, of which they were joint authors. This was a lengthly brief and we will only quote from it the caption of Section VI:

"A practical organization is a corporation to guarantee to buy carry-over from each year's crop at fair exchange value and to conduct export selling. Its charter must insure the following results:

"1. No Government in business.

"2. No class preference or subsidy for agriculture.

"3. Complete assumption of risk by agriculture.

"4. Financial solvency under all conditions.

"5. Simplicity of operation.

"6. Minimum of interference with existing institutions."

Based on this brief a bill embodying the plan was drafted by somebody in the Department of Agriculture which was introduced by Representative HAUGEN and Senator MCNARY as H. R. 5563, rewritten as H. R. 9033 and was the first of the succession of McNary-Haugen bills developing gradually into its present form in Title I of S. 5027. The rapid drift away from "no Government in business," "no subsidy for agriculture," and "complete assumption of risk by agriculture," and other features will be noted. Neither H. R. 9033 in 1924 or H. R. 7893 in 1926 was passed.

S. 4808, the surplus control act of the Sixty-ninth Congress, second session (1927), and S. 3555, the agricultural surplus control act, Seventieth Congress, first session, were both in their day passed by both Houses, vetoed by President Calvin Coolidge, and not repassed. President Coolidge's veto messages and the accompanying opinions of John G. Sargent, Attorney General, as to the unconstitutionality of the bills, Senate Documents No. 214 (1927) and No. 141 (1928) are monumental works in clarifying and developing the economic, political, and constitutional weaknesses of this type of plan.

S. 5027, Title I, of the Seventy-second Congress, is the fifth in direct line of descent.

Two lines of developments in this series of bills are of particular importance, for upon them now depend the whole legal concept to be given the proposal:

First. Who is to furnish the money to finance the plan?

Second. How is this money furnishing to be legally enforced?

Third. Is this a bill for raising revenue to be paid into the Treasury, or do the provisions for collection and deposit in section 12 (d) constitute some other form of money raising?

XXVII. Evolution of the equalization fee: In the first McNary-Haugen bills, those of 1924 and 1926, the "equalization fee" payment shall be made by the producers of each commodity apparently in accordance with the Peck theory that this was a mutually cooperative "special assessment operation" which the producers were to bear the burden of by taxing themselves. Some time between 1926 and 1927 the glimmer of a suspicion appeared that perhaps the plan might "back-fire" and the producers who paid the tax for operating costs might not get it back. Therefore, in the 1927 edition the idea first appears that the inanimate commodity itself must pay the cost and the plan was changed to practically that proposed in S. 4536 wherein, quoting only the essentials:

"In order to carry out marketing and price-insurance arguments without loss to the revolving fund each marketed unit of such agricultural commodity shall contribute its equitable share of the losses, costs, and charges. Such contributions shall be made by means of an equalization fee apportioned and paid as a regulation of interstate and foreign commerce in the commodity. Any equalization fee shall be paid, in respect of each marketed unit, upon one of the following: The transportation, processing, or sale of such unit * * * (as) * * * the board shall determine." (Sec. 12 (b)) also "an equalization fee shall be collected upon the first sale or other disposition of any food product derived from cattle or swine if on hand at the commencement of the maketing period."

The House report in 1927 (p. 7) explains this:

"As each bushel of grain or bale of cotton moves in commerce a contribution is to be collected from the most convenient point—from the miller on milling, or the railroad on transportation, or the purchaser in buying, as the board has determined to be most suitable in each case. The bill calls this contribution the "equalization fee," because by means of it the expense of an operation which benefits alike all producers of a crop is carried by them in exact proportion to the benefits received."

So the miller, the railroad, or the purchaser is to pay the "fee"; so it is a matter of individual property concern and not the taxing of an impersonal commodity. Whether this be a general excise tax for revenue or a fee or charge for governmental services remains to be considered.

XXVIII. The assessment and collection of the equalization fee in the first McNary-Haugen bill of 1924 was variously explained and defended on the diverse grounds that it was:

(1) an excise tax upon the sale of commodities,

(2) a special assessment tax "in order to permit the persons benefited by the act to pay for the operations thereof," and

(3) a monetary exaction in connection with the power of Congress "to regulate commerce with foreign nations and among the several States."

It is noteworthy that then, as now, almost the entire political argument, as distinguished from the legal, for the bill is being built upon the second of these grounds—the original Peck thesis. But each of these three diverse classifications of the fee contradicted the two others and left the proponents confused, so in 1927, and now, it is determined that the monetary exaction, thus euphemistically referred to in early defenses, was "an equalization fee apportioned and paid as a regulation of interstate and foreign commerce." Thus it is given a name and classification by which it must stand or fall.

XXIX. The fee represents money or property belonging to the miller, the railroad, or the purchaser which the Government proposes to demand, by the power to tax or by other due process of law, shall be forthwith handed over to the Government.

Has the equalization fee, as originally conceived by Mr. Peck and still spoken of by some of the committee to pay the losses and costs of an economic and business operation levied upon those specially benefited by the increase in property values, retained this character legally, or have the necessities of constitutional justification changed its character and method of imposition so that it is either tax or excise for revenue, or is still something else, a fee or an "adjustment charge," as in H. R. 13991?

XXX. As Professor Seligman says, "A fee * * * is a compulsory contribution for services in which the element of public service must be present." This is a fee for regulation and regulatory and inspection fees must typically bear some general relationship of equality to the expense and time involved in the Government's act of regulating. Though perhaps not in point in all respects, the decision in Postal Telegraph Co. *v.* Taylor (1903, 192 U. S. 64, 73) is important. Here a municipal ordinance provided for an inspection tax that was greatly in excess of any possible expense to be incurred, and the Supreme Court held the tax invalid for the reason that "under such facts it would seem to be plain that the ordinance was adopted as a means of raising revenue and not repay expenses for inspection."

The purpose of the fee is "to carry out marketing and price-insurance agreements, * * * and to contribute ratably its equitable share of losses, costs, and charges arising out of such agreements." Losses are likely to be the main item, that is, losses incurred in commercial transactions, buying in a rising or elevated domestic market and deliberately selling at a lower price abroad, the losses inevitable in any price-insurance agreements and losses the result possibly of poor business judgments and reliance upon inaccurate crop reports affecting prices, domestic and foreign. We have no precedent for classifying as feeable Government expenses these huge commercial losses incurred in business in which the Government as principal employs agents to handle transactions of this type and finance them. And are price-insurance agreements, mentioned four times in section 12 (a), (b), and (d), to be entered into committing the Government under some implied power related to the objectives of the bill because there is no specific authority or apparent necessity for such measures? It seems clear, however, these items do not represent the expense of regulating service in the sense understood by the Supreme Court in the case cited and by Doctor Seligman.

XXXI. Treatment of fee inconsistent with tax: Provisions relating to the fees in this bill are, briefly: The transporter, processor, or seller collects the equalization fee, which is deposited in a public depositary of the United States to the credit of the stabilization fund established by the board for each commodity. The board shall have exclusive power of expending the money in the fund and of withdrawing payments on marketing and price-insurance agreements, salaries, expenses, and repayments.

Note the care with which payments into the Treasury and appropriation prior to withdrawal and expenditures are avoided, at least as to the form of words. Was this to escape the constitutional requirement that "no money shall be withdrawn from the Treasury but in consequence of appropriation made by law"? (Art. 1, sec. 8.)

There is apparent also an effort to prove or demonstrate that the fee is not a tax but some other form of property taking because of the complete ignoring of the constitutional provision that "no tax or duty shall be laid on articles exported from any State." (Art. 2, sec. 9). This is developed more fully in Section XXXVII, post.

There is also a studied attempt to demonstrate that the money raised is not revenue for a Federal purpose, since S. 4808 in 1927 and S. 3555 in 1928, the McNary-Haugen bills of those two years, as well as the present S. 4536, all originated in the Senate, whereas the Constitution requires that "all bills for raising revenue shall originate in the House of Representatives" (Art. I, sec. 7). The courts, in order to sustain these bills, would be compelled to find that they did not "raise revenue."

The facts that the equalization fee (a) is not paid into the Treasury, (b) is not paid out "in consequence of appropriations made by law," (c) is levied on articles to be exported, (d) is levied in a bill which originated in the Senate, combine to prove either that the fee is not a tax levied for revenue or if it is such a tax, is so faultily provided for in the technical construction of the bill that it must be held invalid.

XXXII. What other property taking act may it be? If, however, the equalization fee is not a form of taxation, which view may be implied from these elements in the structure of the bill, then it must come under the head of some of the other property-taking powers:

(a) It is not a gift or "money borrowed on the credit of the United States." (Art. I, sec. 8, Constitution.)

(b) It is surely not "private property taken for public use," since no element of "just compensation" is present. (Amendment V, Constitution.)

(c) It lacks the conventional elements of a regulatory fee for a public service, since its amount is not to repay expenses of regulation and said amount is determined by entirely different considerations in which fluctuating market prices in foreign markets beyond any possible sphere of regulation play a prominent part. (See sec. —, post.)

(d) Therefore, research and reflection disclosing no other alternatives, it must apparently be a monetary or property exaction, taken from individuals against their wills who are not interested in the price-elevation plan for the commodity, to repay the Government for its costs and losses incurred in a gigantic commercial operation for the purchase and sale of commodities. Such a power is not conferred upon Congress and its exercise amounts to depriving the owner of property without "due process of law." (Constitution, Amendment V.)

XXXIII. The equalization fee considered as a tax: While technically the possibility of the equalization fee in S. 4536 being a legally levied tax appears conclusively disposed of, it nevertheless appears that the collection of several hundred millions of dollars in fees or charges must properly be treated as a revenue-raising tax rather than as a regulatory fee or exaction, and that it should be studied on that basis, upon the assumption that the technical defects in drafting can be remedied.

XXXIV. The equalization fee as a regulator of interstate commerce: One of the most important powers of Congress is that of regulating interstate and foreign commerce, and the concept of what is involved in regulation has gradually been broadened by Congress and sustained by the Supreme Court. The matter of regulation was discussed in Memorandum I, section 3, and definitions and decisions of various dates cited, culminating probably in the most comprehensive of all, Chief Justice Taft's:

"To regulate in the sense intended is to foster, protect, and control the commerce with appropriate regard to the welfare of those who are immediately concerned, as well as the public at large, and to protect its growth and insure its safety." (Dayton-Goose Creek Railroad Case (1924) 268 U. S. 456, 478.)

Title I mentions "interstate and foreign commerce" in only one place, in section 12 (b), when it says, "Such contributions shall be made by means of an equalization fee apportioned and paid as a regulation of interstate and foreign commerce in the commodity." None of the "contributions" referred to (Sec. 12 (b)) have to do with acts necessarily related to interstate commerce—as a matter of fact, most of them are positively identifiable as intrastate matters and only a few are of such nature that they are intrastate in some instances and interstate in others, but with the intrastate transactions having no controlling or burdening influence on the others. Merely giving this an "interstate" name is ineffectual without "building up" the picture. What I have in mind is well illustrated by a passage in the debate of one of the earlier McNary-Haugen bills. During a speech by Senator Lenroot, the late Senator Cummins interrupted to read the definition of interstate commerce given in the packers' act, as follows:

"If such article is part of that current of commerce usual in the livestock and meat-packing industries, whereby livestock, meats, meat-food products, livestock products, dairy products, poultry, poultry products, or eggs, are sent from one State with the expectation that they will end their transit after purchase in another, including in addition to cases within the above general description, all cases where purchase or sale is either for shipment to another State or for slaughter of livestock within the State and the shipment outside the State of the products resulting from such slaughter. Articles normally in such current of commerce shall not be considered out of such current through resort being had to any means or device intended to remove transactions in respect thereto from the provisions of this act."

In reply to Senator Cummins's question, Senator Lenroot stated that he was inclined to think that this was a fair and legal description of what constitutes interstate commerce in that particular instance and that if the transactions taxed in the Haugen bill were as carefully guarded, a very different question would be involved.

The same kind of a relationship has been built up in laws controlling intrastate freight and passenger railroad rates with respect to their effect on interstate rates. The necessary burden-some relationship must be established in this case between the incidents of intrastate processing, transportation, and sale—"all of these delicate, multiform, and vital interests—interests which in their nature are and must be local in all the details of their successful management" to use Mr. Justice Lamar's words (Kidd *v.* Pearson, 128 U. S. 1, 20, quoted in Memorandum I, Sec. II) on the one hand, and interstate commerce on the other. Title I does not do this.

XXXV. What the fee is supposed to do is by its indirect economic action remove a portion of the commodity away from this

country through the channels of foreign commerce and thus through increasing scarcity, produce a price elevation for the remaining units of the commodity. This action brings no benefit or response to that portion of the commodity which is peculiarly in interstate and foreign commerce which is not duplicated among the units remaining within intrastate range. The drafters of the bill, to serve their own inscrutable ends, have chosen to make the commodity itself the subject of regulation but "goods, as goods, can not offend, forfeit, unlade, pay duties, or the like." Commodities have no inanimate interest in price and are not fostered or protected by such measures. In no place is there a reference to the Interstate Commerce Commission, charged with the main responsibility for regulatory measures affecting interstate commerce, nor is the Farm Board clothed with power to prescribe rules of any character whatsoever by which such commerce may be guided or governed. The whole question is whether the court will look to an unsupported name, or whether it will read the bill as a whole to determine its purpose; and note therein that it is experimentally designed to provide for the making of Federal contracts for the buying and selling of commodities from which substantial losses and expenses will result and be paid, for the purpose of influencing and so regulating the price to be received by the commodity producers who remain so modestly and discreetly in the background as not to be mentioned in even a single line in Title I. The recent trend of decisions in the court like Hammer *v.* Dagenhart, make me confident that "statute must be judged by its natural and reasonable effects" (247 U. S. 251, 275), and so be held not within the scope of the commerce clause.

But back of the scenes we know from its history that essentially the bill attempts to influence or regulate the prosperity of the grower in contradistinction to the one who is legally the owner and payer of the fee, and protection of the grower is not a subject for regulation under the commerce clause. Even though the growers' product will eventually be deposited upon the "current of commerce" and become part of it, its transportation, processing, or sale does not appear to be a subject for regulation for the purpose of favorably influencing the price to be obtained by the original grower who, if the fee be levied on processing or transportation would never be called upon to pay it, though he might be if it was levied on the sale, which appears an unlikely choice.

XXXVI. The equalization fee as a tax: The discussion of the preceding sections has emphasized the attempt to drag the operations of Title I to within the scope of the commerce clause so as to get the money by a commerce regulatory fee. This brings us logically to the still more interesting question, the converse of the foregoing: Can the constitutionally delegated taxing power be availed of to finance a gigantic commercial operation masquerading as a regulation of interstate and foreign commerce, but actually something else, probably not within the competence of Congress and the Federal Government.

There is distinguishable an evolution or trend of Supreme Court cases from (1) the days when Marshall said: "Should Congress, under the pretext of executing its powers, pass laws for the accomplishment of objects not intrusted to the Government, it would become the painful duty of this tribunal to say that such an act was not the law of the land" (McCulloch *v.* Maryland (4 Wheat. 315, 423); to (2) the days when under the theory of McCray *v.* United States and Veazie Bank *v.* Fenno almost any act was sustained if the power exerted was in the first instance a duly delegated power; to (3) another and presumably present-day phase, beginning with Hammer *v.* Dagenhart (247 U. S. 251) and Child Labor Tax case (259 U. S. 20) and Hill *v.* Wallace (259 U. S. 44), decisions handed down the same day, in which the court has returned to the doctrine of Marshall and has held that if from the text of the statute the court could determine that its real purpose was not to raise revenue or to regulate interstate commerce, but to regulate some activity reserved to the State, it would impute an unconstitutional motive to Congress and hold the law invalid.

This doctrine is entertainingly illuminated by Hon. JAMES M. BECK in his address in The Supreme Court To-day and To-morrow, pages 263 to 268 (cited in Sec. XX). It is sufficient to state my belief that Title I carefully explains in its text all the details of its motivation in a manner to indicate clearly its illegality under this doctrine.

XXXVII. The equalization fee is a burden on exportation: Section 9, Article I, of the Constitution provides: "No tax or duty shall be laid on articles exported from any State." The Supreme Court, in Fairbanks *v.* U. S. (181 U. S. 283, 292), said: "The purpose of the restriction is that exportation, all exportation, shall be free from national burden." In Cornell *v.* Coyn (192 U. S. 418) it is said: "This means that no burden shall be placed on exportation."

In Peck *v.* Lowe (247 U. S. 165, 173), involving taxation of net income of a corporation from its exporting business which was sustained, the court said: "And the court has indicated that where the tax is not laid on the articles themselves while in course of exportation, the true test of its validity is whether it 'so directly and closely' bears on the 'process of exporting' as to be in substance a tax on the exportation."

Also Spalding & Bros. *v.* Edwards (262 U. S. 66).

The equalization fee is an exaction imposed by reason of the fact that the commodities are a part of interstate and foreign commerce, and being a part of foreign commerce, must be kept free as exports from national burdens, no matter how small. In the Fairbanks case, they were merely stamp taxes on foreign invoices. There is no provision for keeping separate those commodities and articles made therefrom which are "fee-paid" and those which, when exported, must be "fee-free." Whether fee or tax or some other exaction, it appears to be a nationally imposed burden on exportation repugnant to the Constitution.

XXXVIII. Delegation by Congress of the power to tax: As more fully developed in Memorandum I, Section XII, the Supreme Court has upheld laws in which Congress's exclusive authority to levy taxes is delegated to administrative agencies, presenting a "certain course of procedure and certain rules of decision" (Chief Justice Taft, 257 U. S. XXV), really authority "to fill in the blanks." The authority in section 12 (b) far transcends any such limit: "The board shall estimate the probable losses, costs, and charges" and determine, from time to time, the amount of the fee for each commodity unit.

This involves, among other factors:

(a) An economic determination of the percentage, or number of units, of the crop which must be withdrawn from the domestic market to bring about a price appreciation to a defined and fixed level. No known formula has ever been prepared that I have heard of.

(b) An estimate of the foreign market prices from time to time during the period and of domestic price to determine losses based on differences.

(c) An estimate of losses on price—insurance agreements, involving an official guess as to whether the price objective of the bill will be attained.

The enumeration of these items shows that the concepts are too vague to be judicially limited (United States *v.* Cohen Grocery Co., 255 U. S. 89), particularly for the purpose of determining whether taxes levied based on the board's determination thereof conform to the legislative will. The Constitution does not permit the delegation of taxing powers under any such loose discretion, and the man who has to pay the taxes has the right to the protection of the courts against the deprivation of his property by an administrative agency upon any such vaguely delegated authority.

XXXIX. Only the mechanics remain to be devised: One of the Presidential nominees, in his speech of acceptance four years ago, said: "Our platform calls for * * * an earnest endeavor to solve the problem of distribution of the cost of dealing with crop surpluses over the marketed unit of the crop whose producers are benefited by such assistance. Only the mechanics remain to be devised."

This describes accurately the McNary-Haugen plan as typified by Title I of this bill. The best brains among counsel for the organizations urging this plan were presumably working to "devise the mechanics."

Comparison of the 1928 and 1932 editions discloses practically no progress in legal essentials. As I view the situation, this is due to no lack of ability among counsel, but merely that the anticonstitutional thesis of the plan makes solution of the problem of devising the details of the mechanics impossible, as judged by results to date. At the time I corresponded with Mr. Peck and received his reply suggesting several legal expedients, all of them inadequate according to my analysis. There is also a distinct avoidance on the part of the producers of the assumption of any of this cost, as noted in a previous section.

XL. Prognosis: In case the bill should become a law with Title I as it now stands, I foresee that when producer, transporter, or seller is called upon for payment of the equalization fee in a test case, he will deny complete responsibility for collecting payment from the commodity on the conceded basis that it is not a tax levied for revenue and that no due process of law has been invoked to deprive him of property; that the commercial operations, from the economic consequences of which price elevation is anticipated, are merely business operations to which he is an involuntary, nonprofiting party and total stranger, and he does not choose to contribute to it for reasons already outlined.

CONCLUSION

XLI. Eight apparently sound arguments against the constitutionality of Title I, as specified in Section XXIII, supra, appear sufficient to convince one of my belief that it transcends the authority of Congress to enact this bill.

Title II. Export debentures

XLII. The argument against the export-debenture plan is more along the line of its utter economic futility and its direct drain upon the Treasury than upon its constitutionality.

The economic theory of the export bounty is that if a sufficient part of the domestic surplus or carry-over of any agricultural commodity is exported, a condition of demestic scarcity will progressively develop with a resultant rise in domestic price, and be it noted that the bounty would generally be paid to professional commodity exporters and manufacturers, and to the producer only in a negligible number of cases. This is probably true as an abstract proposition, but no economist that we know of has yet had the temerity to formulate the relationship between the exports necessary and objective rise sought, in view of the many factors involved, such as transfer of demand to other commodities.

XLIII. Concerning bounties: This is, of course, a bounty, and was so called when conceived in 1924. The word "debentures" has no distinguishable meaning different from Government due bills or I. O. U's. The Supreme Court itself, in the leading case involving the sugar bounty of the McKinley Tariff Act of 1890, United States *v.* Realty Co. (1895) (163 U. S. 427), held it unnecessary to decide whether the payment of a bounty was within the power of Congress or not. With this example, far be it from me to predict their action should the question again come before

them. For those who are interested in this line of inquiry I commend the following:

United States *v.* Carlisle (5 App. (D. C.) 138), which held the said sugar bounty unconstitutional for conventional reasons that it was a payment of public funds for the benefit of the individual recipients.

The Michigan Supreme Court held bounty payments by the State unconstitutional. (124 Mich. 674; 56 L. R. A. 329.)

See also the complete review up to date of publications in 1892:

The Sugar Bounties, Charles F. Chamberlayne, Harvard Law Review, volume 320; and

Bounties, in United States Supreme Court Reports, volume 3, page 508, particularly 511.

XLIV. Unbalancing the Treasury: Title II of the bill provides for the levy and collection of no new revenues to finance the plan. The debentures are to be issued for approximately one-half the schedule of tariff duties on the commodities affected. Of course the export debenture, which is transferable by delivery and which is to be receivable at its face value by any collector of customs in payment of duties collectible against articles imported by the bearer (sec. 13 (e)), merely serves as a substitute for money when finally presented by its bearer, and keeps just that much money out of the Treasury. To the extent that the exporter receives debentures the Treasury eventually fails to receive cash which importers would otherwise pay, and fails to make its contribution to meet the general expenses of the Government. It is impossible to estimate the cost of this plan, for reasons set out in the next paragraph, leading us to believe it will be a discourager of export rather than the opposite.

XLV. Countervailing duties and reprisals: One of the maxims of international law is to the effect that "No nation can conscionably object to the same treatment being accorded to its trade by other nations as its own laws accord to their trade with it." The tariff act of 1930 of the United States provides, omitting repetitive phrases, "Whenever any country, association, or cartel shall pay or bestow any bounty or grant upon the manufacture or production or export of any article manufactured or produced in such country, there shall be levied and paid, in addition to the duties otherwise imposed, an additional duty equal to the net amount of such bounty or grant, however the same be paid or bestowed" (sec. 303). With this reception accorded bounty-aid goods arriving at our ports, it is almost inevitable that similar treatment will meet our commodity exports when they arrive at foreign ports. "What's sauce for the goose is sauce for the gander." The export bounty here will merely pay the additional import duties at port of entry abroad, and the receipt of a bounty of this type, with no net profit to the recipient, will be unavailable as a commercial motive for reducing surpluses by moving them abroad.

In Mr. F. D. Roosevelt's "essential specifications of a workable plan" outlined in his Topeka address the third specification clearly had this in mind: "Third, it must not make use of any mechanism which would cause our European customers to retaliate on the ground of dumping."

Title III. The allotment plan

XLVI. Title III, which follows in general outline H. R. 7797, introduced by Mr. SWANK in January, 1932, exemplifies the allotment plan in one of its earliest and simplest phases. S. 4536 was recommitted to the committee on June 15 apparently for the purpose of redrafting, and after certain changes reintroduced as S. 5027 in the present session. Only those features in this latest edition will be discussed which embody principles of lasting interest.

I believe Title III as now before the committee is subject to these irremedial objections:

1. It regulates and prohibits trading in commodities within the several States, which is a power not delegated to Congress but reserved to the States by the tenth amendment to the Constitution.

2. The prohibition with respect to the right to sell and buy commodities except at not less than federally fixed prices and the Federal dictation that certain commodities shall be exported, withheld from market, or otherwise disposed of "deprives" those interested "of liberty or property without due process of law," as guaranteed by the fifth amendment.

Section 14 (a) provides that "the part of the domestic production of any agricultural product which is needed for domestic consumption * * * shall enter interstate commerce at a price per unit not less than the cost of production," and that "the remaining or surplus portion, if any, shall be exported, withheld from market, or otherwise disposed of as otherwise directed by the board (sec. 14 (a)), except that it shall not be disposed of in the domestic market."

Other than the producers, only those in business who are licensed by the Government may buy and sell these agricultural commodities, and "it shall be unlawful for any licensee to purchase (the domestic consumption portion of) any agricultural products at a price less than the cost of production." Note that this minimum fixed price, "the cost of production" (sec. 14 (a) and 15 (8)), does not govern alone the occasion when the commodity first "enters commerce" but regulates and controls, and prohibits as well, all subsequent purchases along the highway of commerce within both interstate and intrastate commerce.

XLVII. It regulates trading within the States. Unless this bill regulates trading within the several States it is wholly ineffective in its economic results, as the command "shall enter interstate commerce * * * at not less than the cost of production," unsupported as it is by further definition, does not bring all the intrastate transactions within its scope, for reasons fully discussed in Section XXXIV, supra. Only to plainly state the provisions of Title III in its exact form indicates clearly its constitutional weakness in thus attempting to dictate, regulate, and prohibit trading in commodities, as well as the administrative detail in supervising sales of all producers to insure that they do not sell domestically in excess of the permitted fraction and that the purchasers do not buy any of the forbidden portion or at less than the federally defined and fixed prices.

The question of the regulation of intrastate affairs is fully discussed in Memorandum I, Section VII, which applies with equal force to the type of control here proposed to be imposed.

XLVIII. It interferes with the right to contract about one's affairs: It may be well to add the Supreme Court view in a law by Congress applying directly to selling of a commodity (U. S. *v.* Dewitt (1870), 9 Wall. 41). This law made it unlawful to "offer for sale oil made from petroleum for illuminating purposes inflammable at less temperature or fire test than 110° F."

Chief Justice Chase said:

"The questions certified resolve themselves in this: Has Congress power under the Constitution to prohibit trade within the limits of a State?" which "must be answered in the negative," citing License Cases (5 Howard 504), Passenger Cases (7 Id. 283), License Tax Cases (5 Wall., 470), and cases cited.

To the same effect, see the recent case (Hill *v.* Wallace (1922), 259 U. S. 44).

The act of Congress imposed a tax on contracts of sale of grain for future delivery. The court held:

"Sales of grain for future delivery at Chicago * * * are not in themselves interstate commerce, and can not come within the regulating power under the commerce clause unless they are regarded by Congress, from the evidence before it, as directly interfering with interstate commerce so as to obstruct or burden it."

The principle of these two cases is equally applicable to the prohibition as proposed with respect to the right to sell and buy commodities below a federally defined and fixed minimum price. The seller or buyer is "deprived of * * * property without due process of law," the protection to his property contained in the fifth amendment to the Constitution.

Both the liberty and property right represented by the right to contract for purchase and sale of commodities is illuminated by another recent case—Adkins *v.* Children's Hospital (1923) (261 U. S. 525, 545).

The District of Columbia's minimum wage law established a wage board with authority to fix standards of minimum wages for women.

The court said:

"That the right to contract about one's affairs is a part of the liberty of the individual protected by the fifth amendment is settled by decisions of the court and is no longer open to question," citing also Coppage *v.* Kansas (236 U. S. 1, 14).

Interference to the extent of prohibition with the right and liberty to contract to purchase or sell at prices below a federally defined and fixed minimum is equally subject to this objection.

CONCLUSION

XLVIX. The Executive is charged in section 1 (b) (4th) of S. 5027 with a difficult task when after making certain almost inevitable findings he "shall arrange to secure cost of production" for certain commodities sold in the domestic market. This task becomes a practical impossibility so far as his efforts are concerned when implemented only "with one or more of the plans authorized in Title I, Title II, and Title III," each of which appears weak and inoperative for the reasons stated.

I am genuinely responsive to the appeal for social justice contained in this measure, but that appeal furnishes no compelling reason for the adoption of this or any other specific plan from among those available if, by its adoption and later rejection by the court, the cause of agriculture is thereby damaged rather than improved.

This appears to be one of the crucial situations warned against by Justice Holmes when "well-settled principles of law will bend * * * because of some accident of immediate overwhelming interest which appeals to the feelings and distorts the judgment" (193 U. S. 400).

The opening text is repeated:

"There is no cause, no matter how great its appeal to human sympathy, that justifies a violation of the Constitution of the United States."

Respectfully submitted.

ARTHUR J. EDWARDS.

MONTCLAIR, N. J., *January 31, 1933.*

REPORTS OF COMMITTEES

Mr. CAPPER, from the Committee on the District of Columbia, to which was referred the bill (H. R. 5823) to increase the motor-vehicle fuel tax in the District of Columbia, and to provide for the better administration thereof, reported it with amendments and submitted a report (No. 1152) thereon.

Mr. VANDENBERG, from the Committee on Commerce, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

S. 5503. An act authorizing the Chesapeake Bay Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Chesapeake Bay from a point in Baltimore County to a point in Kent County, in the State of Maryland (Rept. No. 1153); and

S. 5504. An act authorizing the Bushkill Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Delaware River at or near Bushkill, Pa. (Rept. No. 1154).

ENROLLED BILLS PRESENTED

Mr. VANDENBERG, from the Committee on Enrolled Bills, reported that on February 3, 1933, that committee presented to the President of the United States the following enrolled bills:

S. 243. An act for the relief of S. F. Stacher;

S. 433. An act to authorize the posthumous award of a distinguished-flying cross to Eugene B. Ely;

S. 2058. An act for the relief of William C. Rives;

S. 2982. An act for the relief of J. G. Seupelt; and

S. 4381. An act authorizing the President to transfer and appoint Lieut. Morris Smellow, United States Navy, to the grade of passed assistant paymaster, with the rank of lieutenant, in the Supply Corps of the United States Navy.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHIPSTEAD:

A bill (S. 5582) to authorize the Reconstruction Finance Corporation to make loans to private colleges, universities, and institutions of higher learning, and for other purposes; to the Committee on Banking and Currency.

By Mr. MOSES:

A bill (S. 5583) granting an increase of pension to Delia H. Holmes; to the Committee on Pensions.

HOUSE BILL REFERRED

The bill (H. R. 14458) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1934, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

AMENDMENT PERTAINING TO WAGE CUTS AND FURLOUGHS

Mr. COSTIGAN submitted an amendment intended to be proposed by him to an amendment proposed by Mr. BRATTON to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed, as follows:

At the end of said amendment insert:

"In making any such reductions in expenditures no wage cuts or furloughs shall be ordered other than those heretofore effected or in any other section of this act provided."

FEDERAL GASOLINE TAX—AMENDMENT

Mr. BINGHAM submitted an amendment intended to be proposed by him to the bill (H. R. 14416) to make the Federal gasoline tax effective until June 30, 1934, which was referred to the Committee on Finance and ordered to be printed, as follows:

On page 1, line 11, to strike out "State, or political subdivision thereof" and insert in lieu thereof the following: "State or Territory, or a political subdivision thereof, or the District of Columbia."

AMENDMENT OF THE BANKRUPTCY LAW

Mr. BULKLEY submitted an amendment intended to be proposed by him to the bill (H. R. 14359) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, and acts amendatory thereof and supplementary thereto, which was referred to the Committee on the Judiciary and ordered to be printed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Chaffee, one of its clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 4509) to further amend the act approved February 25, 1920, entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain."

MINING OF COAL, PHOSPHATE, OIL, ETC., ON THE PUBLIC DOMAIN

Mr. CUTTING. Mr. President, I call up from the table the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to Senate bill 4509, and ask for its adoption.

The VICE PRESIDENT. The Chair lays before the Senate the conference report and it will be read.

The report was read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 4509) to further amend the act approved February 25, 1920, entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment.

GERALD P. NYE,
BRONSON CUTTING,
JOHN B. KENDRICK,
Managers on the part of the Senate.

JOHN M. EVANS,
TOM YON,
DON B. COLTON,
Managers on the part of the House.

The report was agreed to.

PRESENTATION OF POSTHUMOUS MEDALS OF HONOR

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 2200) to authorize the presentation of a medal of honor, posthumously, to the late Henry Clay Drexler and the late George Robert Cholister, which were on page 1, lines 3 and 4, to strike out "in the name of Congress," and on page 1, line 11, after "shipmates." to insert "That said medals of honor may be presented to the nearest next of kin of said deceased, respectively, living at the date of the enactment of this act."

Mr. HASTINGS. I move that the amendments of the House be concurred in.

The motion was agreed to.

HOUR OF MEETING MONDAY—MEMORIAL SERVICES

Mr. McNARY. Mr. President, I ask unanimous consent that when the Senate concludes its work to-day it take a recess until 11.30 o'clock a. m. on Monday.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. McNARY. It is the desire that Senators may meet here at 11.30 o'clock before proceeding to the House, where appropriate memorial services are to be held commemorating the life and character of the late ex-President Coolidge; after which, I want to give notice, we shall return to the Chamber and continue the work for the day.

RECENT DEVELOPMENTS IN AMERICAN INDUSTRY

Mr. SMOOT. Mr. President, I ask leave to have published in the RECORD an address delivered by David Sarnoff, president of the Radio Corporation of America, at the forum conducted by New York University and the Investment Bankers Association of America, New York City, N. Y., on January 12, 1933, entitled "Recent Developments in American Industry."

There being no objection, the address was ordered to be printed in the RECORD, and it is as follows:

Attention is centered to-day, as at no previous time in our memory, on the pressing questions of unemployment, the restoration of markets, the revival of trade, and on the relationship of modern industrial methods to these perplexing problems.

That the changing course of industry has had its bearing on these questions none can dispute. It would seem equally beyond challenge that other factors, not industrial in character, must be taken into consideration in any adequate study of means for restoring an equilibrium, of assuring continuous employment, stimulating commerce, and giving new vigor to our economic life. The

conditions of the hour are no more inherent in the industrial practices than in the social and political concepts of the times. They come not only because industry has grown larger and more complex, but because the evolution of the social, legislative, and political elements in our life has not kept pace with the rapid march of science and invention.

It will be possible here to touch upon only a few of the outstanding aspects of American industry and to consider briefly some of the broader tendencies that have revealed themselves in recent years.

America has been an industrious nation for upward of a century and a half and an important industrial nation for approximately half that time. Within that period industry has been subjected to continual transition. No generation has missed the swift-moving forces that have revolutionized the customs and habits of the people, and no generation has been entirely free from maladjustments and economic distress, which have brought home with increasing emphasis the need for more fundamental planning in our social, political, and economic life.

Let us look for a moment at some of the things that have occurred in our own generation, recognizing, of course, that in the twentieth century industry has been given tremendous new impetus.

TWENTY YEARS IN RETROSPECT

During the last two decades in our own land the number of automobiles in use has increased from 940,000 to 24,000,000. The number of telephones has increased from 8,000,000 to 20,000,000. The number of homes wired for electricity has increased from 3,000,000 to 20,000,000. Radio has entered 17,000,000 homes. Whereas 20 years ago these vital services were enjoyed by a minority of the people, their use to-day is almost universal.

During these two decades we have witnessed the coming of the wireless telephone, radio broadcasting, talking motion pictures, aviation, concrete highways, and a vast number of other developments and inventions of profound influence upon daily life. Billion dollar corporations have appeared in our business structure. Skyscrapers raise themselves above our cities. We cross the continent in one day, and the Atlantic Ocean in a little more than four. Change has not been limited to industry and commerce.

Twenty years ago there was scant mention, and little understanding, of such terms as income taxes, prohibition, speakeasies, and racketeers. In the last 20 years, women have obtained the franchise and have entered trade and business in large numbers. In style, they have progressed from long hair to bobbed hair, and I think, back to long hair again; and from long skirts to short skirts, and back to long again. In two decades we have witnessed political upheavals in all parts of the world, the fighting of a world war, the fall of royalty, the rise of communism, Fascism, Hitlerism, and other isms. In this period we have also encountered the problems and learned some lessons about reparations and war debts.

It is of significance to recall some of these political, social, and industrial factors and their trends during recent times. They serve to remind us that while they occupied the stage, they also clamored for notice; and to the extent that some of them have been considered national or world problems, they prevented the centering of attention elsewhere. There has been much criticism and much assessment of blame, because the world during the period of prosperity paid little heed to the oncoming of depression. It must be remembered that the forces which led to the recession in trade did not form suddenly, but were in shaping over a long period. The psychology of the day was the psychology of expansion, and it was as evident among economists, financiers, public representatives, and social leaders as among the executives and workers in industry.

However, this is neither the time for argument nor for any to shirk present responsibilities by lodging the blame for difficulties elsewhere. Just as the forces which caused the slackening of trade were forming over an extended period, so must the forces that are to restore normal conditions be shaped gradually. None can wave a magic wand and at once restore trade to its former high level. Those who are suggesting palliatives and new isms, who are trying to redraw the entire circle by plotting a segment, or who are facing the future with utter despair, are missing the more fundamental conditions and circumstances that offer a foundation upon which to build for a better to-morrow.

WAR-TIME STIMULUS TO INDUSTRY

To those who have witnessed the industrial progress of the last 20 years there can be no doubt that the requirements of the war period stimulated the evolution of the American industrial machine. True, a great deal was accomplished prior to 1914 in producing goods in quantities for national distribution and consumption. Nevertheless, the pressure of war requirements tremendously accelerated factory output. Contracts for billions of dollars worth of supplies and materials were let by our own and foreign governments, calling for additional plant and manufacturing facilities and for increased labor.

In the pressure for war materials the research laboratories of our industrial organizations took on renewed vigor. They brought us many new basic and fundamental discoveries in the electrical, mechanical, and chemical sciences. Our manufacturing forces soon found that they could devise machines and plants to do things more rapidly and more economically. Quickly it became obvious that many of these inventions, plant facilities, and new processes of manufacture were also applicable to peace-time pursuits, and therefore to the enhancement of national happiness and prosperity. It was inconceivable that these improved facilities should be left idle to decay; and upon the signing of the Armistice those having requisite foresight and vision made plans for turning their organizations and plants into the production of goods for public consumption.

DEVELOPMENT OF NEW INDUSTRIES AND NEW SERVICES

Despite the difficulties attending the adjustment from war to peace, and the temporary recession of industry during the years 1920 and 1921, many of our industrial leaders undertook with initiative and faith a more vigorous activity in the production of new devices and new services which had application to the home and to the individual. Their eyes were forward. They were planning for better things.

Outstanding among these developments was the advent of radiobroadcasting in 1922, which almost overnight blossomed forth into a new and vital industry, and provided a new service to the public. It set some frozen money into circulation and opened up new avenues for the employment of labor. Radio proved to be a powerful new factor in knitting together our national life, enlarging the viewpoint of the individual, not alone nationally, but internationally.

Our industries also produced the labor-saving devices which have removed a great deal of drudgery from our daily routine—electrical appliances, such as the flatiron, the toaster, the percolator, the electric washing machine, the vacuum cleaner, the electric refrigerator, the electric clock, and the like.

Large-scale quantity production in the automobile field, together with continuous improvements and refinements, brought us better transportation at lower prices, and the growing demand for that form of transportation eventually gave us a magnificent system of national and State highways. These became the arteries for closer contact between humankind—a more personal contact with neighboring villages, towns, and cities than had ever been experienced by the average individual.

We expanded our national communication facilities in the telegraph and telephone fields. We established speedy radio circuits direct to the leading nations of the world. We gave people a new form of entertainment by the development of the sound picture. Building and home construction went forward on an unprecedented scale. The chemical sciences made new discoveries and gave us many new products. The entire Nation was active; unemployment was at the lowest level in history. The demand for our products in the foreign field was no small factor in that era of business expansion, for many of these nations did not possess the plants, facilities, and research organizations that had been developed in our own country, and consequently they bought many of these new things from us. As a result of all this, American labor enjoyed a higher rate of pay, and the average citizen gained a new glimpse of future possibilities—a vision of greater comforts, more luxuries, more enjoyment, a fuller life. American life was enriched, new standards of living were created, and new opportunities were made available. This is roughly a picture of what had been accomplished, and from the standpoint of material achievement it is not a hard picture to view in retrospect. It is no crime, in my opinion, for anyone to have made the effort to make the world a better and a happier place to live in, and to give people more of the material comforts made available through research and invention.

EFFECTS OF ACCELERATED INDUSTRY

A clear view of the developments and advantages of that period has been temporarily obscured by the events of the past three years. In the light of present-day conditions this is quite understandable. But whatever was then accomplished in the way of benefits to mankind should not be lost because of the present fog. Rather it should serve as a basis for still further progress along lines which will assure not only the maintenance but further improvements of the American standard of living.

Now, let us look for a moment at some of the unsound factors of that period: Among other things, the debacle of 1929 resulted from unbridled, large-scale production and unrestrained and ruinous competition which existed in almost every industry and which at last compelled manufacturers to sell large portions of their goods at a loss. The intense activity of the period led to an inflation of values in virtually every field of human effort, and the fundamental principle of keeping production within the limits of buying power had almost been lost sight of. The machine was run to the limit of its capacity, whether in the agricultural field or in general industry. The buying power of the consumer was overestimated by finance and industry; and, in fact, also by agriculture. The market was frequently glutted, goods were forced upon the public at unprofitable prices, and even then largely paid for on the time-payment plan. Profits were on the ragged edge, and a large part of our populace went into debt.

Two other factors contributed to the decline of our industries—i. e., increased skill and capacity in production on the part of foreign countries, and the burdens of international indebtedness growing out of the World War. As to the first, American industry failed to recognize early enough that both latent and active genius also existed in many of the foreign countries where we were selling our goods, and that sooner or later they would produce much of their own requirements in these new commercial fields. As to the second, the economic conditions in these countries, resulting from reparations, war debts, world tariff conditions, problems of exchange and political upheavals, reduced and in some cases destroyed their power to purchase abroad.

Notwithstanding these facts, business management can not alone be charged, in my opinion, with those weaknesses which brought on the present depression. We have noted that the spirit of the times was for expansion. The task of business management was to create and build up. Even the most radical philosophies of the day can offer no valid criticism of creative effort. Business management had no control of the competitive forces about it. Overproduction was not entered into deliberately, nor with intent to destroy markets. It resulted from the vigor of competitive effort—the desire to serve as much of the market as possible, the very thing that is sought in the policy of unrestrained competition.

THE PROBLEM OF UNRESTRAINED COMPETITION

Time is making it increasingly clear that while no fundamental barriers to prosperity exist in the United States, we have still to balance and put into equilibrium the economic and industrial forces of the Nation. We can not produce in the blind faith of an inexhaustible demand. We can not encourage unrestricted production for its own sake without suffering the consequences of market disorganization. The profitless prosperity that often flows from unrestricted output is but the mirage of success. What does it profit an industry to pile up enormous sales totals in any one year, if by doing so it undermines its market for the following year?

The need of stabilized production programs has been voiced by many industrial leaders. While much has been accomplished along this line, it is far from adequate. However, in considering this problem we must take into account the conditions which modern industry faces in this respect.

There are few who will take issue with the fact that constructive competition should and must be preserved in the manufacture and distribution of commodities. True competition inspires research and invention. It makes for improvement of industrial processes, for higher standards of quality, and for better standards of value.

But competition is not a graven image to be worshiped under any and all conditions. It is not always or necessarily a beneficent agent which guards us from the serpent of monopoly. There is destructive competition as well as constructive competition. There are times when it aids, and there are times when it bars, the solution of important industrial problems. There is gainful competition, and there is wasteful competition. There is fair and unfair competition.

SUPPLANTIVE COMPETITION A NEW FORCE IN INDUSTRY

The fact of the matter is that the principle of competition must be interpreted in the light of new methods of production, new forms of organization, modern methods of distribution, and new creative forces which have entered industry.

The greater competition, the supplantive competition of modern industry, may be a new conception that awaits fruition in the scientist's mind; a new invention which may undermine an entire industry; a pioneering technical development that may shake an investment of millions of dollars. From the caldrons of science new forces of supplantive competition are constantly arising. They take shape as pale ghosts of industrial obsolescence that stalk after every industry that has become so thoroughly "stabilized" that it can only grow around the waist. The greater competition is the competition between the old and the new. Not merely the competition between those who would make the best rat traps and thus lead the world to their doors, but the competition offered by those who have invented a product, developed a method, or found a means that would make rat traps unnecessary.

No apparent or alleged monopoly can afford to be industrially self-complacent in this era of technical progress. No merger, consolidation, or union of similar or related interests can afford to disregard the still small voice of research and invention that may come from the humblest laboratory. No combination of industrial units, however large, can hope long to dictate prices and terms to the public when new instrumentalities are constantly being created to compete for similar services.

To-day we regard competition not only as between like products but also as between different methods of rendering a given service.

In the field of transportation, for example, technical progress is now adding the airplane to the facilities established by the railway, the steamship, the bus, the motor car, and other conveyances.

The science of nutrition as it unfolds its discoveries is forcing wheat and meat and sugar and starch to fight to retain their places in the modern diet.

The post, the telegraph, the telephone, cable, and wireless are now competing for the world's intercommunications.

And yet there is fear on the part of some elements in our society that lack of competition may sap the virility and strength of our whole economic system. It is a fear that dominates every constructive step proposed for such control of output in industry as would lead to the reasonable balancing of supply and demand. It is an alarm that fails to take account of the difference between the antisocial effects of profitless and "cut-throat" competition and the sounder competition stimulated by the laboratory through its creation of new commodities and new services for the public.

There is no danger of the early demise of competition in this industrial era, so long as there are men who will seek to widen their scope of service, so long as research points the way to further industrial goals, and so long as scientific and technical progress opens new vistas of human progress.

UNEMPLOYMENT AND ITS RELATION TO INDUSTRY

The problem of a balanced industry naturally has the closest bearing on the problem of unemployment. Industrial thought has changed profoundly from the day when unemployment was considered one of the inevitable results of our economic cycles. In addition to the social and political problems created by prolonged unemployment of a substantial portion of our population, finance and industry are directly affected by the decline in purchasing power and reduced consumption resulting from unemployment. By whatever method the problem of unemployment is to be solved, a sound, stable industrial structure is presupposed for its effective solution. We can not command industrial prosperity regardless of economic conditions.

The problems of unemployment must be attacked on several fronts. As an offset to the increase in the greater productivity of labor resulting from advanced technology, there has appeared the persistent demand for shorter hours in industry and more leisure for the worker. This demand is the result not only of a wider education and of technological improvement, but also in the growth of cultural opportunities and an increase in the scope and variety of entertainment. It has not been many years since a number of industries operated on the 10 or 12 hour a day basis. To-day the 8-hour day is standard in many industries. It seems clear that the trend toward shorter hours of labor must continue. Public opinion is crystallizing to-day in favor of the shorter work period. I believe we should turn to the shorter day and the shorter week not only as compensation for the higher individual productivity in industry but also as a definite move toward reemployment through a wider distribution of available work. If there is any fundamentally humanitarian purpose in the transition from hand labor to machine labor, it must be in the creation of leisure, which is not only among the most coveted of human possessions but also, in a complicated age, a necessity for the individual who desires to know something more about the economic, social, cultural, and political forces that are moving about him. But it should be recognized that added leisure will bring to society and to the individual responsibilities no less than has labor. There is a vital difference between just being idle and benefiting from intelligent use of leisure. It may be necessary to train ourselves for leisure just as it has been necessary to train for labor.

EFFECTIVE SOLUTIONS REQUIRE COOPERATIVE SPIRIT

The proper approach to some of the problems that confront us is an important consideration at this time. The scope of action required for their solution clearly requires the help of other forces in our national life as well as that of industry.

Social and political science must cooperate with industry, and industry with these sciences. In our present complex situation the action of industry alone or of government alone is not enough. There must be a sympathetic understanding by each of the problems of the other and a spirit of helpfulness must be demonstrated in their respective attitudes toward each other before the forces of public opinion can be rallied to the support of any effective program designed to help the Nation.

The full measure of cooperation needed makes it necessary that the different forces of our industrial, social, and political life be prepared to sacrifice some past concepts and prejudices. All must give ground, and all must recognize that between them there are no inherent causes for hostility.

It is not so difficult, especially for those without ultimate responsibility, to propose new, spectacular, and attractive looking remedies, yet remedies which are untried on the proving ground of life. One can, in fact, get reasonable agreement on a diagnosis of present ailments. One can even get a reasonable amount of accord on the remedies to be applied. But the real question, to my mind, is not the diagnosis nor the prescription but how to apply the medicine to the patient. It is one thing to apply it under the dictatorship of fascism or under the ukase of communism—it is quite another to apply it through voluntary acceptance by a nation of 125,000,000 people who rightly prize the political freedom which they and their forefathers have secured through democracy.

It is far from my desire to condemn the examination of new theories. One who is associated, as I am, with a branch of industry closely related to the laboratory, and which is the product of scientific research, would find it difficult to complain about reasonable experimentation in the social and political fields. However, it is not the practice of the competent research staff to offer what may be termed, by popular expression, half-baked ideas. In the laboratory everything must be thoroughly tested, subjected to use under varying conditions, frequently rebuilt and in all ways rendered as nearly perfect as possible before it is offered for public use. The laboratory is not afraid to attempt or to consider anything because it is new, but it dare not offer its product until convinced that it is practical. The laboratory likes ideas; it dislikes faulty mechanisms. It can demonstrate that some one is on the wrong track quite as easily as it can demonstrate that the route selected is the right one to follow.

Medicine, like industry, has become the field of great experimentation. It is a common hope to-day that the plagues of cancer and tuberculosis may be eliminated through further research, and all seek to encourage in so far as possible the great work being carried on to that end. But, in medicine we experiment with all sorts of germs injected into mice and white rabbits. We watch for effects and learn from results and by this method all mankind is often benefited. But few, indeed, would desire to have these experiments tried in a laboratory of 125,000,000 people who still possess great virility and strength.

The solution to our difficulties to-day can be sought with much greater assurance within our present industrial, social, and political systems, which may be modified and adjusted to meet new requirements, than through revolutionary methods which, if poorly conceived or executed, must sacrifice the progress already won and prove disastrous to our concepts of freedom.

PROMPT ACTION REQUIRED

When urgent problems press for prompt solution, as in the present circumstances, it is perhaps too much to expect that the educational forces, which must be at work in order to bring about a mutual spirit of cooperation and helpfulness between the different elements of our society, will move fast enough to arrest further decline and bring about the needed remedies. We are faced with the desire to adopt measures which will work best in the long run, and at the same time we require methods that will provide immediate relief. Delay can not be helpful in either case.

We are now in a period of political transition from one administration to another. The country has spoken with unmistakable clarity about its preference. It may therefore be assumed that in so far as the new administration may present a definite program for action, it will have public and legislative approval. Such a definite program of action, it is to be hoped, is now being crystallized by those who will have not only the responsibility but also the authority to act.

It is my conviction that America has the ingenuity and the courage, the resources, and the power to deal with its problems and to find their solution.

"REPEAL—ONLY WAY TO END RACKETS, GANGS, SPEAKEASIES"

Mr. DAVIS. Mr. President, I present and ask leave to have published in the RECORD an editorial written by Paul Block, publisher of the Pittsburgh (Pa.) Post-Gazette, in its issue of February 2, 1933, entitled "Repeal—Only Way to End Rackets, Gangs, Speakeasies."

There being no objection, the editorial was ordered to be printed in the RECORD, and it is as follows:

REPEAL—ONLY WAY TO END RACKETS, GANGS, SPEAKEASIES

George W. Wickersham, chairman of the late Commission on Law Observance and Enforcement, which found that prohibition was unenforceable but did not, as a body, say so, has now declared that he believed it was "absolutely essential" that modification of the liquor laws should include provisions for the sale of hard spirits, as well as wines and beer, under the control of a national commission.

It is a pity Mr. Wickersham did not say this two years ago when the commission made its report with its jumble of conclusions by individual members. The country might have had a 2-year start in the solution of the liquor problem, which the present Congress, in spite of the mandate of the people at the last election and in spite of the Treasury's need of revenue, shows no disposition to consider in a sensible and patriotic manner.

Prohibition, as Mr. Wickersham now points out, has failed because it has not had the support of the people. The country's aim in the future on liquor control should be toward temperance through education rather than by prohibition. The quickest, the best, way to begin this is through straight repeal of the eighteenth amendment. The people of the individual States, of course, should be allowed to decide whether they want to be dry or wet.

It is hopeless to expect anything from the lame-duck Congress because it has shown governmental irresponsibility at its worst. But the country has a right to expect better of the next Congress, especially if the Democratic Members will recognize President-elect Roosevelt's leadership and help him to fulfill the promises made in the Democratic platform.

Repealing the eighteenth amendment would probably bring to the Treasury Department from two to three billion dollars annually in excise taxes. It would help to do away with most of the present-day taxes which have helped to stifle business and have reached, and no doubt will now reach even more widely, working men and women.

Such a law would also strike at the power of the great racketeering and gangster groups, at the corruption of public officials, and at the disrespect of all law which has grown out of dissatisfaction with the prohibition law. It would help revive the faith of our people in our form of government—faith in the government of the people by the people who have spoken so unmistakably against prohibition—and that is more important to the future of America than whether liquor may be bought and sold.

PAUL BLOCK, *Publisher.*

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

Mr. ROBINSON of Arkansas. Mr. President——

The VICE PRESIDENT. The Senator from New York has the floor. Does he yield to the Senator from Arkansas?

Mr. COPELAND. I am glad to yield to the Senator.

Mr. ROBINSON of Arkansas. Mr. President, yesterday Postmaster General Brown requested the opportunity to discuss with me the subject of air mail contracts and subsidies. I suggested to him that he supply a memorandum setting forth his viewpoint. This has been done in a letter under date of February 3, released by the Post Office Department yesterday. This letter states among other things:

The air mail is producing at present not less than $7,000,000 per annum.

Thus it appears that the subsidy contemplated in the original provision of the bill now under consideration was almost three times the amount of the receipts from the service. It is further stated in Mr. Brown's communication that the "average rate per mile, effective November 1, 1932, was 45 cents per mile."

There is attached to the letter referred to a copy of the route certificate for air mail service from Chicago by certain designated points to San Francisco, Calif., and return. The distance between the terminal points is 2,025 miles. The rate, as appears from the certificate, is 95½ cents per mile, or more than twice the average rate, notwithstanding the route is probably the longest in the entire system.

These facts appear contradictory of the declaration by the Postmaster General in the letter referred to, as follows:

The fewer miles the operator flies, the more it costs per mile.

It further appears that the certificate, while irrevocable in form except for willful neglect, expressly provides for "rates of compensation to be fixed from time to time, at least annually, by the Postmaster General, and so forth." It thus becomes apparent that the subsidy may be reduced without violating the certificates or contracts, but the extent of the reduction that may be justly made is a proper subject of inquiry.

In answer to an inquiry directed to the Postmaster General by Congressman MEAD, chairman of the Committee on the Post Office and Post Roads of the House of Representatives, dated January 23, 1931, the Postmaster General expressly declared that no air mail contracts were contemplated at that time by the department. January 31, 1931, just eight days later, the Postmaster General issued press releases announcing that four new air mail certificates or contracts had been issued that day.

In view of all the circumstances, it is believed that an investigation of air mail contracts is justified, an investigation covering every phase of the subject in relation to the manner of the making of the contracts, the justness and fairness of the rates in force, and all matters and transactions which may be calculated to throw light on the amount which should be properly made available for the Air Service. I am not prepared to state when the resolution of investigation will be submitted, but it is intended that the same shall be submitted in time to provide for the proper working out of the controversy involved.

I ask that the letter of the Postmaster General, referred to in my remarks, be printed in the RECORD, as also the attached copy of the route air mail service described in my remarks.

The VICE PRESIDENT. Without objection, that order will be made.

The matter referred to is as follows:

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., February 3, 1933.

Hon. JOSEPH T. ROBINSON,
United States Senate.

MY DEAR SENATOR ROBINSON: Pursuant to your suggestion, I am pleased to submit the following memorandum relative to the present obligations of the Post Office Department with respect to the air mail services:

Section 6 of the "Act to amend the air mail act of 1925, further to increase commercial aviation," as amended April 29, 1930 (McNary-Watres Act), provides as follows:

"The Postmaster General may, if in his judgment the public interest will be promoted thereby, upon the surrender of any air mail contract, issue in substitution therefor a route certificate for a period of not exceeding 10 years from the date service started under such contract to any contractor or subcontractor who has satisfactorily operated an air mail route for a period of not less than two years, which certificate shall provide that the holder thereof shall have the right, so long as he complies with all the rules, regulations, and orders that may be issued by the Postmaster General for meeting the needs of the Postal Service and adjusting mail operations to the advances in the art of

flying and passenger transportation, to carry air mail over the route set out in the certificate or any modification thereof at rates of compensation to be fixed from time to time, at least annually, by the Postmaster General, and he shall publish in his annual report his reasons for the continuance or the modification of any rates: *Provided*, That such rates shall not exceed $1.25 per mile. Such certificate may be canceled at any time for willful neglect on the part of the holder to carry out any rules, regulations, or orders made for his guidance, notice of such intended cancellation to be given in writing by the Postmaster General, and 45 days allowed the holder in which to show cause why the certificate should not be canceled."

In accordance with law, 23 air mail contracts, covering routes aggregating 20,099 miles, all of which contracts were duly let by competitive bidding, have been surrendered, the several contractors taking in substitution therefor route certificates issued by the Postmaster General granting them the right, so long as they comply with all the rules, regulations, and orders that may be issued by the Postmaster General for meeting the needs of the Postal Service, and adjusting mail operations to advances in the art of flying and passenger transportation, to carry air mail over their respective routes at rates of compensation fixed in such certificates and to be fixed from time to time, at least annually, provided that such rate shall not exceed $1.25 per mile, for a period ending not more than 10 years from the date of beginning service under such contracts, to wit, on the 5th day of April, 1936.

Because the contracts so surrendered, all of which ran for periods fixed by law at four years, were executed at various times, the several dates of expiration necessarily fell at various times. In order that the Congress might have an opportunity to deal with the air mail service in its entirety at one time, all route certificates have been issued to terminate on the 5th day of April, 1936, 10 years from the date of the first air mail contract issued, notwithstanding the fact that some air mail contracts were dated less than six years prior to April 5, 1936. All domestic air mail contracts have now been surrendered and route certificates issued in substitution therefor. No further contracts, route certificates or route extensions will be made by this administration.

The legislative record is convincing that Congress deemed four years, the period fixed by law for mail contracts generally, to be too short to justify the heavy investments in equipment and other facilities essential to successful air transport operations, and therefore extensions in time by the device of route certificates were authorized by the act of May 17, 1928.

For your information, I inclose the complete text of a typical route certificate.

On the good faith of the acts of Congress cited and the several obligations assumed by the Post Office Department authorized thereby, the air mail operators have made investments of more than $22,000,000 in facilities for transporting mail, passengers, and express over a nation-wide network of airways, approximating 28,000 miles, constructed by the Department of Commerce at a cost of more than $10,000,000. New equipment required by air mail operators, much of which has been contracted for, aggregates $10,000,000 more. Airport facilities costing approximately $125,000,000 for improvements, valueless except for aviation purposes, have been provided, chiefly by a hundred or more municipalities. An aeronautical industry, wholly dependent upon the continuance of the air mail services, has been created, having an annual turnover of not less than $25,000,000, in addition to the gross receipts of the air-transport operators.

Since the department has been authorized by the McNary-Watres Act to exert pressure on air mail operators to carry passengers and express, their revenues derived from nonpostal sources, which were practically nil four years ago, have steadily increased until at the present time they are running at the rate of $6,000,000 per annum and constantly increasing, notwithstanding the general business stagnation. The increase in revenues from passenger and express traffic has enabled the department to cut the average compensation per mile for air mail operators by successive stages from 82 cents in 1930 to an average of approximately 45 cents, effective November 1, 1932. With general business recovery I am confident the increased postal and other revenues that may reasonably be anticipated will justify further cuts to a level approximating the actual value of the service rendered, excluding any subsidy.

In considering the air mail problem it must be borne in mind that more than 50 per cent of the cost of operating an air-transport service is attributable to factors not directly connected with flying. It follows therefore that discontinuing schedules will not reduce operating costs proportionately. The fewer miles the operator flies the more it costs him per mile. Moreover, passenger and express patronage practically disappears with only one scheduled flight per 24 hours and increases vastly more than in arithmetical ratio as additional schedules are provided. Further, it should be noted that public patronage of the air mail depends upon its facilities being available to every part of the country. Discontinuing the service to any portion of the country would reduce the air mail revenues by a vastly larger sum than the air mail postage normally originating in the part of the country affected. Thus it is obvious that curtailing mileage flown is more than likely to increase the net burden to the Post Office Department, if the operator is to be reimbursed his actual costs, and, of course, there is no other way to keep him in the air.

For the fiscal year ending July 1, 1930, Congress appropriated $15,000,000 for domestic air mail, and 14,939,464 scheduled miles were flown, with 7,719,698 pounds of mail.

For the year ending July 1, 1931, the appropriation was $18,000,000, and 21,380,517 scheduled miles were flown, with 8,579,422 pounds of mail.

For the year ending July 1, 1932, $20,000,000 were appropriated, and 32,202,170 scheduled miles were flown, with 8,845,967 pounds of mail.

For the year ending July 1, 1933, $19,460,000 were appropriated, and it is estimated 34,500,000 scheduled miles will be flown, with over 8,000,000 pounds of mail.

The Bureau of the Budget, the Post Office Department, and the Appropriation Committees of the House and Senate made a thorough survey of the air mail requirements for 1934. In my judgment, due to present business conditions, the sum appropriated by the House of Representatives is the minimum which will suffice for this important service, if the extraordinary progress it has thus far made is not to be sacrificed.

The past four years have been noteworthy in the development of faster, safer, and more comfortable airplanes, flying instruments, radio communication, flying technique, and in the training of hundreds of expert pilots and mechanics, all of which contribute immeasurably to our national security. Large sums of money have been saved for American business by expediting the movement of banking items and generally speeding up what business has survived. May I remind you that many postal operations are not self-sustaining when standing alone. The rural delivery and the second-class service are conspicuous in this particular. Both are justified by reason of the benefits to large groups of citizens. The air mail is producing at present not less than $7,000,000 in revenue per annum. Under normal business conditions this revenue will probably be increased at least to $10,000,000 and the nonpostal revenue received by air mail operators will undoubtedly be increased from $6,000,000 at least to $10,000,000 per annum, permitting a reduction in the Government's contribution to a sum approximating the intrinsic value of the service actually rendered. Eliminating or crippling the air mail at the present time will practically destroy the aeronautical industry, with a gross annual turnover of $50,000,000, taking into account the $25,000,000 disbursed by the air mail operators, and will wipe out investments of the Federal Government, municipalities, and private enterprises, aggregating more than $300,000,000.

However, I rest the case of the air mail service squarely upon the legal and moral obligations of the United States Government by reason of covenants contained in the route certificates issued pursuant to the provisions of the McNary-Watres Act, vesting in the holders of such route certificates the right to carry the air mail over their respective routes and receive just compensation therefor until the 5th day of April, 1936.

I shall be pleased to furnish any other information desired.

Very truly yours,

WALTER F. BROWN.

ROUTE CERTIFICATE, AIR MAIL SERVICE

Route: Chicago, Ill., by certain designated points, to San Francisco, Calif., and return.

Carrier: Boeing Air Transport (Inc.), of Seattle, Wash.

Whereas section 2 of the act of Congress approved on the 29th day of April, 1930, entitled "An act to amend the air mail act of February 2, 1925, as amended by the acts of June 3, 1926, and May 17, 1928, further to encourage commercial aviation," is as follows:

"The Postmaster General may, if in his judgment the public interest will be promoted thereby, upon the surrender of any air mail contract, issue in substitution therefor a route certificate for a period of not exceeding 10 years from the date service started under such contract to any contractor or subcontractor who has satisfactorily operated an air mail route for a period of not less than two years, which certificate shall provide that the holder thereof shall have the right, so long as he complies with all rules, regulations, and orders that may be issued by the Postmaster General for meeting the needs of the Postal Service and adjusting mail operations to the advances in the art of flying and passenger transportation, to carry air mail over the route set out in the certificate or any modification thereof at rates of compensation to be fixed from time to time, at least annually, by the Postmaster General, and he shall publish in his annual report his reasons for the continuance or the modification of any rates: *Provided*, That such rates shall not exceed $1.25 per mile. Such certificate may be canceled at any time for willful neglect on the part of the holder to carry out any rules, regulations, or orders made for his guidance, notice of such intended cancellation to be given in writing by the Postmaster General and 45 days allowed the holder in which to show cause why the certificate should not be canceled"; and

Whereas Boeing Airplane Co. (Inc.), of Seattle, Wash., a corporation duly organized and existing under the laws of the State of Washington, and Edward Hubbard, an individual and citizen of the United States, on the 1st day of February, 1927, duly entered into a contract with the United States to transport the air mail by aircraft on a route from Chicago, Ill., by certain designated points, to San Francisco, Calif., and on the 29th day of April, 1927, Boeing Air Transport (Inc.) of Seattle, Wash., a corporation duly organized and existing under the laws of the State of Washington, hereinafter called the carrier, became the subcontractor

on this route, the said contract presently being in full force and effect; and

Whereas the said carrier has satisfactorily operated said air route for a period of not less than two years, to wit, from the 1st day of July, 1927, and is willing to surrender the said air mail contract and accept in substitution therefor a route certificate as provided in section 2 of the act of Congress approved the 29th day of April, 1930; and

Whereas in the judgment of the Postmaster General the public interest will be promoted by the issuance to said carrier of a route certificate in substitution for said contract: Now, therefore,

Pursuant to the authority in me vested by the provisions of said act, I hereby certify that said Boeing Air Transport (Inc.), of Seattle, Wash., shall have the right, so long as it complies with all rules, regulations, and orders that may be issued by the Postmaster General for meeting the needs of the Postal Service and adjusting mail operations to advances in the art of flying and passenger transportation, to carry air mail over the route hereinafter set out or any modification thereof, at rates of compensation fixed herein, or to be fixed from time to time, at least annually, by the Postmaster General, provided that such rates shall not exceed $1.25 per mile for a period ending not more than 10 years from the date of beginning service under said contract, to wit, on the 5th day of April, 1936, subject to the following conditions:

TERMS AND CONDITIONS

1. The issuance of this certificate by the Postmaster General and its acceptance by the carrier as hereinafter provided shall be deemed a full mutual release of the United States and the said carrier from all the terms, conditions, and obligations of the air mail contract hereinbefore referred to, dated the 29th day of January, 1927, from the date of the acceptance of this certificate, except compensation due for services performed prior to the date hereof, and upon the acceptance thereof the said carrier shall surrender the said contract to the United States.

2. The route over which the carrier shall have the right to carry air mail shall be from Chicago, Ill., by certain designated points, to San Francisco, Calif., and return, including any extension or other modification of said route that may be made as hereinafter provided.

3. Upon 60 days' notice to the carrier the Postmaster General from time to time may modify said route by an extension or extensions thereof, including lateral extensions or consolidations, and prescribe the schedule therefor, including the stops thereon, and determine the mileage upon which the compensation of the carrier is to be based.

4. For the purposes of this certificate the distance between the terminal points of the route hereinbefore prescribed shall be deemed to be 2,025 miles.

5. The aircraft employed by the carrier in the service authorized hereby shall be manufactured in the United States. They shall be of modern design, airworthy, and suitable for the service prescribed; the design and capacity of such aircraft and the location, size, and construction of the mail compartments therein shall be subject to the approval of the Postmaster General.

The following service may be prescribed by the Postmaster General:

(A) Night mail service.
(B) Night mail and passenger service.
(C) Day mail service.
(D) Day mail and passenger service.

6. Until and including the 31st day of December, 1930, or until otherwise directed by the Postmaster General, the carrier shall provide the following service over said route:

(1) One flight by a plane having not less than 125 cubic feet or space for 2,000 pounds of air mail and accommodations for not less than eight passengers, departing from Chicago, Ill., at 8 a. m. daily, except Monday, to be classified as class D service, and payment made therefor at the rate of $1.18½ per mile between Chicago, Ill., and Salt Lake City, Utah, until otherwise ordered.

(2) One flight by a plane having from 80 to 100 cubic feet of space for 1,600 pounds of air mail, departing from Chicago, Ill., at 8 p. m. daily, to be classified as class A service, and payment made therefor at the rate of $1.18 per mile between Chicago, Ill., and Salt Lake City, Utah, until otherwise ordered.

(3) One flight by a plane having from 80 to 100 cubic feet of space for 1,600 pounds of air mail, departing from Salt Lake City, Utah, eastbound at 4 p. m. daily, except Monday, to be classified as class C service, and payment made therefor at the rate of $1.03 per mile between Salt Lake City, Utah, and Chicago, Ill., until otherwise ordered.

(4) One flight by a plane having not less than 125 cubic feet of space for 2,000 pounds of air mail and accommodations for not less than eight passengers, departing from Salt Lake City, Utah, eastbound at 4 a. m. daily, to be classified as class B service, and payment made therefor at the rate of $1.18½ per mile for day flying and $1.25 per mile for night flying between Salt Lake City, Utah, and Chicago, Ill., until otherwise ordered.

(5) One flight by a plane having from 80 to 100 cubic feet of space for 1,600 pounds of air mail, and accommodations for not less than 10 passengers, departing from Salt Lake City, Utah, west bound, at 9 p. m., daily except Monday, to be classified as Class B service, and payment made therefor at the rate of $1.25 per mile for night flying and $1.16 per mile for day flying, between Salt Lake City, Utah, and San Francisco, Calif., until otherwise ordered.

(6) One flight by a plane having not less than 62.5 cubic feet of space for 1,000 pounds of air mail, departing from Salt Lake City, Utah, westbound, at 9 a. m., daily, to be classified as Class C service, and payment made therefor at the rate of $0.95½ per mile, between Salt Lake City, Utah, and San Francisco, Calif., until otherwise ordered.

(7) One flight by a plane having not less than 62.5 cubic feet of space for 1,000 pounds of air mail, departing from San Francisco, Calif., at 8 a. m., daily except Monday, to be classified as Class C service, and payment made therefor at the rate of $0.95½ per mile, between San Francisco, Calif., and Salt Lake City, Utah, until otherwise ordered.

(8) One flight by a plane having from 80 to 100 cubic feet of space for 1,600 pounds of air mail, and accommodations for not less than 10 passengers, departing from San Francisco, Calif., at 8 p. m., daily, to be classified as Class B service, and payment made therefor at the rate of $1.25 per mile for night flying and $1.16 per mile for day flying, between San Francisco, Calif., and Salt Lake City, Utah, until otherwise ordered.

7. Upon 60 days' notice to the carrier, the Postmaster General may increase, diminish, or modify the service above prescribed, and make such adjustments in the compensation of the carrier as he may deem proper.

8. The carrier shall transport the mails of the United States offered for carriage over the route hereinbefore set out with due celerity, in a safe and secure manner, free from wet or other injury, receiving and delivering the same at fields and points therein designated on schedules prescribed by the Postmaster General.

9. Payments shall be made to the carrier monthly upon evidence that the service authorized hereby has been well and faithfully performed in accordance with the provisions hereof.

10. The carrier shall keep and maintain an accurate system of accounting in accordance with regulations prescribed by the Postmaster General. These accounts shall include a record of all obligations, investments, expenditures, receipts, and earnings from any source whatsoever, and shall be subject at all reasonable times to inspection and audit by the Post Office Department. The carrier shall furnish to the Postmaster General such information regarding its accounts and operations as he may from time to time require.

11. The carrier shall not directly or indirectly promote the use of the air mail over the route hereinbefore set out, or any other air mail route, except in accordance with regulations prescribed by the Postmaster General.

12. This certificate is issued upon the express conditions that the said carrier will hold itself subject to all the conditions imposed by the several acts of Congress relating to the air mail service and to all the provisions of the law relating to post offices and the Postal Service generally in so far as they are applicable to the air mail service; that no Member of or Delegate to Congress shall be admitted to any share or part of the benefits accruing to it hereunder; and that it has not employed a third person to solicit or obtain the same, or to cause or procure the same to be obtained upon compensation in any way contingent, in whole or in part, upon such procurement; and that it has not paid, or promised or agreed to pay, to any third person, in consideration of such procurement, or in compensation for service in connection therewith, any brokerage, commission, or percentage upon the amount receivable by it thereunder; and that it has not, in estimating the price at which it undertakes hereunder to carry the mail, included any sum by reason of any such brokerage, commission, or percentage, and that all money payable to it hereunder is free from obligation to any person for services rendered, or supposed to have been rendered, in the procurement of this certificate. And it is understood that a breach of this condition shall constitute adequate cause for the cancellation of this certificate by the Postmaster General, and that the United States may retain to its own use from any sums due or to become due thereunder an amount equal to any brokerage, commission, or percentage so paid or agreed to be paid.

13. The said carrier shall be responsible for the persons to whom it commits the custody and transportation of the mails, and the observance of the law by such persons and the faithful performance of the duties required by it of them; and shall not commit the custody or transportation of the mails to any person under 16 years of age, nor to any person under a sentence of imprisonment at hard labor imposed by a court having criminal jurisdiction, nor to any person not authorized by law to be concerned in contracts for carrying the mail.

14. The said carrier shall be answerable in damages to the United States for any breech by it, or by its officers or agents, of the terms and conditions set out herein; and for such a breech, or for inferior service, or for loss of or damage to the mail through its fault or that of its officers or agents, the Postmaster General may make such deductions from the pay of the said carrier as he may deem proper.

15. The carrier shall be required to provide necessary workroom space in its buildings on the field or fields to permit proper handling and distribution of mails by Post Office Department employees.

16. This certificate may be canceled by the Postmaster General at any time for willful neglect on the part of the holder to carry out any rules, regulations, or orders made for its guidance, notice of such intended cancellation to be given in writing by the Postmaster General and 45 days allowed the holder in which to show cause why the certificate should not be canceled.

17. By agreement of the Postmaster General and the carrier, the life of this certificate may be curtailed, said certificate may be canceled, or any other modification may be made herein not inconsistent with law.

18. The Postmaster General shall have the right at any time during the period of service authorized hereby to require the carrier to furnish surety other than that for which provision is hereafter made, and in his discretion to increase or reduce the amount of the bond that has been furnished by the carrier.

19. The delivery to and acceptance and approval by the Postmaster General of a bond in the sum of $251,000, conditioned upon the faithful and efficient performance in accordance with the terms and conditions hereinbefore set out of the service intended to be authorized by this certificate, duly executed by a surety acceptable to the Postmaster General and the acceptance of this certificate upon the said terms and conditions evidenced by the countersignature of the said carrier, shall be conditions precedent to the vesting of any right in the said carrier by virtue hereof.

Witness my hand and seal this 21st day of October, 1930.

[SEAL.] WALTER F. BROWN,
Postmaster General.

Witness to signature of the Postmaster General.
ALICE MUMMENHOFF.

Accepted upon the terms and conditions above set out this 29th day of October, 1930.

BOEING AIR TRANSPORT (INC.),
By JAMES P. MURRAY.

BOND

(Corporate surety)

Know all men by these presents that Boeing Air Transport (Inc.), principal, and United States Fidelity & Guaranty Co., Baltimore, Md., as sureties, are held and firmly bound unto the United States of America in the just and full sum of $251,000, lawful money of the United States, to be paid to the said United States of America or its duly appointed or authorized officer or officers, to the payment of which, well and truly to be made and done, we bind ourselves, our heirs, executors, administrators, successors, and assigns, jointly and severally, firmly by these presents.

Whereas Boeing Air Transport (Inc.) has executed a route certificate with the United States to carry the mails by aircraft on route No. AM–18, between Chicago, Ill., via certain designated points, and San Francisco, Calif., in accordance with the stipulations and agreements contained in said certificate.

Now, the condition of the said obligation is such that if the said Boeing Air Transport (Inc.), carrier, shall perform said service according to his certificate aforesaid, then this obligation shall be void; otherwise to be in full force and obligation in law.

In witness whereof we have hereunto set our hands and seals this 29th day of October, 1930.

BOEING AIR TRANSPORT (INC.),
Principal and Carrier.
By JAMES P. MURRAY.

MARIE T. RICKER.

UNITED STATES FIDELITY & GUARANTY CO.,
By H. E. RICHMOND, *Surety; Attorney in Fact.*

Witness to signature of surety:
MARIE T. RICKER.

Mr. COPELAND. Mr. President, we have had long discussions relating to the ocean mails, not alone this year but in previous years. Last night the able Senators from Florida, Maine, Massachusetts, and other States discussed the pending amendment and presented certain facts in opposition. I want to call the attention of the Senate to the further fact that we have invested a couple of billion dollars in American shipping since the beginning of the World War. In addition, I want Senators to understand and to appreciate the significance of the statement that our Government now has authorized and outstanding loans on American ships amounting to almost $146,000,000, the exact figures being $145,914,253.86. That is as of December 31, 1932. In short, the shipping lines now benefiting by the mail subventions owe to the United States, in round figures, $146,000,000.

I want to speak about these loans and how they have been met. One would think, to listen to some of the arguments presented here, that we are giving this money to the shipping lines; that there is no hope that it is to be returned to us. What are the facts?

Under construction and reconditioning or completely finished we find that 97 fine vessels, aggregating 838,000 gross tons of shipping, have been paid for or are being paid for through this loan construction fund. We have made altogether loans amounting to about $250,000,000, which was the amount of the revolving fund; but, of the loans made, certain sums have been returned. Now, as I have stated, the outstanding amount of those loans is $146,000,000.

It is proper to inquire, have the shipping lines met their obligations to the Government? There are certain sums overdue on 23 vessels constructed or reconditioned by 8 of the 44 lines. On 23 vessels there is overdue on the principal $2,288,000, but the interest has been met in every single case except one. One line having built one vessel has defaulted on its interest to the extent of $10,270; but, with that one exception, the interest has been paid on the 23 vessels on which there is an overdue principal payment. Full payment has been made on 74 vessels constructed or reconditioned.

What will happen if the McKellar amendment shall prevail, in my candid opinion, is that the great majority of our shipping lines will go into bankruptcy. There are a half dozen lines that could survive; I say that with some degree of certainty; but, in my honest opinion, if these mail subventions shall be slashed as proposed by my friend from Tennessee, the American merchant marine, in general, will go into bankruptcy.

Suppose that were to happen; these ships would be returned to the United States; we would have them upon our hands. Then we would return to the condition which existed previous to the enactment of the Jones-White Act.

Until the Jones-White Act was passed we had an enormous annual deficit in the operation of our ships. That deficit averaged between $40,000,000 and $50,000,000 every year. It cost the Government to operate these ships from $40,000,000 to $50,000,000 every year, and, more than that, no provision whatever was made for replacements.

Anybody who knows about shipping realizes that a vessel 20 years of age is practically useless. I observed the other day the sale of a number of steamboats, belonging to a line known as the Iron Steamship Co., which for years carried passengers between New York City and Coney Island. I happen to see those boats often, because they are tied up at a dock which I pass when I go from the city to my home in the country. They look like fine boats, but they sold for about $1,500 or $2,000 apiece the other day because of their age.

The great steamship lines can not operate with ancient and decayed ships. There must be steady replacements in order that we may compete with the magnificent ships which are built by foreign nations. When I say " by foreign nations," I say that deliberately, because it is by the subsidies supplied by foreign nations that the great ships of the Cunard Line and the various Italian lines and others have been constructed. When we had a loss in operations of from $40,000,000 to $50,000,000 a year that did not take into consideration the replacements necessary to make our merchant marine effective.

So we face this state of affairs: If we discontinue our aid to the American merchant marine, those ships will come back to us for operation. It is unthinkable that they would not be operated, as certainly our country would not tie up at the docks those great vessels—97 of them—which have been reconditioned and built during the past 5 or 10 years. They would be operated, and their operation would involve a loss of from $40,000,000 to $50,000,000, with no hope of replacements except by direct appropriations from the Treasury.

When we consider this question of the American merchant marine this year, as we considered it last year, a listener in the gallery would think that we never had established any policy regarding these ships. Let me call that subject again to your attention.

Mr. President, I am intending to offer a substitute for the amendment proposed by the Senator from Tennessee; and I send it forward in order that I may have some time to discuss the substitute in my own time.

The PRESIDENT pro tempore. Does the Senator wish to have it read now?

Mr. COPELAND. No; if the clerk will hold it for the moment.

As I say, a listener in the gallery would imagine that we had never determined any national policy as regards the American merchant marine.

I hope it is unnecessary to repeat this language; but let me call the attention of the Senate to the merchant marine act of 1920, the very first language in that act:

That it is necessary for the national defense and for the proper growth of its foreign and domestic commerce that the United States shall have a merchant marine of the best equipped and most

suitable types of vessels sufficient to carry the greater portion of its commerce and serve as a naval or military auxiliary in time of war or national emergency, ultimately to be owned and operated privately by citizens of the United States; and it is hereby declared to be the policy of the United States to do whatever may be necessary to develop and encourage the maintenance of such a merchant marine; and, in so far as may not be inconsistent with the express provisions of this act, the United States Shipping Board shall, in the disposition of vessels and shipping property as hereinafter provided, in the making of rules and regulations, and in the administration of the shipping laws, keep always in view this purpose and object as the primary end to be attained.

There is no question about that language. It was the solemn declaration of the Congress of the United States in 1920.

That act was reviewed in 1928.

The PRESIDENT pro tempore. The time of the Senator from New York has expired.

Mr. COPELAND. Mr. President, I desire to present the substitute.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The CHIEF CLERK. The Senator from New York offers the following as a substitute:

Provided further, That the Postmaster General is hereby authorized and directed to enter upon negotiations with the various shipping companies having contracts for the carrying of ocean mail, and, if possible, secure from such companies severally agreements providing that said companies shall agree to apply the whole or a considerable amount of the mail pay due under the terms of any such contract to the liquidation of any amounts due to the United States or United States Shipping Board on loans made for the construction of new ships to be operated in the performance of such mail contracts.

The PRESIDENT pro tempore. The question is on agreeing to the amendment, in the nature of a substitute, offered by the Senator from New York. On that question the Senator from New York is recognized for 15 minutes.

Mr. COPELAND. Mr. President, the declaration of policy which we adopted in 1920 was reconsidered in 1928. I know the discussion that we had in the Commerce Committee, and the debate that we had upon the floor of the Senate, in connection with the question of whether or not we still adhered to the policy laid down in 1920. In 1928, in section 1 of the new act, we provided that—

The policy and the primary purpose declared in section 1 of the merchant marine act, 1920, are hereby confirmed.

In other words, in 1928 we made a resurvey of the merchant marine situation, and, after debate, determined that the policy established in 1920 should be continued.

Now here we are seeking to violate our past action. There is nothing new or strange about the contracts which have been entered into between the Postmaster General and the shipping lines. The conditions are all laid down in the law of 1928. They are all here—the ocean mail service, and how much shall be paid, it being provided that the type of vessels described as maintaining a speed of a certain number of knots at sea in ordinary weather, and of a gross tonnage of so much, shall be paid a certain rate per mile.

There is nothing startling or mysterious about what we find in these contracts. They follow out to the letter the law of the country. Yet here we are, after first having declared a principle, a policy, after having made these contracts, having declared the conditions under which the contracts should be made, and the contracts have been made exactly in accordance with law. To me it is beyond understanding how any Member of the Senate could possibly vote for the pending amendment, which would have the effect of abrogating the solemn obligations of the United States.

The able Senator from Alabama [Mr. BANKHEAD] last night spoke about the resentment felt in the United States of America over the fact that certain foreign nations decline to meet their obligations and make the payments due upon the debts which they owe us. We have been righteously indignant and vocally expressive of our indignation in the Senate over the failure of these nations to meet their obligations. Yet we are giving solemn consideration here in this body to an act which will bring about the abrogation of the contracts entered into between the United States of America and certain shipping lines. I can not believe it possible and do not believe it possible that such action will be taken here, and yet that is the thing that is proposed.

But, Mr. President, I know the sincere desire of the Senator from Tennessee [Mr. MCKELLAR] to effect real economies in the administration of our Government. No man in the Congress or in the country has been more energetic or intelligent in the formulation of plans for economies than the Senator from Tennessee. I am willing to go this far in meeting the desire of the Senator from Tennessee and others who follow him, to enter into some understanding along the lines of my amendment, between the Post Office Department and the shipping lines so far as they are able to do it without endangering the possibility of their operation because of the lack of finances. I am willing to do this, as proposed in this amendment; I invite the attention of the Senator from Tennessee to this, and I can see no objection to it:

We are going to have a very able Postmaster General pretty soon. If you all knew Jim Farley as I do—my neighbor in New York—you would realize that he will bring to this office a degree of energy and capacity such as it has rarely had. I am willing to authorize that Postmaster General to enter into negotiations with those shipping lines with which we have outstanding loan contracts amounting to $145,000,000 to see whether all the mail pay, or a substantial part of the mail pay, or a part of the mail pay, may not be used to liquidate the debt owing by those lines to the United States.

There are certain lines that are able to do this. It would, perhaps, be unseemly for me to name them, but I have in mind certain lines that could do this, that could apply every dollar of the mail pay to the liquidation of their obligations. The practical significance as regards the Treasury would be that instead of being called upon to pay out, without any return, large sums of money—in the case of one line that I have in mind, for example, a million and a half of dollars per year—that would be turned in toward the liquidation of the debts. That would help us; the equity of the private owners would be increased and the Government's responsibility lessened. I have no doubt that it would mean a saving to the Treasury of a good many million dollars per year; and certainly in these times that is desirable.

Mr. SMITH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from South Carolina?

Mr. COPELAND. I yield.

Mr. SMITH. The question that is under consideration, as I understand, is whether or not this amount shall be reduced in accordance with the amendment of the Senator from Tennessee, that being tantamount to defaulting on contracts.

Mr. COPELAND. Right.

Mr. SMITH. What is the length of the life of these contracts?

Mr. COPELAND. Ten years.

Mr. SMITH. And that was in accordance with the law?

Mr. COPELAND. Absolutely.

Mr. SMITH. And are the contracts of such a nature as to be binding in their present form?

Mr. COPELAND. They are binding. There are certain infinitesimal technicalities, savings that might be made by agreement between both parties, but in general they are binding.

Mr. SMITH. And if we refuse to appropriate the money, it is tantamount to defaulting on a contract which was entered into in accordance with law?

Mr. COPELAND. The Senator is entirely correct.

Mr. SMITH. How long have these contracts been running?

Mr. COPELAND. They were for 10 years in the first place. They have 5, 6, and 7 years yet to run.

Mr. MCKELLAR. Mr. President, will the Senator yield?

Mr. COPELAND. I yield.

Mr. MCKELLAR. Of course, the department has the right to curtail routes and ports, and in that way reduce

the amount that can be paid. That can be done under the contract.

Mr. COPELAND. Let me explain that to the Senator from South Carolina. The Senator from Tennessee is right. Let us take a line going out of New York to South America. That route could be changed so as to go by way of Cuba, or by way of Puerto Rico, or by way of Bermuda, and in that way increase a little bit the mileage; but the distance between New York and this South American port would still have to be paid for. It is that sort of economy which could be effected, but in my opinion it would be very, very infinitesimal.

The mileage between New York and this South American port would still have to be paid for. The only sort of economy that could be legally effected, would, in my opinion, be infinitesimal.

Mr. McKELLAR. The number of ships could be decreased in the same way, and in that way a tremendous reduction made.

Mr. WHITE. Mr. President, will the Senator from New York yield?

Mr. COPELAND. I yield.

Mr. WHITE. The number of ships could be decreased by agreement between the parties, but not arbitrarily by either party.

Mr. SMITH. Mr. President, that is getting down to an answer to the question I have asked. Is it possible, under the terms of the law and the contract, so to reduce the number of ships and the ports of call until the contract is practically wiped out?

Mr. WHITE. Mr. President, will the Senator from New York permit me to answer?

Mr. COPELAND. I yield.

Mr. WHITE. Under the operations of any contract I have ever seen that may not arbitrarily be done. A change in the ports of call, a change in the number of sailings, may be effected, but only by mutual agreement by the contracting parties. As I get it, the purpose of the Senator from New York is to suggest to these parties that they negotiate and see if they can not voluntarily work out such a reduction.

Mr. SMITH. And if no such agreement is reached, then, under the law, the contract as it stands is binding in all essentials?

Mr. WHITE. It is a binding, legal contract.

Mr. SMITH. That is what I wanted to know.

Mr. COPELAND. Mr. President, I have a few minutes left on the pending amendment and 15 minutes on the bill, which I may take later in the day.

I simply want to say that we have developed a merchant marine which is of some consequence. It was not long ago, it was only at the beginning of the war, when very little of our products, agricultural and manufactured, were carried by our ships. Even now we are carrying only one-third of our foreign trade in American-flag ships. On the other hand, Great Britain carries 60 per cent of her own foreign trade in British Empire flag ships and is carrying 45 per cent of the total foreign trade of the entire world.

The British are greatly agitated over the situation. I called attention yesterday to the action of the British Chamber of Shipping. They have gone so far as to call upon those men who are to be delegates to the forthcoming economic conference to get in touch with the delegates of other nations in order that there may be some plan worked out to end the support America is giving to its American merchant marine.

Mr. McKELLAR. Mr. President, will the Senator yield to me?

Mr. COPELAND. I yield.

Mr. McKELLAR. The Senator says we are carrying only about one-third of our foreign trade in American-flag ships, and that is true. How much of a decrease does that represent for the last three years?

Mr. COPELAND. Decrease?

Mr. McKELLAR. We carried more than 50 per cent of that trade in American ships three years ago, and now we are carrying less than a third of it, while it is said we are building up our American merchant marine under this law.

Mr. COPELAND. The Senator is entirely wrong in that matter.

The PRESIDENT pro tempore. The time of the Senator from New York has expired.

Mr. COPELAND. I thought I had three minutes.

The PRESIDENT pro tempore. The time clerk informs the Chair that the Senator's time has expired.

Mr. COPELAND. I am sorry. There were a few words I wanted to say about the British shipping interests which are trying to coerce us into action.

Mr. JOHNSON. Mr. President, may I propound an inquiry to the Senator from New York?

The PRESIDENT pro tempore. The Senator from California is recognized for 15 minutes.

Mr. JOHNSON. I wanted to propound a question for information.

The PRESIDENT pro tempore. The Chair has to enforce the unanimous-consent rule.

Mr. JOHNSON. Very well, the Chair may take the time out of my time.

I ask the Senator from New York if he will do me the kindness to explain just what he means by interference of the British authorities with the American merchant marine.

Mr. COPELAND. Mr. President, I am glad to answer the Senator from California.

The British Chamber of Shipping in formal meeting passed certain resolutions. These they passed up to the Government to be turned over to the delegates to the economic conference. This is what section 9 of that document says. I quote:

> Viewing the position as a whole, we recommend that, both pending the conference and at the conference itself, Great Britain should endeavor to secure the cooperation of as many nations as possible pledged to work for the reestablishment of world trade through the removal of trade barriers, including the modification of tariffs upon the goods carried and the removal of all forms of discrimination (including subsidies) in favor of ships under the national flag by which such goods are carried. We further recommend that Great Britain and those cooperating nations should agree to confine most-favored-nation treatment to each other's trade and shipping.

They are planning to approach those delegates, not in open convention but by private arrangement, beforehand. It is their plan to work out some scheme by which they may take care of their favorite shipping, meaning the shipping of those European nations as against the shipping of the United States.

Further, they speak of what they are going to do to enforce their proposals. To me it is the most outrageous and selfish national policy I ever heard of.

Mr. JOHNSON. Does this refer to the economic conference about to be held?

Mr. COPELAND. The Senator is correct in his assumption.

Mr. JOHNSON. Preparations are already being made by Britain, by interviewing the various nations which are concerned, for what is to be done at that economic conference?

Mr. COPELAND. By secret diplomacy. That is exactly the plan.

Mr. JOHNSON. It is a species of lobbying?

Mr. COPELAND. Yes; a species of lobbying against Uncle Sam and the interests of the American merchant marine.

Mr. JOHNSON. I thank the Senator.

Mr. ROBINSON of Arkansas. Mr. President, in view of the debate which has already been so prolonged and protracted on this bill, and the large number of appropriation bills, as well as legislative matters of first importance, which ought to receive consideration during this session, I am going to make a suggestion to the Senator from Tennessee. It is that he modify his amendment so as to provide for reduction of seven and a half million dollars in the aggregate amount of this subsidy, with the recognition of the fact that the contracts themselves permit readjustments which may enable the incoming Postmaster General to work out arrangements consistent with the contracts, or consistent with supplemental contracts which may be agreed upon, so as not to involve the question of rescinding the contracts.

It seems to me that if the Senator should do that, we ought to take a prompt vote on the amendment, and then, if I may be indulged just a moment longer, we ought to go forward with the pending appropriation bill, and if possible dispose of it to-day, and then take up another appropriation bill; and I hope some agreement like that proposed two days ago by the Senator from Wisconsin [Mr. LA FOLLETTE] may be entered into.

The end of the session is approaching, and little progress is being made. The Senate has on its calendar a number of important measures already disposed of by the House of Representatives, and there are also some other bills which must be acted upon if possible before we conclude the present session.

I do hope that we may shorten these debates, and that amendments which are in the nature of changes in the law may be reduced to the smallest possible number, so that we may reach a conclusion. The situation in the Senate is discouraging, and it is disappointing, to say the least.

I make this suggestion to the Senator from Tennessee and hope he may find it consistent with his desires.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. ROBINSON of Arkansas. I yield.

Mr. COPELAND. I think that if the proposal suggested by the Senator from Arkansas, the leader on this side, is carried out, some agreement might be reached. My suggestion is that we pass over this item of the bill in order that some of us who are interested in this particular amendment might get together with the Senator from Tennessee and see if we could agree on such an amendment as is proposed.

Mr. McKELLAR. Mr. President, I want to state, first, that I am perfectly willing, for the reasons so excellently stated by the Senator from Arkansas, to accept the suggestion he makes, and I therefore want to perfect my amendment so as to make it provide for the striking out of $35,500,000, and inserting in lieu thereof $28,000,000. If I may, I do that at this time.

Mr. COPELAND. Mr. President, that does not cover what the Senator from Arkansas suggested. His suggestion was that the matter be handled by negotiation with the Postmaster General.

Mr. McKELLAR. I am perfectly willing to agree on that language, and would have reached that if the Senator from New York had given me an opportunity.

Mr. ROBINSON of Arkansas. I do not know that it is necessary to incorporate in the bill legislative language along that line, particularly at this stage of the proceedings. I said that under the contracts themselves it appears that readjustments may be made, within the limit of the amendment as modified by the Senator from Tennessee. My thought is that with the amendment he has suggested, we might reach a conclusion.

Mr. McKELLAR. I am perfectly willing to accept the suggestion.

Mr. WHITE. Mr. President, will the Senator from Tennessee yield?

Mr. McKELLAR. I yield.

Mr. WHITE. Let me ask whether that contemplates the withdrawal of the amendment of the Senator from Tennessee now pending, and the submission of a new amendment, reducing the amount carried in the bill from $35,500,000 to $28,500,000?

Mr. McKELLAR. To $28,000,000.

Mr. ROBINSON of Arkansas. It contemplates simply changing the amount in the amendment of the Senator from Tennessee.

Mr. WHITE. Then it would leave the other provisions of the amendment intact.

Mr. FLETCHER. There is no other provision.

Mr. WHITE. Oh, yes, there is.

Mr. McKELLAR. There is a proviso, that not to exceed $7,000,000 of that sum may be used for carrying foreign mail. I think that in carrying out the suggestion made, the $7,000,000 should be reduced, and if that is satisfactory, I am willing to change that amount.

Mr. FLETCHER. The amendment pending is the amendment to strike out the $35,500,000. There has been no amendment offered with reference to the $7,000,000.

Mr. McKELLAR. None at all, but I am calling attention to the fact that $7,000,000 of that amount was to be used as indicated.

The PRESIDENT pro tempore. The question now pending is on the amendment in the nature of a substitute proposed by the Senator from New York [Mr. COPELAND] to the amendment proposed by the Senator from Tennessee [Mr. McKELLAR], which amendment is to strike out "$35,500,000" and to insert in lieu thereof "$17,750,000." The Senator from Tennessee has perfect liberty to modify his amendment to any form he chooses, up to the minute the vote is taken on the amendment.

Mr. FLETCHER. Nobody questions that, and I am willing to vote on it right now.

Mr. McKELLAR. Let us vote.

Mr. ODDIE. Mr. President, I would like to hear the amendment read.

Mr. McKELLAR. Let the amendment be reported.

Mr. COPELAND. Mr. President, may I have the attention of the Senator from Arkansas for a moment?

Mr. ROBINSON of Arkansas. Certainly.

Mr. COPELAND. Let me suggest again that we pass over this item, in order to permit some conferences on the subject, to see if we can not bring in an amendment which will be mutually satisfactory. Then we will not be delaying the progress of the bill.

Mr. ODDIE. Mr. President——

The PRESIDENT pro tempore. The Senator from Nevada is recognized.

Mr. ODDIE. I strongly oppose the amendment of Senator McKELLAR providing for the reduction of the item in this bill for ocean mail and foreign air mail contracts. The whole question has been studied very carefully by the committee, which reported it for the same amount as passed by the House. I am very much opposed to the reduction, and ask the Senate to defeat this amendment. Otherwise our American merchant marine will be seriously crippled and driven off the seas. We can not afford to allow that to happen.

We had some very fine and helpful statements on the subject last night when this amendment was under discussion. I refer especially to the speeches made last night by the Senator from Florida [Mr. FLETCHER], the Senator from Maine [Mr. WHITE], the Senator from Massachusetts [Mr. WALSH], and the Senator from Alabama [Mr. BANKHEAD]. They gave a great deal of valuable data and showed that the reduction suggested would be ruinous to the service. I feel that even with the modification suggested by the Senator from Arkansas and the Senator from Tennessee it would still be far too much of a reduction. It would ruin the service.

At this time I will submit some data and ask to have it printed in the RECORD. First, I submit a statement by Malcolm M. Stewart, chairman of the Middle West Foreign Trade Committee, on the Benefits of the American Merchant Marine, which I ask may be printed in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The statement is as follows:

STATEMENT BY MALCOLM M. STEWART, CHAIRMAN MIDDLE WEST FOREIGN TRADE COMMITTEE, ON THE BENEFITS OF THE AMERICAN MERCHANT MARINE

The freight bill for American products in foreign trade amounted to approximately $9,000,000,000 for the 10-year period between 1921 and 1930, inclusive. Of this amount, American ships received about $3,000,000,000, or at the rate of $300,000,000 a year.

It is estimated by the United States Shipping Board that 85 per cent of the money paid to American operators is expended in this country. These expenditures are for fuel and other supplies coming from all parts of the country; for the payment of salaries and wages of operating staffs of the steamship companies; to the large number of stevedores and longshoremen employed in the handling of cargo; to approximately 185,000 men engaged in the operation of seagoing vessels and harbor craft; for insurance, office rent, dividends, if any, and for other miscellaneous purposes.

The magnitude of the merchant marine's shore business is indicated by the expenditures for fuel oil alone. Figures prepared

by the United States Bureau of Mines show that in 1930 American vessels engaged in the foreign trade consumed a total of 22,631,557 barrels of oil. In 1931 the figure was 19,919,906 barrels. Total consumption during 1930 for all American vessels was 94,131,000 barrels, or 3,953,502,000 gallons, which was nearly 10 per cent of the country's total production.

It is interesting to note the consumable stores required by the *Leviathan* for one round trip under normal operation. Among other items, this one ship requires 80,000 eggs, 600 boxes of apples, 15,000 pounds of butter, 20,000 pounds of jam, 20,000 pounds of cabbage, 6,000 pounds of game, 2,000 quarts of milk, 60,000 pounds of potatoes, 56,000 pounds of fish, 16,000 pounds of sugar, 2,000 pounds of grapes, 14,000 pounds of carrots, 400 crates of oranges, 250,000 cigarettes, 70,000 pounds of flour, 186,000 pounds of meat, 20,000 pounds of ham, 1,600 pounds of tomatoes, 2,240 pounds of tobacco, 3 tons of tea and coffee, and 3,756 tons of fresh water.

Figures prepared for two proposed new superliners show that the operators anticipated an annual revenue of $16,500,000, of which $1,888,000 would go for wages, $2,567,000 for food and other stores, $3,086,000 for fuel oil, $92,000 for stevedores, etc., $800,000 for port charges, $500,000 for commissions and brokerage, $823,000 for insurance, and almost $1,000,000 for maintenance and repairs. Of the $16,500,000 in expected revenue, at least $12,000,000 would be spent in voyage and lay-up expenditure. The balance would go for fixed charges, administrative costs, advertising, and so on. These two ships would thus keep in the United States some $16,000,000 to $18,000,000 a year which would otherwise largely be spent in foreign ports. (Advance report predicted a loss for the first year, hence possibility of $18,000,000 figure.)

Moreover, the vessels themselves would cost in the neighborhood of $32,000,000 apiece, all of which would be spent in American yards.

Reports worked up for these vessels allowed $4.75 a day as the expense of feeding a first-class passenger. Passengers in other classifications, together with the deck and engine departments, bring the total food bill up to $25,000 per ship for each voyage. The fuel-oil cost was set at $10,000 a voyage if the vessels were operated at top speed of 28 knots. Practically every State in the Union benefits from the tremendous quantities of material required by the American merchant marine. And it should be noted especially that these are not one time but continuing expenditures. Every ship built under the construction loan provisions of the merchant marine act will be operated under the American flag for at least 10 years. These ships during the next decade will leave in this country billions of dollars which would otherwise be spent abroad.

Mr. ODDIE. Then I would like to have placed in the RECORD a release from the National Committee on the Merchant Marine, from which the senior Senator from Massachusetts [Mr. WALSH] quoted last night in a very effective manner.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter is as follows:

WASHINGTON, D. C., *January 31, 1933.*

Released by National Committee on the Merchant Marine

Pursuant to a call issued by T. V. O'Connor, chairman of the United States Shipping Board, the National Committee on the Merchant Marine held its first meeting to-day in this city to discuss the more pressing problems now confronting American shipping. Attacks recently launched, here and abroad, against the present system of Government building and operating aids, formed the principal subject of discussion. Other subjects included the relationship of the Navy and the merchant marine, the intercoastal service, cooperation with the United States Chamber of Commerce and other commercial bodies, and methods by which the public's interest in maritime affairs could be utilized to the best advantage.

By a unanimous vote the following statement was issued by the committee:

"Certain proposals now pending in the Congress of the United States, if not properly considered, may very easily destroy the entire American merchant marine engaged in foreign trade, with a resultant loss of many millions of dollars a year to American industry, agriculture, and labor.

"The present American merchant fleet has been developed under definite laws of Congress, one of which is an act authorizing the Postmaster General to make ocean mail contracts with essential steamship lines as a Government aid to the establishment and maintenance of such lines. Forty-four mail contracts for 10-year periods have been made since 1928, when the act was passed. They constitute the very foundation upon which the American overseas merchant marine exists. They were entered into as legal, binding contracts, ordered by Congress after a most careful, thoroughgoing and painstaking investigation of every fact and phase of the question.

"Under these contracts private shipowners have brought the American merchant fleet in foreign trade into splendid position, although no ship company is making any real profit at this time. Nearly 600 American-flag ships now operate on 70 regular lines in foreign trade, as against only 17 in 1914. Forty-one new vessels have been constructed since 1928 to modernize the American fleet and give it the power to compete successfully with foreign lines. Our merchant marine operating in the foreign trade is capturing for American industry several hundred million dollars every year out of an ocean freight bill of $500,000,000 paid by American exporters and importers. Every dollar of that $200,000,000 goes back into the pockets of the American citizens who contribute in labor or supplies to the operation of the necessary ships.

"Under existing laws, and because of these American vessels, the proportion of the annual freight-bill money remaining in the United States has increased since the war from less than 10 per cent to nearly 40 per cent, which represents the relative proportion American vessels are now carrying of our own foreign commerce.

"And this is only a part of what the people of the United States get out of it. One hundred and fifty million dollars a year is paid to American labor as a consequence of the operation of our merchant marine in the foreign trade. Millions of dollars have been expended for ship construction in America since 1928, and the near future will see an expenditure of two hundred million for the same purpose. Shipping lines have invested millions of dollars of private capital to build up these ocean services—all on the guarantee that the Government aid provided by Congress in 1928 through mail contracts would be continued.

"If that aid were seriously curtailed at this time companies now operating in foreign trade would be destroyed and the United States thrown back to where it was in 1914, when it carried but 9 per cent of its own commerce. Two hundred millions now spent by the industry in the United States would then go to the ships and people of foreign flags.

"The most serious phase of the discussion of this subject to-day is the lack of real frankness. When Congress passed the act laying down the policy of extending Government aid through mail contracts it knew exactly what it was doing, what the aid was for, and why it was necessary in order to carry out its avowed purpose for the protection of the Government's interests. Congress was committing this Government to a determination to give financial aid to private shipowners for the specific purpose of partially offsetting the difference in construction and operation costs between foreign ships and American ships competing against each other. The congressional committees directly concerned looked the facts in the face and came to the conclusion that if we were to have a privately owned merchant marine in the foreign trade the Government would have to help meet these cost differentials. The alternative was continued ownership and operation by the Government—a policy which had been piling up large deficits year after year.

"Instead of directing the Secretary of the Treasury to pay money outright to American companies, Congress passed an act directing the Postmaster General to pay money in the form of mail compensation, thereby adopting a method which had long been followed by other maritime nations. It specified in the act the rates to be paid for the steamship service rendered in order to make certain that the aid would accomplish the national purpose.

"The Postmaster General has complied with the orders of Congress, the companies are receiving the aid, and, as a consequence, they are doing what Congress intended them to do—building up their lines to carry a reasonable proportion of American commerce with ships suitable and available to our Army and Navy as national defense units.

"To consider this aid from the point of view that it is a payment for carriage of mails is unfair. To break down payments under these contracts into so many dollars per mail sack or letter is ridiculous, and with the informed mind it approaches mental dishonesty. If all the Government wanted was transportation of mail, the rates would be much lower, and Congress would have made them lower; but instead it ranged them from $1.50 to $12 per nautical mile according to the size and speed of the ships rendering the particular service.

"The reason Congress adopted the policy of aid through mail contracts and put that policy into operation was that it believed it could save money thereby and avoid the alternative of Government ownership and operation in the maintenance of the necessary ocean trade routes. And it has saved money. Operating deficits of the Shipping Board when it handled its 38 Government services ran from forty to fifty million dollars a year. Under existing aid laws, the board has sold all but five of its lines to private companies, but its operating deficit on those five for 1932 was $8,000,000 without interest or depreciation charges. The Government mail aid for 1932 was about $20,000,000, which brings the total cost to the Government up to approximately $28,000,000.

"The present expense to the Government is about $25,000,000 instead of from $40,000,000 to $50,000,000 per annum—a saving of about $25,000,000 a year.

"In other words Congress, as a measure of economy, has knowingly and purposely voted approximately $20,000,000 a year for the maintenance and permanency of an adequate American merchant marine in private ownership in carrying out a national policy long since declared. It has decreed that the money shall be paid through mail contracts. Any attack upon those contracts now, in the midst of their guaranteed periods of operation, not only threatens the destruction of a great national industry which cost millions of dollars to establish, but is, in fact, an attack upon the will of Congress itself.

"The Postmaster General, the Attorney General, and the Comptroller General of the United States, with the cooperation of the United States Shipping Board, each within their respective provinces, have passed upon these ocean mail contracts. If there is anything radically wrong with any particular contract it could well and adequately be taken up for correction by the same or

succeeding executive heads of these administrative institutions of the Government."

By resolution of the main committee, Chairman O'Connor appointed the following subcommittee to make a further study of the shipping situation and report at a later date:

H. G. Smith, J. C. Rohlfs, Dr. Thomas H. Healy, Col. A. B. Barber, Basil Harris, J. Caldwell Jenkins, Fred J. Gauntlett, E. H. Duff, R. D. Sullivan, John D. Reilly, Malcolm M. Stewart, and J. F. Milliken.

Members of the committee and others in attendance were as follows:

T. V. O'Connor, chairman United States Shipping Board; S. S. Sandberg, vice chairman United States Shipping Board; Commissioner H. I. Cone, United States Shipping Board; Col. A. B. Barber, manager transportation division United States Chamber of Commerce; C. L. Bardo, president New York Shipbuilding Co.; Capt. S. W. Bryant, United States Navy; H. E. Cabaud, first vice president New York & Cuba Mail Steamship Co. (AGWI); Ira A. Campbell, general counsel American Steamship Owners' Association; Commodore H. A. Cunningham, port captain, Standard Shipping Co.; K. D. Dawson, vice president States Steamship Co.; R. Stanley Dollar, president Dollar Steamship Lines; James A. Farrell, jr., president American South African Line; Fred J. Gauntlett, representing Matson Navigation Co.; Robert L. Hague, vice president and general manager Standard Shipping Co.; Dr. Thomas H. Healy, assistant dean, School of Foreign Service, Georgetown University; J. Caldwell Jenkins, vice president Black Diamond Steamship Co. and chairman of the committee on shipping information, American Steamship Owners' Association; Edgar F. Luckenbach, president Luckenbach Steamship Co.; J. L. Luckenbach, executive vice president American Bureau of Shipping; Joseph T. Lykes, president Lykes Bros.-Ripley Steamship Co. (Inc.); George A. Marr, vice president Lake Carriers' Association; Capt. J. F. Milliken, secretary-treasurer Neptune Association; Cleveland A. Newton, general counsel Mississippi Valley Association; Robert H. Patchin, vice president Grace Steamship Co.; Capt. W. J. Petersen, Pacific American Steamship Association; John D. Reilly, president Todd Shipyards Corporation; J. E. Barnes; J. C. Rohlfs, president Pacific American Steamship Association; Basil Harris, vice president United States Lines Co.; J. P. Ryan, president International Longshoremen's Association; Charles M. Sheplar, president National Marine Engineers' Beneficial Association; H. G. Smith, president National Council of American Shipbuilders; Malcolm M. Stewart, chairman Middle West Foreign Trade Committee; Raymond D. Sullivan, president South Atlantic Steamship Line; J. Russel Wait, vice president American Association of Port Authorities; Roger Williams, vice president Newport News Shipbuilding & Dry Dock Co.; W. I. Denning, Export Steamship Corporation; Raymond T. Baker, representing States Steamship Co. and Pacific Atlantic Steamship Co.; E. H. Duff, American Steamship Owners' Association.

NATIONAL COMMITTEE ON THE MERCHANT MARINE.

Mr. ODDIE. The present policy covering ocean mail contracts is being attacked on various points. These attacks are receiving considerable publicity which is very detrimental and unfair to the American merchant marine. One point of attack is that the steamers of some of the lines carry only a small amount of mail for which they receive a very large amount of money from the Government. The statements are misleading because they do not recite the fact that the purposes of the merchant marine act are threefold, namely, for the actual transportation of foreign mail, the development of naval and military auxiliary, and the development of foreign and domestic trade and commerce. Therefore, any comparison of the compensation paid on an individual route against only one of these purposes, and ignoring the others, is improper.

Senate Document 69, being data furnished by the Postmaster General in response to a Senate resolution, shows that the total payments under the ocean mail contracts for the fiscal year ending June 30, 1931, were $15,847,664 more than would have been paid on the poundage basis had there been no such ocean mail contracts. Therefore, this is the amount which the United States is paying for the other two factors. I will ask permission to place in the RECORD a very valuable and helpful statement on Ocean Mail Contracts—a National Policy, by F. A. Bailey, of San Francisco, dated June 15, 1932. I also placed this in the hearings on the Treasury and Post Office Departments appropriation bill, pages 135 to 139.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The statement is as follows:

OCEAN MAIL CONTRACTS—A NATIONAL POLICY

By F. A. Bailey, San Francisco, June 15, 1932

Any consideration of the subject of aid to American-flag ships through the medium of ocean mail contracts and/or construction loans must be prefaced by an understanding of the purposes of the law.

First, it must be made clear that any such contracts were not intended for the physical carriage of mail only, and the payments thereunder can not be justified on such grounds alone. The act of Congress authorizing such contracts and loans clearly defines the purpose (Title I, merchant marine act, 1920), "that it is necessary for the national defense and for the proper growth of its foreign and domestic commerce that the United States shall have a merchant marine of the best equipped and most suitable types of vessels sufficient to carry the greater portion of its commerce and serve as a naval or military auxiliary in time of war or national emergency * * * and it is hereby declared to be the policy of the United States to do whatever may be necessary to develop and encourage the maintenance of such a merchant marine * * *."

Next comes the merchant marine act of 1928 (Title I, declaration of policy, sec. 1), "The policy and the primary purpose declared in section 1 of the merchant marine act of 1920 are hereby confirmed."

Then follows Title III in this act, authorizing construction loans, and Title IV, authorizing ocean mail contracts.

If Congress only intended to provide for ocean transportation of United States foreign mails, no additional law would have been necessary; if it only intended that such mail should receive the fastest and most economical dispatch the existing lines, mostly of foreign flag, would have supplied the necessary facilities. In 1928, when this law was passed, the passenger traffic of the United States was being handled 72 per cent by foreign-flag ships. It would seem fair to suppose that approximately this percentage of the United States mails would likewise have been handled by foreign ships, if only the matter of speed and economy was in the mind of Congress at that time.

A reading of the debates in Congress preceding the passage of the latter act, however, clearly shows that Congress understood it was passing a ship subsidy act and that it was not merely providing for the transportation of ocean mails. As the United States must have a merchant marine, and can only acquire and maintain such with Government aid, Congress adopted the policy followed by other nations, of giving aid to its foreign-trade merchant ships through the medium of ocean mail contract payments.

That the amount of such payments and aid to American ships is greater than that of foreign nations to their merchant marine, is due to the difference in the standard of living in America and in such other countries, which is reflected through the construction costs and operating costs of such vessels. To put it another way, these aids amount to a subsidy or a tariff, to equalize production and operating costs of American ships with their foreign competitors. This fact is clearly understood by the administration and has been followed with painstaking care by the Government on all later contracts. In order to insure this feature, the President appointed an interdepartmental committee on ocean mail contracts, consisting of the Postmaster General, the chairman of the United States Shipping Board, the Secretary of Commerce, and the Secretary of the Navy. These gentlemen in turn appointed a subcommittee of their principal assistants, who, with the aid of statisticians and actuaries, carefully investigate the difference in construction and operating costs of American ships and foreign-flag ships over any proposed ocean mail route before such route is certified and advertised for bids—thus the Postmaster General is advised of a maximum compensation (within the maximum already established by the law) which may be paid for such service, without doing more than placing the American ship on a footing of economic equality with its foreign competitor.

The purpose of the law has been clearly defined as threefold:

(a) Actual transportation of foreign mails.

(b) Development of naval and military auxiliaries.

(c) The development of foreign and domestic trade and commerce.

Therefore, any comparison of the compensation paid on an individual route against only one of these purposes, and ignoring the others, is improper. Senate Document No. 69 (being data furnished by the Postmaster General in response to a Senate resolution) shows that the total payment under ocean mail contracts for the fiscal year ending June 30, 1931, amounted to $15,847,664.15 more than would have been paid on the poundage basis had there been no such ocean mail contracts. Therefore this is the amount which the United States is paying for the other two factors:

(b) Naval and military auxiliaries.

(c) Commerce development.

The Postmaster General has stated that for the present fiscal year, on account of larger and faster ships placed into service, this amount will be somewhat increased but will be less than $20,000,000. Let us then analyze this amount and see whether the United States has made a good bargain and whether it is getting value for its money.

Ignoring for a moment the feature of commerce development, let us consider what happened at the time of the World War. At that time the United States had no merchant marine worthy of the name—it in fact consisted of 95 deep-water ships in near-by trades and only 17 in overseas trade. We were transporting 21 per cent of our foreign commerce. Practically every person is familiar with the shipbuilding program which the exigencies of war compelled. This called for the creation of 3,500 deep-water ships and an expenditure of $3,000,000,000. Of this program, 2,300 ships were completed, and with partial construction and building contract cancellations, the full amount of money was practically expended. Ignoring the hasty and therefore relatively poor construction of such vessels as compared with careful planning and leisurely

building, and ignoring also the entire principal amount of $3,000,000,000 expended, we find that the increase of the national debt by this amount figured at an interest rate of only 3⅓ per cent results in an interest payment every year of $100,000,000, which will continue for generations on account of the lack of necessary American ships in the emergency. This also ignores any consideration of prolonging the conflict by lack of preparedness, as well as the dangers involved as to successful prosecution of the war.

The United States is therefore obtaining for one-fifth of such interest alone an adequate merchant marine which will amply insure against a recurrence of this condition, and will at the same time provide the necessary avenues for the development of our foreign trade; furnish transportation facilities for the excess productions of farms, mines, and manufactures; furnish employment for a large number of American seafaring personnel at the American standard of living; train young cadets for officers on these ships where they will likewise be available for naval and transport purposes in an emergency; keep at home vast expenditures for shipbuilding, fuel, ships' stores, ship insurance, etc., which otherwise would be expended abroad by foreign-flag ships engaged in such commerce.

It should be borne in mind that this is not a temporary expedient. These ocean mail contracts provide that new vessels must be constructed and placed on the routes, of the most modern and up-to-date type; that the character of vessels suitable for such trades must be approved by the United States Shipping Board, and that plans and specifications covering the actual construction of vessels must be approved by the Navy Department to insure their adaptability as military auxiliaries. The cost of such construction features as compared with plain merchant ships, and all other costs, including the difference in building in American shipyards at higher labor rates, the difference in wages on American ships, and the difference in the standard of living aboard such vessels, is reflected in, and covered by, the one compensation item of a rate per mile operating over the particular ocean mail route.

The terms of the present ocean mail contracts require the construction of 60 new ships with 53 additional ships which may be required under certain conditions, all to be built in the manner and under the conditions before mentioned. At the present time there are built, or building, 31 such new vessels of 371,000 gross tons costing in excess of $138,000,000. There are also vessels reconditioned, or in the process of reconditioning, to the number of 15, of 132,000 gross tons, upon which has been, or is being expended, $11,724,000. It is true that a large amount of the capital for such purposes is being loaned to the operator by the Government under the terms of the construction loan law, but it should also be noted that for this purpose more than $37,000,000 has been expended by private capital. The balance of the amount loaned by the Government is at the prevailing rate of interest which certain Government securities are yielding at the time of each individual loan; the theory being that the Government would loan its borrowing power to the private shipowner at the same rate of interest which the Government itself was paying; private capital putting up 25 per cent of the cost or value of such vessels and the Government taking the whole thereof as security for its loan. These loans are repayable in 20 equal annual installments, and the interest thereon semiannually. It is not to be denied that certain interest rates are very low, and unquestionably lower than Congress really intended, as the yield on certain short-term securities was allowed by the law to determine the rate of interest on these loans. This has since been cured by an amendment to the law which places the minimum on such loans at 3½ per cent per annum. No criticism can properly be directed at the administrators of the law on account of any very low interest rate, as the law contained a formula for this purpose. Any such responsibility must rest with Congress who passed the law, as its authors have very frankly admitted. The only other course left to the administrators was to have refused all loans under the act, thus blocking the evident purpose of the law and presuming a judgment superior to that of the Congress.

While much has been said about a loan to shipowners under this law, it is not generally known that something more than $900,000,000 has been loaned by the Government under various farm loan acts as an aid to agriculture, at a rate of interest averaging less than 2 per cent. It also is a matter of record that considerable losses have occurred under such farm loans, whereas this has not been the case on loans to aid the construction of vessels under which the collateral is far more tangible, and as the loan is repayable in equal installments every year, the loan is reduced faster than the collateral value depreciates.

The American merchant marine is not the only industry receiving compensation in excess of poundage or postage rates. The Post Office Department reports show that there is being paid for the physical transportation of mail matter other than first class, an amount in excess of $100,000,000 per year more than the revenue received in postage from this class of mail matter. Whether this is justified does not concern us here and is merely stated to show that any operating deficit of the Post Office Department can not be solely charged to the aid given American ships through this medium.

It should be understood that without Government aid the American foreign-trade lines can not continue to operate in competition with their more cheaply built and operated foreign-flag competitors in overseas trade. The alternate to this policy is a reversion to the condition of the American merchant marine at the beginning of the World War with all of the risks which attend such a situation. In the present depression, even with Government aid, it is doubtful whether any of the subsidized lines are making expenses. This, of course, is no real criterion as unquestionably the foreign lines are also having an economic struggle.

The intangible feature of foreign-trade development is more difficult to show in specific figures, but equally definite and certain. It has been said that approximately 10 per cent of the population of the United States earn their livelihood from the production of export goods. If this be an accurate figure, then some thirteen million persons are dependent upon a trade which would certainly be in a precarious position if dependent upon the vessels of our competitors for the delivery of our products. Even to-day American foreign trade carried in American ships only amounts to approximately one-third (in 1917 it amounted to about one-fifth). Surely any merchant who could deliver only one-third of his goods to his customers by his own conveyances could not be said as having unduly stressed this portion of his business; nor could he be charged with extravagance if his delivery wagons as an individual unit of his business were not self-supporting. This is further emphasized if we consider that the remaining portion would have to be delivered by conveyances of the merchant's principal competitors. It would seem a fair statement that the United States as one of the leading first-class powers can not maintain a status of trade isolation. It would seem equally clear that the foreign commerce of this country can not be handled in ships of other nations except under conditions adverse to such trade, and to economic conditions in the United States. It would also seem obvious that considering the many advantages to the whole country, the real necessity for naval and military auxiliaries, and the economic factors involved, the United States has entered upon a policy which is entirely warranted and in fact vital to the country's interests, and that the costs involved are amply justified. It should be borne in mind that practically every other maritime nation of commercial importance is, in varying degrees, carrying out a similar policy, and that the larger amounts paid to American ships is relative to the higher standard of living as compared with such other countries. Under no circumstances will the operator of the American ships be compensated on a basis which would place him on more than an equal footing with his foreign competitor. The American shipowner does not ask for more than equal opportunities and if these are not exceeded, surely the Government is not overindulgent. It should also be borne in mind that these ocean mail contracts are effective only to foreign ports where such American-flag ships enter into direct competition with foreign vessels. It does not apply between American ports, which trade is restricted to American ships, in which the trades the compensation for mail transportation is upon a poundage basis.

There is no question but that on certain routes very little actual mail has been transported, as compared with the compensation paid. In these instances the purpose of the route has been the development of the foreign trade and commerce of the United States from certain American localities to certain trade areas, as well as the provision under such contracts of new vessels, for military and naval auxiliary purposes in an emergency. It is obviously unfair to take an individual instance of this character and draw an example reduced to dollars paid for pounds of mail carried. On such a basis the contracts could not possibly be justified, and they never were so intended.

Every route authorized as an ocean mail route has passed a searching examination by the interdepartmental committee, and representatives of the Departments of Commerce, Post Office, Navy, and Shipping Board (three of these being Cabinet officers) have determined and certified that the route is an essential one for the purposes defined in the law, and that the combined factors of mail transportation, military auxiliaries, and commerce development justify the making of a contract over such route; as well as the type, size, speed, capacity, and characteristics of vessels which should be employed on such route, and the frequency and regularity of sailings. The committee determines the maximum compensation which such vessels may obtain, not only under its own investigation to equalize foreign competitive conditions, but under the specific provisions of the law. The very nature of the preliminaries to such a contract clearly shows that it is not for the purpose of mail transportation alone, as the Departments of Commerce, Navy, and Shipping Board comprise the majority of the committee; and the law itself by basing compensation upon the tonnage of vessels as well as the speed, shows that the carriage of commerce as well as of mail was a controlling factor.

A careful analysis of the purposes, policy, law, and contracts will find them justified in the interest of the Nation. If any such contracts exist which do not measure up to the law, the Department of Justice should institute proceedings for their cancellation. If the existing contracts do so measure, they not only should be carried out by the Government for the purpose originally intended, but they should be defended on the broad, farsighted policy basis that they are in the interests of the whole Nation.

HIGHLIGHTS REGARDING OCEAN MAIL CONTRACTS

1. These contracts were not intended for the physical carriage of mail only, and payments thereunder can not be justified on such grounds alone.

2. The law authorizing these contracts specifically states that the primary purpose is the provision of naval and military auxiliaries for national defense and the development of foreign commerce.

3. The debate in Congress shows that Congress understood it was passing a ship's subsidy bill, but was doing so in the same manner as other nations give aid to their merchant marine.

4. The basis of all contracts is determined by the Postmaster General, Secretaries of Navy and Commerce, and chairman of the United States Shipping Board, in consultation, and a maximum fixed which can only place the American ship on a footing equivalent to its foreign competitor.

5. Total payments under these contracts for the last fiscal year were less than $16,000,000 more than would have been paid to carry the mail on a poundage basis. This amount is therefore what it is costing the Government for naval auxiliaries and commerce development. In comparison we are paying more than $100,000,000 per year interest on increased national debt on account of ships built during the World War, which would not have been necessary had we then possessed an adequate merchant marine.

6. More than $37,000,000 of private capital has been invested in ships built or improved under ocean mail contracts. The total cost of such ships built or building is more than $149,000,000.

7. The interest paid by shipowners on loans for such construction is the same rate which the Government is paying for the money it borrows. Therefore the Government is loaning its borrowing power to the shipowners without cost to itself.

8. More than seven times as much money ($900,000,000) has been loaned for farm aid at interest less than 2 per cent.

9. These contracts act as a subsidy or tariff to equalize production and operating cost of American ships with their foreign competitors. Without such aid operation of American ships on American standards in foreign trade is impossible. It is the same as tariff protection of any other American industry.

10. American-flag ships are carrying approximately one-third of our foreign trade to-day. They were carrying about one-fifth at the time of the World War. Surely this is only a reasonable participation in our own business.

11. The millions spent at home by these ships to American crews—fuel, food, stores, insurance—are important factors which should not be overlooked. All such expenditures by foreign vessels are almost entirely in the country of their flag.

Mr. KING. Mr. President, will the Senator permit an inquiry?

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Utah?

Mr. ODDIE. I yield.

Mr. KING. I have been told that most of the contracts which have been made by the Postmaster General under the law are held directly or indirectly by two corporations or two companies, the Dollar Line and the International Mercantile Marine, and that the latter company sails under the English flag most of the ships that are covered by these contracts. Is my information correct?

Mr. ODDIE. The Senator's information is not correct. There are a few ships of the International Mercantile Marine which they have been unable to dispose of which are still sailing under the British flag, but the great majority of those ships are American ships sailing under the American flag, and numbers of them are splendid, large, and new ships built in American yards by American labor. It is a large organization, and in a way it is interwoven in its organization with certain other American organizations. In the network of its operations, extending over various parts of the globe, the company for certain reasons has been compelled to retain certain British ships, because it has not been able to sell them. Complete data on this subject can be found in the voluminous hearings of the subcommittee of the Senate Appropriations Committee of last year, and I refer the Senator to them.

Mr. FLETCHER. Mr. President, may I interrupt the Senator to say that none of these contracts is made with any foreign-flag ship.

Mr. KING. Mr. President, will the Senator permit a further interruption?

Mr. ODDIE. Certainly.

Mr. KING. The Senator did not quite answer my question. My question was as to whether or not the two companies were the beneficiaries of most of the contracts, directly or indirectly. My understanding is that a number of corporations have been absorbed or are controlled by the International Mercantile Marine and that a considerable number of ships operated by that company, directly or indirectly through its associates and affiliates, are operated under the British flag. My recollection is that the statement made before the House committee indicates quite conclusively the accuracy of the implied question which I have propounded.

Mr. ODDIE. I refer the Senator to the hearings on the Treasury and Post Office Departments appropriation bill of last year, which are very voluminous and which contain full information on this point. Much of this information was brought out during the debate by the Senator from Tennessee [Mr. McKELLAR].

Mr. SMOOT. Mr. President, let me say that every dollar of the appropriations goes to American-flag ships. The contracts are not made with foreign ships.

Mr. ODDIE. There is no question about that.

Mr. McKELLAR. There are a number of shipping companies that have contracts that have several times as many ships under a foreign flag as they have under the American flag. The International Mercantile Marine and the United Fruit Co. and others are some of them. There is no question about it. There is evidence of that in the record.

Mr. SMOOT. I say again that every ship given a contract for carrying mail is an American-owned ship.

Mr. McKELLAR. Oh, yes; where the International Mercantile Marine owns so many British ships and so many American ships, the subsidy actually goes to an American ship. That particular ship collects it, it is true, but the International Mercantile Marine owns it and, of course, indirectly the subsidy goes to the foreign vessels.

Mr. SMOOT. I do not believe the Senator really wants any American company to do only American business.

Mr. McKELLAR. Oh, no; but when we are trying to build up an American merchant marine and subsidize companies that fly more foreign flags than they do of the American flag we are doing a mighty poor business in building up the American merchant marine.

Mr. SMOOT. I want to say to the Senator that the contracts let for carrying the mail are let to companies that do not fly more foreign flags than they do of the American flag.

Mr. McKELLAR. Does the Senator mean to say the International Mercantile Marine and the United Fruit Co. do not have more ships flying a foreign flag than they have ships flying the American flag?

Mr. SMOOT. The United Fruit Co. has ships running to all parts of the world. There is no question about that, but they are an American concern, with American capital and American officers.

Mr. McKELLAR. That is a very different thing.

Mr. SMOOT. The position the Senator is taking now is that they are foreign concerns because they do a foreign business.

Mr. McKELLAR. Oh, no. The Senator misunderstands me entirely. I am merely saying that the companies have more foreign ships flying foreign flags than they have American ships flying the American flag.

Mr. COPELAND. Mr. President——

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from New York?

Mr. ODDIE. I yield.

Mr. COPELAND. This is an old worn-out tale. We have been hearing it for a long time. Every Senator knows that every ship we have is an American ship. Our President Wilson asked Mr. Franklin not to dispose of them to the British. Then we have two or three ships carrying the Panama flag, and we are trying to help their national pride, which they hold very properly. But when we talk about great numbers of foreign ships receiving subsidies from our mail contracts it is perfectly absurd and without any foundation in fact.

Mr. WHITE. Mr. President, will the Senator yield?

Mr. ODDIE. I yield to the Senator from Maine.

Mr. WHITE. Mr. President, reference has been made to the United Fruit Co. and its ownership of ships. It is true that in 1928 when this legislation was enacted the United Fruit Co. owned more foreign vessels than it owned American vessels. It had some thirty-odd foreign vessels at that time. It has reduced that number. The fact of the matter is that under the operation of this law the United Fruit Co. to-day has American vessels of the value of more than $33,500,000, and it has foreign vessels of the value of a trifle over $10,000,000. Since this legislation was enacted the United

Fruit Co. has increased its American tonnage by 67 per cent, as I stated last night, and its investment in American ships by 771 per cent.

The ships which the United Fruit Co. owns under foreign flags are almost wholly small vessels operating and used largely as feeders, running down to Honduras, Panama, and some of the other South American countries, and serving only as feeders for the larger and better ships of the United Fruit Co., which are American-flag ships.

The same situation is true with respect to the International Mercantile Marine. Since the war the International Mercantile Marine has disposed of more than 55 foreign-flag ships with a tonnage of more than 617,000 tons. To-day the International Mercantile Marine is operating more American-flag ships than foreign-flag ships. To-day the foreign-flag ships which the International Mercantile Marine owns are ships of an average age of 15 years or thereabouts, fast approaching the age of commercial inefficiency, while their American-flag ships are new and better and speedier ships, as fine ships as sail upon the seas. Two of them have been built under the provisions of this law in American yards, and those two ships have cost substantially in excess of $10,000,000 each. So the substantial facts are not as stated by the Senator from Tennessee.

Mr. ODDIE Mr. President——

The VICE PRESIDENT. The Senator has about a minute of his time left.

Mr. ODDIE. I want to make just one statement. I want to refer to the statement made by the Senator from Florida [Mr. FLETCHER] last night. He offered a great quantity of most useful and necessary data for the determination of this question.

Mr. FLETCHER. Mr. President, I ask unanimous consent that we vote at once on the amendment.

Mr. ODDIE. I hope that that may be done.

The VICE PRESIDENT. The question is on the substitute offered by the Senator from New York.

Mr. FLETCHER. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. McKELLAR. Let the amendment be stated.

Mr. COPELAND. Mr. President, I desire to withdraw the substitute which I offered.

The VICE PRESIDENT. Then the question is on the McKELLAR amendment as modified.

Mr. FLETCHER. Let us have the yeas and nays.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. WALSH of Massachusetts (when Mr. COOLIDGE's name was called). I wish to announce that my colleague [Mr. COOLIDGE] is absent from the city owing to illness in his family.

Mr. FRAZIER (when his name was called). On this question I am paired with the junior Senator from Florida [Mr. TRAMMELL]. If I were permitted to vote, I would vote "yea," and I understand the Senator from Florida, if present, would vote "nay."

Mr. HEBERT (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. BAILEY]. In his absence I withhold my vote. If permitted to vote, I should vote "nay."

Mr. NORRIS (when Mr. HOWELL's name was called). I desire to announce that my colleague, the junior Senator from Nebraska [Mr. HOWELL], is absent from the city on official business of the Senate. I ask that this announcement may stand for the day.

Mr. COSTIGAN (when Mr. NEELY's name was called). The Senator from West Virginia [Mr. NEELY] is unavoidably absent. I am authorized to say that if present he would vote "yea."

Mr. ROBINSON of Indiana (when his name was called). I have a general pair with the junior Senator from Mississippi [Mr. STEPHENS]. In his absence, and not knowing how he would vote, I withhold my vote. If permitted to vote, I should vote "nay."

Mr. THOMAS of Idaho (when his name was called). I have a general pair with the Senator from Montana [Mr. WHEELER] and therefore withhold my vote. If permitted to vote, I should vote "nay."

The roll call was concluded.

Mr. AUSTIN. I have a pair on this vote with the junior Senator from West Virginia [Mr. NEELY], who, if present, would vote "yea." I withhold my vote. If permitted to vote, I should vote "nay."

Mr. BRATTON. I transfer my general pair with the Senator from Nebraska [Mr. HOWELL] to the Senator from Illinois [Mr. LEWIS] and vote "yea."

Mr. BINGHAM (after having voted in the negative). I have a general pair with the junior Senator from Virginia [Mr. GLASS]. I transfer that pair to the junior Senator from California [Mr. SHORTRIDGE] and permit my vote to stand.

Mr. FRAZIER. I wish to announce that my colleague [Mr. NYE] is unavoidably absent. He is paired on this vote with the senior Senator from Louisiana [Mr. BROUSSARD].

Mr. FESS. I wish to announce the following general pairs:

The Senator from Wyoming [Mr. CAREY] with the Senator from Louisiana [Mr. LONG];

The Senator from Missouri [Mr. PATTERSON] with the Senator from New York [Mr. WAGNER];

The Senator from Illinois [Mr. GLENN] with the Senator from Virginia [Mr. SWANSON]; and

The Senator from South Dakota [Mr. NORBECK] with the Senator from Arizona [Mr. HAYDEN].

Mr. SHEPPARD. I desire to announce that the Senator from Nevada [Mr. PITTMAN], the Senator from Arizona [Mr. HAYDEN], the Senator from Arkansas [Mrs. CARAWAY], the Senator from Illinois [Mr. LEWIS], and the Senator from Arizona [Mr. ASHURST] are necessarily detained on official business.

I also desire to announce that on this question the Senator from Arkansas [Mrs. CARAWAY] has a special pair with the Senator from Massachusetts [Mr. COOLIDGE]. If the Senator from Arkansas were present, she would vote "yea," and the Senator from Massachusetts, if present, would vote "nay."

Mr. FLETCHER. I desire to announce that my colleague [Mr. TRAMMELL] is detained because of a death in his family.

I also wish to announce that the Senator from Mississippi [Mr. STEPHENS], the Senator from North Carolina [Mr. BAILEY], the Senator from New York [Mr. WAGNER], the Senator from Virginia [Mr. GLASS], the Senator from West Virginia [Mr. NEELY], the senior Senator from Louisiana [Mr. BROUSSARD], the junior Senator from Louisiana [Mr. LONG], and the Senator from Massachusetts [Mr. COOLIDGE] are necessarily out of the city.

The result was announced—yeas 32, nays 36, as follows:

YEAS—32

Barkley	Capper	Harrison	Norris
Black	Clark	Hull	Robinson, Ark.
Blaine	Connally	Kendrick	Russell
Borah	Costigan	King	Sheppard
Bratton	Cutting	La Follette	Shipstead
Brookhart	Dill	Logan	Thomas, Okla.
Bulow	George	McGill	Tydings
Byrnes	Gore	McKellar	Walsh, Mont.

NAYS—36

Bankhead	Fess	Keyes	Smith
Barbour	Fletcher	McNary	Smoot
Bingham	Goldsborough	Metcalf	Steiwer
Bulkley	Grammer	Moses	Townsend
Copeland	Hale	Oddie	Vandenberg
Couzens	Hastings	Reed	Walcott
Dale	Hatfield	Reynolds	Walsh, Mass.
Davis	Johnson	Schall	Watson
Dickinson	Kean	Schuyler	White

NOT VOTING—28

Ashurst	Frazier	Long	Shortridge
Austin	Glass	Neely	Stephens
Bailey	Glenn	Norbeck	Swanson
Broussard	Hayden	Nye	Thomas, Idaho
Caraway	Hebert	Patterson	Trammell
Carey	Howell	Pittman	Wagner
Coolidge	Lewis	Robinson, Ind.	Wheeler

So Mr. McKELLAR's amendment as modified was rejected.

Mr. DICKINSON. Mr. President, I offer the amendment which I send to the clerk's desk.

The VICE PRESIDENT. Let the amendment be stated.

The CHIEF CLERK. On page 34, line 19, it is proposed to strike out the words "the acquisition of sites or of additional land."

Mr. DICKINSON. Mr. President, my only purpose in offering this amendment is this: The public-building program must be curtailed, but so long as we permit the department to use available funds for the acquisition of additional sites they will continue to buy land in various localities, and, after they have once bought the land, they immediately begin making plans for buildings and let the contracts for them. They have on hand now about $83,000,000 with which to complete the purchase of all the sites which are under contract or under consideration.

My theory is that by the adoption of this amendment we will serve notice on the department that they must curtail their building program; that we expect to bring it to an end; but the amount carried in this bill may be used for the completion of buildings that are under contract.

Mr. DILL. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Washington?

Mr. DICKINSON. I yield.

Mr. DILL. I did not get clearly the purport of the Senator's amendment.

Mr. DICKINSON. It is to strike out the words——

Mr. DILL. An answer to the question I am about to ask I think will clear up my doubt. Does the amendment prohibit the purchase of sites between now and July 1?

Mr. DICKINSON. No; it will have no effect on that. It will apply only after July 1, and will simply prevent the department from continuing acquiring land in various localities. It is, in effect, a notice of the ending of the public-building program.

Mr. DILL. The reason I ask the question is that there are a number of sites just now on the verge, as it were, of being bought, all the preliminary work having been done, and I do not think they should be interfered with.

Mr. DICKINSON. Let me suggest to the Senator that the proposed amendment not only will not prevent any sites being taken over between now and July 1, but there will remain available the $83,000,000 the department still has on hand to complete contracts in the future. It will, however, prevent them from using the money that is in this bill for the acquisition of additional sites. I think the amendment should be adopted.

Mr. BLAINE. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Wisconsin?

Mr. DICKINSON. I yield.

Mr. BLAINE. Would the Senator's amendment prevent the Treasury Department from carrying out the provisions of the emergency relief bill which we passed at the last session of Congress providing for the acquisition of sites and the construction of post-office buildings designed to take the place of buildings which are now under lease at enormous rental?

Mr. DICKINSON. It would not affect at all the expenditure of those funds. It would apply only to the $50,000,000 carried in this bill which are needed for the completion of buildings which are under contract or may be put under contract in the future. It would have no effect on the emergency legislation at all.

Mr. BLAINE. It might have no legal effect, but might it not cause the Secretary of the Treasury to consider the amendment as announcing the policy of Congress, and, therefore, he would not carry out the provisions of the emergency act?

Mr. DICKINSON. The amendment could not be so interpreted. It would only affect the particular $50,000,000 that is involved in this bill.

Mr. VANDENBERG. Mr. President, may I ask the Senator a question?

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Michigan?

Mr. DICKINSON. I yield.

Mr. VANDENBERG. The Senator says it would affect only the $50,000,000 carried in this bill. As I understand, it would not remove or eliminate the $50,000,000, but would transfer its expenditure from sites to construction. Is that correct?

Mr. DICKINSON. The language now in the bill provides—

For the acquisition of sites or of additional land, commencement, continuation, or completion of construction.

The amendment would leave the provision for the commencement, continuation, and completion of construction in the bill and would limit the expenditure of the $50,000,000 to that purpose, rather than to permit the department to expand their activities and to purchase additional sites throughout the country.

Mr. VANDENBERG. May I ask the Senator if they do not need $50,000,000 for the next year for their immediate construction program—and I assume they do not, or it would be estimated—why does he not save the $50,000,000?

Mr. DICKINSON. They do need it for construction, but I want them to limit it to construction and to quit expanding the program by buying additional sites. In other words, there is some place where we must cut down the building program, and the only way we will cut it down is by ceasing the purchase of sites, because when a site is purchased it is an easy matter to say, "We have planned the building; we have the specifications ready; the contract is in process of being let, and therefore we need an additional few million dollars to complete the program." This will limit the $50,000,000 in this bill to the construction and completion of buildings in furthering the contracts that are already in existence. The department officials will have $83,000,000 with which they can complete the purchase of the sites that are negotiated for; and I believe that in all justice to the taxpayers we ought to serve notice that we want to curtail the building program.

Mr. ODDIE. Mr. President, will the Senator yield?

Mr. DICKINSON. I yield.

Mr. ODDIE. I should like to have the Senator's opinion as to the effect this proposal would have on certain tracts for which the Government has been negotiating for some time past, and in the case of which litigation has prevented the closing of contracts for the purchase of the land.

Mr. DICKINSON. The former bill carries the language "for the acquisition of sites." According to the testimony before our commitee, the department had $83,000,000 on hand for the continuation of the next year's building program. They needed a supplemental appropriation of $50,000,000 in order to complete next year's building program. What I am doing is simply saying, "Complete the contracts for the purchase of the ground you have negotiated for and contracted for, but use the $50,000,000 that is in this bill for the completion of your construction."

Mr. HALE. Mr. President, will the Senator yield for a question?

Mr. DICKINSON. I yield.

Mr. HALE. Is there not danger that some of the approved projects that would come in under the lump-sum appropriation from Congress would be held up by cutting off the right to purchase sites, and that the emergency appropriation, which is for matters that are not quite as important as those that were in the original project, would be allowed to go on in full force?

Mr. DICKINSON. This would only attach to the $50,000,000 in this bill.

Mr. HALE. Precisely; but the $50,000,000 is for part of the projects that were in the original lump-sum appropriation.

Mr. DICKINSON. All I am doing is limiting the department officials on this $50,000,000 so that they can not buy additional land; that is all.

Mr. HALE. I understand; but a lot of the projects still involve additional sites that must be acquired.

Mr. DICKINSON. Oh, yes; but they have $83,000,000 on hand with which to purchase them.

Mr. HALE. But those projects are considered to be the most vitally necessary of all the new building projects; and I am afraid the Senator would be tying up some of those, and leaving the emergency appropriations with freedom to go ahead.

Mr. DICKINSON. The amendment does not affect the money already appropriated. It will affect only this $50,000,000.

Mr. HALE. Well, I shall not oppose the amendment, because I think it can be fixed up in conference if there is any trouble.

Mr. KING. Mr. President, will the Senator yield for a question?

Mr. DICKINSON. I yield.

Mr. KING. Would not the Senator consent to amend his motion or broaden it so as to prevent the further purchase of sites?

What I am afraid of, although I am inclined to vote for the Senator's motion, is that in the haste of the department officials to utilize the funds now available between now and the coming in of the next administration, some improvident purchases may be made, and the entire amount available utilized. The Senator from Maine [Mr. HALE] has just indicated that there are many negotiations now pending. I was wondering if those negotiations might not be accelerated by the desire to complete the purchases before the next administration comes in.

I do not mean to be partisan at all, nor do I mean to imply that anything improper would be done. That is far from my point; but I was wondering if it would not be better just to interdict any further expenditures in the purchasing of sites.

Mr. DICKINSON. I think it is better to put the limitation on the funds that are carried in this bill, for the reason that that leaves flexibility as to the funds that are in the hands of the Treasury to carry out any existing contracts; and I believe this will be notice to the officials as a result of which they will not proceed to extend their purchases beyond what they should in all reason.

Mr. KING. Mr. President, while I may not approve of the motion in all of its implications, it is so exhilarating to find some one on either side of the Chamber—may I say, and I do not mean to be offensive on this side of the Chamber—signifying a desire for economy, that I shall vote with the Senator from Iowa.

The VICE PRESIDENT. The question is on the amendment of the Senator from Iowa [Mr. DICKINSON].

The amendment was agreed to.

The VICE PRESIDENT. The bill is open to amendment.

Mr. KING. Mr. President, may I inquire of the Senator who has charge of the bill whether all the amendments that have been reported by the committee have been disposed of?

Mr. ODDIE. All the amendments authorized by the committee have been disposed of.

The VICE PRESIDENT. The Chair is advised that one amendment has been sent up that has not been acted upon. Let it be stated, so that we may know whether or not that is true.

The LEGISLATIVE CLERK. The Senator from Nevada [Mr. ODDIE] proposed, on page 35, lines 17 and 18, to strike out "among those to be served: *Provided*, That the Pan American Union agrees" and to insert in lieu thereof "and the American Red Cross Building: *Provided*, That the Pan American Union and the American Red Cross agree."

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Nevada.

The amendment was agreed to.

The VICE PRESIDENT. Are there any further amendments?

Mr. ODDIE. Mr. President, I send to the desk an amendment which I hope the Senate will agree to. I ask to have it stated.

The VICE PRESIDENT. The amendment will be read.

The LEGISLATIVE CLERK. On page 36, after line 3, it is proposed to insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to subcontractors, labor, and material men who furnished labor and material to the Plains Construction Co., defaulted general contractor for the construction of the post office at Las Vegas, Nev., such sums as he may consider equitable and just to reimburse said subcontractors, labor, and material men for unpaid accounts left by said Plains Construction Co. at the time of its default, said sums to be paid only upon proper proof of actual losses sustained exclusive of profit; and there is hereby made available for this purpose not to exceed $20,000 from any sum which may remain from the lump-sum appropriations made for building-construction purposes, notwithstanding the amount of the claims of said subcontractors, in addition to the cost of completing the building, exceed the limit of cost for the construction of the Las Vegas post office.

Mr. KING. Mr. President, I raise the point of order against this amendment. It is general legislation upon an appropriation bill.

Mr. ODDIE. Mr. President, if the Senator will withhold the point of order, I should like to present a letter from the Assistant Secretary of the Treasury which has been received by the chairman of the Committee on Public Buildings and Grounds, the Senator from New Hampshire [Mr. KEYES], since the committee acted on this bill. This is a favorable report from the Treasury Department on the bill I have presented, and this amendment is in the same form. It involves a matter of very great importance to a number of men. While it is local in its scope to a certain extent, the principle involved is very important. It means that the Federal Government is responsible for certain men being defrauded of money which is due them because of the negligence of our Government.

The contract for the Federal building in Las Vegas was let by the Treasury Department over two years ago. The three bondsmen appearing to have signed their names to this bond in compliance with the law did not sign their names at all. The contractor forged the names of these bondsmen on the bond. The contractor failed, after having done certain work under the contract. He failed to pay his labor and for supplies and materials furnished for the building. As the bondsmen's names were forged, there was therefore no bond. These men have been defrauded out of their money which they are unable to secure.

These men worked for wages on the building amounting to several thousand dollars. The material men furnished materials amounting to several thousand dollars. They have not been paid. The Government was not sufficiently diligent in seeing that this bond was a proper bond. The Government is to blame; and the Government should not sit by and see these men suffer by being deprived of the money they have earned and to which they are entitled.

The Treasury Department has sent this letter, which covers the case very clearly, and which reports favorably on the bill I introduced in which this amendment is in the same form. I ask that it be placed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter is as follows:

LAS VEGAS, NEV., *January 30, 1933.*

MY DEAR MR. CHAIRMAN: Receipt is acknowledged of your letter of January 10, 1933, transmitting a copy of bill S. 5362, authorizing the Secretary of the Treasury to pay certain subcontractors for material and labor furnished in the construction of the post office at Las Vegas, Nev., and requesting to be furnished with the views of the Treasury Department.

This bill was introduced as a result of the default of the Plains Construction Co. in its contract for the construction of the post office at Las Vegas, Nev., and the unusual circumstance that, upon the default, it was discovered the personal sureties purporting to support the performance bond of the contractor were without responsibility for the reasons which follow:

On June 13, 1931, bids were invited for furnishing the materials and performing the work required for the construction, except elevator, of the United States post office, courthouse, etc., at Las Vegas. The bids were opened on July 22, 1931, and there were received 21 proposals. The Plains Construction Co., Pampa, Tex., was low bidder in the amount of $237,000, the bid having been submitted in the proper form.

The low bidder was not financially rated or listed, and the Federal custodian at Pampa, Tex., was instructed to wire his recommendations relative to the technical and financial ability of the Plains Construction Co. Also, the contractor was requested to furnish evidence of his qualifications.

The custodian reported that the financial statement of men back of the Plains Construction Co. showed their net worth to be $149,600, and that its ability was very good, also that the contractor's work at Pampa, Tex., had been satisfactory. The con-

tractor, J. O. Pearson, doing business as the Plains Construction Co., furnished a list of the following contracts which he had completed during the past three years:

Methodist church, Quitaque, Tex.; Methodist church, Estelline, Tex.; city fire station, Pampa, Tex.; Smith Building, Pampa, Tex.; Stephenson's Funeral Home, Pampa, Tex.; Chevrolet Building, Pampa, Tex.

He also stated that he had been the general superintendent of construction on several large buildings in Texas and elsewhere, including the following:

Commonwealth Bank Building (10 stories), Dallas, Tex.; Kemp & Kell Bank Building (5 stories), Wichita Falls, Tex.; Canadian General Electric Building (5 stories), Calgary, Alberta; Gray County Courthouse, Pampa, Tex.

He also listed the following concerns, who furnish him material on open account:

Austin Bros. Steel Co., Dallas, Tex.; Mosher Steel & Machinery Co., Dallas, Tex.; Reliance Brick Co., Dallas, Tex.; Atlanta Terra Cotta Co., Dallas, Tex.; Becker Cut Stone Co., Amarillo, Tex.; Steves Sash & Door Co., Fort Worth, Tex.; Southwestern Portland Cement Co., El Paso, Tex.; Western Sand & Gravel Co., Amarillo, Tex.; Roberts Tile & Marble Co., Amarillo, Tex.; Clowe & Cowan, plumbing and heating, Amarillo, Tex.; Panhandle Lumber Co., Pampa, Tex.; Foxworth-Galbraith Lumber Co., Pampa, Tex.; Northwestern Terra Cotta Co., Denver, Colo.

The contractor furnished individual bondsmen; and certificates of sufficiency, executed by the county clerk of Gray County, Tex., showed them to be jointly worth an amount sufficient to qualify them as sureties. The names of the sureties are: E. Boss Clay, J. M. Dodson, and J. F. Meers, all of Pampa, Tex. Their total assets amount to $267,000, and the amount of the bond on the contract is $119,000.

The bonds were apparently executed and completed in the proper form and passed the scrutiny of the Solicitor of the Treasury as to form and execution. Upon receipt of complaints of the contractor's failure to pay subcontractors and material men, the case was investigated. Such investigation being made, it was learned that the contractor was without funds, and in all probability would not be able to proceed with the work. Before the department had an opportunity to call upon the bondsmen, word was received that the three bondsmen whose names appeared as individual sureties claimed that they did not sign the bond for the Plains Construction Co., and held themselves to be without responsibility for the payment of debts incurred by the contractor.

From investigations made by two of the department's representatives who were detailed for this purpose, it developed that the three sureties did not in fact sign the bond, but that the contractor, Pearson, signed the bondsmen's names to the several bonds and accompanying certificates, and that the notary public and county clerk took the acknowledgments without the presence of the bondsmen. The department is in receipt of a letter from the contractor in which he states that he signed the bondsmen's names to the bonds with their permission, and that he was to pay each one $800 for the privilege. Accompanying his letter were copies of purported agreements to pay to the bondsmen the above amount at the rate of $80 per month, and also to sign his life-insurance policy over to the bondsmen.

The Department of Justice, through the Bureau of Investigation, was requested to make an investigation to determine the course which should be pursued relative to the contractor and the bondsmen. The Department of Justice reported that the facts presented a case for the consideration of the grand jury with respect to the criminal liability of Pearson and possibly the young lady notary public, but that the civil liability of the alleged sureties on the bond could not be established. Later, criminal action was brought against the contractor in the State of Texas, but he was acquitted.

When the work was readvertised, a list of the subcontractors was included in the specifications, so that the bidders might have an opportunity to avail themselves of the material already fabricated and probably suitable for use. This did not make it mandatory on the successful bidder to utilize the former subcontractors or their material, but the department desired to afford the labor and material men such opportunity as it could to avoid losses. There appears to be no legal liability on the Government to pay these claims, but in view of the fact that much of their labor and material went into the building for the Government's benefit and their subcontracts were made in the belief that their rights were protected, it is believed that those with justifiable claims should be reimbursed. Before default $8,833.50 was paid the contractor.

The department, therefore, recommends the passage of the bill S. 5362.

This case has been the subject of very complete hearings before the Appropriations Committee of the Senate, and your attention is respectfully called to the hearings on the Treasury and Post Office Departments appropriation bill, 1933, page 1134, and the hearings on the Treasury and Post Office Departments appropriation bill, 1934, page 11.

Very truly yours,

FERRY K. HEATH,
Assistant Secretary of the Treasury.

Hon. HENRY W. KEYES,
Chairman Committee on Public Buildings and Grounds,
United States Senate.

Mr. ODDIE. The chairman of the Committee on Public Buildings and Grounds, the Senator from New Hampshire [Mr. KEYES], has told me that he is in favor of having this provision placed on this bill as an amendment. It is practically the only way in which it can be carried through, because of the shortness of time, and I hope the point of order will be withdrawn. The matter involves the good name and the good faith of our Government toward these men who have earned their money.

I will ask the Senator from Utah if he will not consent to withdraw his point of order.

Mr. KING. Mr. President, I agree with my able friend that a principle is involved. If, by this legislation upon an appropriation bill, we set this precedent, there is no limit to which demands may be made for the reformation of contracts which have been entered into by the Government and by contractors and subcontractors, nor is there any limit to the number of claims and the amount of claims that may be presented upon these appropriation bills.

Under the statement made by my friend, if a bill were submitted for our consideration, I should be perfectly willing to vote to refer this matter to the Court of Claims, or I should be perfectly willing for the Claims Committee of the Senate to make an examination of this matter and determine whether, in all justice, an appropriation should be made. I respectfully submit, however, that if we permit claims to be presented upon these appropriation bills, where there is no opportunity for full investigation, we shall be flooded with claims. The Claims Committee might just as well abandon its functions and the Court of Claims of the United States relinquish the authority which has been conferred upon it.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield for a question?

Mr. KING. I yield.

Mr. WALSH of Massachusetts. Is there any precedent for a proposal of this kind? Does the Senator know of any?

Mr. KING. Well, we do so many incongruous things that there may be some precedent. Some Senator may have raised the point of order and withdrawn it out of regard for the Senator who tendered the proposal; but it does seem to me that it is a precedent, whether or not we followed it in the past, that ought not to be continued.

The VICE PRESIDENT. The Chair sustains the point of order.

The bill is open to amendment. Has the chairman of the committee any further amendments?

Mr. ODDIE. No further amendments.

Mr. KING. Mr. President, a parliamentary inquiry: Are amendments to the text in order now, or must we continue with all the amendments that have been reported by the committee and dispose of them before amendments to the text of the House bill may be tendered?

The VICE PRESIDENT. Amendments to the text, except the economy section of the bill, are in order.

Mr. KING. That is, to the House bill?

The VICE PRESIDENT. Yes; except the economy section.

Mr. FLETCHER. Mr. President, a point of order.

The VICE PRESIDENT. The Senator from Florida will state it.

Mr. FLETCHER. I understand that the statement is made that there are no further amendments. What about the committee amendment beginning on page 65, section 4? That is a committee amendment.

The VICE PRESIDENT. The Chair is advised that there was an agreement that the economy section was to be left over until the other part of the bill was disposed of.

Mr. FLETCHER. The general announcement was made that there were no more committee amendments, and I was wondering what became of that section.

The VICE PRESIDENT. It was to go over under an agreement. The present occupant of the chair was not in the chair when the agreement was made, but he is advised by the clerk that that agreement was made.

Mr. KING. Mr. President, I offer the following amendment: On page 11, line 24, strike out the numerals " 19,900,000," and insert in lieu thereof " 15,000,000."

Briefly, Mr. President, this is an appropriation for the Bureau of Customs. The amount carried in the bill for the bureau for the next fiscal year is, in my opinion, entirely too large.

Mr. FESS. A parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. FESS. Are individual amendments to the bill, which are not amendments to amendments, now being offered before we go on with the economy amendment?

Mr. KING. I made that inquiry and was advised that that was the order.

The VICE PRESIDENT. That was the understanding.

Mr. FESS. That we could go ahead in that way?

The VICE PRESIDENT. That was the understanding.

Mr. FESS. It seems to me it would have been better for us to have gone on with the amendments of the committee, including the economy amendment.

Mr. KING. I agree with the Senator; and that is the reason why I made the inquiry of the Chair before offering my amendment. I preferred to have the so-called economy provisions dealt with before offering any amendments. But as stated by the Chair, I must offer my amendment at this time.

Mr. FESS. I have been informed that the unanimous-consent agreement was otherwise, that the unanimous-consent agreement did not include the economy amendment. I was not aware of that.

Mr. ODDIE. Mr. President, will the Senator from Utah yield?

Mr. KING. I yield.

Mr. ODDIE. I hope we may go right ahead and finish the Treasury and Post Office parts of the bill and act on all of the amendments relating to those departments and then, when they have been completed, we can take up the economy provision of the bill.

Has the Senator from Utah completed his statement regarding this matter?

Mr. KING. No; I have only submitted the motion.

Mr. President, I call attention to the receipts and expenditures of the Bureau of Customs for a number of years. In 1912 the receipts were more than $311,000,000 and the costs of collection were $10,000,000. That is to say, when the collections from the customs were more than they are now the cost of collection was less than one-half what it now is.

I shall only read the figures dealing with millions. In 1913 the customs collections were $318,000,000 and the cost of collecting the same was $10,000,000.

In 1914 the collections amounted to $292,000,000 at a cost of $9,000,000.

In 1915 the collections were $209,000,000 and the cost of collection $9,000,000.

In 1920 the collections were $323,000,000 and the cost of collection $10,000,000.

In 1921 the total customs collections were $308,000,000 and the costs were $10,000,000.

In 1922 the collections amounted to $363,000,000 and the cost was $12,000,000.

In 1923, when the customs collections reached the high figures of $568,000,000, the costs of collection were only $13,000,000, or $2.31 a hundred dollars.

In 1925 the receipts from customs were $555,000,000 and the collection cost was $16,000,000, or $2.92 a hundred for collection.

In 1927, when the customs receipts were more than $612,-000,000, approximately double the collections now, the collection costs were $17,000,000, or $2.85 per $100.

In 1930 the collections were $593,000,000 and the cost of collection began to rise, the aggregate being $22,000,000, an increase up to $3.73 per $100.

In 1931, with a reduction in collections of nearly $200,-000,000, the total collected being $385,000,000, the cost of collection was $23,000,000, or $5.97 per $100.

In 1932, with only $331,000,000 collected, $22,000,000 was appropriated to pay the employees and other costs of collection, or $6.87 for every $100 collected. These increases are, in my opinion, unjustifiable and constitute too great a burden upon the taxpayers of the Government. The costs of collection rose from the rather high figure of $2.31 a hundred in 1923 to $2.58 in 1924, $2.92 in 1926, and $6.87 per hundred in 1932.

Mr. President, for 1933 the customs receipts will be less than they were in 1932. The appropriation for the fiscal year 1932–33 was $22,000,000, and it is obvious that the cost of collection for the next fiscal year will probably be $7 or more for every $100 of customs collected.

Mr. President, I am unable to justify the committee—and I speak with no disrespect—in reporting such a tremendous sum for this purpose.

There are evidences that the expenses of the Treasury Department have been during the past few years entirely too great, and the bill before you reveals that no economy has been introduced into that department. In my opinion at least eight or ten million dollars should be deducted from the total sum carried by this bill for the Treasury Department, but all efforts to secure such reduction will be unavailing.

Mr. President, $19,900,000, practically $20,000,000, is entirely too large a sum when it is almost certain that the customs receipts for the next fiscal year will be less than they will be for this fiscal year.

The committee, I believe, ought to accept the amendment which I have tendered; and, in the meantime, when the bill goes to conference, if desired, the conferees may confer with the Treasury Department. I feel sure that a careful examination of all the facts relating to this matter will reveal that with proper economy and administrative efficiency the costs of collection can be materially reduced.

Mr. President, I ask the Senator having the bill in charge if he will not accept the amendment.

Mr. ODDIE. Mr. President, last year the appropriation for this work was $22,000,000. The estimate this year was for $20,092,000, and it was cut by the House to $19,900,000. After the Senate committee had studied the matter carefully, they found that they could not cut it any further, without impairing the service to a serious extent.

Mr. SMOOT. Mr. President, may I say to my colleague that it is not the amount of the collections that determines the cost. There must be a full staff at the customhouses. The importations are less in value now, as my colleague says, but the entries are very little different in number. It does not cost any more to examine an entry worth a thousand dollars or $5,000, if it is one product, than if the value were $500,000. It takes just as much time, and costs just as much money to examine an entry worth $500 as if it were worth $5,000, or $500,000, if it is one product.

The committee noted the cost of collecting the customs receipts, just as my colleague has called attention to it, and what he says is accurate; but just as soon as the importations start coming in quantities, as they have in the past, instead of hand-to-hand purchases in small quantities from abroad, of course the cost of collecting would not seem so bad as the figure to which my colleague calls attention.

There is one thing sure. It is hard enough now to collect the import taxes, because every device known to the trade is used to make the tax low or to escape it, the smartest attorneys in the United States are retained, and the importers are not going to pay any more than they really have to, as my colleague must know.

If the figures of this appropriation were cut below that recommended by the committee, I am afraid the Government would lose more money than it would save. If I felt that the work could be done properly for less, I would not hesitate to join the Senator in recommending that the amount be cut. But the situation is as I have stated it, and I wanted my colleague to understand the condition. I called attention to this very item in the committee, and we discussed it; and the department, as well as I, knowing the routine of the work, think that if we cut the appropriation we will lose more money through the entry of goods at lower rates than we would gain by cutting the appropriation, in which event the full organization could not be continued in operation. I hope the amount will not be reduced.

Mr. KING. Mr. President, I hope the Senator from Nevada will accept the amendment. I do not want to call for a quorum, but I shall feel constrained to unless we can have some composition of this matter.

Mr. SMOOT. Mr. President, I will say this, that as far as the committee is concerned, if the Senator having the bill in charge is satisfied, I would accept the amendment in some lesser amount. What was the amount my colleague suggested?

Mr. KING. Fifteen million dollars.

Mr. SMOOT. Why not make it $17,500,000, and let the matter go to conference?

Mr. KING. I accept that.

Mr. ODDIE. Mr. President, that would mean that in the conference we would have to do our best to get it back to the amount now in the bill—$19,900,000.

Mr. KING. There is no use having a conference, if that is the attitude of the Senator.

Mr. LA FOLLETTE. I want to commend the frank statement of the Senator from Nevada.

Mr. ODDIE. Mr. President, I do not think that personal remarks——

The VICE PRESIDENT. The senior Senator from Utah has the floor.

Mr. SMOOT. Mr. President, of course, if the Senator from Nevada desires to have me yield to him at this time in order to make a statement in answer to something that was said which he felt was not fair to him, I will yield at this time.

Mr. KING. Mr. President, will my colleague yield to me?

Mr. SMOOT. I will yield to my colleague just as soon as the Senator from Nevada shall have completed his statement.

Mr. ODDIE. Mr. President, of course the Senate understands that if the committee is instructed by the Senate to carry out a certain direction of the Senate, it will do its best; but as an individual Senator, I think it would be a mistake to reduce this amount such a large sum by adopting this amendment at this time. As the Senator having the bill in charge, I will not accept the amendment. I prefer having a vote of the Senate on it.

Mr. SMOOT. Mr. President, my only reason for even suggesting the acceptance of the modified amendment was that I would like to make an examination to-day so as to find how many employees are necessary; and if all the employees now in the service are necessary to do the work properly, I will suggest that we keep the amount as it is. I do not pledge myself in any way as to what the condition may be found to be. I wanted time to look into the details of it.

Mr. KING. Mr. President, in view of the wise suggestion made by my colleague, and his evident purpose to be fair in this matter, I accept the suggestion he has made and will modify my proposed amendment so that it will reduce the amount to $17,500,000. May I speak on that, or has my time expired?

The VICE PRESIDENT. Modification of the amendment would not extend the Senator's time.

Mr. KING. I appeal to the Senator from Nevada to accept the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment of the junior Senator from Utah.

The amendment was agreed to.

The VICE PRESIDENT. The bill is still open to amendment.

Mr. KING. Mr. President, I desire to offer an amendment. On page 15, line 17, under the head of "Bureau of Internal Revenue, collecting the internal revenue," I move to strike out the numerals "$30,800,000" and insert in lieu thereof "$26,000,000."

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Utah.

Mr. ODDIE. Mr. President, I am compelled to ask the Senate not to agree to this amendment. This matter was gone over very carefully. Last year the committee examined the same thing. When it was under discussion in the Senate I received a telegram from a woman on the Mexican border in Texas begging us not to make certain reductions which would result in crippling the service and allowing narcotics to cross the border. She described in detail the harm that was being done to the young people of that section by the unlawful importation of narcotics. It was pointed out that cutting the item to the large extent suggested would result in weakening the efforts of our Government to suppress the narcotic evil.

It has been found that the department can not function properly if the item is cut as is now suggested, and I therefore hope the amendment will not be accepted.

Mr. KING. Mr. President, I have read the record with respect to some of these appropriations and I submit that there is nothing in the record to justify the positive assertion of my friend from Nevada.

Mr. ODDIE. Mr. President, will the Senator yield?

Mr. KING. Certainly.

Mr. ODDIE. Last year I pointed out that a proposed 10 per cent cut in this item would have resulted in a saving of a few million dollars, possibly up to $12,000,000, or very near that amount in the appropriation, but the result would have been a loss to the Government of $95,000,000 in revenue. We would have lost many dollars of revenue for every dollar saved in the appropriation.

Mr. KING. Mr. President, I have made some investigation of the Internal Revenue Bureau, and in my opinion it has not inaugurated and put into effect these measures of economy which the situation demands. I invite attention to the fact that in 1913 the appropriation for the bureau was but $5,000,000 plus, in 1914, $5,000,000 plus, in 1915, $6,000,000 plus, in 1916, $7,000,000 plus, and in 1917, $7,000,000 plus. That is to say, these various amounts were appropriated for the purpose of meeting the expenses of collecting the taxes and revenues that by law are obtained by the internal revenue branch of our public service.

In 1918, when the total taxes collected were nearly $4,000,000,000, only $12,000,000 were appropriated to meet all expenses of the bureau, and this was only 33 cents for each $100 collected. This fiscal year my friend from Nevada pleads for $2.17 to collect each $100.

In 1919, following the disturbed condition in business resulting from the war, the costs of the bureau were only $20,000,000, or 53 cents for each $100 collected. Senators will also remember that the perplexing excess-profits system was in force, with the elaborate machinery and a larger personnel necessarily employed. The total collections for that year were $3,850,000,000. In 1920 the bureau obtained an appropriation of $27,000,000 to pay its employees and meet its operating expenses when only a few years before its appropriation was only $5,000,000. The collections were $5,400,000,000 and the cost only 50 cents per $100 collected.

In 1921 $33,000,000 were appropriated to the bureau and the collections were more than $4,595,000,000, but the cost of collection was only 72 cents per $100 collected. In 1922 there was another $1,000,000 added, making a total of $34,000,000, with diminishing receipts, the total of which were $3,197,451,000, and it cost then $1.07 per $100 collected. In 1923 it cost $36,000,000 for the collection of $2,621,745,000, or a cost of $1.39 per $100 collected.

The Senate will recall that during the last years I have stated and those I am about to give the bureau was settling the important cases arising from the rather complicated and perplexing war-tax legislation and also collecting millions of dollars of taxes. In settling cases, meeting litigation, and paying out refunds after having adjudicated the same a large personnel was required. The machinery of the bureau was greater than that required at the present time. Nevertheless, with all of these activities, the cost was only $1.15 for the collection of each $100. Last year it was more than $2.50; and with the $30,800,000 carried in the pending bill, in my opinion, assuming a considerable diminution in income, the cost will be more than $3 for each $100 collected, as against 33 cents, 53 cents, 50 cents, and 72 cents per $100 collected when the revenues collected were two or three times what they are at the present time.

Mr. FESS. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Ohio?

Mr. KING. I yield.

Mr. FESS. A mere recital of what the Senator is covering seems to be on its face a subject of severe criticism. But I wonder whether there is not a rational explanation that would relieve it from criticism. I do not know, because I am not on the committee. I realize that covering the recent period we not only have additional legislation which would complicate tax collections; but I recognize, as the Senator must, that with the progress of expenses of the Government there is a more intense effort to collect all taxes that are due, as shown very often by the illegal taxes being collected that must be refunded. I am wondering, without knowing, whether the additional cost is not justified on the basis of the work that has to be done.

Mr. KING. I would like to say to the Senator that I can not conceive of any justification for an increase in the cost of collection of approximately eight or ten times what it was a few years ago.

Mr. FESS. A few years ago, when we had simple tax laws, it was not difficult at all to get at the taxes.

Mr. KING. I beg the Senator's pardon. In 1918 we had the most complicated tax laws, including the excess-profit taxes, and the machinery set up and the rules and regulations promulgated compelled a large and efficient personnel, much larger than that needed at the present time.

Mr. FESS. Yes; but the Senator will recognize that taxes were paid at that time under protest and there are lawsuits now pending relating to taxes that were collected at that time and which have not yet been adjudicated.

Mr. SMOOT. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to his colleague?

Mr. KING. I yield.

Mr. SMOOT. There are just as many taxpayers to-day as there ever have been and more than there were in 1929 or 1930, but the amounts are very much smaller. It takes just as many men and just as much time to investigate claims of $1,000 as it does claims of $20,000 or $30,000. In some cases, of course, we have had refunds of $600,000, but those days have passed.

So far as the work is concerned, we have to have the organization as it exists to-day in order to accomplish that work, because every income-tax return is examined. I do not care how small it is, every return is investigated and report made upon it. There are just as many complaints now on the part of the Government of returns unjust to the Government as there ever have been. If we slacken up in the examination of the returns, I am afraid the Government will lose a great deal of money. I hope the Senator will not insist upon asking that the amount be reduced.

Mr. KING. Mr. President, my time has probably been exhausted by the Senator from Ohio and my colleague, but I do not complain. I am not contending for an unjust policy. I am trying to do justice to the taxpayers of the United States. I have some knowledge of the workings of the Internal Revenue Bureau, as I was a member of the Finance Committee, as is my colleague, and of the joint committee of the Senate and House that has something to do with the collection of taxes and the tax laws generally. The able Senator from Michigan [Mr. COUZENS] and I sat upon it for a number of years investigating the procedure of the Internal Revenue Bureau, and I reached the conclusion then, and the facts demonstrated the justice of the conclusion, that there is room for economies in that bureau. I feel sure that this remarkable increase from 35 or 50 cents in the cost of collecting each $100 up to, as it will be under the appropriation in my opinion, more than $3, can not be justified.

Mr. President, I shall ask to have a vote on the amendment submitted. It seems to me that $25,000,000, which is five times as much as it was a few years ago, is in excess of what would be the legitimate requirements for the collection of the limited incomes which the Internal Revenue Bureau will be called upon to obtain during the next fiscal year. I would like to see a little economy injected into the administration of the Treasury Department and the bureaus therein. Senators demand economy, but when the test comes the votes are not sufficient to enforce the demand.

Mr. THOMAS of Oklahoma. Mr. President, inasmuch as we are not making much progress on the bill, inasmuch as the Senate evidently desires to postpone action until to-morrow, which means not Sunday or even Monday, but Tuesday or some later date, and notwithstanding the fact that both political parties recently declared in favor of economy, it is now apparent that if there is to be economy it will be brought about "to-morrow," not to-day.

Mr. President, while the Senate is making little or no progress with the pending bill, and while the Senate does not desire apparently to effect any economies, I desire to take a moment's time, if I may, to call attention to some of the things happening throughout the country.

In an early edition of this afternoon's paper and in the first column I find these large black headlines: "Three farmers shot as revolt spreads from East to West."

This is a Chicago story:

CHICAGO.—The first blood had been drawn to-day in the ranks of angry farmers whose tempers have been aroused in recent weeks by the increasing burdens of mortgage foreclosures and tax sales.

The revolt against mortgage payments and delinquent-tax sales was spreading to-day from the Atlantic seaboard to the Rocky Mountains, and conditions in the Corn Belt were made more precarious by a strike of farmers against low milk prices. This affected three States and brought the bloodshed.

That was an afternoon paper. Under a similar heading in an earlier paper I find these words:

Five farmers shot in milk price war.

This story comes from Des Moines.

Further down in the news item I find reference made to conditions in Nebraska. The first reference was to Iowa. I read:

In Nebraska a new conciliation farm mortgage relief board considered a plan for the appointment of county boards of five farms.

Then I find, Mr. President, further down, some reference to conditions happening in my State.

At Cherokee, Okla., a farm sale was postponed without explanation, and at Vermillion, S. Dak., a judge told farmers that he would uphold the law "no matter how many protestors gathered."

Members of a joint legislative committee on farm mortgage arbitration were deadlocked in Iowa as they attempted to dovetail provisions of separate House and Senate bills.

In Oklahoma City Governor Murray exhorted the legislature to act quickly on farm legislation and termed mortgagees "American citizens with their backs to the wall."

Mr. President, throughout my State the farmers, the small business men, the merchants, and the unemployed are to-day organizing councils of defense. Defense against what? Read the newspapers and gather the answers.

Mr. President, I wish also to call the attention of the Senate to one page of this morning's Washington Post. This page is literally full of incidents of the kind that I have tried to portray before the Senate. On page 2 of this publication I find a news story under the following headline:

House told revolt signs are growing.

I read one sentence from the article. It quotes a Member of Congress, as follows:

When you are having rope parties on the doorsteps of your courts it is time that we look the situation in the face and act accordingly.

Then, Mr. President, adjacent to that article I find this item:

Bill to liberalize R. F. C. progresses. Senators given alarming pictures of growing distress of idle.

I read from the article as follows:

Edward F. McGrady, legislative representative for the Federation of Labor, told the committee that unemployment has passed the 12,000,000 mark; that 9,000,000 others are on part time; that 45,000,000 Americans are living "in poverty," and that 15,000,000 of them are existing "only with the help of charity, without which they would perish."

Almost as black a picture was painted by Miss Grace Abbott, Chief of Federal Children's Bureau, who said that relief demands have "passed all experience" and are not being met anywhere.

Then a subhead:

Warns of "revolution."

A few days ago I mentioned the word "revolution" here, and Senators attacked me in the cloakroom and the press attacked me in editorials for mentioning the word "revolution." Here in this conservative newspaper I find under the black headline "Warns of 'revolution,'" the following item:

Harvey Couch, director of the Reconstruction Corporation, recommended liberalization of the law under which the relief organization can make construction loans from its fund of $1,500,000,000 for self-liquidating projects.

David Cushman, New York engineer and economist, testified that the situation is so serious the Federal Government should throw every resource into the battle. He recommended that loans be made by the Government for any useful projects, regardless of their economic soundness.

P. J. Horne, who said he was one of the transient unemployed, told the Senators "revolution is hanging over your heads." He advised opening Army camps for the migratory labor "before you have a revolution."

Then, Mr. President, on the same page I find an interesting article under the following headline:

B. & O. may borrow $5,000,000 of R. F. C. I. C. C. authorizes fourth loan which will meet trust maturities.

I read from the body of the article, as follows:

The Baltimore & Ohio Railroad Co. was authorized yesterday by the Interstate Commerce Commission to borrow $5,000,000 from the Reconstruction Finance Corporation to meet equipment trust maturities during the first six months of this year.

This is the fourth loan the company has received from the corporation, $7,000,000 having been approved on March 30, 1932, by the commission; $25,500,000 on May 16, 1932; and $31,625,000 on August 19, 1932.

The $31,625,000 loan was for the purpose of enabling the railroad to pay half of a bond issue of $63,250,000, which will mature on March 1 of this year. The commission report yesterday said the company has been successful in developing its plan for refinancing, reaching a point where it may be expected to become operative in the near future.

Then, on the same page, I find another news story.

Mr. BLACK. Mr. President, will the Senator from Oklahoma yield there?

The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from Alabama?

Mr. THOMAS of Oklahoma. I yield.

Mr. BLACK. Does the article which the Senator is reading refer to the Baltimore & Ohio Railroad?

Mr. THOMAS of Oklahoma. It is so mentioned by this conservative newspaper.

Mr. BLACK. I have before me a list of the salaries paid by that railroad, and it shows the salary of the president to be $120,000 a year.

Mr. THOMAS of Oklahoma. Mr. President, I appreciate the information given by the distinguished Senator from Alabama.

Mr. President, last night a distinguished Member of this body made a speech in one of the Northeastern States. As quoted in a newspaper story by the Associated Press this distinguished Senator gave an outline of the measures which might be helpful in meeting the conditions which confront us, the conditions of warfare going on in the Western and Southern States. With all respect for the ability and political sagacity of this distinguished Senator, I wish to read the measures which he says if adopted will help to solve the economic difficulties that confront the American people. The program as set forth by him is:

Balancing the Budget, prohibition repeal, beer, reciprocal tariff agreements, two farm relief projects, lowering income-tax exemptions if necessary, but no sales tax, stabilization of foreign exchanges, bankruptcy and transportation relief.

Mr. TYDINGS. Where was that speech delivered?

Mr. THOMAS of Oklahoma. This address was delivered at Providence, R. I.

Mr. President, on yesterday the appointed but not as yet confirmed head of the Home Loan Bank Board gave out a newspaper release, which is official and from which I desire to read one or two paragraphs. It is from Mr. Franklin W. Fort, chairman of the Federal Home Loan Bank Board. In this release Mr. Fort says:

Discussing with newspaper men to-day the general mortgage situation throughout the country, Mr. Fort warned that if State legislatures generally increase the difficulties of collecting debts in such a way that holders of mortgages will find it impossible to get their money even where no excuse exists for nonpayment, the lending of mortgage money will cease.

I quote further from the same newspaper release:

The general situation in the country on legislative change in the terms and conditions of collecting mortgages is a very serious threat to any new lending.

Well, in large sections of this country there is no lending now, and these two sentences giving this warning by Mr. Fort will have no effect whatever upon the situation in some sections of the country.

Mr. President, we are now in the forty-first month of this depression. I should like to ask any Member of the Senate what power is there anywhere that can do anything about this depression save the policy-making branch of this Government, the Congress of the United States? Forty-one months have come and gone and no committee as yet, so far as I know, has made any effort even to study, investigate, and try to find out what is the cause, much less what might be applied as a remedy.

Mr. TYDINGS. Mr. President——

The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from Maryland?

Mr. THOMAS of Oklahoma. I yield.

Mr. TYDINGS. I should like to point out to the Senator from Oklahoma, who has given considerable time to a study of the condition of the country in order that appropriate remedies may be found and applied, that during the first three years of the depression the policy of the administration was to say that nothing was wrong and that prosperity was just around the corner, and to ignore the grave signs to which the Senator has pointed.

There are many of us in this body—and I am one of them—who feel that a great many of the needed solutions can not be forged on the congressional anvil. For example, we can not reduce tariffs unless other countries will reduce them; we can not bring about disarmament unless other countries will agree to disarm; we can not bring about a consideration of the war-debt question until we have worked it out with other nations; and, finally, one of the greatest troubles, in my opinion, is the depreciated currency of silver-using countries.

I believe that it is possible, with a new administration which will aggressively tackle this problem, to restabilize the silver currencies of two-thirds of the world's population and thereby increase their purchasing power and thereby also move some of our surpluses. But what I am afraid of is that if we deflate within our own country, we will still have more than our people can possibly consume, even with the increased buying power of an inflated dollar.

Mr. THOMAS of Oklahoma. Mr. President, I appreciate the statement made by the distinguished Senator from Maryland; but I am not afraid of putting more money in circulation to enable people to pay their taxes, to enable them to pay their interest, to enable them to pay their debts, and to enable them to buy something of the goods that are now on the dusty shelves of the stores of the country. I am not afraid of that, Mr. President, and believing that is one question that should have consideration, I took it upon myself to prepare a letter and send it to probably 25 of the leading economists of the Nation. I have despaired of getting results here. In 41 months all we have had is a resolution adopted by the Senate giving the Finance Committee the right to hold some hearings and make an investigation. I am advised this morning that the committee is going to meet on Monday and then will decide if and when it will proceed.

Mr. President, I desire at this point to have inserted in the RECORD a copy of the letter that I sent to economists of standing throughout the Nation—North, South, East, and West. The country to-day does not need political leader-

ship. What the country needs is economic leadership. We have plenty of political leadership; but, despairing of getting any economic leadership, I have taken it upon myself to place in the RECORD some data and some information which I think will be helpful. So I desire to place in the RECORD a copy of the letter sent by me to leading economists.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The letter referred to is as follows:

JANUARY 30, 1933.

Mr. C. O. HARDY,
Brookings Institution, Washington, D. C.

MY DEAR MR. HARDY: As you know, the issue of the inflation of the currency is now being considered as a possible relief policy; and by inflation I mean a reasonable expansion of the currency. I have a conviction that by placing additional currency in circulation money would thereby become more plentiful, hence cheaper, and to the extent money becomes cheaper commodity prices will rise.

I have never favored inflation to a dangerous degree; and at present I am advocating the expansion of our currency until commodity prices rise to the level of 1926; in other words, I take the Department of Labor wholesale commodity index as the standard, and in 1926 this index showed the buying power of the dollar to be 100 cents. I now favor the expansion of currency sufficient to raise commodity prices to the 1926 level: and then, in the event that commodity prices should continue to rise, my policy would be to reverse the process and take money from circulation so that the dollar could be maintained as nearly as possibly at a buying power of 100 cents.

It occurs to me that if Great Britain, off the gold standard, can so manage her pound as to keep its buying power at approximately $3.35, our Government, on the gold standard, could so manage to keep our dollar at approximately 100 cents.

If agreeable, you will render me a great favor and the country a distinct service by giving me your reaction to the proposal herein presented.

Assuring you in advance of my appreciation of receiving a reply, I am,

Yours most cordially,

ELMER THOMAS.

Mr. THOMAS of Oklahoma. Mr. President, at this time I desire to call attention to a few of the replies. From time to time I will call attention to others. The first one is from Charles W. Tippetts, professor of economics, University of Buffalo.

The VICE PRESIDENT. The time of the Senator has expired.

Mr. THOMAS of Oklahoma. Mr. President, a parliamentary inquiry. Have I some time left on the bill?

The VICE PRESIDENT. The Senator has.

Mr. THOMAS of Oklahoma. I will inquire how much time I have remaining on the bill.

The VICE PRESIDENT. The Senator has 15 minutes.

Mr. THOMAS of Oklahoma. I thank the Chair.

This letter is in reply to my inquiry, and I call attention just to one or two of the statements made by Professor Tippetts, as follows:

1. For a year and half—

Says Mr. Tippetts—

I have been a thoroughgoing inflationist, i. e., I wish prices to rise.

2. There is more inflationist sentiment among teachers of economics than I ever thought possible. Many are reluctant to say so publicly, for fear of arousing criticism. Their chief doubt is whether inflation can be controlled.

3. I have followed your program in the press, and I am now willing to say that, from the statement in your letter, I agree with you.

Mr. President, I ask permission to insert this letter in full at this point in my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter is as follows:

UNIVERSITY OF BUFFALO,
SCHOOL OF BUSINESS ADMINISTRATION,
DEPARTMENT OF ECONOMICS,
Crosby Hall, February 2, 1933.

DEAR SENATOR THOMAS: Please pardon my replying informally, but the stenographers have gone and I wish to rush this answer to your letter. I shall answer in sections.

1. For a year and a half I have been a thoroughgoing inflationist, i. e., I wish prices to rise.

2. There is more inflationist sentiment among teachers of economics than I ever thought possible. Many are reluctant to say so publicly for fear of arousing criticism. Their chief doubt is whether inflation can be controlled.

3. I have followed your program in the press, and I am now willing to say that, from the statement in your letter, I agree with you.

4. Agreement as to purpose being settled, there remains the procedure to be followed. There are two ways: (a) Either print greenbacks (United States notes) and disburse them for public works, or directly for unemployment relief; (b) or borrow Federal reserve notes from the Federal reserve banks, secured by Government bonds, and disburse them in the same manner. I should prefer the former, but would not object to the latter.

5. If inflation means departure from the gold standard, I would go off gold. We did so during the war when we placed an embargo on gold exports and refused to pay it out. A similar policy should be followed, if currency inflation starts, as this is a similar emergency. Otherwise an external and internal drain of gold might follow and you would have to choose between gold and inflation. If you have to make this choice in the middle of an inflationary program, you may choose gold, and deflation will again be resumed.

6. Control must be specified, absolute, and air-tight. Control is possible. Germany was an exceptional case. Inflation is justified in war times; why not now? Your program for control seems satisfactory to me, but it must be made absolutely mandatory.

7. Write to Prof. Ray B. Westerfield, of Yale. He told me privately he favored such a program. Whether he will say so publicly I do not know.

8. Have you seen the statement of the department of economics of the University of Chicago favoring greenbacks? If not, I can send you a copy, if you will promise not to publish it without their consent.

Very sincerely,

CHARLES S. TIPPETTS,
Professor of Economics.

P. S.—Why not call it "a managed currency" instead of inflation? It is practically the same thing, and may gain greater support.

Mr. THOMAS of Oklahoma. I next call attention to a reply received from Warren F. Hickernell, written from the Yale Club, New York City. I desire to read just one or two paragraphs of this letter, but I will ask permission to have the whole letter inserted in the RECORD:

I agree that prices should be put back to the 1926 level, if possible. It is a barbaric situation when people work and live for 10 years or more at one level of prices and suddenly find themselves robbed of half the value of their property by a deflation of credit.

The VICE PRESIDENT. Without objection, the letter will be printed in the RECORD.

The letter is as follows:

NEW YORK, *February 2, 1933.*

DEAR SENATOR THOMAS: Thanks for your letter of January 30. I agree that prices should be put back to the 1926 level, if possible. It is a barbaric situation when people work and live for 10 years or more at one level of prices and suddenly find themselves robbed of half the value of their property by a deflation of credit.

If Washington and Wall Street had had the requisite intelligence, we would have gone off the gold standard in 1931, or would have reduced the weight of the gold dollar enough to save the country from nation-wide bankruptcy. As matters stand, we have not shown enough intelligence to serve as a model for future generations.

When I wrote a history of panics and depressions, I constructed graphs of commodity prices in relation to currency and credit, and found that prices rise only under the following conditions:

1. When gold reserves increase, as in 1849–1860 and 1897–1910. Bank credit expanded as the gold foundation increased, and prices rose so long as gold reserves increased faster than commodity production.

2. When paper currency increases enough to drive the country off the gold standard. It is impossible to elevate prices materially by increasing the paper currency so long as you remain on the gold standard. If gold is the standard, paper currency can not be increased beyond the amount needed for pay rolls, pocket money, and "till money." Paper currency merely increases and decreases with trade activity and employment. It is "effect" and not "cause." But if you go off the gold standard, paper money is the currency unit and becomes "cause." It will cause prices to rise if the amount is enough to drive the country off the gold standard.

3. When confidence attains a high pitch, so that more active use is made of the existing amount of deposits. On the gold standard, it is deposits and not paper currency which causes prices to rise. During 1933–34 the national income would rise from $40,000,000,000 to $60,000,000,000 on the present amount of deposits if all uncertainties were removed and everybody had as much confidence as in 1926. The turnover of deposits in 140 cities in 1932 was only twenty-six times per annum as compared with forty-six times per annum in 1929. By restoring complete confidence deposits would again turn over (be used) forty or fifty times a year and employment and prices would increase.

To sum up, there are four ways to increase prices:

1. To issue enough paper currency to drive the country off the gold standard.

2. To restore complete confidence and permit more active use of existing currency and deposits.

3. To reduce the weight of the gold dollar 40 per cent, so that prices would increase 67 per cent as soon as confidence was restored.

4. To increase gold reserves by arranging for Europe to send us gold in settlement of war debts and then forbid foreign transactions involving material loss of gold.

We have a Babel of plans—crop allotment, bonus, silver, etc.—so that each tends to kill the other. I am afraid nothing will be done.

Sincerely,

WARREN F. HICKERNELL.

Mr. THOMAS of Oklahoma. I next call attention to a letter just received from Dr. Willford I. King, professor of economics, New York University, of date February 2. Without taking time to read the letter, I ask permission to insert it in the RECORD at this point.

The VICE PRESIDENT. Without objection, the letter will be printed in the RECORD.

The letter is as follows:

NEW YORK UNIVERSITY,
SCHOOL OF COMMERCE, ACCOUNTS, AND FINANCE,
DEPARTMENT OF ECONOMICS,
New York, February 2, 1933.

Hon. ELMER THOMAS,
United States Senate, Washington, D. C.

MY DEAR SENATOR THOMAS: In reply to your inquiry of January 30, 1933, I will say that it seems to me clear that prices can be raised to any desired level by putting into circulation a sufficient supply of currency. The truth of this is evidenced by the experience of a hundred countries.

Your policy of expanding the currency until commodity prices rise to the level prevailing in 1926 seems to me to be thoroughly sound. Sweden has shown during the last 16 months that it is entirely feasible to maintain prices at a certain level whenever there is a desire on the part of the authorities to accomplish this end. If you are interested in the record of the Swedish experiment you may find it worth while to refer to the Index, published by the Svenska Handelsbanken each month. In the September, 1932, issue you will find an article by Prof. Bertil Ohlin describing Sweden's monetary policy. The Index is printed in English.

As you say, Great Britain has kept the pound much more stable than the dollar during the last year or more. Even so, she has not obtained as high a degree of stability as has the Swedish Government with its money.

I take pleasure in sending you a copy of an article in the Burroughs Clearing House Magazine in which I discuss feasible methods of raising the price level. You may be interested in reading it. You probably remember that on January 14, I sent you a copy of a plan for stabilizing the currency which, if adopted, would, I believe, accomplish the desired end.

Please accept my congratulations on the good work that you are doing.

Very sincerely yours,

WILLFORD I. KING,
Professor of Economics.

Mr. THOMAS of Oklahoma. I next call attention to a letter just received from Dr. Harry Gunnison Brown, of the School of Business and Public Administration, Department of Economics and Finance, University of Missouri, Columbia, Mo., of date February 2, 1933. I read one or two paragraphs of this letter, as follows:

I find myself in general agreement with your purpose and point of view. There is, in my opinion, absolutely nothing which will meet the needs of the present situation except inflation. It should, of course, be controlled inflation.

Again I read:

It is my belief that the policy of the Federal reserve banks and the Federal Reserve Board has been chiefly responsible for getting us into our present predicament.

* * * * * * *

In other words, it takes stronger and more heroic measures to stem the tide of severe depression than to bring prosperity when the depression is only mild and just beginning.

Again I read:

Inflation or reflation is necessary either to bring early recovery from unemployment and business depression or to bring relief for debtors. The one remedy will serve for both evils, and it is the only remedy adequate for either.

I ask permission to insert the entire letter in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter is as follows:

UNIVERSITY OF MISSOURI,
Columbia, February 2, 1933.

Senator ELMER THOMAS,
Committee on Appropriations, United States Senate,
Washington, D. C.

MY DEAR SENATOR THOMAS: I have at hand your letter of January 30, which I received yesterday, but could not get time to reply to until to-day. I find myself in general agreement with your purpose and point of view. There is, in my opinion, absolutely nothing which will meet the needs of the present situation except inflation. It should, of course, be controlled inflation. In other words, your idea of withdrawing currency should prices go above the desired level, in order to stabilize the general level, appears to me the proper policy.

Some have questioned the desirability of bringing the price level back to that of 1926, pointing out that this might be an injustice to creditors whose loans have been made during the period of low prices. Some economists would like to go halfway back or two-thirds of the way back to 1926. Yet, on the other hand, it can be argued that debtors who have paid interest or have paid installments on the principal during the period of low prices are entitled to have the price level raised even higher than that of 1926. It is so extremely important to have the price level raised a great deal that I would favor any reasonable compromise for which legislative support could most easily and certainly be secured, whether that meant going back to the price level of 1926 or to the lower level of 1929, or to the still lower level of 1930. Any of these would be so immensely superior to letting things take their course that I think it would be wise to compromise on any one of them if this proved necessary in order to get action. Any action that may be taken now will be too late for many thousands of persons who have lost their farms or their homes and who will probably be dead before they can rehabilitate themselves economically. In the face of the overwhelming injustice of these falling prices the agitation of various little groups for special favors and the diverting of public attention away from the one significant remedy for the whole situation is the tragedy of the decade.

It is my belief that the policy of the Federal reserve banks and the Federal Reserve Board has been chiefly responsible for getting us into our present predicament. I still have two or three copies left of an article which I wrote on the subject a little over a year ago, and I am going to take the liberty of sending you one if I can find an extra one around. I had the feeling in 1928 and 1929, as I still do, that Federal reserve policy should have been directed to controlling the price level so as to keep it stable rather than to controlling the stock market. As commodity prices were lower in 1929 than in 1926 and lower, I think, than in 1928, there was no justification for the sharp restriction of credit and the selling of their securities on the open market and so withdrawing currency from circulation on the part of the Federal reserve banks at that time. Dr. Gustav Cassel, the internationally known Swedish economist, testified in 1928 before the Banking and Currency Committee of the House of Representatives. He expressed the opinion that high discount rates charged for the purpose of discouraging speculation on the stock exchange would affect the whole business situation; that it would bring falling prices and unemployment and general business depression. In the face of that testimony the Federal reserve banks did thus restrict credit and even more sharply in 1929 than in 1928, and all of the consequences which Cassel feared have come upon us.

But even if it be admitted that there was any justification whatever for such credit restriction in 1929, it must still be insisted that when prices began to fall and incipient depression appeared the Federal reserve banks ought to have reversed their policy radically and at once by reducing their rediscount rates and purchasing in the open market whatever volume of securities were required in order to put into circulation enough currency to bring back the price level and restore the demand for goods. This policy they did not follow except haltingly and weakly and in the spring of 1931 they again began to dispose of their securities on the market and draw currency out of circulation to be buried in their own vaults, thus decreasing the demand for goods in the very midst of business depression. No wonder the depression became steadily worse despite the rosy pictures of prosperity "just around the corner."

It is true that during 1932, at last, the Federal reserve banks, perhaps driven by the threat of the Goldsborough bill, did buy securities heavily in the open market. Indeed I think they increased their holdings by approximately a billion dollars. And since in spite of this policy on their part prices did not rise and business continued depressed, it is now argued in some quarters that inflation is no remedy at all and can accomplish nothing. The fact is, I believe, that such action, coming so late as it did and when the depression was growing so severe, had its effects largely offset by the accumulating forces of depression. In other words, it takes stronger and more heroic measures to stem the tide of severe depression than to bring prosperity when the depression is only mild and just beginning. For by 1932, dull business and falling prices were bringing general ruin, and along with this, runs on the banks and bank failures. This meant a wiping out of bank credit and therefore of purchasing power on the one hand as fast as or faster than it could be restored by the policy which the Federal reserve was following. But this does not mean that a still more vigorous policy would be unavailing or that the policy followed did not at least prevent conditions from growing worse. However, in view of the stage which has been reached by the depression, it may be that some form of cooperation of the Treasury Department with the Federal reserve system is requisite for restoration of prices and prosperity. In that connection I wonder if the person who will occupy the place of Secretary of the Treasury in the new Cabinet is likely to have any sympathy at all with the laudable and very important purpose which you have in view!

In the present circumstances I believe that the insistence on "balancing the Budget" is all wrong. Such insistence means that when the Government gives a civil servant money which he can spend it must take this money from the taxpayers and diminish the expenditures of the taxpayers by an equal amount. Should the Government borrow temporarily from the Federal reserve banks in order to pay its civil servants and meet its other expenses, this would put new money into circulation and would give the civil servants purchasing power without taking it away from the taxpayers. At the present time many of our banks—not merely the Federal reserve banks—are holding excess reserves in order to be in a liquid position. They are afraid to make investments that they would ordinarily make and currency is thus kept out of circulation in the banks. Such banks would gladly purchase Government short-term notes, and a meeting of appropriations out of borrowed funds would thus increase purchasing power and tend both to get us out of the depression and to raise the price level. The Government can now borrow at absurdly low rates and it seems ridiculous to insist that it shall not do so under these circumstances. This, at least in part, is what I mean when I say that cooperation between the Federal reserve system and the Treasury Department may now be of immense importance.

There are some persons who fear that a determined effort to raise the price level, in view of the prevailing low price level and high value of gold in the rest of the world, would force an export of gold and deplete the reserves of the Federal reserve system. Even should this danger threaten, it seems to me that we can under no circumstances afford to risk inaction. Three possible means of protection suggest themselves:

1. Reduce the reserve requirements of the Federal reserve banks so that they could stand a much larger drain of gold; or

2. Put an embargo, at least temporarily, on the export of gold; or

3. Frankly abandon a fixed weight of gold as a standard and order the Federal reserve banks to stabilize the value of the dollar by purchasing and selling in the open market gold (and possibly silver) and securities.

Either two or three would give more immediate relief to farmers producing export crops than would one. The price of wheat and cotton, as you know, is fixed on the world market, and an increase of currency which left us frankly on the gold standard would not appreciably increase the prices of these export crops until the easy credit and outflow of gold had raised the foreign price level as well as our own. But the adoption of expedient 2 or expedient 3 would quickly change the exchange value of American money in relation to foreign gold prices so that the same foreign price would give the American farmer more dollars. Nevertheless, any one of these expedients would bring eventual relief, and any one of them would be better than nothing at all. Inflation or reflation is necessary either to bring early recovery from unemployment and business depression or to bring relief for debtors. The one remedy will serve for both evils, and it is the only remedy adequate for either. In view of the desperate situation, I sincerely hope that you can get wide support from your colleagues in the Senate.

I am pretty thoroughly convinced that this depression, so far as the United States is concerned (and it is economically a dominant country affecting all the others), is the result of an inept policy on the part of the Federal reserve system and that an understanding of the fundamental economic principles by the President and his Secretary of the Treasury would have prevented it or brought rapid recovery. But neither of these officials seems to have had any comprehension of what was happening and because of this, though doubtless with the best intentions, Hoover has seen his administration wrecked and himself repudiated by an electorate which did not know what was wrong but which felt keenly that matters were being mishandled. The same fate may await the President elect. Anyone who is anxious that the Democratic Party and its policies shall be dominent during the next decade should see that Mr. Roosevelt must be made to realize that the public will have no more patience with depression during his administration than during Hoover's, that the way to prosperity lies through proper control of the price level, and that the superstitious worship of old fetishes regarding money will mean disaster. * * * I hope you may be able to accomplish this purpose.

Very sincerely yours,

HARRY GUNNISON BROWN.

Mr. THOMAS of Oklahoma. I now call attention to a letter from 82 Wall Street. It is a letter signed by Rudolph Spreckels, of date February 3, addressed to myself, as follows:

The foreign war-debt situation appears to me to be assuming serious aspects and the already overburdened American taxpayers have reason to expect Congressional protection against possible Executive action which may result in shifting these foreign loans onto their backs.

It would seem desirable that Congress take immediate steps to require our State Department to inform the debtor nations that Congress does not approve of secret negotiations between the debtor nations and the Executive branch of our Government, and that Congress will not approve cancellation or modification of our Government's loans.

Now, here is a clause to which I desire to invite especial attention, and it is the first one of the kind that I have seen in my correspondence. It is the first one of the kind that I have seen anywhere. It is only the beginning, Mr. President:

Sauce for the goose is sauce for the gander—so if foreign nations can afford to default on their government debts, our Government could afford to default in the payment of United States bonds issued to raise the money borrowed by those nations.

There is an intimation from Wall Street itself, Mr. President, over the signature of Mr. Rudolph Spreckels, that there may come a time when the Government will fail to raise and appropriate the money to pay these United States Government obligations, tax-exempt gold bonds that at present rest so securely in the strong boxes of that famous street.

I read further:

Perhaps our rich American bondholders who advocate cancellation of foreign war loans would have a change of heart if Congress adopted a resolution canceling all United States bonds issued to finance those nations; and I dare say foreign owners of United States bonds would then learn to appreciate the unfairness on the part of their governments in demanding cancellation of their financial obligations.

Mr. President, I ask that this letter in full be printed in connection with my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter is as follows:

NEW YORK, *February 3, 1933.*

HON. ELMER THOMAS,
United States Senate Office Building,
Washington, D. C.

MY DEAR SENATOR THOMAS: The foreign war-debt situation appears to me to be assuming serious aspects, and the already overburdened American taxpayers have reason to expect congressional protection against possible Executive action which may result in shifting these foreign loans onto their backs.

It would seem desirable that Congress take immediate steps to require our State Department to inform the debtor nations that Congress does not approve of secret negotiations between the debtor nations and the executive branch of our Government, and that Congress will not approve cancellation or modification of our Government's loans.

Sauce for the goose is sauce for the gander; so if foreign nations can afford to default on their government debts, our Government could afford to default in the payment of United States bonds issued to raise the money borrowed by those nations.

Perhaps our rich American bondholders who advocate cancellation of foreign war loans would have a change of heart if Congress adopted a resolution canceling all United States bonds issued to finance those nations; and I dare say foreign owners of United States bonds would then learn to appreciate the unfairness on the part of their governments in demanding cancellation of their financial obligations.

German reparation payments are in an entirely different class, because they were arbitrarily set up by that nation's victorious foes; whereas our loans were voluntary obligations incurred by those nations to enable them to defeat Germany and to acquire its vast territories, the value of which may fully compensate them for their financial loss in that war and upon which our Government has a moral lien in consideration for the moneys loaned.

Sincerely yours,

R. SPRECKELS.

Mr. THOMAS of Oklahoma. At a later date I will take occasion to incorporate more of these letters in the RECORD, if I may have permission.

Mr. KING. Mr. President, I desire to modify my amendment so as to strike out the figures "$30,800,000" and insert in lieu thereof "$29,800,000."

The VICE PRESIDENT. The question is on the amendment of the Senator from Utah, as modified.

The amendment, as modified, was agreed to.

Mr. McKELLAR. Mr. President, under the notice heretofore given, I offer the amendment which I send to the desk, and ask to have it read.

The VICE PRESIDENT. The amendment will be read.

The CHIEF CLERK. The Senator from Tennessee offers the following amendment:

On page 16, line 16, after the word "each," insert the following: "*Provided further*, That no refund or credit of any income or profits, estate, or gift tax in excess of $20,000 shall be made after the enactment of this act until a report thereof, giving the name of the individual, trust, estate, partnership, company, or corporation to whom the refund or credit is to be made, the amount of such refund or credit, and the facts in connection therewith and all supporting papers are submitted by the Commissioner of Internal Revenue to the Comptroller General of the United States and approved by him, the papers to be returned to the Commissioner of Internal Revenue after final action on the proposed

refund is taken by the said Comptroller General. This proviso shall not apply to refunds or credits made pursuant to a judgment of a court having jurisdiction of the subject matter, or a decision of the United States Board of Tax Appeals, which has become final."

Mr. ODDIE. Mr. President, will the Senator yield?

Mr. McKELLAR. Just one moment.

I desire to explain to the Senate that this amendment is similar to the one that was adopted by the Senate before and approved by the House. When the bill went to the President the President vetoed it on the ground that it was an invasion by the legislative branch of the Government of the constitutional prerogatives of the executive branch of the Government.

The only change that has been made in the amendment is to provide that the tax refunds shall be examined by the Comptroller General of the United States, so that it will accord with the President's message entirely. In other words, it is entirely within the recommendation of the President.

Now, I desire to say another word about the amendment.

As I recall the President's message, he thought well of the legislation. He thought that some such legislation ought to be enacted. He referred to the question of auditing these accounts. I feel sure that the amendment will meet the approval of the executive branch of the Government, and I hope the Senate will adopt it.

Mr. ODDIE. Mr. President, I am compelled to make the point of order against this amendment that it is legislation on an appropriation bill.

The VICE PRESIDENT. The Chair sustains the point of order.

Mr. McKELLAR. Mr. President, I entered a motion under the rule to suspend the rules and make the amendment in order. I, therefore, offer that motion now, and ask to have it stated.

The VICE PRESIDENT. That must be done in writing.

Mr. McKELLAR. It has been done in writing, and all of the forms complied with. The only thing that I ask for now is the yeas and nays. Let us vote on it.

Mr. MOSES. The Senator desires the yeas and nays on his motion to suspend the rules?

Mr. McKELLAR. Of course.

Mr. SMOOT. Mr. President, as I understand the amendment, the Comptroller General is to make the examination.

Mr. McKELLAR. Yes.

Mr. SMOOT. The Comptroller General already does that very work now without any instruction.

Mr. McKELLAR. Oh, no; he does not.

Mr. SMOOT. That is his duty. If he does not do it, then he does not perform his duty.

Mr. McKELLAR. Oh, no! If I recall aright, by an amendment offered by the Senator from Utah who is now addressing the Senate, that part of the Internal Revenue Office is excluded from the jurisdiction of the Comptroller General. At any rate, he has no right to make this examination now and can not do it under the present law. This merely refers the matter to him so that he may examine these accounts just as he examines other accounts of the Government.

There may be something about tax refunds that is sacred, that the Comptroller General can not or should not examine into, but it seems to me there is not. The President really suggested—not in words, but certainly by implication, and probably by words—that these refunds should be submitted to an auditor; and to my mind this is the proper way to do it.

The VICE PRESIDENT. The question is on the suspension of the rules.

Mr. SMOOT. Mr. President, I simply wish to say to the Senate that no money is paid out of the Treasury of the United States unless the Comptroller General makes an examination as to whether or not, under the law, it is lawful to do so. I care not what the appropriation may be; after the examination is made, if it does not conform to the law, or if it violates the law in any way, shape, or form the claim is never paid.

Mr. McKELLAR. Then there ought not to be any objection to this amendment under those circumstances.

Mr. SMOOT. Therefore I say that this amendment is perfectly useless and never ought to go on the appropriation bill.

The VICE PRESIDENT. A two-thirds vote is required to suspend the rules.

Mr. COUZENS. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll to ascertain the presence of a quorum.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Copeland	Hatfield	Robinson, Ind.
Austin	Costigan	Hayden	Russell
Bankhead	Couzens	Johnson	Schall
Barbour	Cutting	Kean	Schuyler
Barkley	Dale	Kendrick	Sheppard
Bingham	Davis	Keyes	Shipstead
Black	Dickinson	King	Smith
Blaine	Dill	La Follette	Smoot
Borah	Fess	Logan	Steiwer
Bratton	Fletcher	McGill	Thomas, Okla.
Brookhart	Frazier	McKellar	Townsend
Bulkley	George	McNary	Tydings
Bulow	Goldsborough	Metcalf	Vandenberg
Byrnes	Gore	Moses	Walsh, Mass.
Capper	Grammer	Norris	Walsh, Mont.
Caraway	Hale	Oddie	Watson
Clark	Harrison	Reed	White
Connally	Hastings	Robinson, Ark.	

The VICE PRESIDENT. Seventy-one Senators having answered to their names, there is a quorum present. The question is on suspending the rule to make the amendment of the Senator from Tennessee in order. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. BRATTON (when his name was called). I have a pair with the junior Senator from Nebraska [Mr. HOWELL]. I understand that if that Senator were present he would vote as I intend to vote. I vote "yea."

Mr. McKELLAR. Mr. President——

The VICE PRESIDENT. The Senator can not interrupt the roll call.

Mr. McKELLAR. Can it be done by unanimous consent? We are about to reach an agreement in the interest of expediting the consideration of the pending bill.

The VICE PRESIDENT. Is there objection to withdrawing the order for the yeas and nays?

Mr. SMOOT. Will the agreement referred to by the Senator require another roll call?

Mr. McKELLAR. I think not.

Mr. BINGHAM. I object.

The VICE PRESIDENT. The clerk will continue the call of the roll.

The Chief Clerk resumed the call of the roll.

Mr. FRAZIER (when his name was called). I have a pair to-day with the junior Senator from Florida [Mr. TRAMMELL], but I understand that on this vote he would vote as I intend to vote. I vote "yea."

Mr. COSTIGAN (when Mr. NEELY's name was called). The Senator from West Virginia [Mr. NEELY] is necessarily absent. I am advised that if present he would vote "yea."

The roll call was concluded.

Mr. HASTINGS. Mr. President, the Senator from Rhode Island [Mr. HEBERT] is paired with the Senator from North Carolina [Mr. BAILEY]. Both those Senators are absent. If the Senator from Rhode Island [Mr. HEBERT] were present, he would vote "nay."

Mr. ROBINSON of Indiana. Again announcing my pair with the junior Senator from Mississippi [Mr. STEPHENS], I withhold my vote.

Mr. FESS. I desire to announce the following general pairs:

The Senator from California [Mr. SHORTRIDGE] with the Senator from West Virginia [Mr. NEELY];

The Senator from Wyoming [Mr. CAREY] with the Senator from Louisiana [Mr. LONG];

The Senator from Missouri [Mr. PATTERSON] with the Senator from New York [Mr. WAGNER];

The Senator from Illinois [Mr. GLENN] with the Senator from Virginia [Mr. SWANSON];

The Senator from South Dakota [Mr. NORBECK] with the Senator from Illinois [Mr. LEWIS];

The Senator from North Dakota [Mr. NYE] with the Senator from Louisiana [Mr. BROUSSARD]; and

The Senator from Idaho [Mr. THOMAS] with the Senator from Montana [Mr. WHEELER].

Mr. BINGHAM (after having voted in the negative). I have a general pair with the junior Senator from Virginia [Mr. GLASS]. I transfer that pair to the junior Senator from Connecticut [Mr. WALCOTT] and allow my vote to stand.

The result was—yeas 44, nays 25, as follows:

YEAS—44

Ashurst	Capper	Gore	Robinson, Ark.
Bankhead	Caraway	Hayden	Russell
Barkley	Clark	Johnson	Schall
Black	Connally	Kendrick	Sheppard
Blaine	Costigan	King	Shipstead
Borah	Couzens	La Follette	Smith
Bratton	Cutting	Logan	Thomas, Okla.
Brookhart	Dill	McGill	Tydings
Bulkley	Fletcher	McKellar	Vandenberg
Bulow	Frazier	McNary	Walsh, Mass.
Byrnes	George	Norris	Walsh, Mont.

NAYS—25

Austin	Fess	Keyes	Steiwer
Barbour	Goldsborough	Metcalf	Townsend
Bingham	Grammer	Moses	Watson
Copeland	Hale	Oddie	White
Dale	Hastings	Reed	
Davis	Hatfield	Schuyler	
Dickinson	Kean	Smoot	

NOT VOTING—27

Bailey	Hebert	Nye	Swanson
Broussard	Howell	Patterson	Thomas, Idaho
Carey	Hull	Pittman	Trammell
Coolidge	Lewis	Reynolds	Wagner
Glass	Long	Robinson, Ind.	Walcott
Glenn	Neely	Shortridge	Wheeler
Harrison	Norbeck	Stephens	

The VICE PRESIDENT. On the vote, the yeas are 44, the nays 25. Two-thirds not having voted in the affirmative, the motion is lost.

Mr. SHIPSTEAD. Mr. President, I present the amendment which I sand to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 57, line 16, the Senator from Minnesota moves to strike out the period and to insert a colon and the following words: "*Provided further*, That no part of the money herein appropriated shall be paid on any contract covering a ship or ships employing alien seamen on ships leaving American ports," and on page 57, line 16, to insert the words "*Provided*, That no part of the money herein appropriated shall be paid."

Mr. ODDIE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Nevada?

Mr. SHIPSTEAD. I yield.

Mr. ODDIE. I am compelled to make a point of order on this amendment, on the ground that it is legislation on an appropriation bill.

Mr. SHIPSTEAD. Mr. President, I am of the opinion that the amendment is a limitation on an expenditure, and therefore is in order.

The PRESIDENT pro tempore. The Chair overrules the point of order. The Chair regards the amendment as a limitation on an appropriation.

The question is on agreeing to the amendment proposed by the Senator from Minnesota.

Mr. SHIPSTEAD. Mr. President, the amendment is very plain and speaks for itself. It provides that no part of any money appropriated shall be paid on any contract covering a ship employing alien seamen when leaving American ports. In other words, it provides that no ship leaving an American port that is employing an alien crew or alien seamen can receive any money out of the Treasury of the United States. They have to employ American citizens as sailors on their ship when they leave an American port. It does not bar them, in case of desertion or sickness in a foreign port, from employing alien seamen coming to the United States; but when they leave the United States they have to employ American seamen.

Mr. REED. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Pennsylvania?

Mr. SHIPSTEAD. I yield.

Mr. REED. Would not the Senator's amendment require that the crew be composed exclusively of American citizens?

Mr. SHIPSTEAD. Yes.

Mr. REED. They could not carry any alien seamen at all?

Mr. SHIPSTEAD. No. Aliens could travel as passengers, of course, but could not be employed as seamen.

Mr. BINGHAM. Mr. President, the amendment offered by the Senator from Minnesota is in fact a bill regarding alien seamen, which has been on the calendar for some time and has been objected to repeatedly. In my opinion it is undoubtedly legislation, but the Chair has ruled that it is merely a limitation and is not out of order.

But the amendment, if adopted and enacted into law, would put out of business practically all of the American lines now operating on the Pacific Ocean. In order to compete with foreign lines on the Pacific they are obliged to use a certain number of alien seamen, chiefly stewards. These are carefully protected from entrance into the United States, but in order to compete with Japanese lines, French lines, British lines, and other foreign lines crossing the Pacific it is their custom to employ a certain number of alien seamen. Under the law the great majority of the officers and most of the seamen must be American citizens. It is true that a certain number of them are not. It is my opinion that this would work a very great hardship on our ships operating in the Pacific. It seems to me it has no place on this bill, and I hope the Senate will not agree to the amendment.

Mr. WHITE. Mr. President, I would not under any circumstances quarrel with the Chair on the ruling which has just been made on the point of order made by the Senator from Nevada [Mr. ODDIE]. Of course, the amendment is not offered for the purpose of reducing the appropriation, and the effect of it, if adopted, would not be to reduce it. The purpose of the amendment and its effect would be to change the character of the crews upon American ships. It would be, as pointed out by the Senator from Pennsylvania [Mr. REED], a requirement that every seaman and employee on ships benefited by the merchant marine act should be an American, and that is not the present law of the country. The amendment in its effect and in its purpose is to change existing law.

Now to come to the merits of the proposition. So far as I know, there is no country in all the world that requires that all the seamen upon its ships shall be nationals of that country. Here in the United States, until we enacted this merchant marine act of 1928, there was no requirement that any percentage whatsoever of the crews of American ships should be American citizens. The law was, and it had been the law for probably 100 years, that officers should be American citizens. When we wrote the 1928 act we provided that for a first brief period of time 50 per cent of the crew of vessels carrying our mail under that act should be American, and then at the end of four years we advanced that proportion to two-thirds of the crews.

So we have lifted the percentage from nothing, as it was before the 1928 act went into effect, until to-day we have the requirement that two-thirds of the crews of ships operated under mail contracts shall be American citizens. I submit that that is going as far as we ought to go at this time. I concur in what the Senator from Connecticut [Mr. BINGHAM] has said, that with respect to trade upon the Pacific Ocean, certainly with respect to those trades that take our vessels into the torrid zones of the earth, we can not get American citizens to go down into the stoke-holds of the steamers, we can not get American citizens to go into the

stewards' departments of the steamers and serve in those capacities.

Mr. President, in its effect the amendment will undo everything we have tried to do with respect to our ships. It is going far beyond the necessities of the case. It is going far beyond all reason. I earnestly hope that the amendment will not prevail.

Mr. GORE. Mr. President, I desire to ask the Senator from Minnesota [Mr. SHIPSTEAD] if the point and purpose of his amendment is to hire Americans?

Mr. SHIPSTEAD. It is.

Mr. GORE. I think it is in perfect harmony with the amendment which we adopted on yesterday, "Buy America," which, in my judgment, means "good-by America" so far as our foreign commerce is concerned.

To illustrate, Senators shrink from following their own principles to their logical conclusions, and I might say to their disastrous conclusions. A Senator this morning visited the seed loan division of the Department of Agriculture. An agent of a fertilizer company called up and was insisting with unbridled strenuosity that Congress ought now to enact a law requiring that all farmers who are obtaining seed loans should stipulate that they will buy only American fertilizer, fertilizer made in America by Americans, and the ingredients of which shall have been produced in America. Of course I would agree to the amendment just offered by the Senator from Minnesota if he would agree to an amendment providing that these crews shall take American oxygen along and shall breathe American oxygen only and shall not defile their pulmonary apparatus with the air that pervades the salted seas. [Laughter.] We might devise some way of requiring those ships, when they go down to the sea, to follow the waters emptied into the ocean by the Hudson, the Mississippi and the Columbia, and ply only those waters which originate in America. [Laughter.]

Senators let us go through with this thing. Let us be consistent with the lofty principles that we announced on yesterday!

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Minnesota.

Mr. SHIPSTEAD. Mr. President——

The PRESIDENT pro tempore. The Senator from Minnesota has already spoken once on his amendment and can not be recognized again.

Mr. SMOOT. Let us have the yeas and nays.

The yeas and nays were not ordered, and the amendment was rejected.

Mr. ASHURST. Mr. President, I desire to offer an amendment on page 76——

The PRESIDENT pro tempore. We have not yet reached that title of the bill. Title II is still on its second reading and open to amendment. If there are no further amendments to be proposed to Title II, then pursuant to the agreement under which the Senate is operating Title III will be taken up and considered.

Mr. BINGHAM obtained the floor.

Mr. REED. Mr. President, will the Senator yield to enable me to suggest the absence of a quorum?

Mr. BINGHAM. I yield for that purpose.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk called the roll and the following Senators answered to their names:

Ashurst	Caraway	Glass	Keyes
Austin	Clark	Glenn	King
Bankhead	Connally	Goldsborough	La Follette
Barbour	Copeland	Gore	Lewis
Barkley	Costigan	Grammer	Logan
Bingham	Couzens	Hale	McGill
Black	Cutting	Harrison	McKellar
Blaine	Dale	Hastings	McNary
Borah	Davis	Hatfield	Metcalf
Bratton	Dickinson	Hayden	Moses
Brookhart	Dill	Hebert	Norbeck
Bulkley	Fess	Hull	Norris
Bulow	Fletcher	Johnson	Oddie
Byrnes	Frazier	Kean	Pittman
Capper	George	Kendrick	Reed
Reynolds	Sheppard	Thomas, Idaho	Walcott
Robinson, Ark.	Shipstead	Thomas, Okla.	Walsh, Mass.
Robinson, Ind.	Shortridge	Townsend	Walsh, Mont.
Russell	Smith	Tydings	Watson
Schall	Smoot	Vandenberg	White
Schuyler	Steiwer	Wagner	

The PRESIDENT pro tempore. Eighty-three Senators having answered to their names, a quorum is present.

Mr. ODDIE. Mr. President, when this bill was presented to the Senate I announced that on the completion of the Treasury and Post Office sections I would request the Senator from Connecticut [Mr. BINGHAM] to explain the so-called economy provisions which are included in this bill. I stated at the time that as an individual Senator I was opposed to certain of those provisions, but they will be discussed and acted on when we come to them.

The PRESIDENT pro tempore. Under the unanimous-consent agreement entered into at the beginning of the consideration of the bill, Title III is now in order; and under the unanimous-consent agreement referred to amendments proposed by the committee are first in order, and if committee amendments are desired to be offered from the floor, they may now be offered.

Mr. BINGHAM. Mr. President——

The PRESIDENT pro tempore. The Senator from Connecticut is recognized as in charge of this section of the bill.

Mr. BINGHAM. Mr. President, the economy provisions of the bill occur as one single amendment, striking out all that part of the bill known as section 4, section 5, section 6, and section 7, and in lieu thereof inserting some 20 pages.

Mr. President, as the first portion of the amendment is rather complicated and will not be easily understood, I am going to ask unanimous consent that the Senate consider the different provisions recommended by the committee in the order in which they are mentioned in the report on the bill, which is on Senators' desks. For instance, in the report on page 3 the first item discussed is "furlough provisions and compensation reductions," and reference is made to the bill, page 69, line 20, where section 101 of the original economy act "is amended by adding at the end thereof the following new subsection."

Mr. President, it seems to me that this is the logical way to proceed with the bill, for the reason that section 4, which is the first section in order in the bill, contains a reference to so many different sections of the economy act and continues them in full force and effect that amendments to that section, which are made later on in the committee amendment, will lead us to be somewhat confused in regard to the discussion. Therefore, I ask unanimous consent that the various provisions may be considered in the order in which they are referred to in the report on the bill submitted by the committee.

The PRESIDENT pro tempore. Is there objection?

Mr. GORE. Mr. President, if that shall be done, I should like to ask the Senator when will it permit us to reach sections 16, 17, and 18? Are they among the sections the Senator asks to be passed over for the present?

Mr. BINGHAM. We shall not reach sections 16, 17, and 18 so very much later, I will say to the Senator, since they occur on pages 79, 80, and 81 of the bill.

Mr. GORE. And we are now taking up the provisions on page 69?

Mr. BINGHAM. The provision which I desire, if the unanimous-consent agreement shall be made, to take up first is the one to which I referred, and which proposes a further reduction in compensation of 1⅔ per cent.

Mr. GORE. I have an amendment pending.

The PRESIDENT pro tempore. Is there objection to the unanimous-consent request preferred by the Senator from Connecticut?

Mr. GORE. I have no objection.

Mr. ASHURST. Mr. President, will the Senator permit me to ask him a question?

Mr. BINGHAM. Certainly.

Mr. ASHURST. At the appropriate time, I desire to move to strike out section 11, which is found on page 76 of the bill. On page 8 of the committee report there is a para-

graph discussing section 11. Will the able Senator advise me when, in his judgment, he being in charge of this section, would be an appropriate time for me to make such a motion? I am not seeking any premature action, but I do not want to be foreclosed.

Mr. BINGHAM. I should not imagine that we could possibly reach that to-day, I will say to the Senator.

Mr. ASHURST. I am indifferent as to the time, but I do not want to be foreclosed. Would the agreement that is now sought to be obtained preclude my right to seek to strike out that section?

Mr. BINGHAM. Not at all, Mr. President. When we reach page 8 of the report, and the question arises whether the Senate will accept that recommendation of the committee, then, of course, it will be in order for the Senator to move to strike out section 11 of the bill.

Mr. ASHURST. Then, it is proposed to consider the remainder of the bill according to the report rather than according to the bill itself? Is that the idea?

Mr. BINGHAM. Yes; that is the suggestion which I have made, and I believe it is in the interest of clarity and good procedure.

Mr. ASHURST. I thank the Senator from Connecticut.

Mr. BLAINE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Connecticut yield to the Senator from Wisconsin?

Mr. BINGHAM. I yield.

Mr. BLAINE. Assuming that we reach page 7 of the report after it shall have been reached and disposed of, by way of example, will that preclude going back and offering amendments to other provisions?

Mr. BINGHAM. Not at all, unless under the rules of the Senate some provision shall have been adopted.

Mr. BLAINE. I understand that. But it would not preclude going back and offering amendments which would not be contrary to the general rules of the Senate?

Mr. BINGHAM. No; not at all.

Mr. BROOKHART. Mr. President——

Mr. BINGHAM. Will the Senator permit the request for unanimous consent to be put?

Mr. BROOKHART. I should like first to ask the Senator a question. He stated that this entire title was one amendment. Would it be considered as one proposition if the unanimous consent agreement were not entered into?

Mr. BINGHAM. Under the ordinary rules of the Senate, we should have, then, to consider the amendment as a whole, and amendments to it could be offered at any time, which would confuse us in the logical consideration of the whole proposal.

Mr. BROOKHART. Under the Senator's request for unanimous consent we would consider the sections separately?

Mr. BINGHAM. Yes; each proposal would be considered separately.

Mr. BROOKHART. And we would have a separate vote, if necessary, on each one?

Mr. BINGHAM. That is my suggestion.

Mr. FESS. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. FESS. The query propounded by the Senator from Iowa does suggest some confusion, and I should like to have the Chair's ruling on it.

The PRESIDENT pro tempore. The Chair's understanding, in the absence of a unanimous-consent agreement to the contrary, is that the entire language of title 3 will have to be considered as a single amendment, and to it amendments may be offered at any time dealing with any portion of it. The Senator from Connecticut, however, asks unanimous consent that the single amendment, namely title 3, shall be dealt with in the order in which the report submitted by the committee deals with the subject matter.

Mr. FESS. So that——

The PRESIDENT pro tempore. So that as the report deals with given sections of the amendment, those sections would be taken up seriatim.

Mr. FESS. The Chair has answered the query I had in my mind.

The PRESIDENT pro tempore. Is there objection to the unanimous-consent request preferred by the Senator from Connecticut?

Mr. LA FOLLETTE. Mr. President, I do not wish to impinge on the time of the Senator from Connecticut, if his time is running on this amendment; but I wanted to ask whether or not there was any danger of there being such an interrelation between these amendments that it might be necessary to consider the individual amendments to the various sections in relation to other sections.

Mr. BINGHAM. It was for that reason that I suggested taking it up under the headings set forth in the report; for when the Senate determines what it wants to do with each heading, then the clerk can readily make the amendments in the form desired by the Senate.

Mr. REED. Mr. President, will the Senator yield for a question?

The PRESIDENT pro tempore. Does the Senator from Connecticut yield to the Senator from Pennsylvania?

Mr. BINGHAM. I yield.

Mr. REED. Am I correct in my understanding that if any of us, for any reason, is called away from the floor for a moment, and a subject matter as listed in the report is acted upon, it will be impossible under this agreement to revert to it and offer any amendment to it?

The PRESIDENT pro tempore. The Chair would not so hold.

Mr. REED. If it is the understanding that we are not barred from going back and offering amendments, I have no objection to the unanimous-consent agreement.

Mr. BROOKHART. I should like to ask one further question: If this section of the bill is divided up for consideration, will the 15-minute time limit apply to each division, or will there then be only 15 minutes for the whole amendment?

Mr. BINGHAM. It is my idea that each section should be treated as a separate amendment, and therefore the 15-minute limitation would apply only to each section; whereas if the unanimous-consent agreement should not be granted, the limitation would apply to the entire amendment reported by the committee.

Mr. BROOKHART. And the Senator includes that idea in his request?

Mr. BINGHAM. That was my understanding.

The PRESIDENT pro tempore. The Chair would so hold. Is there objection to the unanimous-consent agreement preferred by the Senator from Connecticut? The Chair hears none, and the agreement is entered into.

Mr. BINGHAM. Now, Mr. President, I ask that the clerk may read on page 69 from line 20 to line 3 on page 70.

The PRESIDENT pro tempore. The clerk will read, as requested.

The Chief Clerk read as follows:

(1) Section 101 is amended by adding at the end thereof the following new subsection:

"(d) The rate of compensation of each officer and employee to whom subsection (a) or (b) applies shall be reduced by 1⅔ per centum."

And section 101(c) is amended by striking out "subsections (a) and (b)" and inserting in lieu thereof "subsections (a), (b), and (d)."

Mr. BINGHAM. Mr. President, it is perfectly evident that everyone understands what this proposal is. The President of the United States suggested that, in addition to the furlough now in effect under the economy law as passed last year, there should be imposed an additional cut of 11 per cent. The committee went into the matter very carefully and unanimously recommended to the Appropriations Committee that, instead of 11 per cent as recommended by the President in the Budget message, the additional cut should be 1⅔ per cent. That will put all salaries under $12,000 on the same basis of a 10 per cent cut.

Mr. KEAN. Mr. President, I should like to ask the Senator a question.

The PRESIDENT pro tempore. Does the Senator from Connecticut yield to the Senator from New Jersey?

Mr. BINGHAM. I yield.

Mr. KEAN. I should like to ask whether a post-office clerk who is employed for a short time during the year, whose salary would be nominally at the rate of $1,200 a year, but who serves for only three or four days, would, under this provision be subject to a cut amounting to more than his salary?

Mr. BINGHAM. No; Mr. President, such cases are taken care of under another section, where it is provided that there may be no cut which would amount to more than $83 in any given month.

The PRESIDENT pro tempore. If the Chair correctly understood the purport of the colloquy between the Senator from Iowa and the Senator from Connecticut, under the unanimous-consent agreement the Senate will vote on each one of these proposals. Therefore the question is upon agreeing to No. 1 as contained in the report.

Mr. ODDIE. Mr. President, I oppose this extra 1⅔ per cent reduction in the pay of Federal employees as contained in this so-called economy amendment to this bill. It may not sound like a large amount to those who have not given this question study; but when we consider the large number of Federal employees who are receiving very small salaries, this 1⅔ per cent reduction will represent the difference between present conditions, which are bad enough, and positive privation and suffering.

I consider it a very small way in which to save money for the Government. I consider it false economy. The Government will function better, normal conditions will return sooner, and the American standard of living will be maintained longer and brought back to a higher level if this amendment is rejected.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Nevada yield to the Senator from Massachusetts?

Mr. ODDIE. Yes.

Mr. WALSH of Massachusetts. How much money is it claimed will be saved to the Federal Treasury by the adoption of this amendment cutting salaries generally?

Mr. ODDIE. The Senator from Connecticut [Mr. BINGHAM] has those figures.

Mr. BINGHAM. Mr. President, it is estimated that the saving will be $17,800,000.

Mr. WALSH of Massachusetts. Does this amendment embrace a cut in the salaries of Members of the House and the Senate?

Mr. BINGHAM. No, Mr. President. They are at present on the 10 per cent basis.

Mr. WALSH of Massachusetts. And it is because they are on the 10 per cent basis at the present time that the committee did not recommend any further cut in their salaries?

Mr. BINGHAM. The committee recommended that all salaries under $12,000 be cut at the rate of 10 per cent, except salaries of $1,000 and under, and except that no salary should be reduced below $1,000.

Mr. WALSH of Massachusetts. There is no cut, then, below $1,000?

Mr. BINGHAM. No salary of $1,000 is cut at all, and no salary that is a little above $1,000 is cut below $1,000.

Mr. WALSH of Massachusetts. I thank the Senator.

Mr. COSTIGAN. Mr. President, I desire to ask the Senator from Connecticut some questions about the committee's amendment.

Will the Senator from Connecticut tell us what the aggregate pay cuts of Federal employees will amount to under the bill as reported by the committee? I have a statement which purports to show that the provision for at least a 5 per cent reduction in another section of the bill, as reported by the committee, amounts, at the minimum, when applied to Post Office employees, to approximately 7½ per cent. Of course, the percentage would be increased if the reduction were extended, as is possible, beyond 5 per cent by the departmental head.

Am I correct in inferring that the aggregate pay cuts under the bill as reported for postal employees, if the 1⅔ per cent pay cut is applied, will be approximately 17½ per cent?

Mr. BINGHAM. I do not fully follow the Senator. I am sorry. The present reduction is about 8⅓ per cent. The committee has recommended 1⅔ per cent beyond that, or a total of about 10 per cent.

Mr. COSTIGAN. That is correct. That makes 10 per cent. Now, under the amendment which the Senator has asked us to reconsider, an additional 5 per cent or greater reduction by the heads of departments is provided.

Mr. BINGHAM. Not as the amendment stands at present in the bill, because the Senator from Colorado himself has seen to it that none of that saving may come out of salaries or wages.

Mr. COSTIGAN. But under the amendment, as the Senator from Connecticut desires it, there will be an additional reduction of at least 7½ per cent, if I am correctly advised.

Mr. BINGHAM. I can not follow the Senator's figures. What I said yesterday was that under the amendment as offered by the Senator from Colorado it would be necessary to discharge employees so as to save 5 per cent in many departments, because it would be impossible to request them to take additional furloughs and spread the work over a larger number of persons, and it would increase the unemployment. If the budget of a department contained personal services only, and the amendment offered by the Senator from New Mexico went into effect without the amendment offered by the Senator from Colorado, it would be necessary to cut down 5 per cent in the pay of all persons employed; but if the amendment stays as offered by the Senator from Colorado, it would be necessary to discharge 5 per cent of the employees.

Mr. COSTIGAN. The figures to which I have made reference give an estimate of the effect of the reductions on employees of the Post Office Department.

The Senator from Nevada [Mr. ODDIE] the other day stated the basic calculations in some detail. It probably will be well, since this discussion may continue until Monday, and since we have here an example of some of the effects of what we are to do on the wages and living standards of men, women, and children, if we may have the table I hold in my hands placed in the RECORD to show the items of the calculation. I ask that that be done, Mr. President.

The PRESIDING OFFICER. Without objection, the table will be printed in the RECORD.

The table is as follows:

FIXED CHARGES, EITHER BY LAW OR CONTRACT	
Transportation and delivery of equipment by freight, express, or motor	$350,000
Payment of rewards	45,000
Compensation to postmasters and allowances for rent, light, and equipment to postmasters of the fourth class	46,000,000
Compensation to assistant postmasters, first and second class post offices	6,200,000
Fees to special-delivery messengers	7,450,000
Car fare and bicycle allowance	1,250,000
Inland transportation by star routes	14,000,000
Inland transportation by steamboats	1,350,000
Inland transportation by railroad routes and for mail messenger service	100,000,000
Transportation of foreign mails by steamship and aircraft	35,500,000
Balance due foreign countries	1,000,000
Manufacture of postage stamps, etc	4,900,000
Rent, fuel, light, and water for first, second, and third class post offices	16,000,000
Pneumatic-tube service, New York, Brooklyn, and Boston	548,000
Total fixed charges	233,343,000

PERSONNEL SERVICE (SALARIES), POST OFFICE DEPARTMENT	
Office of Postmaster General	214,463
Office of First Assistant Postmaster General	471,000
Office of Second Assistant Postmaster General	394,275

Office of Third Assistant Postmaster General	$725,532
Office of Fourth Assistant Postmaster General	328,638
Office of Solicitor of Post Office Department	68,750
Office of Chief Inspector	188,045
Bureau of Accounts, Post Office Department	87,083
Total	2,477,786

PERSONNEL SERVICE (SALARIES), FIELD

Inspection service	1,878,750
Clerks at Inspection Division headquarters	300,700
Clerks and employees at first and second class post offices	161,000,000
Clerks in charge of contract stations	1,800,000
Allowances to third-class offices for clerical hire	8,000,000
Village delivery service	1,400,000
Detroit River service	15,995
Letter carriers, City Delivery Service	113,000,000
Rural Delivery Service	95,000,000
Railway Mail Service, clerks	51,000,000
Total	433,395,195

TOTAL SALARIES, POST OFFICE DEPARTMENT AND FIELD SERVICE

Post Office Department	2,477,786
Field service	433,395,195
Total	435,872,981

RECAPITULATION

Total appropriation	717,033,378
Fixed charges by law or contract (from which no deduction can be made)	233,343,000
Amount on which reduction can be made	483,690,378
Amount of appropriation necessary for salaries	435,872,981
Amount of appropriation, less salaries, on which reductions can be made	47,817,397
5 per cent saving on the entire appropriation	35,851,666
Per cent of reduction necessary to effect a 5 per cent saving on the entire appropriation after eliminating fixed charges upon which no saving can be effected, 7.41 per cent.	

Mr. COSTIGAN. Under this table it is estimated that the amount of the appropriation, less the salaries, on which the wage reductions can be made is $47,817,397, and that a 5 per cent saving on the entire appropriation would amount to $35,851,666. The conclusion is that the minimum 5 per cent reduction—that is, a per cent of reduction on the entire appropriation necessary to effect merely a 5 per cent saving—after eliminating fixed charges upon which no saving can be made, will amount to 7.41 per cent of the workers' wages.

If that be true, and if the amendment favored by the Senator from Connecticut [Mr. BINGHAM] and by the Senator from New Mexico [Mr. BRATTON] be later adopted in the form in which it was first presented, post-office employees apparently will be subject to an aggregate reduction below their previous wages of 17½ per cent. I submit that such a reduction is extraordinarily oppressive. It tends unduly to decrease general purchasing power at a time when increased purchasing power is our greatest need.

Mr. BINGHAM. The Senator is now making an argument against the Bratton amendment rather than against the amendment as suggested by the Economy Committee.

Mr. COSTIGAN. I am making an argument against both, I will say in answer to the Senator from Connecticut.

Mr. BINGHAM. Mr. President, all that the Senate Economy Committee recommends is 1⅔ per cent increase. That which the Senator voted for when he voted for the Bratton amendment added an increase, according to his own figures, of more than 7½ per cent.

Mr. COSTIGAN. If the Senator from Connecticut will pardon me, I did not vote for the Bratton amendment.

Mr. President, while on my feet I think it appropriate to ask to have placed in the RECORD a statement of Mr. Thomas F. Flaherty, the competent secretary-treasurer of the National Federation of Post Office Clerks, recently prepared by him and submitted to me. It is worthy of the Senate's attention as a clear and discriminating outline of the carefully considered position taken by this important group of Federal employees—not only on the pending amendment but also on the bill as a whole. I will read a paragraph or two, and request that the entire statement be incorporated in the RECORD with my remarks. The memorandum says, in part:

If the economy law is continued, it means notice to the country by Congress that there is little hope for an upward trend prior to July 1, 1934. This would sound a note of despair, with unfortunate reactions everywhere.

Economists state that a live dollar, such as goes into the pay envelope of a postal worker, turns over five times monthly in rapid circulation. Thus, the $40,000,000 that will be cut this fiscal year (1932–33) from the postal pay rolls represents a decreased spending volume of more than $2,000,000,000.

With reference to the particular feature of the bill before us, this statement declares:

We would respectfully call your attention to the proposed amendment on page 69, beginning line 22, reading:

"(d) The rate of compensation of each officer and employee to whom subsection (a) or (b) applies shall be reduced by 1⅔ per centum."

This would superimpose a straight pay cut upon the furlough plan, making the total loss in earnings amount to 10 per cent, not counting the further cut of 5 per cent or more. It is highly objectionable for the reasons set forth above. The aggregate savings by this amendment are negligible, although the individual hardships it entails are many.

The PRESIDING OFFICER. As requested by the Senator from Colorado, the entire statement will be printed in the RECORD.

The statement is as follows:

In behalf of the membership of the National Federation of Post Office Clerks permit me to say that the present economy law has failed of its purpose, not having effected substantial economies and at the same time materially injuring the service morale.

It has impaired the mass purchasing power of the postal workers to the extent of $40,000,000 throughout the country, which in turn has been harmful to the small business man.

We are firmly convinced that a continuation of this law will retard rather than help economic recovery.

If the economy law is continued, it means notice to the country by Congress that there is little hope for an upward trend prior to July 1, 1934. This would sound a note of despair, with unfortunate reactions everywhere.

Economists state that a live dollar, such as goes into the pay envelope of a postal worker, turns over five times monthly in rapid circulation. Thus, the $40,000,000 that will be cut this fiscal year (1932–33) from the postal pay rolls represents a decreased spending volume of more than $2,000,000,000.

Prosperity never can be restored by spending less. This applies to the Government as well as to individuals. Carried to its logical conclusion, this form of economy would result in everybody refusing to buy services or goods. The situation is aptly summed up by J. M. Keynes, of England, perhaps the world's foremost economist, in the following terse statement:

"If we carry 'economy' of every kind to its logical conclusion, we shall find that we have balanced the Budget at naught at both sides, with all of us flat on our backs, starving to death from a refusal for reason of economy, to buy one another's services. Economy is only useful from the national point of view in so far as it diminishes our consumption of imported goods. For the rest its fruits are entirely wasted on unemployment, business losses, and reduced savings."

This clamor for a reduction of Federal taxes comes from a small though powerful group of large taxpayers. Less than 4 per cent of the people pay Federal income tax directly. It is sheer nonsense, therefore, to claim that this drive for lowered Federal taxes is in response to a widespread public demand. The average farmer or wage earner pays no Federal income taxes—or very little. Four-fifths of all such taxes are paid directly by 1 per cent of the people—the wealthy group that can well afford to pay.

It is wrong to assume that Federal taxes are nonproductive and can be withheld without injury to the people. We spend more money for recreation and amusement than for running the Government. The Federal tax bill is not responsible for our present dilemma. Members of Congress should not be stampeded into an unwise action now because of a demand from a few large taxpayers for personal relief.

The distribution of the tax dollar shows that 55 per cent goes for local taxes; 30 per cent for Federal taxes; 15 per cent for State taxes. Only 4 per cent of every dollar paid in taxes goes for the wages of Government employees. Consequently, the entire civil personnel could be dismissed without effecting any substantial economy in taxes.

OBJECTION TO PAY CUT

We would respectfully call your attention to the proposed amendment on page 69, beginning line 22, reading:

"(d) The rate of compensation of each officer and employee to whom subsection (a) or (b) applies shall be reduced by 1⅔ per centum."

This would superimpose a straight pay cut upon the furlough plan, making the total loss in earnings amount to 10 per cent, not counting the further cut of 5 per cent or more. It is highly

objectionable for the reasons set forth above. The aggregate savings by this amendment are negligible, although the individual hardships it entails are many.

RESTORATION OF AUTOMATIC PROMOTIONS

We are grateful to the Senate Economy Committee for having recommended a restoration of automatic promotions in the Postal Service. This is accomplished by the elimination of section 201 of the economy act. We trust this action will be approved by the Senate.

The salary progression of post-office clerks and city letter carriers from an entrance grade of $1,700 annually to the top grade at $2,100, is fixed by a law which stipulates that they be promoted successively $100 each year, contingent upon satisfactory service. There are approximately 4,733 clerks and 3,109 city letter carriers in these four automatic salary grades at present. Most of them worked five years or longer as substitutes before appointment to the regular force at $1,700, which means they have been in the service at least eight or nine years. This period is in reality the employees' apprenticeship. For the most part they are family men with the consequent responsibilities. To deprive them now of earned promotions is expensive economy—resulting in a very small money saving and a large loss in service morale.

BREACH OF CONTRACT

It sounds impressive to say that Congress will stop all promotions as an economy measure. There may be cases where this can be justified. Yet in this instance there would be a breach of contract on the part of the Government, and the economy is aimed directly at the lowest paid groups—those least able to stand it.

SAVINGS SMALL

The total saving effected by denying these earned promotions is approximately $780,000, which is to be withheld from 7,800 wage earners, scattered throughout the country, and which ordinarily would be spent in the usual channels of trade. In view of the billions appropriated by Congress to stimulate business it is rather petty to now suspend this legitimate expenditure in the form of earned wages and increased purchasing power. Congress should not be put in the position of stimulating only big business and throttling little individuals.

GOVERNMENTAL HOARDING

President Hoover recently called attention to the importance of dissipating fear and restoring public confidence as an aid to economic recovery. The suspension of the earned promotions of men receiving $2,000 or less annually—men who have been in the public service for seven or eight years—has not established confidence and security among the postal employees. It has had the reverse effect, and to this extent retarded the reconstruction program. If every dollar hoarded means a destruction of from $5 to $10 of credit, as the President stated, then withholding these promotions is equivalent to governmental hoarding at the expense of a low-wage group and can not be defended, morally or economically.

NIGHT WORK

Your attention is directed to the Senate committee amendment beginning line 22, page 71, reading:

"(2) Wherever by or under authority of law compensation for night work (other than overtime) is at a higher rate than for day-work such differential shall be reduced by one-third."

We are again indebted to the Senate Economy Committee for its recommendation to restore the night work differential in part. Under existing legislation it has been reduced from 10 to 5 per cent in the Postal Service. This amendment would reduce the 5 per cent to 3⅓ per cent. We believe in view of all the circumstances that the full differential should be restored.

The loss of the night-work differential affects the lower paid groups in the post offices and is discriminatory in its application, resulting in a double or triple pay cut in some instances. It has happened that a postal night worker has lost his automatic promotion ($100), his night-work pay differential ($100), and then on top of these reductions he loses 8⅓ per cent of his earnings by reason of the furlough plan. This is an unusually severe penalty to impose upon a $2,000 employee.

AN INJUSTICE CORRECTED

We are grateful to the Senate Economy Committee for the inclusion in the bill of section 8, lines 14 to 26, inclusive, page 75, which corrects an injustice imposed upon some 2,300 postal employees who were arbitrarily separated from the service by Executive order on July 9, 1932, but who did not receive their retirement annuities until August 1. This section corrects that injustice and provides that annuity payments shall be made to cover the period from July 10 to 31, inclusive.

PROTECTION FOR LOW-PAID EMPLOYEES

We are also grateful to the Economy Committee for its approval of the House provision to prevent pay deductions of employees earning less than $1,000 annually. The Comptroller General ruled that postal substitutes, whose actual earnings are for the most part now less than $1,000 annually, are nevertheless paid at a "rate" in excess of that amount and deductions must be made from their earnings.

Section 5, lines 6 to 19, inclusive, page 73, contains the corrective legislation which insures employees receiving not more than $83.33 against pay cuts. It was plainly the intent of the last Congress not to reduce the earnings of those receiving less than one thousand but nevertheless this has been done to postal substitutes. The legislation, therefore, is needed for the protection of this group.

REPEAL REQUESTED

The National Federation of Post Office Clerks believes that as a matter of broad principle and sound economics the repeal of the economy act is fully justified. But if it can not be repealed, we trust its harmful effects will be minimized by the inclusion of the constructive amendments above referred to and the elimination of the unsatisfactory, restrictive features of the law.

Mr. COSTIGAN. It is not possible, because of limited time, to pursue the matter further for the moment, except to direct attention to the suggestion made the other day, and rather lightly dismissed here, that faithful employees of the Government are not being overcompensated for their services; that many of them are caught in the downward pull of economic distress, in common with other citizens of our country.

I was handed to-day a memorandum summarizing 105 replies from city letter carriers of a leading city in Tennessee. The answers are believed to be fairly representative.

Out of the 105 interrogated, 66 replied that they bought or started to buy their homes during the period of higher prices in this country; 57 that their homes are under mortgage; 68 that they owe for furniture and other household necessities; 70 that they are in debt because of sickness or death in the family; 85 that they are helping relatives who are unemployed; 91 that a further reduction in salary will endanger their chances of completing their payments on homes, furniture, and other household necessities.

Thirty-one of the number, according to this tabulation, have been required to give up, in whole or in part, the use of home telephones; 15 have found it necessary to stop purchasing milk; 17, ice; 67, clothing; 64, home necessities; 59, insurance; 81, amusements; 27, gas; and 71 find themselves no longer able to make contributions to relieve the distress of others.

In addition, those who responded report that there have been no reductions in payments of interest, or in street car, gas, light, water, telephone, insurance, and total home expenses.

Mr. President, I call attention to these items in order that the gravity of apparently innocent reductions urged by the Senator from Connecticut and the committee for which he speaks may not be forgotten by those of us who sit here and easily cast our votes on one side or the other of the pending issue. We are fundamentally dealing with business recovery and human welfare.

If, as suggested—and apparently the figures submitted for the record are authentic—the aggregate burden which will fall, to take but one illustration, upon the postal workers of this country, under the combined suggestions of the committee, will exceed 17 per cent, it is to be hoped that the Senate will defeat the pending amendment.

The PRESIDING OFFICER. The question is on the amendment on page 69, subsection (1), lines 20 to 24, and on page 70, lines 1 to 3, inclusive, where the committee proposes to insert the following:

(1) Section 101 is amended by adding at the end thereof the following new subsection:

"(d) The rate of compensation of each officer and employee to whom subsection (a) or (b) applies shall be reduced by 1⅔ per cent."

And section 101 (c) is amended by striking out "subsections (a) and (b)" and inserting in lieu thereof "subsections (a), (b), and (d)."

Mr. BLAINE. Mr. President, this is a very important amendment, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Bratton	Copeland	Frazier
Austin	Brookhart	Costigan	George
Bankhead	Bulkley	Couzens	Goldsborough
Barbour	Bulow	Cutting	Grammer
Barkley	Byrnes	Dale	Hale
Bingham	Capper	Davis	Harrison
Black	Caraway	Dickinson	Hastings
Blaine	Clark	Fess	Hatfield
Borah	Connally	Fletcher	Hayden

Johnson	McGill	Robinson, Ark.	Townsend
Kean	McKellar	Robinson, Ind.	Tydings
Kendrick	McNary	Russell	Vandenberg
Keyes	Metcalf	Schall	Walsh, Mass.
King	Moses	Schuyler	Walsh, Mont.
La Follette	Norris	Sheppard	Watson
Lewis	Oddie	Steiwer	White
Logan	Reed	Thomas, Okla.	

The PRESIDENT pro tempore. Sixty-seven Senators having answered to their names, a quorum is present.

Mr. BINGHAM. Mr. President, I merely want to say that if we can get a vote on this matter now, so that we may make some progress, I shall be perfectly willing then that the Senate shall take a recess until Monday.

Mr. LA FOLLETTE. Mr. President, I would like to ask the Senator from Connecticut a question. In view of the statement made by the Senator from Colorado [Mr. COSTIGAN], does it not seem to the Senator from Connecticut that we should first pass upon the question whether or not the amendment offered by the Senator from Colorado to the amendment proposed by the Senator from New Mexico is to be reconsidered by the Senate? If the 5 per cent reduction provided in the amendment offered by the Senator from New Mexico is to be used to reduce salaries in the Government service 5 per cent, that should be determined before the Senate proceeds to follow the recommendations of the economy committee in another section of the bill to reduce wages 1⅔ per cent.

As pointed out by the Senator from Colorado, should the amendment be reconsidered and the Senate reject it upon reconsideration, we would then have adopted a pay cut of 17½ per cent for Government employees.

I realize that the hue and cry for economy has stampeded the Congress and the Senate into a position where they are ready to slash almost anything, regardless of its effect on human beings, but it does seem to me that we should have a determination of just how far we are to go and that we should not take these cuts up piecemeal.

I, therefore, appeal to the Senator from Connecticut that he withdraw the amendment now pending on behalf of the Economy Committee, make his motion to reconsider the vote by which the amendment offered by the Senator from New Mexico was agreed to, and determine the question whether the amendment of the Senator from Colorado is to remain in the amendment, before we proceed to adopt this additional recommendation of the committee.

I ask the Senator if he will not, in order that we may have a logical procedure here, take the course which I suggest.

Mr. BINGHAM. Mr. President, I have no objection to taking that course, and if the Senator chooses to move to reconsider the vote now, I shall offer no objection.

Mr. LA FOLLETTE. I think the Senator from Connecticut should make the motion. I do not favor a reconsideration, myself, but the Senator has given notice that he intends to make such a motion, and I appeal to him to make it now.

Mr. BINGHAM. Mr. President, if there is no objection, I ask unanimous consent that the vote whereby the so-called Bratton amendment was agreed to may be reconsidered. I make the request in that form in order that I may then move to reconsider the vote whereby the so-called Costigan amendment to the amendment was adopted.

Mr. COSTIGAN. Mr. President, I feel that I am not in a position to consent to reconsideration of the vote by which the Senate agreed to the provision. It is, however, my understanding that the Senator from New Mexico [Mr. BRATTON] intends to offer another amendment meeting a suggestion made the other day by the able Senator from Nebraska [Mr. NORRIS] that the 5 per cent wage cut apply, if at all, uniformly to every department. I presume, therefore, that amendment comes before us. If the Senator from New Mexico so proceeds, it is my intention to offer in substance the same amendment to his general amendment which the Senate adopted with respect to his particular amendment. Therefore, at this time I am compelled to object.

Mr. BRATTON. Mr. President, it is my purpose later to offer the amendment to which the Senator from Colorado has just referred. It comes at a subsequent place in the bill. I think there is considerable force in what he said, and I appeal to the Senator from Connecticut to pass over the pending amendment until we shall have reached the place and passed upon the amendment general in character which I shall offer later, as a determination of that question may have some bearing upon whether this cut should be adopted or not.

Mr. NORRIS. Mr. President, may I make an inquiry of the Senator?

Mr. BRATTON. I yield.

Mr. NORRIS. If the Senator offers the amendment to which he has referred and which I trust he will offer at the place in the bill to which he has referred, and assuming it is agreed to by the Senate, it will then be desirable to take out of the bill the amendment already agreed to; is that correct?

Mr. BRATTON. Yes.

Mr. NORRIS. To pave the way for such an emergency, would it not be well, in order to prevent that from being accomplished by some one objector, for the Senator himself to make a motion to reconsider the vote by which the amendment was agreed to, and let that motion be pending until we dispose of the other matter? Will it be more than three days? If it is not done to-day, the time limit would very probably expire.

Mr. BRATTON. The amendment was adopted yesterday.

Mr. NORRIS. Then there is plenty of time.

The PRESIDENT pro tempore. May the Chair suggest that motion to reconsider has already been entered and merely awaits the actual making.

Mr. BRATTON. That is correct.

Mr. NORRIS. Does the Senator from Connecticut intend to develop that motion?

Mr. BINGHAM. Mr. President, I am under the embarrassing situation of having been asked by one Senator to press it now and having been asked by another Senator not to press it until we reach the end of the bill. I have no preference in the matter. I appreciate the force of what the Senator from Nebraska has said, that it might affect this vote or other votes on the question of the 1⅔ per cent increase in the pay cut if we know whether there is to be a 5 per cent increase in pay cut or whether the motion of the Senator from Colorado is to prevail and no further pay cut is to take place. So far as I am concerned, I am willing to settle the question now.

Mr. NORRIS. Could we not solve that difficulty by having the Senator from New Mexico offer his amendment now? Is it not in order to offer that amendment now?

The PRESIDENT pro tempore. The Chair is of the opinion that that would vitiate the unanimous-consent agreement entered into to proceed seriatim with the amendments of the committee.

Mr. NORRIS. My understanding was that the unanimous-consent agreement was only to prevent amendments to the economy provision coming up until we have disposed of amendments to the other provisions. However, I was not present when it was entered into.

Mr. BARKLEY. Mr. President, would it not be possible to secure an agreement to pass over the 1⅔ per cent additional pay cut until we pass finally upon the 5 per cent pay cut as it will be offered by the Senator from New Mexico, because such an arrangement as that would enable us to determine the larger question first?

The PRESIDENT pro tempore. In the opinion of the Chair, that may be done.

Mr. BINGHAM. I am perfectly willing to do that. I ask unanimous consent that the motion which has been pending may be withdrawn.

The PRESIDENT pro tempore. Without objection, that may be done.

RECESS

Mr. BINGHAM. I now move that the Senate take a recess, in accordance with the unanimous-consent agreement heretofore entered into, until 11.30 a. m. on Monday.

The motion was agreed to; and the Senate (at 4 o'clock and 5 minutes p. m.) took a recess until Monday, February 6, 1933, at 11.30 o'clock a. m.

HOUSE OF REPRESENTATIVES

SATURDAY, FEBRUARY 4, 1933

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O God, our help and our hope in ages past, Thy blessed benediction has been with us, and as unwithering as divine love and as boundless as human life. Thou surely hast nourished us through the years and taught us the true principles of rich and abiding character. In the urgent service and need of our country make us watchful and consumed by a noble passion, and thus we shall be justified in the minds of our fellow citizens. Our Father, be with men of every station; guide men, sustain men, help men, shelter men, and console men as they walk up and down the streets and lanes of our land, and make us all merciful and true. In every worthy vocation and in every essential business may we seize the opportunity of developing clean, strong, and manly souls. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Craven, its principal clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13607) entitled "An act to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of distress."

The message also announced that the Senate had agreed to the amendments of the House to the bill (S. 487) entitled "An act for the relief of Herbert G. Black, owner of the schooner *Oakwoods*, and the Clark Coal Co., owner of the cargo of coal on board said schooner."

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 4509) entitled "An act to further amend the act approved February 25, 1920, entitled 'An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain.' "

The message also announced that the Senate had agreed to the amendments of the House to the bill (S. 2200) entitled "An act to authorize the presentation of a medal of honor posthumously to the late Henry Clay Drexler and the late George Robert Cholister."

MINING OF COAL, PHOSPHATE, OIL, ETC. ON THE PUBLIC DOMAIN

Mr. EVANS of Montana. Mr. Speaker, I call up the conference report on the bill (S. 4509) to further amend the act approved February 25, 1920, entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium, on the public domain."

Mr. SABATH. Mr. Speaker, I make the point of order there is not a quorum present.

The SPEAKER. Evidently, there is not a quorum present.

CALL OF THE HOUSE

Mr. SANDLIN. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, when the following Members failed to answer to their names:

[Roll No. 155]

Abernethy	Brand, Ohio	Cole, Md.	Dominick
Aldrich	Britten	Cooke	Douglas, Ariz.
Almon	Buckbee	Cooper, Ohio	Erk
Andrews, N. Y.	Burch	Corning	Finley
Arentz	Busby	Crosser	Fish
Bacharach	Byrns	Crump	Fishburne
Baldrige	Carter, Wyo.	Culkin	Flannagan
Beck	Celler	Davenport	Foss
Bowman	Chase	Dickstein	Freeman
Brand, Ga.	Clancy	Dieterich	Gillen
Golder	Igoe	Oliver, N. Y.	Stewart
Goldsborough	Jeffers	Overton	Strong, Kans.
Granfield	Johnson, Ill.	Owen	Sullivan, Pa.
Green	Johnson, S. Dak.	Pettengill	Sweeney
Haines	Johnson, Tex.	Rankin	Tierney
Hall, Miss.	Johnson, Wash.	Rich	Treadway
Hancock, N. Y.	Kelly, Ill.	Sanders, N. Y.	Underwood
Hartley	Lamneck	Shott	White
Haugen	McLeod	Shreve	Whitley
Hoch	McSwain	Sirovich	Wigglesworth
Hollister	Maas	Smith, Idaho	Williams, Tex.
Hornor	Manlove	Snow	Wingo
Houston	Mobley	Stafford	Wood, Ind.
Hull, William E.	Nelson, Wis.	Stevenson	

The SPEAKER. Three hundred and thirty-one gentlemen have answered to their names. A quorum is present.

On motion of Mr. RAINEY, further proceedings under the call were dispensed with.

MINING OF COAL, PHOSPHATE, OIL, ETC., ON THE PUBLIC DOMAIN

The SPEAKER. The Clerk will report the conference report.

The Clerk read the conference report.

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 4509) entitled "An act to further amend the act approved February 25, 1920, entitled 'An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain,' " having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment and the Senate agree to the same.

JOHN M. EVANS,
TOM YON,
DON B. COLTON,
Managers on the part of the House.
GERALD P. NYE,
BRONSON CUTTING,
JOHN B. KENDRICK,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (S. 4509) to further amend the act approved February 25, 1920, entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The bill as it passed the Senate authorized the Secretary of the Interior to direct or assent to the suspension of operations and production of coal, oil, and/or gas under any lease granted under the act and provided for the suspension of payment of acreage rental for the period of suspension of operations and production. The House amendment would mean that should there be operations resulting in production from the leased area in the future, the department would collect from the lessee the back rental, out of production. In the case of a small production this amendment would virtually annul the purposes of the bill.

The amendment was offered under a misconstruction of what was intended under this proposed legislation, and after adoption of the amendment in the House, the author of the amendment and the House conferees were glad to recede from the amendment.

JOHN M. EVANS,
TOM YON,
DON B. COLTON,
Managers on the part of the House.

Mr. SNELL. Mr. Speaker, I desire to ask a question on the conference report. I wish the chairman of the committee would tell us why they yielded and accepted the proposition as presented by the Senate in preference to the position of the House.

Mr. EVANS of Montana. Mr. Speaker, the statement accompanying the report would show that clearly. The Sen-

ate passed this bill; and the gentleman from Wisconsin [Mr. STAFFORD] offered an amendment which, in effect, nullified the bill. The House adopted the amendment, and then the gentleman from Wisconsin joined with the conferees in asking that the House recede from its amendment.

Mr. SNELL. I really can not understand why we should not put all the leases, large and small, on exactly the same basis.

Mr. EVANS of Montana. We do.

Mr. EATON of Colorado. If the gentleman from Montana will yield—this bill was reported from the Public Lands Committee and placed on the Unanimous Consent Calendar. I was responsible for the manner in which the bill finally passed the House. This was the situation: When the bill was first called on the Consent Calendar the gentleman from Wisconsin [Mr. STAFFORD] desired to amend the bill in a manner which appeared to entirely change its effect. It went over for a couple of weeks; and when the Consent Calendar was next called, during the debate on the bill, I consented to the Stafford amendment, with the understanding that the bill should be passed with the amendment and that its effect should be considered by a conference committee and the differences ironed out in that committee.

Mr. SNELL. That is not the way I have understood it.

Mr. EATON of Colorado. This bill, as originally passed by the Senate, made an additional section to be added to the general leasing law of February 25, 1920, requiring the Secretary of the Interior to suspend acreage rentals during periods of suspension of operations and production of oil and gas under certain oil and gas leases which he is already authorized to suspend in the interest of conservation, and directing that the terms of such leases should be extended by adding thereto such suspension period. It also excepted therefrom existing leases within naval petroleum reserves and naval oil-shale reserves.

It appeared that the effect of the amendment practically nullified the original purposes of the bill, and after a conference with the author of the amendment he consented that it should be deleted. Upon further consideration by the Public Lands Committee of the House, the conferees were authorized to recede from the amendment.

Mr. SNELL. That is a general statement, but I can not understand why we should not collect the back lease rentals from the small operators just the same as we do the large ones.

Mr. EATON of Colorado. This bill does not affect back lease rentals. As the committee understands the situation, the remedy in this bill was proposed by the Department of the Interior because of the injustice which was occasioned lessees when the department ordered cessation of operations and production under existing leases, even against the protest of such lessees. It is true that some lessees have made requests for suspensions; but in every case where the department had ordered the suspension it was necessary for the department to collect the charges for deferred operation on account of the existing law, and rules and regulations made thereunder, all of which are to be considered as a part of the lease provisions.

As I understand it, the department decided it was proper to put all cases of suspended operation in the same class, whether the suspension was by order of the department on its own initiative or upon request of a lessee. So if this conference report is now adopted, the requirement for collection of acreage rentals during periods of postponed operation or production will be changed, no rentals will hereafter be collected for such periods, and the terms of each lease will be extended or set forward a like number of years or other period.

Mr. SNELL. The gentleman does not mean to say that the request originally came from the department instead of the people operating these leases?

Mr. EATON of Colorado. Yes; as a matter of fairness, the Secretary of the Interior, in the interest of conservation, on account of the depression and on account of overproduction of oil and gas, has required a number of lessees to postpone production upon their leases. Under the present law it was required that rentals be collected for the postponed periods.

Mr. SNELL. As I understand from the report, there has been a difference in the treatment and collection of these rentals from the large and small leaseholders.

Mr. EVANS of Montana. I yield to the gentleman from Colorado, who reported the bill, to answer that statement.

Mr. EATON of Colorado. No; there has been no difference.

Mr. SNELL. Of course, if that is not the situation, all right.

The conference report was agreed to.

WATER USERS ON IRRIGATION PROJECTS

Mr. POU, from the Committee on Rules, reported the following resolution, which was referred to the House Calendar and ordered printed:

House Resolution 369

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H. R. 13918, a bill to extend the operation of the act entitled "An act for the temporary relief of water users on irrigation projects constructed and operated under the reclamation law." Approved April 1, 1932.

That after general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Irrigation and Reclamation, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment the committee shall rise and report the bill to the House, with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and the amendments thereto to final passage without intervening motion, except one motion to recommit.

LEGISLATIVE APPROPRIATION BILL, FISCAL YEAR 1934

Mr. SANDLIN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 14562) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1934, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union, with Mr. BULWINKLE in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. The Clerk will proceed with the reading of the bill.

The Clerk read as follows:

For compensation of Senators, $864,000.

Mr. WHITTINGTON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 2, line 3, before the period insert: "*Provided*, That during the fiscal year ending June 30, 1934, the rate of compensation of Senators and the rate of compensation of any other office, position, employment, or enlistment the incumbent of which is subject to the furlough provisions or the compensation reductions contained in Title I of Part II of the legislative appropriation act, fiscal year 1933, as continued for the fiscal year 1934, is reduced by 11 per cent of the amount of such compensation in excess of $1,000, and such reduction shall be made after the application of and shall be in addition to the reduction provided in such title as continued."

Mr. SANDLIN, Mr. LAGUARDIA, and Mr. COCHRAN of Missouri made a point of order against the amendment.

The CHAIRMAN. What is the gentleman's point of order?

Mr. SANDLIN. That it is legislation on an appropriation bill and is not germane.

Mr. WHITTINGTON. Mr. Chairman, I would like to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. WHITTINGTON. The proposed amendment reduces the salary of Senators who are covered by the paragraph under consideration, and is not objectionable to the rule, if the amendment reduces the appropriation for a salary of one official and at the same time reduces the salary of all other officials and all other employees.

The proposed amendment is nothing more nor less than a continuation of the furlough plan, as adopted by the House, by making a further reduction of 11 per cent, with the exemption of a thousand dollars applicable to all officers and employees under the Government.

The CHAIRMAN. The Chair thinks that the amendment is not germane; and therefore the Chair sustains the point of order.

Mr. WHITTINGTON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 2, line 3, strike out the period, insert a colon, and add: "*Provided*, That the salaries of Senators and of Representatives be reduced to $7,500 per annum."

Mr. WHITTINGTON. Mr. Chairman, the paragraph under consideration provides for the salaries of Senators. On page 11 of the bill there is a provision for the compensation of Members of the House. When we reach that paragraph I will offer a similar amendment for the Members of the House. I made a speech favoring further reductions of Federal salaries on yesterday to which I invite the attention of the Members of the House.

In a word, Mr. Chairman, permit me to say that Government salaries and compensations compose one-third of the National Budget. The Democratic Party has pledged an immediate reduction of 25 per cent. President Hoover recommended the continuation of the furlough and a reduction of an additional 11 per cent.

Both parties in this House have approved of the continuance of the furlough plan with the reductions of the economy bill. All salaries have been dealt with in one appropriation bill. I stated on yesterday that I would offer an amendment to the pending bill for a general reduction of all salaries. I stated that if such an amendment was not in order on this particular bill I would offer an amendment to reduce salaries of Members.

I prefer the pay-cut plan to the furlough plan, but the House has adopted the furlough plan. My amendment for general reductions follows the furlough plan by increasing reductions 11 per cent, with an exemption of $1,000.

The amendment I offered a few minutes ago, if adopted, would not have been perfect, but it would have provided for a saving, according to the Bureau of Efficiency, of about $55,000,000. I urged the reduction of salaries of Members of Congress and all others receiving similar salaries on this floor 14 months ago. The gentleman from Indiana [Mr. LUDLOW], a member of the subcommittee in charge of the pending bill, before whom I appeared, introduced a bill that is now before the committee of which I am a member, for a reduction to $7,500 in the salaries of Members of Congress, and, as I recall, the gentleman from Colorado [Mr. HARDY], also a member of the same Subcommittee on Appropriations, introduced a similar amendment last year for which I voted. My position is this:

Inasmuch as thus far the Committee on Expenditures, of which I am a member, has made no report for further general salary reductions—and I say this without criticizing anyone, for I think that Members of Congress are as much entitled to a reasonable compensation as anyone else, and I believe they earn every dollar of their salary, as do the clerks of the Members—yet the House has gone on record, and no provision has been made for further reduction of Federal salaries. What is causing the delay; what is hindering the matter? I know that the so-called Norris amendment will reduce our term by two months, but we knew that when we voted for it and submitted it. We knew that when we ran for the office last November. I know that we have to pay income taxes on our salaries, but so does everybody in the United States who gets a salary of $9,000, as we do, and many of them in addition have to pay an income tax in the States. I know the excuses and alleged arguments against reduction, and I concede to every Member his opinion, but I am dealing with but one thing in this amendment. It is time for sacrifice, when millions of our fellow citizens are out of jobs, when 10,000,000 to 15,000,000 men are walking the streets and highways of the country out of employment. When homes and lands and farms are being foreclosed, I submit that the leadership of the House ought to assert itself, and we ought to be willing to do our part; we ought to be willing to sacrifice. The increases in our salaries heretofore have been made in independent bills.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. FITZPATRICK. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. In a moment. If we decrease our salaries at the present time, I respectfully submit that the decrease will be followed by decreases in all salaries later on.

Mr. Chairman, under leave to extend my remarks, permit me to say that under the rules of the House the amendment that I offered to reduce the compensation of Senators and all other Federal compensations by an additional 11 per cent, under the furlough provision of the economy act of 1932, which has been continued, a point of order was made and sustained. On yesterday, in my speech in behalf of reductions of all governmental compensation, I had in mind that a special rule would be necessary to enable an amendment providing for the reduction of all salaries to be inserted in the pending bill. I called upon the Committee on Rules to grant a resolution making such general amendment in order. Personally, I favor the reduction of all salaries for the fiscal year 1934, substantially as provided in H. R. 14549, which I have introduced, from 10 per cent to 30 per cent, with an exemption of $1,000 and with a proviso that constitutional offices shall not be affected. It is difficult to insert a pay-cut amendment such as I have offered on a furlough statute. I therefore adopted the additional cut of 11 per cent to the general reductions of 8⅓ per cent and to the reductions affecting Members of Congress 10 per cent in the economy act of 1932. There is an opportunity here to promote real economy. I am interested in further reductions.

The gentleman from Missouri [Mr. COCHRAN] referred to the fact that I had only recently introduced bills. I have emphasized that I did not introduce bills at all until it become apparent that no action would be taken on similar bills introduced by others. The Committee on Expenditures tabled general salary reduction bills during the first session of the present Congress. The Economy Committee was then created. I cooperated with and supported the committee in every way that I could. I urged that the percentage of reductions be made larger when the economy act was adopted. I voted for the pay-cut plan first. I then supported the furlough provision. I voted for every economy that was proposed. I did not vote for alleged economies when investigations showed that no real economies would result.

The gentleman from Texas [Mr. BLANTON] on yesterday stated that I voted against consolidating the Army and the Navy. I spoke against such consolidation. I made an extended argument on the floor. I stated then and I repeat now that Mr. BYRNS, the chairman of the Committee on Appropriations and author of the bill, appeared before the Committee on Expenditures and called attention to the fact that the purchasing activities of the two departments could be combined. No real or substantial economies were provided. It is not necessary to combine the two departments in order to coordinate purchasing activities. I voted for combining the purchasing activities and for the elimination of duplications in the two departments. I thought combining the departments would endanger the national defense. Of course we could abolish both the Army and the Navy. Money would be saved, but there would be no efficient economy. Again, reference was made to the fact that I voted against abolishing the Army transports and the Panama Railroad. I gave the matter thorough consideration. I considered that the competing steamship companies would profit by the elimination of the transport system. It was my thought influence of the steamship trust was really behind the movement to abolish. It was my further thought that the steamship companies would charge more to transport Army supplies from the United States to Panama than

it costs the Government to operate the transport and the railroad. In other words, I could not see where there was economy.

I regret exceedingly that under the rules the House can not vote generally to reduce all salaries. It is not my fault. I have urged such action repeatedly for the past two years. I have cooperated in every way. The House has merely continued the reductions in the economy act of 1932. Everybody admits that the country is in worse condition than it was a year ago. The issue is clear-cut. I favor further reductions. I do not advocate merely reducing the salaries of Members of Congress, without reducing other salaries. It has been repeatedly charged that Congress refuses to make further general reductions because we would be compelled to reduce our own salaries. My whole thought is to remove the stumbling block. If Congress first reduces congressional salaries, we can consider impartially and without interest other reductions.

I emphasize that I am only urging reductions for the current fiscal year. When normal times return, salaries will automatically be as now provided by law. We are in an emergency which is more serious than war. I have determined to pursue every remedy to urge other and further general reductions.

The chairman of the Committee on Expenditures states that he will give further consideration to the bills that I have introduced. I beg to assure him that I will continue to urge consideration of these bills. I will further urge that reports be made on the bills, notwithstanding his statement in the public press that the bills that I had introduced would sleep in his committee. I state now that I will withdraw both of the amendments that I have introduced if assurances of an opportunity to vote for general reductions of all salaries is given during this session of Congress. The attitude of the chairman is well known. I have stated today that I am only urging the reduction of salaries of Members as an example and as a precedent to be followed by other reductions.

I introduced a bill to improve the method of paying congressional allowances. I advised the chairman that I was interested in improving the method of payment. I went so far as to state to him as to the bill that I introduced relative to clerk hire, that if the committee would agree to report the bill, with the present allowance, with substantially the provisions I introduced for paying the additional clerk hire to the person rendering services, if and when the service was rendered, whether by the month or not, I would ask unanimous consent to offer it as an amendment to the pending bill. Reductions as to clerks should be covered by the general law. I am giving Members a chance to reduce their own salaries and to set their own houses in order. I have dealt only with salaries in the Senate and the House.

If the House reduces congressional salaries, the Senate, under the rules of that body, can insert a rider making further reductions in the economy act as continued. The need for reduced taxation is great. Extraordinary remedies are required. The salaries of Members of Congress were increased in 1925 by a rider in the Senate. They were increased in prosperous times. There is no argument for increases unless in times of depression there are to be decreases. My argument is supported by reason and confirmed by experience.

Money is a relative term. I stand on the proposition that $7,500 will go as far in 1933 as $10,000 went in 1925 and in 1929. It will buy as many goods and as much services. Living expenses throughout the country have been reduced. They have not been adequately reduced in Washington, nor will they be until congressional and other salaries have been reduced.

I am not unaware of the attitude of the House. I have endeavored to perform my duty as I see it. I accord to other Members the same right. I have confined my arguments to the matter of the pending bill and to the reductions in Federal expenditures. I, of course, was not unprepared for the charges of demagoguery that have frequently been made during the course of this debate. Many who made similar charges against the reductions of salaries voted to reduce congressional and other salaries a year ago.

I call upon the Democratic leadership, and I urge the membership of the House who oppose the suggestion that I make for general reductions by first reducing our own salaries to come forward with their policy and their program of further reductions. It is time for action. In my judgment, the feeling is prevalent that Congress has evaded the responsibility of further reductions. Those who oppose reducing congressional salaries first and who say that they favor general reductions might well advance their plans. I will gladly cooperate.

I have no pride of authorship in any bills that I have introduced. I stand for the principle of further reductions. I shall continue to urge increased reductions. It is true that the reduction of salaries of Members of Congress will amount to only $805,500. The example and the stimulus will be worth infinitely more. If we reduce our salaries, $80,000,000 in general reductions will result. I am aware of the general argument for a particular appropriation. It is always said that only a small amount is involved, but it is the little appropriations that aggregate the big appropriations. It is the small reductions that result in large reductions.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. ELLZEY. Mr. Chairman, ladies and gentlemen, certainly, I dislike very much to differ with my colleague from Mississippi. Nevertheless, it is my privilege to represent to you another trend of thought that has long prevailed among another group of Mississippi citizens, whom I have the honor to represent.

Ladies and gentlemen, I have made an estimate of this proposed economy, so far as it applies to congressional pay. This estimate was made on the basis that the cost of operating the Federal Government last year was approximately $4,000,000,000. Then, deducting the amounts now in effect because of the savings of the economy act of last year, I find that such a proposal, so far as it relates to congressional members, would reduce the cost of operating the Government approximately one ten-thousandth of 1 per cent. Such economy would effect the reduction in the cost of the Government in about the same proportion that a dewdrop would effect the volume of water in the Atlantic Ocean.

Certainly, the citizens whom I represent well know that I have supported every measure, during my short service of one year in Congress, that has reduced the salary, mileage, and clerk hire of Congressmen; and I may add that I have supported every other measure of true economy. However, I doubt that Mississippi is as much concerned that I support such a proposal, which is so much like that expression in Holy Writ, "Strain at a gnat and swallow a camel." However, my people, and yours, are vitally concerned that I support, with all my ability, such economies as the following, viz:

ECONOMY MEASURES

First. A complete reorganization of the administration of the Federal Government, under a wise plan sponsored by President-elect Roosevelt, whereby unnecessary commissions may be abolished, bureaus combined, and every unnecessary employee released from the White House down to the so-called "gin reporter" in each county. This act of economy will save millions of dollars for our people.

Second. Legislation that will destroy waste and extravagance from the construction of the $17,000,000 Commerce Building and the entire chain of colossal structures which will grace Pennsylvania Avenue.

Third. An economy act that will scale down and refinance farm mortgages which will save the homes of the American farmers.

Fourth. A program that will collect the foreign debts and thereby add to the Federal Treasury billions of dollars.

Then, ladies and gentlemen, my Mississippi friends are vitally interested in some very remedial and constructive legislation, as follows, viz:

CONSTRUCTIVE LEGISLATION

First. A program for the operation of Muscle Shoals, thereby saving the American farmers millions of dollars in cheaper fertilizer and providing for the masses of the people cheaper power and electricity. Yes; flood-control legislation which will protect the property and the lives of Mississippi citizens of the Mississippi and Yazoo River Valleys and likewise give relief to the citizens of Jackson, Miss., and adjacent territory, whose property is constantly endangered by the high waters of Pearl River.

Second. Legislation that will remonetize silver in a proposal similar to the 16-to-1 silver standard advocated by William Jennings Bryan, or some other sound program of expansion that will result in lowering the cost of the gold dollar and raising the price of cotton, corn, tomatoes, and all farm commodities.

Third. Laws that will readjust the tariffs and secure an understanding with foreign nations which have put into effect retaliatory tariffs and very largely have destroyed markets for American farm products. Likewise, a revision of tariff laws which will save the American farmers millions of dollars in indirect taxes.

Mr. Chairman, it has never been necessary during my 20 years of public service to Mississippi people to worry about compensation, and I am not worried about this matter. However, I am vitally concerned that I may render a service that is worthy of the hire. If, day or night, I can study the details of the American Government and gain information to be utilized in a legislative program; if I can win your confidence and gain your friendship; if I keep the faith with the people who have honored and trusted me, then Mississippians will never begrudge one penny that I earn. If you will pardon this personal reference, I shall submit to you some necessary expenses I have had during my one year of service. Remember that I had a special election last March, a primary this summer, and a state-wide race until a supreme court decision stopped further expenses. You will be vitally interested to know, gentlemen, that my expenses for all three campaigns have been approximately $9,000. Furthermore, during my term of office, I have not spent one cent of Federal funds in paying any member of my family or relatives for clerk hire. On the contrary, in the discharge of my duties, at my own personal expense, I have paid for additional clerical service. Let me further say, gentlemen, that I love the code or standard of service which permits a public servant to finance his own campaign expenses. Then he is unhampered by the wishes of special interests and is absolutely free to represent the interest of the masses.

In conclusion, let me say that this proposal is a simple test of your mettle and mine. Let us vote our convictions in a courageous and honest way.

Suppose, my friends, that this proposal, and similar proposals, were carried to extreme conclusions; what would be the inevitable results? It would simply mean that the American youth, without money and living in the rural section or small village, would be forever eliminated from the participation in the administration of the American Government. Instead, it would result in the affairs of this Government passing into the hands of the wealthy class. Then the people of the greatest land on earth would find themselves facing a condition like that which once prevailed in Rome, Russia, Germany, France, and England. Suppose this type, a type similar to a few of the $1 a year employees of the Government during the war-time profiteering days, were administering the affairs of Government. I wonder what would be the attitude of these international bankers toward foreign debts, a lowering of the income taxes in the upper brackets, and so forth.

It does not require much courage to vote your honest convictions in this matter. Let us play this game fairly and be good sports, regardless of the reports of the Associated Press and CONGRESSIONAL RECORD. I hope that my Democratic colleagues, and likewise my Republican friends, regardless of whether you won or lost your election, will play this game as good sports, remembering that fine code of sportsmanship so well expressed by an eminent writer in these words:

For when the One Great Scorer comes
To write against your name
He writes not that you won or lost—
But how you played the game.

Mr. CLARKE of New York. Mr. Chairman, I ask unanimous consent that the gentleman's time may be extended two minutes.

Mr. HUDDLESTON. Mr. Chairman, I object.

Mr. JOHNSON of South Dakota. Mr. Chairman, I move to strike out the last word.

I rise, Mr. Chairman, to oppose this amendment, because I know of its absurdity. For 18 years it has been my pleasure to be a Member of this body. I have left the House voluntarily, never expecting to return to it as a Member, leaving it with less money than when I came, which is about nothing, but perfectly satisfied with the great experiences of congressional life. But I know something of the problems, legislative and personal, that you Members of this body must solve, and the problems that those who may come after us must meet. I know that most of the Members of this House are compelled to keep up a home in two places, because you must maintain a home where your real home is, and maintain one here where your temporary residence happens to be. I know that of those who leave Congress, practically all leave without any more money than they brought with them, and most of them leave very much in debt. I know of one time, when times were good and people were traveling, I kept account for 60 days of the expenses that come to a Member of the House. For 60 days for lunches, dinners, tickets, and automobiles, and just the courtesies that are extended by Members of Congress to those whom they represent, I found that it took one-third of the salary I received. Anyone who knows the facts knows that you are compelled to maintain a certain standard of living here that would be the same as your standard of living at home; and, as a matter of fact, I would rather live in the town from which I came with a salary of $4,000 a year than live here at a salary of $10,000 a year. [Applause.] I do not say that there is demagoguery in this amendment, because I can not conceive of such a thing, but I feel it is my duty to give the facts, and if there is demagoguery, it ought to be met by the facts. I can not help but feel that this amendment was made more for the purpose of its effect in some great Southern State than it is for its effect on the floor of this House. [Applause.]

I say that with all courtesy, because in leaving this House after 18 years I can truthfully say that I do not have any element of personal feeling against any man or woman who is a Member of this body. I have felt sometimes that you are afflicted with so many intimidating lobbies and that sometimes you are harassed by so much demagoguery, it is my duty in leaving here to protect you, if I can, from a little of it by giving the facts as they exist. I do not believe that any Member of this body ought to vote for this amendment, because I know if he does, and if it is adopted, he can not maintain his family with any degree of self-respect. Any Member of this body who does vote for it, and if it is adopted, will find when he leaves that he will owe just that much more money which he must pay and for which he must work.

Mr. WHITTINGTON. Will the gentleman yield?

Mr. JOHNSON of South Dakota. I yield.

Mr. WHITTINGTON. Is it not true that $7,500 will buy as much approximately, if not more, than $10,000 would buy in 1929?

Mr. JOHNSON of South Dakota. Not in Washington. Let me say in answer to the gentleman from Mississippi that if, when this horde of people come from Mississippi shortly, he will do as I have done, if he will take them to luncheon and dinner as I have done with constituents who have come to see me, and extend to his constituents who visit him in Washington the same courtesy they would extend and have

extended to him in their home towns, he will find he will have nothing left of his salary. [Applause.]

Mr. WHITTINGTON. Is it not true that living expenses in Washington will not decline until there have been further reductions in governmental expenses?

Mr. JOHNSON of South Dakota. That is entirely speculative. I am certain the cost of living in Washington is not a matter of food only; it is the things we must do and expenses incidental to political life from which we can not escape.

[Here the gavel fell.]

Mr. SANDLIN. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in 10 minutes.

Mr. SIMMONS. Mr. Chairman, I object.

Mr. SANDLIN. Mr. Chairman, I move that all debate on this paragraph and all amendments thereto close in 10 minutes.

The motion was agreed to.

Mr. COCHRAN of Missouri. Mr. Chairman, I rise in opposition to the pro forma amendment.

Mr. Chairman, I rise for the purpose of defending the committee of which I am chairman, the Committee on Expenditures, and also of which the author of this amendment is a member. The proposition he places before the House at the present time is now under consideration by our committee and it was brought there in part by the gentleman from Mississippi. When did he bring it there? It came to the committee last week, and one of the bills which he introduced contains the same provisions as the amendment he offered, to which I made a point of order. He introduced that bill day before yesterday. The committee has already held one hearing for the gentleman from Mississippi. It will hold additional hearings.

We should have orderly procedure in this House. Our rules provide for it. There is no effort on the part of this legislative committee to stifle an investigation of the bills the gentleman has presented, and there will be no such effort.

Mr. Chairman, this bill is not the place to add legislation of this character, although it is permissible under the rules, especially when the legislative committee is doing its duty.

There is a tendency upon the part of the press of the country to discredit the Congress, claiming there are certain abuses here. I am not going into all of them, time will not permit, but I want to mention one of them, and I hope the gentlemen in the press gallery will take notice of what I have to say.

Members of Congress are accused of getting free shaves and free hair cuts. I do not know what happens in another body, but I know something about the House. I can go across the street to an outside barber shop and get a hair cut and a shave for 50 cents. I can go to the barber shop in the House Office Building and get a hair cut and shave for 60 cents; but if I go into the barber shop of the Capitol down stairs a hair cut and shave will cost me 75 cents. I get no shaves or hair cuts free. Nevertheless, the people of the country have been led to believe we can go into the barber shop every day and get service for nothing. There are many other so-called abuses that are not based upon facts. We were criticized for having water coolers. Do my friends in the press gallery want the water cooler there? They are essential to good health.

What does the amendment of the gentleman from Mississippi propose? It proposes to reduce the salaries of Members of Congress to save the Government $795,000 a year. That is what it is supposed to do. As I said yesterday, the author of the amendment, who has taken a great interest in economy overnight, tried to add an amendment to the Army appropriation bill amounting to $30,000,000, and it would take 40 years to save that $30,000,000 under the amendment the gentleman from Mississippi now offers.

I believe it is the duty of this House to let its legislative committee handle this matter; and I can assure each and every Member a free and open hearing and most careful consideration following the close of the hearings.

Furthermore, I think, in all fairness to the 165 new Members of the House who come March 4, who will be affected by the amendment, they should be allowed to decide whether they will reduce their salaries. Also, do not forget the Norris amendment means a $1,600 reduction to the new Members. I hope the House will take this fact into consideration and not legislate upon the salaries the Members of the Seventy-third Congress are to receive. One hundred and sixty-five new Members will be here after March 4. It is the greatest turnover in the history of the House, so far as I know.

All the gentlemen from Mississippi and Tennessee are doing here to-day is to give those who do not understand conditions an opportunity to further abuse the Congress. At the expense of all Members they seek to bolster up their political fences. Why, the record of the gentleman from Mississippi [Mr. WHITTINGTON], when it comes to economy, should be inspected. He deserted the Economy Committee, and if anyone doubts it, refer to the record votes. Where was he when there was an opportunity to save a hundred million dollars a year by consolidating the Army and Navy? Look at other record votes and see how he failed to join those who were trying to save the Government real money—not a few hundred thousand but millions.

The gentleman says he will withdraw his amendments if I will assure him, as chairman of the Committee on Expenditures, to take up his bills. Such a proposition is absurd, when he knows he received a hearing two days after he asked for it last week and when he knows that additional hearings are to be held. His bill, where he would slash all salaries, only came to the committee yesterday. It was introduced Wednesday. That shows on the face how absurd his proposition is. I resent any statement that the committee has not functioned or that it will not continue to function.

There are many Members who feel that there has been too much reduction of salaries, not only in the Government service but in private business, for the good of the country. We reduce the purchasing power, and that is just the trouble in this country to-day. Restore the purchasing power and you end the depression. The balancing of the Budget will immediately follow when the purchasing power is restored. Again I say, Mr. Chairman, that it is only fair that we leave to the incoming Members the question of a further reduction in salaries.

Government employees, including Members of Congress, have suffered a reduction in salaries and allowances within the last year, and the bills now pending in the Senate, which have passed the House, provide for continuing that reduction.

Mr. McGUGIN. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, reducing the salary of Congressmen and Senators to $7,500 a year simply takes away the increase which was obtained during the great days of prosperity.

I am fully aware that reducing the salaries of Congressmen and Senators to $7,500, in and of itself, is not a drop in the bucket when it comes to balancing the Budget of this country, and I am not placing my support of this amendment on that ground. The ground upon which I am placing it is that if Congressmen and Senators will take these personal reductions there will then be some chance to obtain general reductions which will run into hundreds of millions of dollars. With a Government that has run behind for three consecutive years and is going to run behind the fourth consecutive year—a Government which last year ran behind 57 cents every time it spent a dollar and this year is running behind nearly 50 cents every time it spends a dollar, in face of the fact that we added nearly a billion dollars of burdensome taxes last session—it is absolutely imperative that the expenses of the Government be reduced, and you can not reduce them a dollar without taking a dollar away from somebody who has heretofore been obtaining it.

Practically all the money spent by the Government goes to people in one form or another, and any time we start to economize we are going to step on somebody's toes.

The real value of this amendment, when it comes to balancing the Budget, is that Congress will have gotten its own house in order, and those who are rebelling against any reduction can not point the finger of criticism at Congress and say, "You have not cut your own salaries." Maybe then we will have the courage to go straight up and down the whole list of those who are drawing money from the Federal Treasury and make reductions in keeping with the necessities of the Government.

The truth of the matter is, in actual practice, there has been little less than a conspiracy between Congress and others on the public pay roll against the tax-paying masses of this country, in that Congress would not reduce the salaries on the outside because consistency would require congressional reductions. If, in a democracy, the time has come when the Representatives are going to vote their own, personal, financial interests rather than the interests of the people as a whole, then democracy is doomed, because the people have no one to stand in their defense.

If times were prosperous, I would have no desire to demand these reductions, but such is not the case. Here is where we are leading. If we do not balance this Budget and get expenditures and income together, it is only a matter of time until the Government of the United States is going to default on its obligation. It would be defaulting today except that the once proud Government of the United States is at the mercy of the bankers of this country, because it is from the bankers the Government is borrowing money with which to carry on the current expenses of government.

I look with shame upon the fact that my Government must obtain its money with which to carry on its daily activities by borrowing it from the banks of this country.

I want my Government on a sound basis with revenue and expenses on a parity, but we can not get them on a parity unless we reduce expenses.

Now, my Democratic friends, how are you going to keep that 25 per cent pledge in your platform if you do not reduce expenses, and how are you going to reduce them except by letting many off the Federal pay rolls or demanding general reductions. But if you are going to demand reductions, how can you expect others to take them if you will not?

[Here the gavel fell.]

Mr. LAGUARDIA. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection?

Mr. SCHAFER. Mr. Chairman, reserving the right to object, debate has been closed. Other Members want to speak. If the gentleman did not want the debate closed, he could have objected.

Mr. LAGUARDIA. Debate was closed on motion of the gentleman from Louisiana.

Mr. SCHAFER. Mr. Chairman, in view of that fact, I will not object.

Mr. HUDDLESTON. I object.

Mr. KUNZ. Mr. Chairman, I move to strike out the enacting clause.

The CHAIRMAN. Is the gentleman opposed to the bill?

Mr. KUNZ. I am.

The CHAIRMAN. The gentleman is recognized for five minutes.

Mr. KUNZ. Mr. Chairman, I am not at all surprised that at this late hour some of our colleagues have been conscience stricken.

Mr. HUDDLESTON. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. HUDDLESTON. Mr. Chairman, I object. The committee has closed debate on this amendment. The gentleman has no right to debate this matter after that order is taken. He may move to strike out the enacting clause but not debate this subject.

The CHAIRMAN. It has been held that a motion to strike out the enacting clause is debatable, with five minutes on each side. The gentleman is recognized for five minutes.

Mr. KUNZ. As I have said, some of the Members have become conscience stricken. You know we have a great many men here who have sacrificed their time to be here at $10,000 a year. We have some men here who are conscience stricken and admit they are not worth more than $5,000. Any business man or any lawyer who has a practice or is in business sacrifices his time to come here; and, eliminating the money you spend to entertain, there is involved neglect of business at home.

If the gentleman feels that $10,000 is too much for him, or if he desires to send word to his constituency that the Government is paying him more than he deserves, he ought to certainly resign and let them send some better man in his place who is worth $10,000 a year. [Applause.]

You know it amuses me when I hear gentlemen tell about their party platform. The gentleman from Mississippi tells you about the party platform pledge to the people of the country. Does he forget that the candidate who was elected President of the United States told the people of America that they would have beer, and, naturally, the country expected the gentleman, standing by his pledge, to support the next President of the United States and to vote to give the people beer.

Mr. WHITTINGTON. Will the gentleman yield?

Mr. KUNZ. I have not the time.

Of course, we hear many of these people convey to their constituents their value and tell about their hard work for the country.

My friend from Kansas talks to you about balancing the Budget. He has not talked of anything but balancing the Budget since he has been here. If he were sincere about balancing the Budget, he would propose to Congress that the capitalists and the monied men of America who have invested their money in tax-exempt securities to the extent of $40,000,000,000 be made to pay the war debt and help to balance the Budget.

This cry of "balance the Budget" does not do any good for the country or the Government, and the gentleman, like a great many others, comes here and talks about balancing the Budget and reducing his salary, because he feels conscience stricken, because he is not worth the amount of money he is receiving from the Government.

Mr. Chairman, I yield back the balance of my time and ask unanimous consent to withdraw my pro forma amendment.

Mr. GOSS. Mr. Chairman, I object.

Mr. LAGUARDIA. Mr. Speaker, I rise in opposition to the amendment to strike out the enacting clause.

Mr. Chairman, in this instance I can qualify as a disinterested witness. [Laughter.] One of the easiest grandstand plays—and I know something about grand-stand plays [laughter and applause]—is to get up here and move to reduce the salaries of Representatives. It is always good for a hand back home.

I made a very careful study of this question last session and the session before. I compiled the average cost of maintenance, travel, and additional expense of Members of this House, and while, of course, I do not know anything about the standard of living of the gentleman from Mississippi, I say that any Member of Congress who seeks to do his work diligently and intelligently must necessarily devote all his time, thought, and attention to his legislative duties. To do this he can not engage in any trade or profession back home. Yet he is put to the additional expense of maintaining a home in Washington; he must maintain his home in his district; he is put to the additional expense of dividing part of his family for the education of his children; he has the additional expense of reporting to his constituency every two years and in between sessions; and it is impossible for any Member of this House to do that which is required of a Member with less than the salary he is getting now. [Applause.]

But there is another question involved. Of course, the gentleman from Kansas gets up here and pleads that "we

must balance the Budget"—and I am using his words, because the bankers demand it—else we default on the bankers' interest. But I plead to-day not for the bankers but for the American people, who have the right to go into their district and pick one of their own to send to Washington, without getting a Bradstreet report on him to find out whether he can afford to take the office as a luxury or a sport. [Applause.]

We have heard so much about dollar diplomacy, where it was necessary for a man to show his bank book before he could qualify for an appointment as ambassador. We have to a certain extent corrected that evil. Does the gentleman want to establish a "dollar Congress"? Does the gentleman want to make this a rich man's club? Does the gentleman want powerful interests to pick one of their employees or a retainer and send him to Congress, pay him an additional salary, and have their individual representative to look after their business here?

This story is not new at all. This is not a job, it is a mission; and there are men in this House who do take this office as a mission. We have important work to do. I know I work hard and I know my colleagues work just as hard. Our work requires a great deal of application, thought, and study, and Members should at least be relieved of the economic worries of the bare requirements of a family. [Applause.]

I have consistently resisted the lowering of standards of living. Surely I can to-day oppose an effort to so lower the pay of a Member as to make it possible for only a wealthy man or a subsidized person to take this important office. I sincerely believe such a system would undermine our system of representative government. I do not maintain that a man should be disqualified to sit in this Chamber because of his wealth. So I insist that nothing should be done to permanently disqualify a man from coming to Congress by reason of lack of a fortune or an independent income. The approval of the pending amendment would be tantamount to requiring property ownership as a necessary qualification for eligibility to election to Congress, a qualification which was definitely rejected all through the history of our country.

[Here the gavel fell.]

The CHAIRMAN. The question is on the motion of the gentleman from Illinois [Mr. KUNZ] to strike out the enacting clause.

The motion was rejected.

Mr. RAMSEYER. Mr. Chairman, I have a substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. RAMSEYER as a substitute for the amendment offered by the gentleman from Mississippi [Mr. WHITTINGTON]: Page 2, after line 3, insert: "The compensation of Senators for a month's service during the fiscal year ending June 30, 1934, shall be at the rate of $10,000 per annum if the average wholesale commodity price level during the month next preceding was 90 or more; $9,000 per annum if such level was 80 or more, but less than 90; $8,000 per annum if such level was 70 or more, but less than 80; $7,000 per annum if such level was less than 70. For the purposes of the preceding sentence, the average wholesale commodity price level during a month shall be the index number of wholesale all-commodity prices, based upon the year 1926 as 100, as indicated for that month in the monthly compilation of wholesale prices compiled by the Bureau of Labor Statistics of the Department of Labor."

Mr. SANDLIN. Mr. Chairman, I make the point of order on the amendment that it is legislation on an appropriation bill.

Mr. RAMSEYER. My amendment is not legislation on an appropriation bill. It is a limitation on an appropriation bill and within the Holman rule. The Whittington amendment reduces the pay to $7,500 per annum. Such pay, after July 1, will be $10,000 under existing law.

Mr. WHITTINGTON. The bill now provides for $9,000 under the economy act.

Mr. RAMSEYER. The economy law now in effect ceases to be in effect on the 1st of July next. We are appropriating for the next fiscal year, beginning July 1, 1933, and according to existing law the salary will be after July 1 next for a Senator or Representative $10,000 per annum. The Congress has not yet by law changed that. The Treasury and Post Office appropriation bill is still pending, and the economy provision of that bill will not be in effect until it passes both Houses and is signed by the President.

Now, what does my amendment do? It merely provides that the monthly salary for the next fiscal year shall be based on $10,000 per annum if the commodity index number for the month before was 90 or more. The second step is that the monthly salary shall be based on $9,000 per annum for the preceding month if the index number was between 80 and 90. It shall be based on $8,000 if the commodity index number was between 70 and 80 and $7,000 if the commodity index number was 70 or less. It does not go below that. If the index number is 90 or more, then the salary is $10,000. If the index number is 90 or more, there is no change in existing law.

Mr. BRITTEN. If the gentleman will yield, if his amendment is agreed to, would it have the effect of changing the Senator's salary every month?

Mr. RAMSEYER. It might. The index number comes out in the middle of the month. Of course, the gentleman's question is not pertinent to the point of order; but if the commodity index number changes enough, the monthly salary may be increased or decreased. My amendment, if adopted, will reassure the people back home that you are acting in good faith to bring about a restoration of price levels which would spell prosperity. By this amendment every Member of Congress will share automatically in the economic conditions, whether good or bad, with the people of the country. If conditions are bad, the salary will go down; if conditions improve, the salary will go up.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. RAMSEYER. Yes.

Mr. LAGUARDIA. It is quite possible that if the gentleman's amendment is adopted there would be no reduction.

Mr. RAMSEYER. Under my amendment, if prosperity is restored, that is, where the commodity index number will reach 90 or more, next August a Senator would receive for his month's pay at the rate of $10,000 per annum.

Mr. LAGUARDIA. If that is so, then the gentleman's amendment is not in order.

Mr. RAMSEYER. If the commodity index number is 90 or more, it would not change the salary under existing law. My amendment will bring about a saving if the commodity index does not rise to 90. At present the index number is 60.4; and if it remains there, or below 70, the monthly pay for the months that the index number is below 70 would be at the rate of $7,000 per annum.

The CHAIRMAN. The Chair is prepared to rule. The Chair sustains the point of order. The question is on the amendment offered by the gentleman from Mississippi.

The question was taken; and on a division (demanded by Mr. WHITTINGTON) there were—ayes 37, noes 172.

Mr. WHITTINGTON. Mr. Chairman, I demand tellers.

The CHAIRMAN. The gentleman from Mississippi demands tellers. Those in favor of ordering tellers will rise and stand until counted. [After counting.] One Member standing, not a sufficient number, and tellers are refused.

So the amendment was rejected.

The Clerk read as follows:

DOCUMENT ROOM

Salaries: Superintendent, $3,960; first assistant, $3,360; second assistant, $2,700; assistant, $2,040; two clerks, at $2,040 each; skilled laborer, $1,740; in all, not to exceed $16,390.

Mr. GARBER. Mr. Chairman, I move to strike out the last word. The Senate amendment to the legislative appropriation bill increasing the salaries of Members of Congress from $7,500 to $10,000 per annum, passed the House on February 20, 1925, and became effective March 4, 1925. In the CONGRESSIONAL RECORD of February 20, 1925, page 4273, appear my remarks in the House on that date in opposition to such increase. At that time I said:

Mr. Speaker, the proposed amendment increases the salary of Members of Congress from $7,500 to $10,000 per year. It also provides that the Speaker of the House, the Vice President, and Cabinet Members shall receive an increase from $12,000 to $15,000 per year.

The positions of the Members of Congress and of the Cabinet were voluntarily sought and accepted by each Member at the

then-existing salaries, which created an implied agreement between the people as the employer and the Member as the employee. In substance that agreement was: The rendition of certain services in consideration for the then-existing salaries. This agreement should be carried out by the respective parties. The employer has no right to discharge the employee; neither has the employee a moral right to arbitrarily raise his salary.

Being the direct beneficiary, he is not qualified to act in an impartial representative capacity, and in fact, the rules of the House prohibit him from so doing.

Voting to increase one's own salary is like a judge sitting in his own case. The amendment offered to have the increases apply only to the Congress to be elected two years hence presented an entirely different proposition than the one now being considered. When the people selected their Representatives for the Sixty-ninth Congress their Budget carried a salary of $7,500 annually for each Member. Had they been informed of the increase now proposed to be made they might have refused our employment and selected others of higher ability to represent them. The presumption is that the increased salaries would have given them the opportunity of making their selection from a higher quality of services.

Were conditions prosperous, times good, expenses cut down, and taxes reduced, and the proposed increase submitted to the people with their approval and the present compensation shown to be inadequate, an increase in salary for the Congress yet to be elected might be a subject worthy of consideration. Under present conditions, it is not.

I therefore shall vote against the amendment. Because the present compensation is inadequate to meet the high cost of living is insufficient justification.

There are 6,500,000 farmers producing necessary foodstuffs who have been unable to meet their expenses during the last four years, and yet they are not asking for a price fixing bill to raise their wages, although with equal propriety and merit they have every moral, legal, and political right to do so.

On December 11, 1931, more than a year ago, I introduced the first bill providing for a graduated reduction in the salaries of Federal employees, including Members of Congress, the Army, Navy, and, in fact, all governmental employees and officials not specifically excepted by the Constitution. The bill provided for a temporary reduction in salaries ranging from 10 per cent on salaries from $1,200 to $1,800 to 25 per cent for those in excess of $3,500, and if enacted would have saved the Government $208,002,520.47 annually. The following analysis of the measure shows in detail what its effect would have been and the total reduction in the cost of Government which would have been accomplished by its enactment:

Proposed reduction	Salaries affected	Amount of reduction
EXECUTIVE AND MILITARY		
25 per cent	[1] $3,500	$44,608,241.11
20 per cent	2,500–3,500	39,721,218.96
15 per cent	1,800–2,500	92,347,242.23
10 per cent	1,200–1,800	24,854,506.17
LEGISLATIVE		
25 per cent	[1] 3,500	1,838,995.00
20 per cent	2,500–3,500	1,059,422.00
15 per cent	1,800–2,500	1,623,055.00
10 per cent	1,200–1,800	1,949,840.00
Total		208,002,520.47

[1] Or more.

We now have under consideration the legislative appropriation bill, which includes appropriations for the salaries of Members of Congress and involves the question of necessary reductions to reduce the cost of government.

In this connection it is well to recall the statement of the Democratic leader, ex-Secretary Josephus Daniels, on March 6, 1932:

> The chief thing that stands in the way of reduction in the cost of government is that up to date Congress has done nothing to reduce its own expenses or compensation. Reforms must begin with themselves.

The Democratic national platform pledged its representatives to reduction in the cost of government of not less than 25 per cent. The amendment now pending before the House proposes a reduction of 25 per cent in the salaries of Members of Congress. The Democratic Party in convention said that its platform was a solemn covenant with the people. What about its solemnity now, when its representatives are face to face with the responsibility of voting such reduction in the salaries of Members of Congress? Should not Members of Congress and, in fact, all Federal employees be willing to take their cut with that of the average business man, with the average professional man, with the farmer, and laborer, all of whom have taken an average cut of not less than 50 per cent? Will the Democratic majority vote to cut or vote to violate the solemn covenant of its party with the people? Will it cease promising and begin voting to execute its platform pledges? Let the roll call answer, that the people may know what they are doing!

Economy, retrenchment, reorganization, curtailment of expenses to a minimum, these are our dire necessities now. But, more than that, they are our sacred obligations to the American people, who have manifested in this great national emergency a splendid, unselfish, patriotic spirit unequaled in the world's history.

The Clerk read as follows:

CLERICAL ASSISTANCE TO SENATORS

Clerical assistance to Senators who are not chairmen of the committees specifically provided for herein, as follows: 70 clerks at $3,900 each; 70 assistant clerks at $2,400 each; and 70 assistant clerks at $2,220 each; such clerks and assistant clerks shall be ex officio clerks and assistant clerks of any committee of which their Senator is chairman; 70 additional clerks at $1,800 each, 1 for each Senator having no more than 1 clerk and 2 assistant clerks for himself or for the committee of which he is chairman; messenger, $1,800; in all, not to exceed $663,850.

Mr. McGUGIN. Mr. Chairman, I move to strike out the first word. I would not rise at this time to speak except for the manner in which the gentleman from New York [Mr. LAGUARDIA] stood here a few minutes ago and misconstrued my statement with regard to this Government borrowing money from the bankers. Here is the situation with this Government to-day. We are going to write checks each month to pay the obligations of the Government, providing the banks will buy enough short-term securities to make it possible for the Government to have funds to meet those checks. Whenever the Government or any other institution meets its current expenses by borrowing money from a bank, it is in the clutches of a bank. I resent the situation that the financial condition of my Government is in such shape that it functions from month to month provided it borrows enough money from the banks of the country to function. I remember reading that when Grover Cleveland had to borrow money from the banks——

Mr. BOYLAN. Mr. Chairman, I rise to a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. BOYLAN. The gentleman is not speaking to any amendment pending before the House. We have heard this story a hundred times, it is in the RECORD a thousand times, and why inflict it upon us any more?

The CHAIRMAN. The gentleman from Kansas will proceed in order.

Mr. GARBER. Mr. Chairman, the gentleman's argument goes to the question of the ability of the Government to pay the salaries of its employees.

The CHAIRMAN. The Chair has directed the gentleman to proceed in order.

Mr. McGUGIN. When Grover Cleveland was President and borrowed money from the banks, the Republicans of this country criticized the President for borrowing money, and the criticism was that he was permitting the Government to fall into the clutches of the bankers. That is what we are doing to-day, and there is no one more responsible than a Congressman who will sit in the Halls of Congress and refuse to vote for a reduction in expenses of Government and refuse to vote for any revenue bill which will raise enough money to meet the expenses of the Government.

Mr. SABATH. Mr. Chairman, will the gentleman yield?

Mr. McGUGIN. This Government can not go on indefinitely following that policy. This Government is intrusted in the hands of Congress, and there is not a man sitting here but knows that every government that ever failed, at the time of its failure, was unable to meet its financial obligations, and such is this Government. Again I say, I

resent the fact that Congress will not provide sufficient revenue to meet the expenses of the Government, and Congress will not reduce expenses, and thus leaves our Government in a helpless situation where it is in the clutches of the bankers. I have seen enough of the bankers, especially the international bankers, and I do not want to see them have their hands about the throat of my Government; but as long as we turn to them and borrow on short-term notes, we are leaving the Republic in the clutches of those bankers. Now I yield to the gentleman from Illinois.

Mr. SABATH. Instead of charging Congress with existing financial difficulties, is it not a fact that these very men, these very bankers, these men that are demanding the balancing of the Budget, are responsible for existing conditions because they destroyed the revenues of the Government by bringing about this crisis or this panic?

Mr. McGUGIN. I have no brief for the bankers, but the bankers are not responsible for the unbalanced Budget. The unbalanced Budget is due to the Government expending more than it is getting in, and Congress will neither reduce expenses nor pass a tax bill that will bring in the revenue. That is what I am complaining about; and that responsibility rests on the Congress, because no other body on earth can meet the responsibility.

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. SABATH. Mr. Chairman, I rise in opposition to the pro forma amendment. Mr. Chairman, I heard the gentleman who preceded me demand of Congress that it balance the Budget. He does not seem to realize that he is advocating the very thing that these bankers, with whom he finds fault, desire him to advocate. This hue and cry for balancing the Budget comes from these bankers and their directors and their hirelings. They are responsible for existing conditions. They destroyed the revenue of the Government. If you will study this matter, you will come to the conclusion that even if you cut the governmental expenditures by 50 per cent and your revenue is reduced by 50 per cent, you can not balance the Budget.

Mr. McGUGIN. Of course not. If you reduce the revenue more than the expenses.

Mr. SABATH. And you should recognize the fact that Congress is not responsible for the conditions.

Congress did not bring about this panic. Congress did not destroy the business of the Nation. It was done by the investment bankers and the "boys" whom the gentleman seems to follow in his efforts to secure a balanced Budget.

Mr. McGUGIN. Will the gentleman yield?

Mr. SABATH. I can not at this time. It is absolutely impossible. The Budget has been balanced very seldom, and the gentleman should not lay such great stress upon that particular feature of existing conditions. If the gentleman would study the men who are behind this propaganda for economy and balancing the Budget, he would come to the conclusion that he is in the wrong company, and I know he would quickly get away from that influence which he is permitting to mold his speeches on the floor of this House.

Mr. McGUGIN. Will the gentleman yield?

Mr. SABATH. I yield for a moment.

Mr. McGUGIN. I will say to the gentleman that my hue and cry for balancing the Budget is not prompted in any sense by any desire of bankers, but merely made in the light of history, which records what happens to governments which do not meet their expenses.

Mr. SABATH. That is not a question.

I have in my possession a pamphlet from the National Economy League. I have a letter from a similar organization, the National Organization to Reduce Debt Expenditure. I am satisfied that all of those organizations are financed, aided, and assisted in their propaganda by the various officials of the banks, their directors, and the presidents of organizations whom those banks control. I know several of those gentlemen are presidents of railroads, and although the railroads have been losing tremendously month after month, those presidents are still drawing $120,000 or so a year. What applies to them applies also to the directors of many of the corporations that are owned by Wall Street interests, men who are getting $75,000, $100,000, and as much as $250,000 a year, and many of whom do not possess even the ability which the gentleman from Kansas displays on the floor of this House. [Laughter and applause.]

In view of that fact, I believe we should not be misled and carried far afield in continually advocating and shouting for the balancing of the Budget.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. SCHAFER. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, on his balancing of the Budget proposition the gentleman from Kansas [Mr. McGUGIN], the able legislator, is absolutely correct. In his advocacy of tax reduction the gentleman from Kansas [Mr. McGUGIN] is absolutely correct. I am somewhat surprised, I am amazed, to find the Democratic Member, who just left the well of the House, indicating in his remarks that the Budget did not have to be balanced, and that the cost of government did not have to be reduced, particularly in view of the fact that in the last session of this Congress the Democratic Speaker of the gentleman's party and the Democratic floor leader of his party stood in this very well of the House and made eloquent speeches in behalf of the early balancing of the Budget.

I was surprised to find the Democratic gentleman from Illinois [Mr. SABATH], who has just left the floor, take a position opposed to a reduction in the cost of Federal Government, in face of the Democratic platform declaration and outbursts of oratory delivered by Democratic campaigners in the last campaign, promising the people of the Nation to reduce the cost of Federal Government 25 per cent, although in the platform and those same speeches they promised relief of every kind imaginable that would cost ten or twelve billion dollars or more each year.

Mr. PARKS. Will the gentleman yield?

Mr. SCHAFER. If the gentleman will get me a little more time.

Mr. PARKS. I will ask to have the gentleman's time extended 10 minutes.

Mr. SCHAFER. The gentleman must get the time first.

Mr. HASTINGS. No, Mr. Chairman; we can not extend the time.

Mr. BARBOUR. Mr. Chairman, regular order.

Mr. SABATH. Will the gentleman yield?

Mr. SCHAFER. I yield to the gentleman to whom I have referred [Mr. SABATH].

Mr. SABATH. Does the gentleman from Wisconsin believe that the return of prosperity is dependent upon balancing the Budget?

Mr. SCHAFER. I believe that balancing the Budget will assist to bring about prosperity, just as advocated by the Republican President of the United States, just as advocated by the Democratic leader, Mr. RAINEY, from the gentleman's State, and just as advocated by the gentleman's Democratic Speaker in this very well of this House.

Mr. KUNZ. Will the gentleman yield?

Mr. SCHAFER. In just a moment. With reference to the speech made by the distinguished gentleman from Mississippi [Mr. ELLZEY], in which he called attention to the wonderful relief that would result from the development of the Tennessee River Basin: The position in favor of this project conclusively proves that the Democratic leaders take a position of facing both ways on farm-relief legislation. They advocate and support the Roosevelt allotment plan to reduce acreage under cultivation, in order to reduce the farm surplus.

According to statements in the press the Democratic Party reversed itself as newspaper releases emanating from Warm Springs indicate that to save the American farmer and the Nation and to save the world we must, at the expense of the Federal taxpayers, put thousands and thousands of acres of new river-bottom farm land into cultivation and production in the Tennessee Valley.

Mr. KUNZ. Will the gentleman yield?

Mr. SCHAFER. Yes; I yield to the very distinguished gentleman who I understand is to be appointed ambassador to the Court of St. James. [Laughter and applause.]

Mr. KUNZ. Permit me to call attention to the fact that in 1923 Mr. Mellon and the Department of the Treasury called the attention of Congress to the fact that the expenditures were greater and the income was less——

Mr. SCHAFER. Oh, after March 4 you Democrats will be on the spot, when you can not blame Mellon and Hoover for all of the ills of America and the world.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. HASTINGS. Mr. Chairman, I ask unanimous consent that debate on this paragraph and all amendments thereto do now close.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

The Clerk read as follows:

For driving, maintenance, and operation of an automobile for the Vice President, $3,840.

BANKERS UNBALANCED BUDGET

Mr. PATMAN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I think it is material in the consideration of this bill that we talk about balancing the Budget. I do not find myself in complete accord with what the gentleman from Kansas has said about balancing the Budget. I am willing to go along with him and do everything in my power to help balance the Budget, but there are several ways of doing it. He says the Nation is imperiled unless we balance the Budget immediately. There has been some discussion about the cause of the unbalanced Budget. It was suggested that the large bankers have had a great deal to do with it. I believe that is true—not the few independent bankers scattered over this Nation, but the few powerful bankers who control practically all the industrial and business concerns of this Nation. There is one bank in New York City the directors of which own and control over 900 different industrial concerns. A few banks in New York City control more than 3,000 industrial concerns and railroad companies. They control practically all the automobile business concerns except the Ford Motor Co., and there has been an effort made to get control of the Ford Motor Co.

USE OF GOVERNMENT CREDIT FREE OF CHARGE

If the bankers who are using the Government credit of this Nation to-day were to pay for this credit like anyone else would have to pay for it, we would not have an unbalanced Budget. If we should go back and require the collection of an interest charge from the Federal reserve system for the use it has made of Government credit, which represents a mortgage upon all the homes and all the property of all the people of this Nation, we would have a sufficient amount to balance the Budget, and we would not have to be worrying about it. Further, the present law requires the collection of such interest.

GET GOVERNMENT OUT OF BUSINESS AND BANKERS OUT OF GOVERNMENT BUSINESS

So, after all, it goes back to the use of the Government's credit without charge by a few powerful bankers. I believe we will have to get the Government out of the business the people of this country are engaged in. On the other hand, I believe we have got to get these few powerful bankers out of the Government's business. The bankers must confine themselves to the banking business. Instead of confining themselves to the banking business they are going into the investment business and flooding the country with worthless stocks and bonds, they are going into the automobile and railroad business, they are going into every kind of business activity, and they are doing it with the aid and assistance of Government credit without any charge whatsoever. Under such circumstances no one else can possibly compete with them. It is unfair competition.

There is one business that the bankers should get out of and the Government should get into. That is the Government should issue its own money and quit farming out that privilege.

CONSTITUTIONAL MANDATE

The Constitution of the United States says that Congress shall coin money and regulate its value. All I ask is that this Congress go back to the Constitution and do just exactly what it says.

UNFAIR COMPETITION

Our Budget will never be balanced as long as we farm out the credit of this Nation to a few powerful bankers free of charge and permit these bankers to use this credit in competition with people who are not enjoying such privileges furnished to them free of charge by the Government. Let me read you an excerpt from an article recently appearing in a New York newspaper:

To-day more fervently than ever people everywhere pray to be saved from the politicians who rule them. What men chiefly resent in the politician is not his alleged cowardice, but his stupidity and his ignorance.

Congress is entitled to be criticized for letting the few have a monopoly on the credit of the Nation and use it without charge.

[Here the gavel fell.]

Mr. PATMAN. Mr. Chairman, I ask unanimous consent to proceed for three additional minutes.

Mr. HASTINGS. Mr. Chairman, I hesitate to object, but it is necessary that we get through this bill. I may say to the gentleman from Texas that we ought to go forward with the appropriation bill. I shall not object to this extension of three minutes, but I want to serve notice that I shall object to further requests for extension of time.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Chairman, I want to serve notice, too, that I think some of us should have a little time to discuss fundamental problems.

Mr. HASTINGS. The gentleman had all day yesterday in which he could have done it.

BANKERS BONUS

Mr. PATMAN. No; we did not have any time at all, not even a minute. The gentleman from Oklahoma is mistaken. He entertains progressive views and I am sure he is glad to hear them discussed. We have got to discuss these fundamental problems. Why take up all this time just appropriating money? Where are we going to get the money? Does not the gentleman think it is material to talk about where we are going to get it, to talk about paying bankers hundreds of millions of dollars a year bonus that is unbalancing the Budget? We are entitled to a little time, too. If bills are going to be passed under suspension and gag rule, let us pass bills like this one under suspension and gag rule, appropriation bills, and then take up some time with general legislation.

JEFFERSON'S WORDS

Our country is never going to be brought out of this panic unless we go back to the Constitution of the United States and do what the framers under the Constitution said we must do. Thomas Jefferson penned the words in the Constitution, that Congress shall coin money and regulate its value. Congress should resume that privilege.

I am anxious to hear from some gentlemen on the floor who have given this matter considerable study and thought, and how will they get an opportunity to speak unless they take time when an appropriation bill is being considered? I hope the House will be patient when these problems are discussed.

BANKERS PAID TO TAKE MONEY

There is another way of balancing the Budget besides raising taxes. For instance, we are appropriating between $40,000,000 and $70,000,000 a year from the Public Treasury to pay these few powerful bankers interest on bonds they have deposited with the Secretary of the Treasury. In return for those bonds they have received new currency, greenbacks, money, from the Treasury of the United States.

While they are getting the use of this money they are also getting interest on the bonds they have deposited. Is not this material in connection with an appropriation bill? We can save money by requiring these bankers to pay for the use they make of the Government credit. The small banks of the Nation will be helped considerably if the large banks are deprived of the privilege of using the Government's credit free. Until the Government assumes its constitutional duty to issue money these few bankers should be required to pay for the use of the money that is issued on the credit of the Nation.

[Here the gavel fell.]

Mr. LANKFORD of Georgia. Mr. Chairman, I rise in opposition to the pro forma amendment of the gentleman from Texas [Mr. PATMAN].

Mr. Chairman, I want to make just a few observations concerning the question of balancing the Budget and solving our present financial difficulties.

I am as much in favor of balancing the Budget as anybody else in the House should be, but we will make an awful mistake if we persuade ourselves to at all believe we can bring back prosperity merely by balancing the Budget. If we solve the fundamental problems which so sorely beset us, we will go a long way toward not only balancing this Budget but providing for the balancing of all future Federal and State budgets.

Just as the gentleman from Texas [Mr. PATMAN] said a few minutes ago, if we solve the question of whether or not our currency should be inflated within reason we will lay the foundation for prosperity, and prosperity in this country will mean the balancing of the budgets of the future. What we may or may not do with this Budget is not so important as is the question, Will this Congress or the next Congress solve the problems of finance, the problems of real farm relief, the problems of real constructive legislative dealing with transportation, so that the budgets of the future may be balanced?

If this panic had not come, we would have had no trouble in balancing the present Budget. Enough money was easily raised by taxes during the years just prior to the depression not only to balance the Budget but also to allow large refunds to those who paid their taxes, and I am anxious to impress upon Congress and upon the country the idea that the way to balance not only this Budget but other budgets is to solve the fundamental problems which are crying for solution, rather than trying to solve them merely by balancing the Budget. Let us cure the awful causes of the depression rather than put all our efforts on a more or less minor result of the depression.

Mr. GARBER. Will the gentleman yield?

Mr. LANKFORD of Georgia. I gladly yield.

Mr. GARBER. Mr. Chairman, I heartily agree with the gentleman's statement that it is essential first to stir the activities of the country in order to secure revenue to balance the Budget.

Mr. LANKFORD of Georgia. That is absolutely true; and it is necessary to bring into existence some form of relief for agriculture, some form of relief for the taxpayers who live back in the States. Whenever we levy a sales tax and invade the States, we not only hurt the farmers who live in those States but we bring about a situation making it more difficult for the Congress of the future to balance the Federal Budget; we make it more difficult for the States to balance their budgets in the years to come. We must not decide that balancing the Budget will solve all our problems, but let us remember that the solution of the other problems will not only balance this Budget but also the Federal, State, municipal, and individual budgets of the future.

Aye, there is the rub. Let us help the individual citizen balance his financial budget, and he will gladly help balance the Federal Budget. We need not worry about balancing the Federal Budget if we will really solve the present problems. Those that are worrying so much about balancing the Federal Budget and seem to have forgotten all our other serious questions simply have put the cart before the horse. They are not approaching this question in the proper manner. They are trying to overcome the cause by curing the effect. Let us cure the cause, and the effect will quickly disappear. Let us balance the Budget of the working man, the farmer, and the average individual citizen, and we will be able to balance all the budgets of the banks and other financial institutions, and almost overnight we shall be able to easily balance the Federal, State, county, and municipal budgets. Congress can not further cut appropriations and thus force prosperity to return. Neither can Congress reduce taxes sufficiently to make everybody prosperous in the absence of some real, constructive legislation solving the pressing problems of the hour. The poorest nations raise the least money by taxation and pay out the least amount for public purposes. At present we are endeavoring to reduce both taxes and appropriations because everybody is in financial distress. If large revenues are raised in the proper manner and from the proper sources and paid out judiciously for all the people, much good will be accomplished and good government will be at its very best.

To my mind the actually balanced Budget is not near so important as is the proper raising and honest, careful expenditure of Federal funds.

I do not want my desire for the Budget to be in balance to be overlooked or misunderstood. I am saying though, that many, many matters are of much more importance than the mere balancing of the Budget. What is of most importance to the citizen is of most importance to the Nation. The Nation is made up of our citizens. The people should run the Government rather than the Government run the people.

In an economic way, nothing is of so much importance to my people—the farmers and their friends—as a good price for the products of the farm. So far as the farmers are concerned, the well-balanced budget of the producers of the Nation is of much more importance than the evenly balanced Federal Budget. The unemployed is much concerned about a job at a living wage, producing ample support for himself and family; he is tremendously interested in a well-balanced personal budget. Let us balance the budget of such as these; they will balance the budgets of the banks and stop bank failures, and we will not have cause to worry over our National Budget.

A mighty howl is going up from the big financial interest of the country about balancing the Budget. Why? There are at least five reasons for this propaganda. The big financial interests want to capitalize the present awful depression by forcing a Federal sales tax on the American people, by forcing lower salaries for Government employees so as to bring about a general wage reduction, by compelling Congress to unfairly reduce compensation and other benefits justly due veterans of the World War, by handicapping and preventing, if possible, the development of great projects for the use of the whole people, such as Muscle Shoals, and to sandbag Congress into repealing all remedial legislation for the masses of the people, without interfering in the least with the laws which grant tremendous benefits to those of great means.

The effort to force a sales tax on the ultimate consumers of the country has assumed alarming proportions. The battle is being waged, both by severe front attacks and well-maneuvered flank movements. When the opponents of the general sales tax were victorious last summer, the sales-tax proponents at once began a campaign to force on the people vicious nuisance taxes, such as the gasoline tax, the bank-check tax, the tax on cool drinks, the tax on candies, and so forth, and so on, and to make their collection as obnoxious as possible for the specific purpose of forcing the public into believing and advocating the repeal of these and the substitution of the sales tax in their stead. Neither of these taxes should be levied and collected for Federal purposes.

A tremendous drive thus is on by those who should pay large income taxes, great estate taxes, and inheritance taxes to rid themselves of these just taxes and to saddle all the burden of the Government on the average private individual of the country. The big financial interests of the country have the people huddled and are endeavoring to stampede them into the slaughter pen for final extinction of the last vestige of our once-boasted liberty. On one side these propagandists are shouting, "The Budget must be balanced"; on another side they are shouting, "Down with nuisance taxes and all other similar taxes; let's do everything by the sales-tax system"; and on still another side the shout is going up, "Prosperity can only be brought back by relieving all capital of taxes and by using the broadened base of a general sales tax."

More and more the wealth of the country is being gathered into the hands of the few and hoarded by them, and more and more these few are using this ill-gotten wealth to relieve themselves and this wealth of all taxes and place the entire burden of the Government on the naked backs, starving stomachs, and impoverished bodies of those who have been robbed of this wealth. There is only one known method by which this can be effectively done, and that is the manufacturers' sales tax or some variation of the sales-tax scheme. The fact that the manufacturers' sales tax is so called is no reason for the argument of its sponsors that it may be absorbed and fully paid by the manufacturers and not charged up to the men and women and children who labor for the particular manufacturers, or passed on to and paid by the ultimate consumer. Only so much will be absorbed and lost by the manufacturer, as he can not possibly pass on to some one else; and for every dollar which he can pass on, hundreds of dollars will be added to his profits and the profits of those who handle his products before final sale—all in the way of pyramiding of charges as the result of this nefarious system.

Then, again, the plundering of the poor is being attempted in various other ways by sales-tax systems even more vicious than the general or manufacturers' sales tax system. I shall briefly discuss only three such devices at this time. All three are most deceptive, and each, at first blush, appears plausible and can be easily mistaken for really worth-while legislation for the average independent citizen. Listen to the siren-like language by which the public is invited to turn aside and embrace these destructive sales-tax schemes to further destroy those who have already been bound hand and foot, gagged, and delivered into the hands of the big financial interests of the country. Here they are—first, legislation to prevent the issuance of tax-exempt securities in the future; second, a medium of exchange or currency on which a 2 per cent stamp tax is to be required every time it is spent; and third, a tax on all labor-saving machines and devices. Each proposal is most seductive, and the public may be most easily misled into asking for the enactment of legislation carrying each of them into effect. I shall not enter into a detail discussion of each of these three suggestions at this time; I prefer to merely mention the conclusions I have long since been driven to, by a careful study of these proposals.

The proposal to prevent the issuance of tax-exempt securities in the future, if enacted into law, at once will greatly add to the value of the approximately $26,000,000,000 in tax-exempt securities already outstanding and to which the law could not apply. These millions, and even billions, thus added to the wealth of these bondholders would not simply spring into existence by some legerdemain but would come out of the food that the poor must eat in order to live, out of the clothes that the naked must attempt to get in order not to freeze, and out of the money that the average man must get and spend in order to keep going and support his family. Then, again, we must remember that these tax-exempt securities of the future which would be taxed are not mysterious evidences of wealth owned only by the rich but include the school bonds that are sold by our counties and cities for educational purposes, the good-roads bonds that are sold to help in road construction, the farm-loan bonds that are sold to get money to be loaned to the farmers at cheap rates of interest, and various other bonds that are marketed to raise money for the welfare of the public.

This proposal, stripped of all its beautiful name, is a plan to put a tax on the brick that goes into our schoolhouses, into our courthouses, into all municipal and other public buildings, such as hospitals, and can only mean a sales tax on these and other articles bought and used in the construction of these buildings, as well as a tax on the people of the Nation who use these public improvements. It would be a tax on the poorest of the poor for the benefit of the great wealth of the country. It would place a tremendous additional burden on all public improvements, such as is suggested by President-elect Roosevelt at Muscle Shoals on the Tennessee River.

The most vicious sales-tax system, though, yet suggested is the proposal to issue a form of currency, called by some prosperity certificates, on which a 2 per cent tax is to be required every time these certificates are used in any trade or financial transaction. This idea simply out-Herods Herod, for there would be no exemptions of food or clothing or medicine or anything else for the poor where this money would be used. The big all-embracing exemption would be for the rich, who would not use this currency at all if they had to pay the tax and who make the purchase of ten times as much property in the Nation by check as the poor man and all others make with cash. This system would be a sales tax on everything that the poor man must buy, without any exception at all, where the poor are too poor to have any money in a bank and would relieve all purchases of those who are able to have a bank account and use checks in their various transactions. A plan to put a 1 per cent tax on currency every month or 12 per cent a year, as discussed by me recently, is a thousand times better than the plan to mulct the public by a 2 per cent tax every time a purchase of any kind is made.

The other sales-tax proposal is to levy and collect a tax from all labor-saving machinery and devices. This sounds like a real good proposition if we only listen to its seductive language and do not at all use our heads and follow this kind of tax suggestion to its ultimate conclusion.

Of course, all machinery can be classed as labor-saving machinery. Therefore, this is a proposal to tax not only all machinery but also all labor that works in connection with such labor-saving machinery and all articles that are manufactured by machinery. Thus we have at once a complete sales tax on all manufactured articles just as vicious and even more so than the manufacturers' sales tax, which I condemned earlier in my present remarks. Then to make bad matters worse, this would put a tax on all shop tools and all shop machinery used in machine shops and railroad shops. If the railroad shops in Waycross and in Douglas in my district now are unable to keep open and give employment to the men of my district who now are so sorely in need, it is hard for me to see how a tax on the machinery in these shops would aid the shops in reopening. Again I can not see how additional taxes on the locomotives would help the matter; neither can I see how a tax on automobiles would help the poor man who now owns one and can not even buy gasoline for it. In fact, the workingman's dinner pail was manufactured by a labor-saving machine and is itself a labor-saving device—enables the poor fellow to carry his dinner, if he has any, in a convenient manner and saves him the labor of carrying it around in his hands. This is also true of the paper bag which the poor man uses to carry food home with him at night. I can not see how a tax on these articles would benefit the poor or help relieve the depression. Neither will any such tax help to solve the problems of the farmers of the Nation. The farmer's mowing machine, corn sheller, sugar mill, stubble cutter, plow stock, and every other machine or device used about the

farm is a labor-saving machine or device and is an improvement over the implements used by primitive man to scratch the ground in order to make it more productive or to pulverize his corn for food, and so on. The wheelbarrow, the wagon, the old-fashioned horse cart, and the tractor, as well as the automobile, are each manufactured by labor-saving machinery and are themselves labor-saving devices or machines. The ordinary wheel, so much in use in all lines of industry is one of the greatest labor-saving devices ever worked out by the ingenuity of man. The sawmill which cuts our lumber, the grist mill which grinds our meal and hominy, the cotton gin which separates the seed of our cotton from the lint, the sausage apparatus which helps our mothers to make our sausage, and so on and so on ad infinitum, are all made and manufactured by labor-saving machinery and are themselves labor-saving devices and machines.

Mr. Chairman, I can remember well the old loom and the spinning wheel my mother used; the old wooden mortar and pestle with which my father separated the rice from the husk or chaff; the old hand grist mill with which I ground corn for the chickens; and the old well fork and sweep, which still stand at the old home place; and the old oaken bucket which hangs in the well, used by all of us—all these were not only heaven's richest blessings but also labor-saving devices, and I can not for the life of me see how a tax on them would in any way help to solve our present financial difficulties.

Every step in the march of civilization has been the result of the invention of labor-saving machinery and labor-saving devices. The telegraph and the telephone helps us to communicate with our friends and transact business without the labor of writing and having our letters carried long distances or the labor of personally traveling the intervening space to discuss matters with our friends; the electric light and electrical energy, generally, enable us to have light without filling and lighting the old kerosene lamp or carrying the hand torch and enables us to do thousands of things more easily and with less labor than could have been done by the early settlers in this country; the airplane helps us, without the slow use of a train or automobile or ship, to get anywhere we wish without much delay and without the labor incident to slow travel; and the radio enables us to know what is going on everywhere without having to try to be everywhere at the same time.

Our clothing is a labor-saving device and was manufactured by labor-saving machinery. Buttons, which enable us to fasten our clothing instead of holding it together as was done by the ancients, are splendid labor-saving devices. Hats and caps are, likewise, splendid labor-saving devices—help those of us that are bald to protect the tops of our heads without going around holding our hands on the top of our physical anatomy to ward off the rain and the snow and the heat and the cold. Suspenders are necessary and excellent and much-needed labor-saving devices—enable us to feel safe among our friends without having to hold up our trousers with our hands. Last, but not at all least, the much-enduring and patient safety pin, though sometimes of lowly but always honorable estate, is one of the most useful labor-saving devices ever wrought out by the inventive genius of all the wise men of all time. And yet, Mr. Chairman, for the life of me, I can not possibly figure out how any of these or all of these should be subject to a Federal tax; neither can I determine how anyone can decide that the present financial depression can be overcome by taxing these or those of us who use them.

Of course, I understand that there are those who have a mental twist which enables them to honestly believe that the way to help the poor is to tax everything manufactured for the poor, tax all the machinery which manufactures these articles, and even tax the working tools of the poor. This would do no good unless the particular machinery could be taxed out of existence. Then, if any good came to the few who might get work as the result of stopping the wheels of progress, they would lose much more because of the infliction of this same tax in other forms on themselves and on others, and so on, with the final result being simply more taxes for the poor without any corresponding benefits for them or the people generally. Nothing can be gained by additional taxes on labor-saving machinery or labor-saving devices. The workingman and the poor everywhere can be benefited not by putting more burdens on the progress of the race, but by providing for a fairer distribution of the results of these wonderful God-given inventions of man. Mr. Chairman, all these crystallized thoughts of the Creator in the hands of man should be owned and operated not for the selfish aggrandizement of a few but for the benefit, honor, and everlasting glory of the great "I am," and all the races of men everywhere.

Then again, this kind of tax would not only constitute a sales tax but it would also be an ad valorem or property tax and would authorize the Federal Government to levy and collect a property tax which has never been done heretofore but which has always been reserved for the States.

The Federal Government should not further invade the States in the gathering of taxes, and should get out of the States except as to those taxes that have been collected for many, many years before the present depression made the question of tax gathering so very important.

Not only is great wealth endeavoring to shift all the burdens of government to the shoulders of the poor, but they are also hoping to shout "the Budget must be balanced!" with such loud acclaim until they hope Congress will forget the duty of paying the veterans of the World War that which is just, due, true, and unpaid for services rendered by them. Let us not forget that our duty is greater to these boys who fought that we might live than it is to the profiteers who stayed here and fleeced the fathers and mothers of these boys while the boys were away.

Again, let us not forget to watch these malefactors of great wealth more than ever before. They are largely responsible for the present depression and now are using every possible effort to use the depression as a means of getting a stronger strangle hold on the public than ever before. Let us watch, as never before, every move made by them and every suggestion offered by them. They come as wolves in sheep's clothing. Their cry for a balanced Budget is not in good faith. It is selfish in the extreme from every standpoint.

They want the Budget balanced, of course, so as to maintain the value of their bonds and provide for the prompt payment of their unjust interest on these bonds. I deliberately used the words "unjust interest" because, to my mind, much of these bonds should not be in existence, but should have been settled by Government currency long ago. This, though, will be discussed more fully by me a little later during my present remarks. Of course, if the credit of the Government should be impaired by any means, all would suffer. The rich, though, would lose more money than the poor; they have more money to lose, and the poor have already suffered everything.

About a year ago, as a part and parcel of the scheme to get the attention of the public away from the crookedness of great wealth, a program of abuse and unfair criticism of Congress was started by the international bankers and others of their kind, aided and abetted by the big subsidized press of the country. The smallest thoroughly honorable detail was seized upon, distorted, magnified, and even misrepresented in order to lead the public into hating Congress and each and every Member thereof. Many of the small papers of the country—many innocently, others willfully and maliciously—joined in this orgy of abuse, misrepresentation, and villification. Mr. Chairman, many of the items mentioned in this campaign of vituperation have been and are to be considered in the pending bill, and I now wish to address myself briefly to them.

We have just considered the one in reference to cutting the salaries of Members of Congress. I never have voted to

increase my salary beyond $7,500 per year. Since its increase I have voted at every opportunity to reduce my salary back to $7,500. I did this while I knew I would serve for the $7,500 if that salary was adopted, and I am now casting the same vote when I know I shall not be a Member of the next Congress. I only received $7,500 for several years after I came here. Everything is much cheaper now than when I served for $7,500, and I feel that the salary of Members of Congress can at this time very properly be reduced to this amount.

I am voting to reduce the salaries of Members of Congress, knowing full well that this reduction, if carried into effect, will not be a drop in the bucket in the matter of balancing the Budget and will not change the price of cotton or corn one-thousandth part of a cent per pound, neither will it in any appreciable way help to relieve the present financial depression. I am voting for this reduction because I feel that if we are to cut expenditures in every way possible, we can not afford not to reduce our own salaries at least to $7,500. I am in favor of cutting the larger salaries, but I am not in favor of reducing the smaller salaries of Government employees or other employees. If we reduce the pay of the smaller employees of the Government, industry will at once reduce the salaries and wages of their small employees where they happen to be in employment at this time. I resent the argument that the way to balance the Budget is to cut the salaries of the employees who are not now getting enough to pay for reasonable food, clothing, shelter, and fuel to keep them warm, and that the way to solve the present depression is to cut again and again the small wages of the wage earner in industry.

Those of us from agricultural sections are fully persuaded that there can be no real relief until the farmers get a much better price for the products of the farm, and anybody who is at all familiar with such problems knows that the price of farm products never were elevated, while the price of wages were low, and that the prices of farm products follow the prices of wages. One never goes up while the other is going down. A fight to reduce the wages of the workingman or the pay of Federal employees is a fight against an increase of the prices of cotton, tobacco, and other farm products.

The public has probably been misled more in this matter than in any other. The salaries of all Government employees and all other officials of the Government, including Members of Congress, constitute a very small item of the total expenditures of the Nation. If the President should call out the Army and force all the Government employees, all public officials, Congressmen and their secretarial help included, to work without pay, sleep and live in tents, and subsist on bread and water, no considerable aid would be given to balancing the Budget, the depression would not be relieved in the least, no additional employment of other people would result, and the farmers would not be assisted at all in getting better prices for their products, and no appreciable difference would be seen in the tax burdens of the public. Our other national burdens and other troubles are so great and varied and the one of salaries is so small until it is but one ear of corn added to a freight-car load of our troubles and cares.

And yet there are those who claim that the way to bring back prosperity is to take it out on those that still have jobs by discharging part and practically destroying the wages of the balance.

Senator COSTIGAN, of Colorado, recently reported a survey of the present economic condition of the letter carriers of a large city in Tennessee, which is believed to be fairly representative, and shows that out of the 105 interrogated, 66 replied that they bought or started to buy their homes during the period of higher prices in this country; 57 that their homes are under mortgage; 63 that they owe for furniture and other household necessities; 70 that they are in debt because of sickness or death in the family; 85 that they are helping relatives who are unemployed; and 91 that a further reduction in salary will endanger their chances of completing their payments on homes, furniture, and other household necessities.

Thirty-one of the number, according to this tabulation, have been required to give up, in whole or in part, the use of home telephones; 15 have found it necessary to stop purchasing milk; 17, ice; 67, clothing; 64, home necessities; 59, insurance; 81, amusements; 27, gas; and 71 find themselves no longer able to make contributions to relieve the distress of others.

In addition, those who responded report that there have been no reductions in payments of interest, or in streetcar, gas, light, water, telephone, insurance, and total home expenses.

Mr. Chairman, I call attention to these items in order that the gravity of apparently innocent reductions urged by wage-reduction sponsors may not be forgotten by those of us who sit here and easily cast our votes on one side or the other of the pending issue. We are fundamentally dealing with business recovery and human welfare.

The public has been led into believing that Members of Congress should not receive a stationery allowance or mileage or funeral benefits, and ofttimes the criticisms of Members because of these matters lead the people to forget all about the Members' real legislative record. These items cause the Members more harm than good. I should like to see the present law amended so as to eliminate the stationery allowance of $90 per term; reduce the number which attends funerals of Members to only two from the Senate and two from the House, at Government expense, instead of a large number from both bodies, as now provided; and simplify the mileage allowance so that designing newspapers can not mislead the public into believing that a Member of Congress gets 15 or 20 cents a mile every time he rides on a train or travels, regardless of the number of trips he may take.

The stationery allowance is not sufficient to pay for the stationery used by the average Member, and yet it is seized upon to lead the public into believing that it is graft and that all Members who receive it are crooks and dishonest. It would be much better for all Members to pay for their stationery outright rather than have the public misunderstand this item. I had rather pay my stationery allowance and not get any mileage, so no one can have these allowances as a means to mislead the public into believing that they are of more importance than all other public questions and that on this account Congress is unworthy of the confidence of honest men and women. Personally, I would prefer to not get any mileage, but I realize that the elimination of mileage would not be fair to those who live long distances from Washington. I do wish, though, that some plan could be worked out so the public could not be so easily misled about this matter. As to funerals, I feel that only such an escort should accompany a deceased Member to his last resting place as will show proper respect for him. I never have felt that a large delegation was at all necessary for this purpose.

So far as the House restaurant is concerned, I am willing for it to be discontinued at any time. I never patronize it except occasionally when some friends from Georgia happen to be in Washington, and we take a meal in the House restaurant. I can, and do, get food that suits me much better, close by, for much less money, and I would not be inconvenienced at all if the House restaurant was abandoned.

I feel like apologizing for taking any notice of these items at this time. They are too small to take up any considerable time, when the whole world is suffering from agencies and causes which threaten our civilization and our very national existence. I only mention these very small items, which do not, and can not, affect the Budget or our economic condition to any appreciable extent, because it may

be well to do so since those who wish to get the mind of the public off the awful problems that confront us are continually misleading the public about these small matters rather than tell the truth about their own guilty responsibility. I want to impress on the public the insignificance of these matters as compared with the all-absorbing problems which so sorely beset us on every hand.

Now let us talk a little more about the Budget. If it must be balanced, how can it be done without the imposition of the general sales tax? My answer is, Bring back prosperity and let prosperity do the work, after the Budget has been reduced by every fair and legitimate means. I shall not now attempt to further discuss the many plans which have, from time to time, been suggested for balancing the Budget and for reducing expenditures. Neither shall I, at this time, further discuss all the plans I have, from time to time, suggested for helping the farmer and solving our present financial difficulties. I do wish, though, to briefly discuss Government bonds, inflation of the currency, and refinancing the farmers' indebtedness. These, if handled along the right lines, will usher in prosperity and provide for well-balanced budgets everywhere.

Everybody wants inflation and everybody wants deflation. Everybody wants inflation of what they have to sell and deflation of what they must buy. They want what they have to sell to advance in price and what they are to buy to fall in price. The big bankers want their money to advance in price and what they buy with money to go down in price. They also want an inflation of the value of their dollar and a deflation of the amount of money that is in actual circulation so they can more easily corner the money market and thus advance the value of the dollars which they have in their vaults.

For a long time the big bankers have had complete control of the inflation and deflation of money and therefore have had control of the inflation and deflation of the value of farm and other products. They have held down the inflation of the amount of currency actually in circulation and thus have inflated or increased the purchasing power of their dollars and accordingly have deflated or lowered the price of what everybody else has to sell.

This control of the issuance of the currency by the bankers is the cause of the depression, almost altogether, and must be taken from the bankers and handled for the benefit of the whole people before there will be a return of permanent prosperity.

The big bankers are fighting this transfer of control in every way possible. They are arguing that inflation of the currency is very dangerous, that it will not help at this time and that it will go wild because it can not be controlled. It can be controlled and is actually being controlled now by the big bankers for the big bankers and to the detriment of all the other people of the Nation. This control must be transferred to an agency created by Congress to act for the whole people and not for the bankers alone.

The big bankers are forced to admit that if enough new currency is issued and put into actual circulation, the value of the dollar will go down and the value of farm products and all other articles which are now for sale will advance accordingly.

If the value of the dollar should double again, the price of everything else would be cut in half; and that if the price or value of the present dollar could be cut in two, the average price of everything else would double. Likewise, if the price of the dollar could be reduced to what is now the value of a 25-cent piece, the price of cotton, tobacco, and everything else would at once be four times as large when measured in dollars and cents. Now, the big bankers have helped to make the price of the dollar three or four times as great as it was a few years ago and thereby made the price of everything else just about one-fourth as great as it was a few years ago. The big bankers have done another thing which is working havoc with our people. By this same process they have increased the debts owed by all of us to where these debts are about four times as large as they were and the interest rate is four times as big as it was when we made the debt. Our taxes are also about four times as great. Why is all this true? It is because it takes four times as much cotton or tobacco or anything else to pay these things as it did a few years ago. This means that those who have the money can get the property of those who can not pay their debts for about one-fourth of what it was worth a few years ago. When they get all of our property they want, then they will be willing to help to increase the value of property and thus again double and treble their money.

Thus we are face to face with the proposition that in order for our people to pay their debts they must get them reduced to about one-third of what they are, and in order for our people to again be free from the domination of the big banks and be happy and prosperous they must get about three times as much for their products as they are now getting. But it is said that this can not be done. Let us see if it can be done. A sufficient proper inflation of our currency will do it, and it can be done in this way on an absolutely sound basis. First, let us see if an inflation of the currency will do it, and then let us see whether or not this inflation can be made on a basis as sound or even sounder than that used at this time by the big bankers themselves.

The "standard of value" in France was the gold franc, which, before the war, contained 19.3 cents' worth of gold. France later stabilized her franc on a gold basis, not at 19.3 cents, but instead a law was enacted whereby the franc would contain 3.91¾ cents' worth of gold, and this paid off debts contracted at the old price of the franc. This resulted in a cancellation of 80 per cent of the debt claims against the people. Instead of having to sell farm products and other commodities sufficient to get 19.3 cents' worth of gold to secure a franc, under the new arrangement they had to sell only enough to pay 3.91¾ cents' worth of gold to get the franc, which would pay off the old 19.3-cent franc debts.

The "standard of value" in Italy was the lira, which was, before the war, worth 19.3 cents also. Debts were created in Italy beyond the capacity of the people to pay. Italy, like France, stabilized her "unit of value," the lira, not at 19.3 cents, but at 5.26 cents' worth of gold, and thereby canceled 72¾ per cent of the debts.

What has happened in other countries would take place here if there was a proper inflation of the currency in actual circulation.

But, the big bankers say inflation is not necessary as there is plenty of money now—yes; but if so, it is not in circulation in sufficient quantities. Again they say that additional inflation was authorized by the Glass-Steagall bill but did no good. My response is that there must be an inflation that will actually put sufficient money in circulation, if we are to get any real benefits from it. Under the Glass-Steagall law and under all other laws, and under most of the proposed laws, this matter of inflation is left entirely in the discretion of big bankers. Additional authority to do as they please about this matter will never get real worthwhile results for the masses of the people. They just simply refuse to exercise this authority to inflate the currency and nothing is gained. Suppose we forced them to increase the volume of currency. Nothing would be gained unless we also forced them to put it in actual circulation; nothing would be gained by their increasing the amount of money if they simply put it in a vault and locked it up. The control must be taken out of their hands if we are to do any good.

The big bankers now can buy Government bonds yielding 3 per cent interest and deposit them back in the Treasury and issue the equivalent in currency. This would be good business it seems, if they would immediately reloan this currency at a good rate of interest on safe collateral. But why should they take a risk of losing during these hard times in

an effort to make 4 or 5 per cent interest when they can keep their money locked up and make much more profit by boosting the price of the money they have in hoarding?

Now, how can our currency be safely inflated so as to put sufficient money in actual circulation to help everybody and overcome the present depression? Here is a plan which I proposed some time ago, which is safer than that now followed by the bankers; would have a much better base than the present one; and would cost the Government absolutely nothing as against 3 per cent per annum now actually paid the bankers for strangling our credit to death by issuing currency just when they think it profitable to themselves, regardless of the effect on the rest of our people.

I would monetize farm lands, farm products, and, if necessary, such other property as would furnish an ample circulating medium—both in volume and amount—for all our people. As I utter these words, I know the opposition will vehemently declare that this sort of thing would ruin us economically and that the plan is unsound from every standpoint. Anticipating this attack, let me say that notes and liens secured by just such property as I have mentioned are now actually used by the banks when they use paper, discountable with the Federal reserve system, as a base for the issuance of currency. The tremendous difference between the plan now used and the one I advocate is that the average man pays in interest and taxes an enormous amount of money to the big banks for handling the farmers' paper and monetizing it, as is now done, and the base furnished at this time is not as sound as the one I am seeking for the farmers and all our people. But the most vital difference is that the present system gives to the big bankers a strangle hold on the very throats of our people and permits them to economically choke the farmer and all our people to death just when they please and as they please in order to accumulate, hoard, and use currency in such a way as to make it more valuable to the bankers and destroy the selling prices of farm and other products—labor included—which the average citizen has to sell. My plan would enable the American people, the average citizen, if you please, to issue a circulating medium of such amount and velocity as may be necessary to prevent such depressions as we now have and to insure prosperity and justice to all.

The big banking institutions now can buy Government bonds and leave them on deposit with the Government and immediately issue the amount of the bonds in tax-free and interest-free currency, the net result of which is that the Government bond—which is only the promise of the Government to pay—is the base of and for the issuance of a similar amount of currency, and that for every $1,000,000,000 thus issued the taxpayers must pay $30,000,000 additional taxes each year in order to balance the Budget—all of which goes to the very bankers who are issuing our currency for their own use and who are using this device for the economic destruction of our Nation. Why is it necessary to issue and sell all these bonds to the bankers in order for them to be used by the bankers as a base for the issuance of currency? Why are two promises of the Government to pay one debt any better than only one promise? Would it not be just as sound for the Government, in the first instance, to issue the currency, backed up by first liens on farm property or other property, save all this interest that the bankers now get for exploiting our people, and furnish tax-free and interest-free money to the farmers and public rather than to the big bankers for hoarding and such other manipulation as pleases them? My plan is safer, sounder, and better for all the people from every standpoint. Why does it put the Government less in debt to issue and sell Government bonds than it would to issue currency, backed up by good liens on good property? The question answers itself. The bonds put the Government further in debt for just exactly the amount of the interest. In other words, there is now outstanding about $20,000,000,000 of Government obligations or bonds. Interest on this amount at 3 per cent annual interest amounts to $600,000,000; and if currency had been issued instead of the bonds, the Government would be in debt today $600,000,000 per year less than it is now, and the sales tax supporters—the big bankers—would not have to be trying to plan some way to force on the people a sales tax to raise this $600,000,000 annually in order to balance the Budget. If this enormous amount of interest on our bonded indebtedness had been saved ever since the World War and prior thereto—sometimes much larger than $600,000,000, and sometimes less—our Budget would not be out of balance, and there would be no need for the suggestion of the big bankers that all kinds of vicious sales taxes be imposed, and that the salaries of "the most humble employees" be cut to the bone.

If I had my way about the matter, I would provide an agency which would be required to accept first liens on real estate and products of the farmer and issue the equivalent thereof in currency. Of course, I would provide for the issue to be safely secured by these liens on the property of the farmer and that an effective control of the entire matter be maintained by Congress. This would save the people the interest on the Government bonds that are now used by the bankers as the basis of the currency issued by them. It would also furnish the farmers and the country ample currency for all purposes and enable everybody to balance the Federal Budget and still have enough money to balance all State and municipal budgets, as well as our individual budgets. My plan would also furnish a gilt-edge first lien on what should be the best property on earth—farm lands—as security for the money as against nothing but the Government's promise to pay, which is behind much of our present currency.

For those who wish to be meticulous about the way or manner of the issuance of currency and insist that Government bonds should be the basis for the currency, let me state that I have suggested that the farmers be permitted to file 30-year 3 per cent mortgages with the Treasury Department in exchange for 30-year 3 per cent Government bonds, then let the Government hold these bonds as the base for the issuance of the currency for the farmers. This would put Government bonds behind the farmers' issue of currency just as is the case with the bankers now, except that the interest on the mortgages would pay the interest on the bonds and vice versa, thus costing neither the farmer nor the Government anything. This issue by the farmers would be secured by the lien in addition to the Government's promise to pay, and be this much safer than the present plan. It would also save the taxpayers the interest on the base made up of bonds and put this matter in the hands of Congress for the use of the farmers and everybody else.

This plan would enable the farmers to discount and pay up in full all their present loans with money obtained for 30 years without interest or any annual payments and on a plan that would authorize a new loan for a larger amount at the end of the 30 years, if then necessary. This will help the farmers, help the insurance companies, help the banks which have farm mortgages, help solve the unemployment problem, bring immediate farm relief of the most lasting character, and balance all the budgets of everybody everywhere.

This plan to monetize farm products would work miracles in the matter of farm relief under my contract system, with the farmers holding their products off the market until a good price is offered by the buyers. A lien without interest would force the issuance of a reasonable amount of interest free cash to be paid to the farmers on their property, during its period of storage. When the cotton or tobacco or other product was sold, of course, the money based on the particular product would be retired. Thus my contract system of farm relief could be financed without any additional tax burden on the farmer or on the public and with tax-free money to the farmers. Under this plan our currency would not be contracted or expanded by the bankers for their own

selfish purposes and designs but would automatically contract and expand as needed by our people in the transactions of their own business affairs and the business of the whole Nation.

Mr. Chairman, I humbly submit this plan of farm relief and general economic relief and respectfully submit that if it is put into effect, our people will witness a new dawn of civic righteousness, and our Nation will become as imperishable as the sun.

The pro forma amendment was withdrawn.

The Clerk read as follows:

For repairs, improvements, equipment, and supplies for Senate kitchens and restaurants, Capitol Building and Senate Office Building, including personal and other services, to be expended from the contingent fund of the Senate, under the supervision of the Committee on Rules, United States Senate, $27,288.

Mr. SCHAFER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SCHAFER: Page 10, strike out all of lines 21, 22, 23, 24, 25, and 26.

Mr. SCHAFER. Mr. Chairman, this is an amendment to strike out the subsidy, at the expense of the taxpayers' Treasury, for the Senate restaurant. At the proper time I shall offer a similar amendment to strike out the subsidy for the House restaurant, and I sincerely hope that the Members will support the amendments and get the Government out of the restaurant business, which is going in the red many thousands of dollars each year.

I expect that the gentleman from Missouri [Mr. SHANNON] the chairman of the special government-in-business investigating committee, who has been criticizing the policy of the Government in business, will take the floor of the House and advocate the adoption of this amendment.

Mr. COCHRAN of Missouri. Will the gentleman yield?

Mr. SCHAFER. In just a moment. If I can get some more time I shall be pleased to yield to all comers on the Democratic side.

When we study the hearings what do we find with reference to the House restaurant? We find, on page 15, that the taxpayers are called upon to expend $20,000, which goes for a monthly pay roll of $3,700 while the House is in session and a monthly pay roll of $850 when the House is not in session and this restaurant closed.

We know that these restaurants are not patronized alone by the Members of the House and the other body. Anybody can patronize these restaurants and they have to pay for their meals whether Members of Congress or the public. When you look at the prices on the menu you know they are paying at least as much as one would pay in a private restaurant, and in most cases more, and still the taxpayers are called upon for these appropriations, notwithstanding that the operation cost of these restaurants does not include the expense of water, heat, power, light, equipment, and rent or taxes.

So the thing to do is to strike out this subsidy that exists right under the dome of the Capitol and let the proper legislative committee bring in legislation to provide for giving private industry, taxpaying industry, an opportunity to submit bids on the restaurant concession and get money into the Federal Treasury instead of taking it out.

I earnestly hope that the gentleman from Missouri [Mr. SHANNON] will take the floor and advocate the passage of this amendment.

Mr. COCHRAN of Missouri. Will the gentleman yield now?

Mr. SCHAFER. I yield.

Mr. COCHRAN of Missouri. I am in agreement with what the gentleman says, but I am thinking about the courtesy the House has always extended to the Senate in reference to these appropriations.

Mr. SCHAFER. In the other body we have plenty of economy experts. Many are talking in favor of cutting people off the pay roll and throwing them into the river of unemployment, and they are denouncing the House day after day for failure to reduce the appropriations enough.

I think that we ought to have a complete investigation of the Government in the restaurant business under the dome of the Capitol. It does seem strange that with high prices for meals, free rent, equipment, light, heat, power, and so forth, the taxpayers' Treasury must be called upon each year to meet deficits running into many thousands of dollars. I do not believe that the other body, which has a record for investigating, would for one moment disapprove opening to the public eye all of the transactions and Government operations which result in these large deficits' being met by the expenditures at the expense of the overburdened American taxpayers.

[Here the gavel fell.]

Mr. BLANTON. Mr. Chairman, I am in favor of taking the Government out of the restaurant business and out of the barber-shop business, and out of every other practice that casts any reflection upon the House or Senate.

Mr. Chairman, the gentleman from Wisconsin [Mr. SCHAFER] ought to have been here long enough to know of the comity that exists between the House and the Senate. The gentleman ought to know that during the history of the two bodies the House has never yet interfered with the contingent fund of the Senate and that the responsibility of the way those gentlemen across the way handle their contingent fund rests upon their shoulders and is a matter between them and their constituents. The amendment offered affects no House institution but limits only the contingent fund of the Senate.

The gentleman from Wisconsin ought to know that the House restaurant, to which he refers, has only recently been taken over by our distinguished friend from North Carolina, the chairman of the Committee on Accounts. The gentleman ought to know that our friend [Mr. WARREN] already has put a lot of economy into this business. The gentleman ought to know that our friend already has cut the deficit that has been carried for the last 12 years on this particular activity of the Capitol to a very large per cent, and we are hopeful that when the new Congress convenes a method will be inaugurated whereby there will be no expense whatever to the Government because of this restaurant.

In this connection I want to compliment our friend, the chairman of the Committee on Accounts [Mr. WARREN]; and I want to compliment our friend from Oklahoma [Mr. MCCLINTIC], who is now working on a proposition to effect further economies.

Mr. SCHAFER. Will the gentleman yield? I do not criticize the gentleman from North Carolina [Mr. WARREN].

Mr. BLANTON. I will yield in just a minute.

The gentleman has overlooked the fact that a transition is going on. The gentleman talks about yielding to a bunch of Democrats over here. The gentleman knows there has been a political transition going on here, a passing from Republican control of 12 years over this House to Democratic control. The gentleman must not evade his own responsibility. The gentleman must not evade responsibility for the annual deficit that Republicans passed on to our good friend Mr. WARREN in this transition. The gentleman ought to be fair.

I never go into the restaurant downstairs myself unless I take some constituent there. I get my coffee in here with Coates, and it costs me 10 cents. This is enough for me to go on for the rest of the day. I do not go down there in the restaurant with my friend from Wisconsin and eat the elaborate meals that he undoubtedly eats.

It is going to take time to effect this transition. We can not undo all this in a moment. It is going to take time for our friend WARREN to work out a plan that will undo this 12-year piece of Government business that he hopes the gentleman from Missouri [Mr. SHANNON] will help him to break up. If the gentleman from Wisconsin were going to

be here, we would expect him to go along with this economy plan. I am sorry all of the gentleman's time is going to be taken up in Milwaukee on some kind of campaign that he is conjuring up on the La Follettes. [Laughter.]

I do not know what proportion this Schafer and La Follette matter is going to amount to, but it may disturb the tranquillity of that which made Milwaukee famous. [Laughter.]

[Here the gavel fell.]

Mr. WARREN. Mr. Chairman, I do not really care enough about this matter to take up the time of the House. Eleven years ago, before I came here, after a full discussion, the House, which was getting inferior service from the operation of the concession down in the restaurant, after much debate decided to take it over and put it under the Committee on Accounts. From that year to the present there has been an annual appropriation for it.

Of course, there is a deficit each year. That deficit is solely for labor. Out of the receipts of the restaurant all food is purchased. The silverware, all table linen, all additions, everything else pertaining to the operation of the restaurant is purchased from the receipts of the restaurant. No part of the annual appropriation is used to pay for anything but salaries. I am not operating a restaurant here. We employ a manager and hold him responsible.

Last year the Committee on Accounts turned back to the contingent fund the sum of $5,000. I do not want to take any credit for doing that, but it was the largest amount that ever was turned over to the contingent fund. We managed to do that by certain economies which we established there. This year we hope to make an additional turnover. While the economy act did not apply to the restaurant, the Committee on Accounts ordered that it should.

But we are in this fix. The whole set-up there is for one meal. They do not serve over 10 breakfasts a day. Of course they have to have a large number of waiters, although of this extra large number that you see down there 75 per cent receive no salary whatever but serve merely for the tips that they get, and their lunch.

Mr. MAY. Will the gentleman yield?

Mr. WARREN. Yes.

Mr. MAY. I should like to suggest that the time lost by Members of the House in getting their meals somewhere else would amount to more than this deficit.

Mr. WARREN. I think that is true. The whole thing resolves itself down to this, Does the House wish to continue to operate this restaurant?

Last year I stated that I should like to bring in a resolution asking that it be let out as a concession, but the Committee on Accounts was opposed to it at that time. As far as I am concerned, if the House declines to operate it, it would be welcome to me personally.

Mr. COCHRAN of Missouri. Will the gentleman yield?

Mr. WARREN. Yes.

Mr. COCHRAN of Missouri. Does the gentleman say that the Committee on Accounts was unanimous in declining to accede to the gentleman's suggestion to let it out as a concession?

Mr. WARREN. I so understood it.

Mr. COCHRAN of Missouri. Well, the gentleman can change that, for I was in favor of it.

Mr. HOLADAY. Mr. Chairman, I want to say that the Committee on Accounts is to be commended on its management of the restaurant. This restaurant is open to the public as well as to the Members, and they all pay the same price for what they get.

Mr. WARREN. That is absolutely correct.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

Mr. GARBER. Mr. Chairman, I ask unanimous consent that the time of the gentleman from North Carolina be extended for half a minute.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GARBER. I am wondering if the gentleman has had time to investigate the necessity of employing persons permanently on the pay roll; that is, annually clear through the year, when there are intervals when Congress is not in session and the restaurant is not in operation.

Mr. WARREN. The gentleman will recall that last session we were here for seven and a half months. When you have a set-up there, such as we have to have, you have to have dependable men who will be here to open that restaurant a week or two before the Congress opens and close it two or three weeks after the Congress adjourns; men that we can always depend upon, and for that reason there are five men we have carried on the permanent pay roll, only five. If we did not do this, then we could not hope to maintain an efficient organization, because we would have to look around each year for new men.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The amendment was rejected.

Mr. McCORMACK. Mr. Chairman, I move to strike out the last word. My purpose in obtaining the floor is to ask my distinguished friend from Missouri, the chairman of the Executive Departments Committee [Mr. COCHRAN], what has happened to the bill that I introduced to try and get back the 8⅓ per cent deductions that were taken from several hundred men who were employed temporarily to remove the snow from the streets of Washington, and to get back the 8⅓ per cent reductions for the many thousands throughout the country who worked temporarily in the Post Office Department during the Christmas holidays. I think we all agree that that money should be returned to them, and I think that even my friend from Kansas [Mr. McGUGIN] would support my bill if I could get it out on the floor.

Mr. COCHRAN of Missouri. The usual procedure was pursued with reference to that bill. The bill was sent to the departments. It was referred to the Commissioners of the District of Columbia, and a favorable report was received. The bill was referred to the Post Office Department, and a brief letter disapproving the legislation was received. Thereupon I wrote another letter to the Postmaster General, asking him for additional information for the committee and the approximate cost upon the Treasury, and a communication, I think, was received yesterday from the Post Office Department giving us some idea of the cost. I hope to have the gentleman from Massachusetts before the committee some day next week.

Mr. McCORMACK. I have called this to the attention of my friend from Missouri, to the gentleman from Wisconsin [Mr. SCHAFER], who is also a member of the committee, and I suggest to the gentleman from Wisconsin that there is no case where he could more valiantly fight for justice than to undertake to have that bill reported out of his committee.

Mr. SCHAFER. Mr. Chairman, I am in favor of the bill; but I do not think the gentleman from Massachusetts goes far enough. He discriminates in favor of only a few employees.

Mr. McCORMACK. The gentleman and I are in no disagreement in that respect; but, on the other hand, I think everybody, or practically everybody, is agreed that it was not his intention when he voted for the economy act in the last session that it should cover such cases. I agree that there are other cases, but if you overload the bill you can not get the bill through. We might as well try to get something for those two classes who have been affected, if we can accomplish it, rather than to load up the bill with other classes of employees and thereby prevent its passage.

Mr. SCHAFER. Mr. Chairman, in view of that situation, if the gentleman persuades his Democratic colleague from Missouri, the chairman of the committee, Mr. COCHRAN, to call a meeting of the committee to-morrow, I shall vote to bring the bill out.

Mr. COCHRAN of Missouri. Mr. Chairman, I am glad to hear the gentleman from Wisconsin say that, because the gentleman in all good faith has probably delayed the consideration of the bill, because he has insisted that the gentleman from Massachusetts has been discriminating in including only a few. He was thinking of the substitutes in the post office and other underpaid employees. So do I think of them, and would like to help them. My thought was the same as that of the gentleman from Massachusetts, namely, the danger of overloading the bill—that we might get ourselves into trouble in that way; but the gentleman from Wisconsin is a member of the committee, and while I agree with him that we should not take the money away from the substitutes and other underpaid employees, we should not go too far now on the McCormack bill. Another committee takes care of the post-office employees. If he will get away from that phase of the matter and agree to report out the gentleman's bill, it should pass. I will call a meeting of the committee next week to consider it.

Mr. SCHAFER. I will get away from that phase, and I shall expect the gentleman to call a meeting for to-morrow or next day.

Mr. COCHRAN of Missouri. Oh, the gentleman does not mean Sunday. We go to church on Sundays, but I shall try to get a meeting of the committee for Tuesday. Will that be satisfactory to the gentleman?

Mr. SCHAFER. Yes.

Mr. HOLADAY. Mr. Chairman, I think the gentleman from Massachusetts [Mr. McCORMACK] should be entirely satisfied. He has received the information where his bill is, and it is now in the hands of a friendly subcommittee.

Mr. McCORMACK. I am particularly satisfied that my distinguished and genial friend from Wisconsin [Mr. SCHAFER] has seen the light. He usually does when the evidence is convincing. I think that the evidence in this case is convincing, far beyond a reasonable doubt, and I am glad that he now says that he is going to cooperate in the passage of this bill.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

The Clerk read as follows:

For compensation of Members of the House of Representatives, Delegates from Territories, the Resident Commissioner from Puerto Rico, and the Resident Commissioners from the Philippine Islands, $3,963,750.

Mr. WHITTINGTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WHITTINGTON: Page 11, line 6, before the period, insert "*Provided*, That during the fiscal year ending June 30, 1934, the rate of compensation of Members of the House of Representatives, Delegates from Territories, the Resident Commissioner from Puerto Rico, and the Resident Commissioners from the Philippine Islands, and the rate of compensation of any other office, position, employment, or enlistment the incumbent of which is subject to the furlough provisions or the compensation reductions contained in Title I of Part II of the legislative appropriation act, fiscal year 1933, as continued for the fiscal year 1934, is reduced by 11 per cent of the amount of such compensation in excess of $1,000, and such reduction shall be made after the application of, and shall be in addition to, the reduction provided in such title as continued."

Mr. SANDLIN. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN (Mr. BULWINKLE). The point of order is sustained.

Mr. WHITTINGTON. Mr. Chairman, I offer a further amendment.

The Clerk read as follows:

Amendment by Mr. WHITTINGTON: Page 11, line 6, strike out the period, insert colon, and add: "*Provided*, That the salaries of Members, Delegates, and Resident Commissioners are hereby reduced to $7,500 per annum: *And provided further*, That the salary of the Speaker is hereby reduced to $12,000 per annum."

Mr. WHITTINGTON. Mr. Chairman, I fully appreciate the temper of the House, I thoroughly appreciate the position I occupy, I regret the attitude of some of my colleagues, but I accord to all the right to their views.

Mr. SWING. Will the gentleman yield?

Mr. WHITTINGTON. In just a moment, please.

In my previous statement to-day I called attention to the fact that the first amendment I offered applied only to the Senate. This is merely the accompanying amendment for salaries of Members of the House. I also called attention to the fact that the amendment, to which a point of order was sustained, would have provided for further reductions in all salaries, of approximately $55,000,000. I regret the House can not in this bill, under the rules, consider general reductions. It is true this particular amendment would provide for a reduction of only $805,500. I concede it is but the start. I have maintained from the very beginning that if the salaries of Members were reduced, there should be further reductions of all governmental salaries. I have said that my purpose in bringing this amendment before the House now was to call the attention of the Congress and the country to the fact that during the present session we have merely continued the reductions of last session and made no effort toward further reductions in salaries and governmental expenditures, as far as compensation was concerned. It has been said that I have been speaking of economy only recently. I argued and spoke at length during the consideration of the economy act, and stated that I favored further and additional reductions. I have stood for further reductions in season and out of season. I introduced a bill for general reductions, but I stated to the members of the Committee on Expenditures, of which I am a member, that it was utterly immaterial to me as to whether the bill introduced by the gentleman from Nebraska [Mr. SHALLENBERGER], or the bill introduced by the gentleman from Oklahoma [Mr. GARBER], or any of the other pending bills was taken up. I am interested in the principle of further reductions. I wanted, and still desire, action. When it was apparent that none of those bills would be considered, when it was apparent that the House thus far had made only provision for the continuance of the economy bill, when it was apparent last week that the Senate would not further reduce, this session. I maintain, as the President of the United States had recommended a further reduction of $55,000,000 and the democracy of the Nation had pledged itself to a 25 per cent reduction immediately, we ought to take the first step.

Under leave to extend my remarks, I say I favor further general reductions. If we can not make general reductions in the pending bill, let us reduce our own salaries. When the bill reaches the Senate a rider can be attached making further reductions. I again say that my purpose in asking the House to reduce the salaries of Members of Congress is to secure general reductions in the Senate. It is no answer to say that the bills should come from legislative committees. Legislative committees have considered salary reductions in the past 12 months more than any other question. The report of the Economy Committee contains a number of set-ups. We are confronted with a fact and not with a theory. If Congress wants to make further reductions, we can make them by a rule in the House or by a rider in the Senate.

All the Members of the House are my friends. I value the good opinion of my colleagues. I understand that some of them oppose salary reductions in principle. They are entitled to their views. I favor general reductions. There must be reductions if taxes are to be reduced, otherwise the people are paying taxes to support officeholders. If we reduce salaries, taxpayers can use money now required for taxes to buy the necessities of life. The purchasing power of the country would be increased.

I understood fully the attitude that I had assumed in urging reductions. I anticipated demagogic designations. Demagogues seem to satisfy themselves when they denounce others as demagogues. I was prepared for the poetic license,

so to speak, to which some of my colleagues have resorted, and the poetic references which some of them have made.

I listened to the effusions of my colleague from Mississippi [Mr. ELLZEY]. The question before the House was the matter of the reduction of congressional salaries. I listened to his remarks attentively. Although he was recognized in opposition to my amendment to reduce it was impossible to tell whether he was for or against the reduction from his remarks, as he talked about nearly all subjects except that under consideration. His part in the discussion was easily apparent.

Federal salaries now aggregate $1,250,000,000. They must be reduced if taxes are reduced and to prevent increases in taxes.

My colleague talked of nepotism and campaign expenses. Neither subject was under consideration. Incidentally, congressional salaries are not for reimbursement of campaign expenses. If so, what about the expenses of the opponent? No; salaries are for services rendered. He overlooked giving us the benefit of his matured views on reducing congressional salaries. He neglected to say whether he favored any reductions whatsoever. He succeeded in talking about almost everything else except reductions in the expenses of Government. He did not touch top, side, or bottom of the amendment under discussion. His remarks, except to even slightly refer to the question, were a brilliant success.

I want to be fair. I trust that I am not selfish. I am a Mississippian but at the same time I am an American. I was interested in the improvement of the navigable rivers of Mississippi for years before I came to Congress. I have been interested since. I have never asked the Congress of the United States for any legislation that I was unwilling to accord to other States or Territories similarly located.

Much has been said about economy. Much has been said about the reduction of the expenditures in Government. Much has been said about the elimination of useless bureaus and the consolidation of departments. Economy can only result by further reducing salaries and by the abolition of useless offices.

The Members of the House may oppose reducing their own salaries without at the same time voting to reduce others. It is not my fault. I offered an amendment, ruled out by a point of order, that could have been made germane by a rule of the Committee on Rules.

I am distressed because during the course of the debate no program or policy has been suggested by those who oppose congressional salary reductions or by others on the floor of the House for the further reduction of Federal compensation. Even my colleague [Mr. ELLZEY] neglected to give me his program for reductions. Have we forgotten the Democratic pledge to reduce 25 per cent? I favor a larger percentage of reduction in the higher salaries. I favor reductions by combining and eliminating, but further salary reductions are imperative.

I now call upon those who oppose my plan to suggest a better program. It is easy to oppose; but, if the Democratic pledge to reduce expenditures immediately is redeemed, it is time for us to begin. I know of no better way to start than for Congress to take the first step. The country will then understand that we mean business in the matter of further reductions in the expenses of government. We may satisfy ourselves, but the country understands. The people of the United States know that $7,500 to-day is more than the equivalent of $10,000 in 1925 or 1929. They know that $7,500 is worth more in the greatest economic crisis in the history of the United States than $10,000 was worth in 1925 or 1929. Are Members of Congress alone right? Is the country wrong in making reductions in all walks of life? Is everybody else in the United States wrong except Congress?

I conclude as I began. I am willing to withdraw the amendments that I propose, if I can receive any assurance of favorable report and favorable consideration at this session of general salary reductions by the Committee on Expenditures, the Economy Committee, or by the Democratic leadership of the House. In the absence of any such assurance, I ask that Congress take the lead.

I favor the pending appropriation bill with amendments to reduce salaries; but, of course, the annual appropriation for the legislative department must be made, whether the bill is amended or not. I can not, therefore, qualify under the rules of the House to offer an amendment to recommit, if I so desired. I have done my part. I can not but believe that Congress will at an early date make further reductions in the expenditures of government.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. MITCHELL. Mr. Chairman, I offer a substitute amendment to the amendment offered by the gentleman from Mississippi.

The Clerk read as follows:

Substitute amendment offered by Mr. MITCHELL: Page 11, line 6, after the word "Islands," strike out "$3,963,750" and insert in lieu thereof "$1,981,875, provided the salaries of Members of the House shall be fixed at $5,000 per annum."

Mr. MITCHELL. Mr. Chairman, I am not unmindful of the attitude and frame of mind of my colleagues here to-day. I am not unaware of the fact that recently the House voted down an amendment fixing the compensation of Members of Congress at $7,500, and, naturally, I expect this same jury to reject this amendment which is offered with the hope of effecting a saving of $2,000,000 a year.

Mr. Chairman, I trust I may be given credit for being sincere in the observation I am about to make. I do not desire to sit in judgment upon the consciences and convictions of any of my colleagues. I simply want to bring the message to this Congress that we owe it to ourselves and to the country to increase the prestige and the standing of the Congress of the United States by sharing the hardships that obtain in the country with the taxpayers of America.

With the purchasing power of the dollar what it is to-day a salary of $5,000 a year will enable one to buy as much as he could have bought in 1928 or 1929 with $10,000. In other words, to-day $5,000 is worth as much as $10,000 was three years ago. I hope we may have the interest of the taxpayers in mind. I trust my colleagues will keep in mind the men and women in America who pay the taxes, and that the members of the House will realize our people, the taxpayers, should be given consideration.

The psychological effect of passing this bill reducing our own compensation would be most wholesome in this country to-day. A few years ago I had the honor of being private secretary to a Member of this House; and I sat in the galleries as a lad and observed the membership on both sides of the Chamber. Permit me to say that great and patriotic men adorned the Halls of this Congress when Members received a compensation of only $5,000 a year.

To-day many Members of this House are increasing their own compensation and receiving even more than $9,000 a year by keeping their next of kin, their wives, sons, or daughters employed at the expense of the taxpayers of this country. I think any Member of this House who receives money through the practice of nepotism should refund it to the Treasury of the United States.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL. I yield.

Mr. BRITTEN. The gentleman refers to the purchasing power of the dollar. I am informed the gentleman is a bachelor. If he is, how does he know what a dollar will purchase? [Laughter.]

Mr. MITCHELL. I plead guilty to the soft impeachment of being a bachelor, but if the women were as easily fooled to-day as they were when my friend got married, I, too, could get married.

[Here the gavel fell.]

Mrs. KAHN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I well remember when I was the wife of a Member of Congress when he was receiving $5,000 a year. I could write a book on what wives of Members of Congress on that salary had to put up with and go through. [Applause.]

Mr. RAGON. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, I regret that these suggestions should have been made to-day. I especially regret it due to the fact that now every cheap wit in the country, whether he pushes a pen to write a newspaper article, or tickles a crowd in the show, will use as the butt of his joke these amendments by the gentleman from Tennessee and the gentleman from Mississippi. [Applause.]

The gentleman from Tennessee is just as wrong as a man can be. If he believes what he says he ought to reduce the salaries of Members of Congress to $2,500 a year. Yes; you can reduce the salaries of Members to $2,500 a year and you will get just as smart men to serve as are serving now. In fact, in some instances you will get a somewhat smarter man to serve. [Applause.]

The gentleman from Tennessee is trying to make it so that a poor man can not serve in the House of Representatives. I am one of them. I am a poor man. [Applause.] I have nothing on God's green footstool to back me but my salary. Can the gentleman from Tennessee say that?

Mr. MITCHELL. Yes.

Mr. RAGON. Well, then the gentleman has been badly misrepresented to me.

Mrs. KAHN. The gentleman from Arkansas has a family.

Mr. RAGON. Yes; I have a family. I have to educate my son here in the District of Columbia, where costs of living have not decreased and are about two-thirds higher than at home. I can not break up his education every time there is a session of Congress.

If you reduced the salaries of Members of Congress to $2,500 a year, what would you get? You would get a bunch of oil-interest lawyers, a bunch of coal operators' lawyers, a bunch of lawyers for the Mississippi River levee district. That is what would come from the district of the gentleman from Mississippi. Do not worry yourself. There would be some very smart men come to Congress for $2,500 a year; but God pity the poor laboring man, God pity the poor farmer, and God pity the average people generally in this country when such men come. [Applause.]

I remember the time when two distinguished gentlemen stood on opposite sides of this aisle as leaders of their parties. There has not been a man in this House since I have been here, from the standpoint of mentality, the equal of Finis Garrett, of Tennessee. Never has a finer spirit occupied a seat on the Republican side of the aisle than John Q. Tilson. [Applause.] Both these men are poor men. Both these men had to depend on salaries received as Representatives. One of them has been driven out of Congress because of his poverty, and I imagine some big interest has taken advantage of his splendid services. The Government loses thereby.

These amendments may not be demagoguery, but in the parlance of the old Arkansas hog raiser it has the "swallow fork" in the right ear and a "crop off" in the left of pure demagoguery. [Applause.]

Why, my friend from Tennessee says something about having relatives on the pay roll. Well, if a man can not depend upon his relatives in these treacherous times, who in the name of God can he depend on?

Mr. MITCHELL. Will the gentleman yield?

Mr. RAGON. Not now.

There is another angle to this question. There are men who have been in this Congress for 30 years who have relatives on the pay roll, the Speaker of the House—why mince words—the Democratic leader of the House, two high and honorable men, whose wives are just as highly honored and respected women as there are in the District of Columbia. [Applause.]

I have no defense for the man who has on his pay roll somebody back in his district who never shows up here. Of course that is wrong. [Applause.] I am talking about the honest Congressman that has an honest relative who is doing an honest day's work in his office. I think he has as much right to employ him or her as anybody else. I will tell you what I did this summer.

[Here the gavel fell.]

Mr. RAGON. Mr. Chairman, I ask unanimous consent to proceed for one more minute.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RAGON. I told my people from every platform in about 30 campaign speeches from the forks of the creek in little Perry County to the city park in the capital of the State of Arkansas, "Yes, I have relatives on my pay roll, and they are doing honest work, and they are going to remain on that pay roll," and I said further, "Whenever you go into this contract with me, you remember that if I stay in Congress 100 years and this relative is still able to work and wants to work, and is capable of doing the work, by the Eternal, she will stay on the pay roll." And I beat a fellow, who was a formidable opponent and who made this question an issue, better than 2 to 1, or more than 15,000 majority. [Applause.]

Mr. SIMMONS. Mr. Chairman, I offer a perfecting amendment.

The Clerk read as follows:

Amendment offered by Mr. SIMMONS to the amendment of Mr. WHITTINGTON: After the word "to" in the second line of the amendment, insert the words "a sum not in excess of."

Mr. SIMMONS. Mr. Chairman, to-day a word has been used on the floor and in discussions among us personally, and that is the word "demagoguery." Let us not apply that now to any Member. Suffice it to say there are Members sitting on the floor of this House to-day who in campaign speeches have repeatedly told their people that they do not believe the salary of a Member of Congress should be in excess of $5,000, or $6,000, or $2,500, or some other figure. There are Members elect who will be in the next body who have made the same statement. I have no personal interest, along with some 160 other Members, in this controversy, for my present service ends March 4 next.

I know what it is to raise a family and maintain two homes and try to send three children to school and maintain some semblance of the position I believe a Member of Congress should maintain in the Capital City and in his home.

My amendment will make it possible for that present Member of the House or that Member of Congress elect, be he demagogue or be he sincere, who believes that he should not receive the salary that is fixed for the Members of the House by law, it will permit that man to legally go to the Sergeant at Arms and say, "I want my salary fixed at $5,000 a year." [Applause.]

It will permit this man, be he demagogue or be he sincere, who says he only wants to draw half of his pay, to go to the Sergeant at Arms and let the other half lapse into the Treasury, and so lapse that he can not later recover it.

If the amendment that is proposed by the gentleman becomes a law, Members of the Congress will be drawing less pay than clerks of committees of this House. Members of Congress will be drawing less pay than chief clerks of bureaus in the departments. Members of Congress will be drawing less pay than bureau chiefs and others. Have we no respect left for ourselves or for membership in this body?

I agree with the gentleman from Arkansas [Mr. RAGON] that if you reduce the salary to $2,500 you will get some men more able than some of us who have been Members of this body or who will be Members of the next body. You will

also get in the Congress men who do not have the ability of the Members of this House, who have never been able to earn and probably will never earn the salary fixed by law for Members of this body. They will be willing to come here because it offers them an opportunity to earn more than they can make anywhere else, and some of them will be incompetent. Some of them may be otherwise, but by radical reduction of salaries you are going to make the Congress a rich man's club, with an annex made up of incompetents and the great rank and file of the men and women who could come here, men of ability and women of ability, who are ready to give the best years of their lives to public service in return for fair pay—you are going to shut them out of the Congress with this kind of foolish amendment.

Let us leave the salaries of the Members of Congress where the men who believe that a Member is entitled to the pay fixed by law can draw that pay; and then I am suggesting, in all seriousness, that those Members who believe they ought not to draw that much money and who want to keep demagogic statements they made in the campaign can go to the Sergeant at Arms and take somewhat less pay, and we will see how many of them have been sincere in the statements they have made if this amendment goes into the act.

Mr. CONNERY. Will the gentleman yield?

Mr. SIMMONS. I yield.

Mr. CONNERY. Do I understand that the amendment of the gentleman from Nebraska simply allows a Member of Congress to turn back whatever part of his pay he wants to, at his own volition, to the Sergeant at Arms?

Mr. SIMMONS. He does not have to turn it back; he will not draw it; and it will be put where, later on, he can not claim it.

Mr. CONNERY. If that is true, I would like to support the gentleman's amendment, because I would like to see how many would avail themselves of that opportunity.

Mr. SWING. Mr. Chairman, I know that the membership of the House possesses facts enough and has knowledge enough to vote on this proposition, but no harm will come from putting into the RECORD and giving to the people some additional statement on the issue.

I have served in this House for 12 years. I think I am well within the truth when I state that I could have served here two years more if I had desired. But the fact is that at the end of 12 years I am poorer not only relatively but actually poorer than when I came to Congress. My modest savings, accumulated through the practice of my profession, have since been exhausted. It has now become necessary for me, considering the welfare of my family, to withdraw from public service and devote myself to my own affairs in hope of reestablishing my personal business on somewhat the same basis of prosperity it possessed before I assumed this office.

This House is patriotic; this House is sympathetic with the condition that prevails in the country. This House is prepared to make every sacrifice on its own part and to take any cut in salary that it may ask other Federal employees to take.

But the proper and rational way to legislate is not to come in with an attack on the pay of any one group, in a grandstand play, trying to make martyrs of ourselves, but rather to let the Economy Committee or the Committee on Expenditures bring in a bill, orderly and well thought out, which will meet the necessities for economy and at the same time do justice to all classes and groups of Government employees and officials. If that is done, no one will doubt but that this House will vote as patriotically and in accordance with the best interests of the Government on the adjustment of their own salaries as they will on the cut of any other employee in the Government.

I know personally what the requirements for effective and efficient service in this House are. My vote against these proposed cuts will be cast solely and wholly with a view to bringing to the floor of this House men and women best equipped and best qualified to perform the legislative duties of our Government in the interests of the people, disinterestedly and without being subjected to economic worries and temptations. In the long run that will prove the greatest economy to the people.

I sincerely hope the amendments will be defeated.

Mr. SANDLIN. Mr. Chairman, as I understand, this amendment limits the salary to $7,500.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from Mississippi, and also the perfecting amendment by the gentleman from Nebraska.

The Clerk again reported the amendment and the perfecting amendment.

Mr. LAGUARDIA. Mr. Chairman, are we to establish a $2,500 class or a $5,000 class by this? Can we afford to do it?

Mr. SANDLIN. Mr. Chairman, I can not think that the gentleman from Nebraska [Mr. SIMMONS] offered his amendment in a serious mood, but that he did it for the purpose of directing the attention of the House to statements made by some candidates for office last fall.

Mr. RAMSEYER. Mr. Chairman, as I understand the amendment of the gentleman from Nebraska, it would give members an opportunity to turn back part of their salary. There is nothing in the law to prevent their doing that now, is there?

Mr. SANDLIN. Nothing that I know of. Mr. Chairman, since my service in this House for 12 years, unless I thought that I could give some information to the Members, I have kept my seat and refused to take the floor. I did not care to discuss this amendment because I could give to no Member of the House any information, for each must understand it as well as I. Let me state, as chairman of this subcommittee, that this proposition submitted by the gentleman from Mississippi [Mr. WHITTINGTON] was considered by the subcommittee, and it was also considered by the full Committee on Appropriations. No action was taken, as he suggests. For myself, I have no hesitation in stating my position here now or on a roll call in the House. This Congress has already let it be known, as the RECORD will show, that the Members of this House have cut their salaries by their own vote $1,000 a year. They have further, by their vote, reduced the terms of incoming Members by two months, a further reduction for them of $1,500. They have cut their mileage and stationery accounts and their clerk hire money and increased income tax rates, which will reduce their salary several hundred dollars additional.

If I wanted to represent a special interest in this House, or if any Member wants to represent a special interest or a special group, he can get the money to meet his campaign expenses from that group or interest. I stated in my campaign that I would not solicit nor accept 1 cent from any person or any interest who would expect to control my vote on legislation here in the House of Representatives. I come to this House a free agent to act for my people.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

Mr. MCCORMACK. Mr. Chairman, I ask unanimous consent that the time of the gentleman be extended for three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SANDLIN. I do not stand here and accuse the gentleman from Mississippi [Mr. WHITTINGTON] or the gentleman from Tennessee [Mr. MITCHELL] of being demagogues. The record has been written, and the membership of this House surely is made up of average citizens from the various districts, and they can judge whether they are or not. I do say this, however, that with the reductions that we have made, and with Members making campaigns, paying their campaign expenses out of their own pockets, as many do,

who are working here to-day earnestly and seriously representing their people, that they are doing so on much more than $5,000 a year. I do not claim to have any more courage than other Members of Congress, but I have no apology to offer here or to my constituents for the position which I take upon these amendments. As has been suggested by other gentlemen, do we want the membership of this House to be made up of millionaires, or of people who come here as mere puppets of those who put up expenses to have them elected, and who will come here to vote for a special interest? I do not believe that any intelligent citizenship in any section of this great country who understands the situation would want us to support the amendment offered by the gentleman from Mississippi or the amendment offered by the gentleman from Tennessee. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Nebraska.

Mr. COCHRAN of Missouri. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. COCHRAN of Missouri. Do I understand, if the Simmons amendment is adopted, that it means that the salary of a Member of Congress is $7,500?

The CHAIRMAN. The gentleman is correct.

Mr. COCHRAN of Missouri. In other words, the salary is reduced from $9,000 to $7,500.

The CHAIRMAN. That is correct.

Mr. SCHAFER. Mr. Chairman, I move to strike out the enacting clause.

Mr. O'CONNOR. Mr. Chairman, I rise to a point of order. The Chairman had already put the question; the question is on the motion of the gentleman from Nebraska, and I make the point of order that the motion to strike out the enacting clause comes too late. Further, it has been made once before, and no substantial amendment has been made to the bill in the interim.

The CHAIRMAN. Since the amendment to strike out the enacting clause was voted on, the committee has not adopted any material amendment. Therefore the Chair refuses to recognize the gentleman from Wisconsin for that purpose. The question is on the amendment offered by the gentleman from Nebraska to the amendment offered by the gentleman from Mississippi.

The amendment to the amendment was rejected.

The CHAIRMAN. The question now is on the substitute amendment offered by the gentleman from Tennessee to the amendment offered by the gentleman from Mississippi.

Mr. CONNERY. Mr. Chairman, a parliamentary inquiry. Is this the $5,000 amendment?

The CHAIRMAN. It is.

The question was taken; and on a division (demanded by Mr. COCHRAN of Missouri) there were—ayes 2, noes 161.

So the amendment in the nature of a substitute was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Mississippi.

The question was taken; and on a division (demanded by Mr. MCGUGIN and Mr. WHITTINGTON) there were—ayes 32, noes 145.

Mr. WHITTINGTON. Mr. Chairman, I demand tellers.

The CHAIRMAN. The gentleman from Mississippi demands tellers. Those in favor of taking the vote by tellers will rise and stand until counted. [After counting.] Five Members have risen, not a sufficient number, and tellers are refused.

So the amendment was rejected.

The Clerk read as follows:

COMMITTEE EMPLOYEES

Clerks, messengers, and janitors to the following committees: Accounts—clerk, $3,300; assistant clerk, $2,460; janitor, $1,560. Agriculture—clerk, $3,300; assistant clerk, $2,460; janitor, $1,560. Appropriations—clerk, $7,000 and $1,000 additional so long as the position is held by the present incumbent; assistant clerk, $5,000 and $1,000 additional so long as the position is held by the present incumbent; three assistant clerks at $3,900 each; assistant clerk, $3,600; two assistant clerks at $3,300 each; messenger, $1,680. Banking and Currency—clerk, $2,760; assistant clerk, $1,740; janitor, $1,260. Census—clerk, $2,760; janitor, $1,260. Civil Service—clerk, $2,760; janitor, $1,260. Claims—clerk, $3,300; assistant clerk, $1,740; janitor, $1,260. Coinage, Weights, and Measures—clerk, $2,760; janitor, $1,260. Disposition of Useless Executive Papers—clerk, $2,760. District of Columbia—clerk, $3,300; assistant clerk, $2,460; janitor, $1,260. Education—clerk, $2,760. Election of President, Vice President, and Representatives in Congress—clerk, $2,760. Elections No. 1—clerk, $2,760; janitor, $1,260. Elections No. 2—clerk, $2,760; janitor, $1,260. Elections No. 3—clerk, $2,760; janitor, $1,260. Enrolled Bills—clerk, $2,760; janitor, $1,260. Expenditures in Executive Departments—clerk, $3,300; janitor, $1,260. Flood Control—clerk, $2,760; janitor, $1,260. Foreign Affairs—clerk, $3,300; assistant clerk, $2,460; janitor, $1,260. Immigration and Naturalization—clerk, $3,300; janitor, $1,260. Indian Affairs—clerk, $3,300; assistant clerk, $2,460; janitor, $1,260. Insular Affairs—clerk, $2,760; janitor, $1,260. Interstate and Foreign Commerce—clerk, $3,900; additional clerk, $2,640; assistant clerk, $2,100; janitor, $1,560. Irrigation and Reclamation—clerk, $2,760; janitor, $1,260. Invalid Pensions—clerk, $3,300; assistant clerk, $2,880; expert examiner, $2,700; stenographer, $2,640; janitor, $1,500. Judiciary—clerk, $3,900; assistant clerk, $2,160; assistant clerk, $1,980; janitor, $1,500. Labor—clerk, $2,760; janitor, $1,260. Library—clerk, $2,760; janitor, $1,260. Merchant Marine, Radio, and Fisheries—clerk, $2,760; janitor, $1,260. Military Affairs—clerk, $3,300; assistant clerk, $2,100; janitor, $1,560. Mines and Mining—clerk, $2,760; janitor, $1,260. Naval Affairs—clerk, $3,300; asisstant clerk, $2,100; janitor, $1,560. Patents—clerk, $2,760; janitor, $1,260. Pensions—clerk, $3,300; assistant clerk, $2,160; janitor, $1,260. Post Office and Post Roads—clerk, $3,300; assistant clerk, $2,100; janitor, $1,560. Printing—clerk, $2,760; janitor, $1,560. Public Buildings and Grounds—clerk, $3,300; assistant clerk, $1,740; janitor, $1,260. Public Lands—clerk, $2,760; assistant clerk, $1,740; janitor, $1,260. Revision of the Laws—clerk, $3,300; janitor, $1,260. Rivers and Harbors—clerk, $3,300; assistant clerk, $2,460; janitor, $1,560. Roads—clerk, $2,760; assistant clerk, $1,740; janitor, $1,260. Rules—clerk, $3,300; assistant clerk, $2,100; janitor, $1,260. Territories—clerk, $2,760; janitor, $1,260. War Claims—clerk, $3,300; assistant clerk, $1,740; janitor, $1,260. Ways and Means—clerk, $4,620; assistant clerk and stenographer, $2,640; assistant clerk, $2,580; clerk for minority, $3,180; janitors—one, $1,560, one, $1,260. World War Veterans' Legislation—clerk, $3,300; assistant clerk, $2,640; in all not to exceed $271,334.

Mr. SCHAFER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SCHAFER: On page 15, line 5, strike out the words "assistant clerk, $1,740."

Mr. SCHAFER. Mr. Chairman, I shall be brief, and I hope the membership will pay some attention to the facts which justify this amendment. This strikes out the appropriation for an assistant clerk for the War Claims Committee. That committee will still have a committee clerk with a salary of $3,300 and a janitor with a salary of $1,260. We know the War Claims Committee only has jurisdiction over claims occurring during the war period.

Most of the work of that committee has been completed. If you will look at the Private Calendar you will find the work has been very greatly decreased. This committee, in my judgment, should be abolished in the next session of Congress and its jurisdictions and functions transferred to the Claims Committee. I expect that the chairman of the War Claims Committee, the distinguished gentleman from Alabama [Mr. ALLGOOD], one of the greatest economy experts on the floor of the House during the past few months, will rise in the well of the House and ask for this reduction in order to benefit the taxpayers whose cause the gentleman so eloquently expounds from day to day. It is indefensible to continue this additional clerk. It may be only a saving of a little more than $1,000 a year, but when are we going to reduce the burden of the taxpayers 25 per cent, as the Democratic Party promised in the last campaign, if we do not start with a thousand here and a thousand there and several thousand in other places? It seems that notwithstanding the fact that the Democratic majority rode into office on the promise to reduce the cost of government 25 per cent, and notwithstanding the fact that for the past two years that party has had control of the House of Representatives, the body in which appropriations must orig-

inate, they have not made any attempt whatever to carry out their platform pledges.

[Here the gavel fell.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. SCHAFER].

The question was taken; and on a division (demanded by Mr. SCHAFER) there were ayes 17 and noes 62.

So the amendment was rejected.

Mr. SCHAFER. Mr. Chairman, I offer a further amendment.

The Clerk read as follows:

Amendment offered by Mr. SCHAFER: On pages 5, 12, 13, 14, and 15 strike out all appropriations for janitors.

Mr. O'CONNOR. Mr. Chairman, I make the point of order that that amendment is not in proper form. It is impossible to legislate in that way. The lines and the words to be stricken should be denoted.

Mr. BANKHEAD. In addition to that, Mr. Chairman, does it not deal with paragraphs of the bill that have already been passed?

The CHAIRMAN (Mr. BULWINKLE). The Chair will overrule the point of order. The language to be stricken is sufficiently identified.

Mr. SCHAFER. Mr. Chairman, this amendment is offered in good faith.

I was surprised upon making a study of this bill and the hearings thereon and the report of the Clerk of the House of Representatives to find committees of this House furnished with special janitors, some of them at an annual salary of $1,560, some committees which only met three or four weeks during the year and which committees only have one room in the House Office Building. Under what principle of government can the House of Representatives, in its attempt to assist the overburdened taxpayers of America, continue to appropriate for its own committees $1,540 for a special janitor for a committee which has only one room in the House Office Building, when the janitor work and cleaning is done by other regular employees? The economy experts in the House now have an opportunity to vote for real economy. Do not vote against this amendment because it saves only a small amount of $25,000 or $30,000, because if you save $25,000 here and $25,000 there in the final analysis you are giving the taxpayers some substantial relief.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. SCHAFER].

The question was taken; and on a division (demanded by Mr. SCHAFER) there were ayes 27 and noes 69.

So the amendment was rejected.

Mr. SIMMONS. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Nebraska is recognized for five minutes.

Mr. SIMMONS. Mr. Chairman, I ask unanimous consent to proceed out of order for five minutes.

Mr. BRUNNER. Mr. Chairman, I object.

Mr. SIMMONS. Mr. Chairman, in the noontime edition of to-day's Washington News I find this statement:

LEGION COMMANDER SCORES OFFICERS' RETIREMENT ACT

BALTIMORE.—"Damn near every doctor in Washington" is on the Government pay roll as a result of enlargement of provisions of the emergency officers' retirement act, Louis Johnson, national commander of the American Legion, charged in an address here last night.

The Legion backed the legislation to provide full officers' salaries for about 700 "battlefield casualties," Johnson said. He charged the Veterans' Bureau with responsibility for its misadministration.

Johnson admitted the Legion had suffered considerable harm from recent criticism which, at one stage, he described as acute. But he added that most of those who had directed their shafts at the organization have since been defeated.

The national commander also scored the National Economy League, which has been attacking certain veterans' relief payments, as backers of a movement to take from the war-torn soldiers and give to the already rich.

There are a number of Members still on the floor who were here during that fight. I was involved in it. The emergency officers' retirement bill is the baby of the American Legion. It was forced through the Congress by the American Legion and passed over the veto of President Coolidge at the demand of the American Legion. They issued their orders to men in this House who took them. They circularized the membership of the House and demanded that the bill be passed without amendment. It was passed without amendment. A number of us did propose to offer amendments that would have taken out of that bill some of the damnable payments that are now being made under it by the Treasury and we were defeated at the behest of the American Legion.

Now that the public knows what the bill has done, now that the American people have found out some of the things the American Legion has been responsible for in charges on the Treasury, now that there is resentment in the country against all veterans' payments, and lots of it unjustified, because of things of this kind, the American Legion is trying to scuttle its own handiwork and disown its own child. I have taken these five minutes that we may again call the attention of the House to the fact that the American Legion can not under any circumstances avoid and escape responsibility for that piece of legislation and the payments, unjustified and unconscionable and uncalled for that are being made to several thousand soldiers of the World War as a result of it.

This Congress last session passed a bill through the House that would have taken probably 2,000 names off the pay roll placed there by that bill. It would have removed the more glaring injustices of the emergency officers' act. That bill is sleeping peacefully in another body, and the American Legion, through its national officers, is insisting that it be not disturbed. The American Legion to-day is using its power and influence in Congress to prevent the legislative correction of the very thing that the national commander publicly condemns.

The American Legion and its national commander ought to have the courage to tell the American people they made a mistake and accept responsibility for that which they have done rather than to attempt now to place the responsibility for their mistakes on the Veterans' Administration, as Mr. Johnson did, according to this press release.

Mr. RANKIN. Mr. Chairman, will the gentleman yield?

Mr. SIMMONS. I shall be pleased to.

Mr. RANKIN. As the gentleman from Nebraska knows, I opposed the passage of that measure and was one of the men who signed the minority report against it. I pointed out, as did other Members of the House at that time, that the list included would grow just as it has grown; and I want to call attention to the fact that the gentleman from Ohio, Mr. Fitzgerald, Roy Fitzgerald, the author of the bill, admitted in his argument on the bill here in the House at that time that it was a pension based on rank, which I contended then violated every principle of American institutions.

Mr. JOHNSON of South Dakota. Mr. Chairman, will the gentleman yield?

Mr. SIMMONS. I yield.

Mr. JOHNSON of South Dakota. That is the same Roy Fitzgerald who urged this at the behest of the Legion and who afterwards was defeated by the soldier vote in his own district.

Mr. RANKIN. I do not know how he was defeated.

Mr. JOHNSON of South Dakota. I do.

Mr. RANKIN. But I do know that when we considered this at that time, the gentleman from Nebraska, the gentleman from Michigan, Mr. Vincent, who has since passed away, and the gentleman from Missouri [Mr. MILLIGAN],

and myself filed a minority report against the bill, and the gentleman from Ohio, Mr. Roy Fitzgerald, author of the bill, stated on this floor that it was a pension based on rank; and no man has any right now to say that he was deceived as to what the bill meant.

Mr. SIMMONS. The American Legion, through its national organization and its legislative committee, forced the bill through Congress without amendment. Responsible spokesmen of the American Legion have since repeatedly boasted of that fact, and have boasted and now do boast of their successful defense of any attempt to change it or reduce the payments made under it.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. SIMMONS. I yield.

Mr. BLANTON. When the bill was first proposed, we were assured it would affect only 900 officers. After the bill was passed 7,000 officers were granted retired pay for life, when over half of them had only presumptive disabilities not of service origin.

[Here the gavel fell.]

Mr. BRITTEN. Mr. Chairman, I ask unanimous consent that the gentleman from Nebraska may proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. SIMMONS. In view of the fact the article quoted says the American Legion's proposal was to make payments to "battlefield casualties," I ask unanimous consent to extend my remarks by inserting the bill. It is not long. I do this to show that the bill is not limited to battlefield casualties and never was intended to be so limited, and the American Legion never asked that it be so limited. I personally offered to withdraw my objection to the bill if it were so limited, and the representatives of the American Legion rejected the proposal and insisted upon its passage just as they proposed it and just as it became a law. The American Legion sponsored the bill; they fought for it; they insisted on its passage "as is." An attempt to shift now, to duck responsibility, comes with not only poor grace but with utter disregard of the facts—facts known to all who had anything to do with the passage of that bill. If the American Legion is now ready to admit its mistakes, it should do so as fighting men admit mistakes, not by attempting to blame some one else for that which the Legion has done.

The CHAIRMAN. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

The matter referred to follows:

[Public, No. 506, Seventieth Congress]

S. 777

An act making eligible for retirement, under certain conditions, officers and former officers of the Army, Navy, and Marine Corps of the United States, other than officers of the Regular Army, Navy, or Marine Corps who incurred physical disability in line of duty while in the service of the United States during the World War

Be it enacted, etc., That all persons who have served as officers of the Army, Navy, or Marine Corps of the United States during the World War, other than as officers of the Regular Army, Navy, or Marine Corps, who during such service have incurred physical disability in line of duty, and who have been or may hereafter within one year be rated in accordance with law at not less than 30 per cent permanent disability by the United States Veterans' Bureau for disability resulting directly from such war service, shall from date of receipt of application by the Director of the United States Veterans' Bureau be placed upon and thereafter continued on separate retired lists hereby created as part of the Army, Navy, and Marine Corps of the United States, to be known as the emergency officers' retired list of the Army, Navy, or Marine Corps of the United States, respectively, with the rank held by them when discharged from their commissioned service, and shall be entitled to the same privileges as are now or may hereafter be provided for by law or regulations for officers of the Regular Army, Navy, or Marine Corps who have been retired for physical disability incurred in line of duty, and shall be entitled to all hospitalization privileges and medical treatment as are now or may hereafter be authorized by the United States Veterans' Bureau, and shall receive from date of receipt of their application retired pay at the rate of 75 per cent of the pay to which they were entitled at the time of their discharge from their commissioned service, except pay under the act of May 18, 1920: *Provided*, That all pay and allowances to which such persons or officers may be entitled under the provisions of this law shall be paid solely out of the military and naval compensation appropriation fund of the United States Veterans' Bureau, and shall be in lieu of all disability compensation benefits to such officers or persons provided in the World War' veterans' act, 1924, and amendments thereto, except as otherwise authorized herein, and except as provided by the act of December 18, 1922: *Provided further*, That all persons who have served as officers of the Army, Navy, or Marine Corps of the United States during the World War, other than as officers of the Regular Army, Navy, or Marine Corps, who during such service have incurred physical disability in line of duty, and who have heretofore or may hereafter be rated less than 30 per cent and more than 10 per cent permanent disability by the United States Veterans' Bureau for disability resulting directly from such war service, shall from date of receipt of application by the Director of the United States Veterans' Bureau be placed upon and thereafter continued on the appropriate emergency officers' retired list, created by this act, with the rank held by them when discharged from their commissioned service, but without retired pay, and shall be entitled only to such compensation and other benefits as are now or may hereafter be provided by law or regulations of the United States Veterans' Bureau, together with all privileges as are now or may hereafter be provided by law or regulations for officers of the Regular Army, Navy, or Marine Corps who have been retired for physical disability incurred in line of duty: *And provided further*, That the retired list created by this act of officers of the Army shall be published annually in the Army Register, and said retired lists of officers of the Navy and Marine Corps, respectively, shall be published annually in the Navy Register.

SEC. 2. No person shall be entitled to benefits under the provisions of this act except he make application as hereinbefore provided and his application is received in the United States Veterans' Bureau within 12 months after the passage of this act: *Provided*, That the said director shall establish a register, and applications made hereunder shall be entered therein as of the actual date of receipt, in the order of receipt in the Veterans' Bureau, and such register shall be conclusive as to date of receipt of any application filed under this act. The term "World War" as used herein is defined as including the period from April 6, 1917, to July 2, 1921.

NICHOLAS LONGWORTH,
Speaker of the House of Representatives.
CHARLES G. DAWES,
Vice President of the United States and President of the Senate.

IN THE SENATE OF THE UNITED STATES,
May 3 (calendar day May 24), 1928.

The Senate having proceeded, in pursuance of the Constitution, to reconsider the bill (S. 777) entitled "An act making eligible for retirement under certain conditions officers and former officers of the Army, Navy, and Marine Corps of the United States, other than officers of the Regular Army, Navy, or Marine Corps, who incurred physical disability in line of duty while in the service of the United States during the world War," returned to the Senate by the President of the United States with his objections thereto, with the message of the President returning the bill; and

Resolved, That the bill do pass, two-thirds of the Senate agreeing to pass the same.

Attest:

EDWIN P. THAYER, *Secretary.*

Mr. SANDLIN. Mr. Chairman, I ask unanimous consent that debate on this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. CONNERY. Mr. Chairman, I have no desire to hold up action on this bill; but three or four different Members of the House, all of whom, I think, were officers during the World War, have just gone on record as opposing the American Legion stand on this proposition. I was not an officer in the World War. I was first a private, and when the war ended I was a color sergeant. I fought for the disabled emergency officers on the floor of this House when that bill came up, and I say that the American Legion was absolutely right in its contention.

Before that bill was passed disabled emergency officers of the Regular Army, Navy, and Marine Corps were already on the retired rolls. They were already on the rolls as disabled emergency officers, and I claimed at that time that

as long as you had them on the rolls, or unless you took them off of the rolls, in justice we ought to put the officers of the National Guard and National Army who went over the top in France in the same position.

Mr. SIMMONS and Mr. JOHNSON of South Dakota rose.

Mr. CONNERY. I shall yield to both of the gentlemen later. Incidentally, I have both a sincere admiration and friendship for the gentleman from South Dakota and the gentleman from Nebraska. I hold it is entirely a matter of the administration of this act by the Veterans' Bureau that has created this furore, and that the law as passed by Congress was a good law.

Go down to the Veterans' Bureau with a man who fought on the field of battle in France and see what happens. I had an individual case myself of Lieut. John Gillespie, a lieutenant in my own company, a company of the One hundred and first Infantry. I saw him after a box barrage at Humbert plantation, in the Toul sector, when he was picked up by shells and tossed aside while going to the relief of the fourth platoon of A Company, which was attacked by a large force of German infantry. I saw him the next morning right after the battle, and I saw that that man had been changed overnight from a normal human being into a shell-shocked, disabled veteran, his nerves racked to pieces in that battle.

I have been fighting for two years down in the Veterans' Bureau to get that man put on the rolls at 30 per cent disability. I submitted an affidavit of my own knowledge. He is a man who could earn a salary of three or four thousand dollars a year before the war, but now he can not make $25 a week. They say, "No, we can not give him 30 per cent disability." But some Regular Army man who fell off his horse over at the parade grounds at Fort Myer or at Chaumont during the war does not have much trouble getting a 30 per cent disability rating.

I now yield to the gentleman from Nebraska.

Mr. SIMMONS. The gentleman believes in the bill and I am not quarreling with him about that. I am quarreling with the attempt now of the American Legion to disclaim responsibility for the bill.

Mr. CONNERY. They are disclaiming responsibility for what the Veterans' Bureau has done under the bill. That is all they are disclaiming.

Mr. SIMMONS. That has been done under a law that they asked us to pass.

Mr. CONNERY. I now yield to the gentleman from South Dakota.

Mr. JOHNSON of South Dakota. That is the matter I want to bring up. The gentleman and I have no dispute about this bill. It is the law, but I think the gentleman will agree with me that the American Legion wrote letters to every Member of Congress and insisted on the passage of the bill.

Mr. CONNERY. Yes.

Mr. JOHNSON of South Dakota. And it does not seem in good taste for the present commander of the American Legion, who knew nothing about it at the time, to now say that the responsibility is on Members of Congress and the Veterans' Bureau when the responsibility should be taken by them.

Mr. CONNERY. He is right with respect to the Veterans' Bureau. Congress enacted the law in good faith, but the Veterans' Bureau has certainly done a terrible job in administering the act.

Mr. JOHNSON of South Dakota. But it was done at the request of the American Legion.

Mr. BOILEAU. Will the gentleman yield?

Mr. CONNERY. I yield to the distinguished gentleman from Wisconsin.

Mr. BOILEAU. I would like to call attention to the fact that I know of a captain of marines in Wisconsin who was decorated for bravery during service at the front, who has a service-connected disability of 100 per cent, but because of a discriminatory feature of that law, saying that he must file his application within one year, on account of the fact he did not file his application under the right acts, he can not come in under the emergency officers' disability act.

Mr. JOHNSON of South Dakota. I think the American Legion is to blame also for that language in the act.

Mr. CONNERY. The American Legion acted in good faith in asking for the passage of that law, and the onus was upon the Veterans' Bureau to administer that act justly. If they had done that, there would be no complaint.

Mr. GOSS. Will the gentleman yield?

Mr. CONNERY. Yes. The gentleman from Connecticut, I know, has studied this law carefully.

Mr. GOSS. May I call the gentleman's attention to the fact that it was not the Veterans' Bureau but a decision of the Attorney General with respect to the original act that allowed these additional men to come in, as was shown by hearings of our Military Affairs Committee last year.

Mr. CONNERY. Yes; you would not have had the presumptive cases brought in if it were not for the decision of the Attorney General.

As a former sergeant who will receive no benefit from this at all and as one who is simply interested in taking care of the interests of these officers of the National Guard and National Army who fought in France, I submit that before Congress does anything with respect to this act they should look into it very carefully, because I want justice done to those men who fought on the field of battle. [Applause.]

Mr. GOSS. Mr. Chairman, the American Legion supported this legislation originally, before the decision of the attorney General which allowed presumptive cases to be admitted. Now the Legion may not think it advisable to support this legislation in view of the Attorney General's decision. Surely that is plausible. General Hines has always opposed the Attorney General's decision in regard to this matter.

The Clerk read as follows:

OFFICE OF DOORKEEPER

Salaries: Doorkeeper, $6,000; special employee, $2,820; superintendent of House press gallery, $3,660; assistant to the superintendent of the House press gallery, $2,520; chief janitor, $2,700; messengers—17 at $1,740 each, 14 on soldiers' roll at $1,740 each; laborers—17 at $1,260 each, 2 (cloakroom) at $1,380 each, 1 (cloakroom) $1,260, and 7 (cloakroom) at $1,140 each; 3 female attendants in ladies' retiring room at $1,680 each; attendant for the ladies' reception room, $1,440; superintendent of folding room, $3,180; foreman of folding room, $2,640; chief clerk to superintendent of folding room, $2,460; 3 clerks at $2,160 each; janitor, $1,260; laborer, $1,260; 31 folders at $1,440 each; shipping clerk, $1,740; 2 drivers at $1,380 each; 2 chief pages at $1,980 each; 2 telephone pages at $1,680 each; 2 floor managers of telephones (1 for the minority) at $3,180 each; 2 assistant floor managers in charge of telephones (1 for the minority) at $2,100 each; 41 pages, during the session, including 10 pages for duty at the entrances to the Hall of the House, at $4 per day each, $27,210; press-gallery page, $1,920; superintendent of document room (Elmer A. Lewis), $3,960; assistant superintendent of document room, $2,760 and $420 additional so long as the position is held by the present incumbent; clerk, $2,320; assistant clerk, $2,160; 8 assistants at $1,860 each; janitor, $1,440; messenger to pressroom, $1,560; maintenance and repair of folding room motor truck, $500; in all, not to exceed $236,033.

Mr. PATTERSON. Mr. Chairman, I make a point of order. It occurs to me that the language in line 11, on page 17, "$420 additional so long as the position is held by the present incumbent," has been carried in the appropriation bill for year after year and is now out of date and is not authorized by law. I therefore make a point of order on that language.

Mr. SANDLIN. Mr. Chairman, this is carried under a provision of the legislative pay act of June 20, 1929, Public, No. 17. The language of the act is identical with the language in the bill and is permanent law.

The CHAIRMAN (Mr. BANKHEAD). The Chair is ready to rule.

The attention of the Chair has been called to the legislative pay bill, and the item to which the gentleman from

Alabama [Mr. PATTERSON] objects is clearly authorized in the text of the law.

The Chair overrules the point of order.

The Clerk read as follows:

For miscellaneous items, exclusive of salaries and labor unless specifically ordered by the House of Representatives, including reimbursement to the official stenographers to committees for the amounts actually and necessarily paid out by them for transcribing hearings, and including materials for folding, $65,000.

Mr. SCHAFER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 20, line 11, after the figures "$65,000" insert: "*Provided*, That no part of this appropriation shall be expended in connection with the House restaurant or kitchen in the Capitol Building."

Mr. SCHAFER. Mr. Chairman, this is an amendment that is offered and if adopted will save the taxpayers of this country some $20,000 a year. We have a peculiar situation existing under the dome of the Capitol, and I am somewhat surprised that the distinguished gentleman from Missouri [Mr. SHANNON], who is frequently making speeches against the Government in business, has overlooked the Government in the restaurant business and the subsidy under the dome of the Capitol.

I had no criticism in my prior talk on the subject for the distinguished gentleman from North Carolina [Mr. WARREN], because I know he and his committee have been doing a fine job, but what situation do we have here? We have a restaurant which the Members of the House and the public patronize. The patrons pay about as much per meal, and in some cases more, than they would at a regular private restaurant.

Here is a restaurant that does not pay rent, that does not pay for light, that does not pay for heat, and equipment, and so forth. It does not pay any personal property or real estate or income taxes, but it has a subsidy from the Federal Treasury to the extent of about $20,000 a year.

This amendment, if adopted, would save the taxpayers that $20,000 a year.

If every restaurant in the Nation needed such a subsidy and the many free contributions they would be closed and put through the bankruptcy court if denied them.

I think it is rather strange that these Members who talk in favor of economy, who talk against subsidies, and in favor of taking the Government out of business, should remain silent with reference to this subsidy.

You Members of the House and the incoming Members of the next House will be criticized, as Members have in the past, for obtaining your meals free in this restaurant, which, of course, is not the fact. The fact is that a Member of Congress or the general public pay more for their meals than they will in an outside restaurant. This House restaurant pays for no heat, no rent, no light, no taxes, no water, and so forth, which a private one does, and in addition receives a subsidy from the taxpayers' Treasury of about $20,000 a year.

Gentlemen, I urge that you adopt this amendment. I particularly call upon you Democratic Members who promised on the stump last fall that you would reduce the cost of government 25 per cent to support this amendment. You ought to begin economy now, because the 4th of March is coming soon, and you then can not blame Mr. Hoover or Mr. Mellon for every ill of America and the world.

Mr. KELLER rose.

Mr. SCHAFER. Yes; I will yield to the gentleman from Illinois, who believes that all Uncle Sam has to do is to comb his whiskers and get goldback bills, just as the soldiers picked the cooties out of their hair in France. [Laughter.]

Mr. KELLER. How long has the gentleman been in Congress?

Mr. SCHAFER. Ten years.

Mr. KELLER. Has the gentleman ever attacked the subsidy before?

Mr. SCHAFER. Yes; certainly.

Mr. KELLER. When did the gentleman do it?

Mr. SCHAFER. I could not tell the gentleman the exact date, but if he will go back and look at the RECORDS he will find that I joined with the economy expert—the gentleman from Michigan, Mr. Cramton—against these subsidies, and, furthermore, past history is not present history. We must reduce appropriations now.

Mr. BOYLAN. Mr. Chairman, I am rather surprised to see the vociferous gentleman from the State of Wisconsin [Mr. SCHAFER] rise and protest against the excellent restaurant we have here under the dome of the Capitol. I am startled, I am amazed, to think that after he has been down there day after day for 10 years——

Mr. SCHAFER. Oh, the gentleman does not go down to that restaurant.

Mr. BOYLAN. And that after having regaled himself with delicious dishes of pigs' knuckles and sauerkraut, hasenpfeffer, Norfolk spots, Potomac shad, terrapin, and all of the other delicacies the restaurant affords, that he should get up here at this late hour and abuse our dear old restaurant; that has been so wonderfully managed by Mr. WARREN. We all know that the gentleman would never be able to come up here and let out his magnificent voice, with all the steam he puts behind it, if he had not previously fortified himself by the good, nourishing, voice-building food that we have down in that restaurant. The gentleman well knows that it is merely a matter of convenience to the Members to have this restaurant. I wager that when the distinguished constituents of the gentleman from the historic city of Milwaukee come here the gentleman is pleased to have the opportunity of taking them to a restaurant of the type and character that we here afford for the service of the gentleman's guests.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. BOYLAN. Yes.

Mr. SCHAFER. I am not opposed to a restaurant in the Capitol, but I am opposed to the Government subsidizing and running a restaurant. I am in favor of getting money into the Treasury by leasing the restaurant quarters for private operation.

Mr. ALLGOOD. Mr. Chairman, will the gentleman yield?

Mr. BOYLAN. In a moment please. The gentleman from Wisconsin has told this to us so often in the last six or seven weeks that I almost remember it word for word. He gets up here and says that the Democrats have not reduced expenses, that the Democrats did not do this, that the Democrats did not do that, and he did it so much that the other day I asked him whether he had read a poem that had been inserted in the RECORD entitled "The Last Will and Testament of a Lame Duck." He said he had not. So, how can I speak intelligently to him, when he has not read that beautiful poem that describes what is going to happen to the lame ducks after they leave here. I know that we are going to have trouble in running this Congress when the gentleman leaves us, because he is in a class by himself. I regret to see him go. He has added comedy and humor on many dull days, and I know that we all have enjoyed him. I do not speak in a jocose manner when I say that I regret the departure of the gentleman. He reminds me of a story that my grandfather used to tell me. He said that one night in Ireland there was a big wind, and it was such a big wind that houses were blown down and property was destroyed. He said that after that time everything that happened in a chronological way was dated from the night of the big wind, and it occurs to me that we might have to date any event that transpires hereafter in the Congress from the date of the departure of the big wind. [Laughter.]

Mr. ALLGOOD. Mr. Chairman, will the gentleman yield?

Mr. BOYLAN. Yes.

Mr. ALLGOOD. The gentleman from Wisconsin says that he does not go down to the restaurant. If they will put a refreshment parlor down there, I think he will go down there and he will stay there.

Mr. BOYLAN. I wish they would put it in. I would be glad to join the gentleman. [Laughter.] I know that we would have good Milwaukee beer there; but in all seriousness, I sincerely regret the departure from our midst of the distinguished orator from Milwaukee.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. PATTERSON. Mr. Chairman, I ask unanimous consent that the amendment be again reported.

There was no objection, and the Clerk again reported the Schafer amendment.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was rejected.

The Clerk read as follows:

No part of the appropriations contained herein for the contingent expenses of the House of Representatives shall be used to defray the expenses of any committee consisting of more than four persons (not more than two from the House and not more than two from the Senate), nor to defray the expenses of any other person except the Sergeant at Arms of the House or a representative of his office, to attend the funeral rites and/or burial of any person who at the time of his or her death is a Representative, a Delegate from a Territory, or a Resident Commissioner from Puerto Rico or the Philippine Islands.

Mr. O'CONNOR. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. O'CONNOR: Page 20, beginning in line 16, strike out all of the paragraph down to and including line 2 on page 21.

Mr. O'CONNOR. Mr. Chairman, my amendment strikes out the limitation on the number of Members who may attend the funeral of a deceased Member, which has been inserted in this bill for the first time. I know there has been a lot of criticism and comment in reference to funeral expenses paid out of the contingent fund on the decease of a Member of this House. I do not know whether the Members of the House know just how much that is, but over a period of 10 years the total expenses of all funerals for Members of this House have aggregated just $16,000. I think we are getting a little small and a little picayune when we adopt such an item in reference to the dead and try to save a few dollars. To say that we shall show such small respect upon the death of one of our colleagues as that only two Members of the House may attend his funeral, I think, is going pretty far. If there is a Member of this House whose funeral only two Members of Congress would attend, let me submit that that man should never have been elected to this House. If that is the only respect that this House can show to a deceased colleague, then we are getting down to pretty small potatoes, in my estimation.

I know it will be said that if they want to go they can go at their own expense, but that does not meet the fact that two Members of this House are picked out to attend a man's funeral. In the first place, it is impossible to have both sides represented at the funeral. It was suggested that the chairman of the committee on which the gentleman served should be chosen to attend, and a Member from the deceased Member's State. There would be no representative of the minority. I believe it would unduly dignify two Members of this House. My amendment is to strike out the paragraph and leave it to the discretion of the Speaker. It is safe in the hands of the Speaker. The present Speaker has cut down the committees. There has been no waste of money with respect to this particular item. It is suggested that the number might be limited. If the number were limited, I would say surely that 10 would not be an extravagant number to send to the funeral of a deceased Member, if they wanted to go.

Mr. WARREN. Will the gentleman yield?

Mr. O'CONNOR. I yield.

Mr. WARREN. The Committee on Accounts carefully considered a resolution introduced by the gentleman from Texas [Mr. SUMNERS], and I understand he has insisted upon this provision being in the present bill also, but after considering it from every angle we reported out a bill providing for five Members rather than two, as this bill now carries. That bill is pending now on the calendar.

Mr. O'CONNOR. Of course, the present provision is right before us in this appropriation bill. The bill reported by the gentleman's committee will not come before us if this provision is passed, so that it is my suggestion that we eliminate this provision from the appropriation bill and take up the subject on its merits when the gentleman reports his bill. Of course, I do not agree that five is a sufficient number. I believe 10 would be a fair number except in an extraordinary case.

So, Mr. Chairman, I have offered the amendment in good faith, out of respect to deceased Members who have served with us here, that we should at least show some respect by sending more than two Members to attend the funeral.

The CHAIRMAN. The time of the gentleman from New York [Mr. O'CONNOR] has expired.

Mr. BLANTON. Mr. Chairman, the provision in this bill limiting and reducing the cost of congressional funerals is something I have been contending for ever since I have been in Congress.

Mr. Chairman, I wish to commend the gentleman from Louisiana [Mr. SANDLIN] and the subcommittee for putting this provision in the bill, and I commend all of the members of the Committee on Appropriations for allowing it to stay in the bill. I want to commend my friend and colleague from Texas [Mr. SUMNERS] for the splendid work he has been doing to bring about this proper reform. I want to commend our splendid and efficient Sergeant at Arms, Mr. Kenneth Romney, who since he has been in office has cut down the funeral expenses materially by refusing to pay extraordinary and unusual and extravagant bills that have been rendered him by Members and various funeral directors who had connection with the funerals. He has saved down to the minimum.

This is a matter that I have been studying for a number of years. I have been hoping that the Congress would cut this matter down to a proper number ever since I have been in Congress. You will find that only very few of those appointed on funeral committees actually reach the funeral.

Mr. BRITTEN. Will the gentleman yield?

Mr. BLANTON. I regret that I have not the time.

A great number are appointed but they do not always attend the funeral. The people back home are not in these congressional funerals. I think two Members would be sufficient from the Senate and two from the House; and I have assurance from the Democratic leader of the Senate that he will offer this same provision to Senate funerals when it comes to the Senate, limiting the number of Senators to two who will attend the congressional funeral. I have assurances from several Senators, distinguished men who watch these matters, that they will back up our committee and put on the same provision when the bill reaches the Senate, limiting the number of Senators who are appointed to two. We have no control over the contingent fund of the Senate. Every time a Member of this House dies or a Delegate or a Resident Commissioner dies we pay not only for our own delegation out of the contingent fund of the House but we pay for the senatorial delegation as well.

Mr. O'CONNOR. Will the gentleman yield and tell the reverse of that?

Mr. BLANTON. Yes; the reverse is that the Senate pays for our committee on Senate funerals, but the money all comes out of the people's Treasury. And that is the reason they are going to put this same limitation on Senate funerals to cut it down to 2 Senators, so that there will be only 2

Senators and 2 Representatives with the Sergeant at Arms. Two Senators and two Representatives and the Sergeant at Arms, who looks after the arrangements, is a sufficient delegation of Congress to go from here across the United States when a Member dies. You will find that the people will have more respect for Congress. They will have more respect for the way we handle affairs here. They will have more respect for the feeling of friendship that we have for each other if we will send a reasonable delegation, and not a great, tremendous committee that is top-heavy.

Now, I want to say that my colleague from Texas [Mr. SUMNERS] has done splendid work. The subcommittee has done splendid work. The Committee on Accounts has done splendid work in hearing the matter. I wish you would get the hearings and read the testimony of the Sergeant at Arms on this point, and you will be in favor of the provision our committee has approved in this bill.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. SANDLIN. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SUMNERS of Texas. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SUMNERS of Texas: Page 20, line 16, strike out the entire paragraph, down through line 2 of page 21, and insert in lieu thereof the following: "No part of the appropriation contained herein for the contingent expenses of the House of Representatives shall be used for the payment of any expense connected with the funeral of a deceased Member of Congress, Delegate from a Territory, Resident Commissioner from Puerto Rico or the Philippine Islands, or officer, or employee of the House of Representatives."

Mr. SUMNERS of Texas. Mr. Chairman, personally I wish to express very great appreciation to the gentleman from Louisiana [Mr. SANDLIN] and his subcommittee for a provision in the bill limiting the expenditures with reference to congressional funerals.

The proposed amendment just read by the Clerk, abolishing entirely the custom, represents my personal views with regard to this matter. I recognize that it is impossible to procure the adoption at this time of the amendment which I have offered, and I shall therefore, at the conclusion of my remarks, ask unanimous consent that it may be withdrawn in favor of the provision which the committee has incorporated in this bill.

Mr. Chairman, I do not believe I may be classed among the sensational Members of this body. I do not believe it is sound public policy, or a proper way to show respect, to take Members of Congress away from their business here and send them across the country at public expense to attend the funerals of our deceased colleagues. When Mr. Longworth was alive he was sympathetic with the efforts which I was making to abolish this custom. It happens that the custom had not been abolished when he died, and recently the papers have been printing stories of the expenditures connected with his funeral.

In my judgment, these expenditures do not add to the appreciation of the people of the person in whose honor we make the expenditure. The contrary is true. This is no way to do honor. This is no proper expenditure of public money. In my view those of us who hold public office are merely private citizens temporarily called to public service. In times like this to take the money of the people and to take Members of Congress away from their duties and send them across the country, does not seem to me to be in line with intelligent public policy. Under the established custom we always have to send a delegation in order to avoid showing disrespect. It is the custom whenever a Member dies to offer the usual resolution. It is not a special indication of respect but is a thing we have to do. I dare say not a Member of this House would rise in his place now and say that in the event of his demise he would want his colleagues, in a time like the present, to leave their post of duty, go across the country, and compel the people of the United States to pay the expenses of those making the trip.

Mr. O'CONNOR. Mr. Chairman, will the gentleman yield?

Mr. SUMNERS of Texas. I yield.

Mr. O'CONNOR. Of course, Members die when Congress is not in session and upon such occasions the Members do not leave their posts of duty.

Mr. SUMNERS of Texas. No; but I am speaking of what usually occurs.

Mr. JONES. Mr. Chairman, will the gentleman yield?

Mr. SUMNERS of Texas. I yield.

Mr. JONES. I am in thorough sympathy with the purpose of the gentleman. I hope he will permit his amendment to be voted on.

Mr. SUMNERS of Texas. I would be very glad to do it were there a chance of its passage, but there is not, in my judgment.

Mr. Chairman, I ask unanimous consent to withdraw the amendment.

Mr. BACON. Mr. Chairman, reserving the right to object, I hope the gentleman will let the amendment be brought to a vote.

Mr. SUMNERS of Texas. I will do it, then. I wish we could procure its adoption.

Mr. LUDLOW. Mr. Chairman, I rise in opposition to the amendment of my friend the gentleman from New York.

It is true this is not an extremely large item, but there is no doubt that in the past it has verged on scandal.

The gentleman from New York says the expense is very small; but it is not so small, after all, as the hearings show that during the decade from 1922 to 1932 the total expense was $164,303. I wonder if the House knows that in one instance the large sum of $7,500 was paid out of the Federal Treasury to purchase a casket for a United States Senator whose name I shall not give?

Mr. O'CONNOR. That was paid out of the contingent fund of the Senate. We did not do that.

Mr. LUDLOW. It is a part of this same proposition. It is a part of the same picture. It may have come out of the Senate fund; but we could put a limitation in this bill which would prevent a repetition of such expenditure. But, coming to the House, in another instance the funeral expenses of a Member of this branch of Congress from the State of California, who died in the city of Washington, amounted to just a little less than $8,000, of which more than $5,000 was for transportation. I do not believe anyone will contend that such expenditures of the taxpayers' money can be justified.

The main item in these expenditures, at all times, has been the cost of transportation; and the committee by cutting down the personnel of these committees from 20, 30, or 35 Members, as sometimes has happened, to 2, cuts out the main cost.

The purpose of this custom is to show the sentiment and respect of Congress toward one of its deceased Members. I submit that respect can be shown just as well by a committee of 2 Members as by one of 20 or 30 Members. This enormous and unwarranted expenditure can and should be prevented.

Mr. O'CONNOR. Mr. Chairman, will the gentleman yield?

Mr. LUDLOW. I yield.

Mr. O'CONNOR. The average cost of these funerals has been $1,800. As a rule nearly $1,000 is expended for the undertaker's bill, and so forth. All that would be saved would be part of the transportation, about four-fifths of the additional $800. Every time a Member died there would be saved about $500 if this amendment were adopted.

Mr. LUDLOW. In response to the statement of the gentleman from New York, I quote the Sergeant at Arms of the

House, who has charge of the administration of this function. He says the transportation item on the average amounts to about two-thirds of the entire bill.

Mr. O'CONNOR. That could not be. If the total funeral cost is $1,800 and of that $800 goes to the undertaker, transportation could not account for two-thirds of the bill.

Mr. BLANTON. The cost of the casket is limited to $400.

Mr. LUDLOW. The gentleman from New York is mistaken as to the average amount of the undertaker's bill. The gentleman from Texas is correct. The cost of the casket is limited by the Sergeant at Arms to $400. I have nothing more to say. I think the people of the entire country are beginning to look with very grave suspicion on this custom and I think it should be abolished for the sake of the good name of the House of Representatives.

Mr. MAY. Will the gentleman yield for a question?

Mr. LUDLOW. Yes; with pleasure.

Mr. MAY. Does not the gentleman think that perhaps this abuse, about which there has been talk here, could be corrected without withdrawing the long-time custom of the House of Representatives in so honoring its Members, and does not the gentleman think that it is more a matter of abuse in the way it is handled than a matter of having the custom?

Mr. LUDLOW. I may say to the gentleman that under the proposed legislation contained in the pending legislative appropriation bill now before the House, the House of Representatives does not discontinue the custom of showing respect to its deceased Members.

There were alternative propositions before the committee. One was for the total abolishment of this custom and another was a modification of the custom so that only 2 Members would be chosen to represent the House instead of 20 or 30. It was decided by our subcommittee to continue the custom by which Congress shows its respect to the deceased, but to reduce the congressional committee to merely nominal size. This takes the evil out of the practice and removes all ground for criticism of Congress. It preserves the ancient custom and tradition of the Congress, about which a great deal of sentiment has become interwoven throughout the years, but it also places that custom and tradition above suspicion.

Mr. MAY. Is the gentleman unwilling to leave the number to the discretion and judgment of the Speaker of the House?

Mr. LUDLOW. While I have not consulted the Speaker, yet I believe he would approve of this proposition.

Mr. BLACK. Mr. Chairman——

Mr. PATTERSON. Mr. Chairman, I ask unanimous consent that the gentleman from New York may proceed for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BLACK. Mr. Chairman, I am not particularly concerned about the amendment, except I do think it is a matter for the Committee on Accounts to handle in its own way, and is a matter that should be handled deliberately.

Some kind words were said by the gentleman from Texas [Mr. BLANTON] about Mr. Romney, the Sergeant at Arms, and his services. I join the gentleman in those statements, but I do not want the records of the House to indicate that these kind words are any reflection on any former Sergeant at Arms.

I have served on congressional committees attended by Mr. Joe Rodgers, one of the most likable characters in Washington. I served on an investigating committee that was away for a long time and covered a great deal of the country. Mr. Rodgers not only served the committee courteously and efficiently and performed some arduous work—in fact, he was at work all the time when the committee was in the western part of the country—he also at all times saw to it that the funds of the Government were not in any way wasted.

I am merely rising so that the CONGRESSIONAL RECORD will show that this gentleman served diligently, efficiently, and economically, as well as the present Sergeant at Arms. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. SUMNERS].

The question was taken; and on a division (demanded by Mr. SUMNERS of Texas) there were—ayes 31, noes 75.

So the amendment was rejected.

The CHAIRMAN. The question now recurs on the amendment offered by the gentleman from New York [Mr. O'CONNOR].

The question was taken; and on a division (demanded by Mr. O'CONNOR) there were—ayes 60, noes 53.

Mr. SANDLIN. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. SANDLIN and Mr. O'CONNOR.

The committee again divided; and the tellers reported that there were—ayes 63, noes 60.

So the amendment was agreed to.

The Clerk read as follows:

For stationery for Representatives, Delegates, and Resident Commissioners, including $4,400 for stationery for the use of the committees and officers of the House, $44,000.

Mr. LUCE. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I make the pro forma amendment in order that in the CONGRESSIONAL RECORD of the same day with the remarks of the gentleman from Nebraska [Mr. SIMMONS], regarding candidates for office who offer to take less than their salaries, there may appear a brief statement of one phase of the law in the matter.

In my judgment a Committee on Elections of the House would be warranted by the court precedents in refusing admission to any man claiming to have been elected who had promised to forego the receipt of part of his salary.

To save the time of the committee, I ask unanimous consent to extend my remarks by including the statement in question.

Mr. LOZIER. Will the gentleman yield for a question?

Mr. LUCE. I yield.

Mr. LOZIER. Is it not true that many States have statutes of that kind penalizing such conduct on the part of candidates and to some extent disqualifying them from taking office, if they make promises of that kind during the campaign?

Mr. LUCE. One of the legal citations I shall include refers to a case in the gentleman's own State.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The matter referred to follows:

When in 1873 J. E. Newell offered the voters of Vernon County, Wis., to serve as county judge for $700 a year, $1,000 being the salary, and later reduced his offer to $600, the court held (State *v.* Purdy, 36 Wis. 213) that votes given by reason of such an offer were void. The voice of justice spoke still more emphatically as a result of what took place in Calloway County, Mo., in 1878. About a thousand citizens held a mass meeting and passed resolutions in which they said the salaries of their county officers were larger than they could afford to pay, and that there were plenty of good men, competent and honest, who were willing to perform the services at lower rates set forth in the resolutions. It was voted to support no man who would not agree to serve for an amount specified. One Collier was elected judge of probate under such an agreement. The matter was carried to the Supreme Court, which held against him. (State *v.* Collier, 72 Mo. 13, 1880.) The ground for the decision was that such a promise tends to swerve the voter from his duty as a citizen; to blind his perceptions to the sole question he should consider, the qualifications of the candidate; and to fix them upon considerations altogether foreign to the proper exercise of the highest right known to free men, the right of suffrage. However, laudable the promise in its object, it is demoralizing in its tendencies and utterly contrary to the plainest dictates of public policy.

The Clerk read as follows:

One-half of the foregoing amounts under "Capitol police" shall be disbursed by the Secretary of the Senate and one-half by the Clerk of the House.

Mr. McGUGIN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I do not intend to take up the five minutes. What I really wanted to do was to move to strike out the enacting clause. I probably could not do it under the rule if objections were made. I am consistently moving to strike out the enacting clause of all of these appropriation bills for the reasons that I have before given.

What I want to point out is that in this bill we are making appropriations by which the next Congress itself will be paid. Many of the Members who are voting to-day will be Members of that Congress. During the last session 50 per cent of every dollar of salary paid to you and me and everybody else on the pay roll went over into the national debt for our children to pay.

When you pass this bill to-day we know that a goodly part of it will never be paid by this generation, and that it too will pass over into the national debt to be paid by the people of the next generation. We know that in passing these appropriations we are not going to have the revenue to meet it. For that reason the enacting clause should be stricken out.

Mr. Chairman, I ask unanimous consent to withdraw the pro forma amendment.

The CHAIRMAN. Without objection, it is so ordered.

Mr. McGUGIN. Now, Mr. Chairman, I move to strike out the enacting clause, and I do not care to discuss it.

The CHAIRMAN. The gentleman from Kansas moves to strike out the enacting clause.

The question was taken; and on a division (demanded by Mr. BLANTON and Mr. McGUGIN) there were—ayes 2, noes 60.

So the motion was rejected.

The Clerk read as follows:

OFFICE OF THE ARCHITECT OF THE CAPITOL

Salaries: For the Architect of the Capitol, Assistant Architect of the Capitol, and other personal services at rates of pay provided by law; and the Assistant Architect of the Capitol shall act as Architect of the Capitol during the absence or disability of that official or whenever there is no architect; $43,500.

Mr. SANDLIN. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 24, line 18, strike out "$43,500" and insert "$44,500."

Mr. SANDLIN. That is to correct an error.

The amendment was agreed to.

The Clerk read as follows:

Capitol garages: For maintenance, repairs, alterations, personal and other services, and all necessary incidental expenses, $7,540.

Mr. BACON. Mr. Chairman, I move to strike out the last word in order to ask a question. I should like to ask the chairman of the subcommittee what are the Capitol garages mentioned on top of page 26?

Mr. SANDLIN. It is the garage where Senators and a limited number of Representatives keep their cars.

Mr. BACON. Is it the garage just completed in the new Plaza?

Mr. SANDLIN. Yes.

Mr. BACON. I thought that was for the exclusive use of Members of the Senate.

Mr. SANDLIN. I think some Members of the House use it.

Mr. KELLER. How did they chisel in?

Mr. SANDLIN. Not being one of the Members that chiseled in, I do not know.

Mr. BACON. How do you get into the membership of that club? [Laughter.]

The pro forma amendment was withdrawn.

The Clerk read as follows:

The sum of $240,000 of the unexpended balances in the appropriations available for construction and furnishing of the new House Office Building shall be covered into the Treasury.

Mr. SANDLIN. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. SANDLIN for the committee: Page 26, line 20, strike out "$240,000" and insert in lieu thereof "$220,000".

The CHAIRMAN. The question is on agreement to the amendment.

The amendment was agreed to.

Mr. MAY. Mr. Chairman, I move to strike out the last word, in order to get a little information. On page 26, line 18, under the heading House Office Building, there is a provision for an appropriation $277,950, "For maintenance, including miscellaneous items, and all necessary services," at the House Office Building. There was an amendment in which the question for janitors for various rooms of the House Office Building was discussed. Does this item cover all those services, including the ones included in the janitors' services?

Mr. SANDLIN. It does not include the janitors for the different committees. It includes the services of the charwomen, and that sort of service, and not those we had under discussion a few moments ago.

Mr. MAY. In other words, it is not a duplication of anything else?

Mr. SANDLIN. No.

The Clerk read as follows:

The appropriations under the control of the Architect of the Capitol may be expended without reference to section 4 of the act approved June 17, 1910 (U. S. C., title 41, sec. 7), concerning purchases for executive departments.

Mr. GOSS. Mr. Chairman, I move to strike out the last word. Does this make it permanent law, or does it apply only to this year's appropriations?

Mr. SANDLIN. It will not make it permanent law.

The Clerk read as follows:

BOTANIC GARDEN

Salaries: For the director and other personal services, $85,000; all under the direction of the Joint Committee on the Library: *Provided*, That the quarters, heat, light, fuel, and telephone service heretofore furnished for the director's use in the Botanic Garden shall not be regarded as a part of his salary or compensation, and such allowances may continue to be so furnished without deduction from his salary or compensation notwithstanding the provisions of section 3 of the act of March 5, 1928 (U. S. C., title 5, sec. 678), or any other law.

Mr. SCHAFER. Mr. Chairman, I make the point of order against the proviso beginning in line 4 and continuing through, ending in line 11, on page 29, on the ground that it is legislation on an appropriation bill, unauthorized by law, and that it increases expenses from the Federal Treasury.

Mr. SANDLIN. Mr. Chairman, this provision has been carried for years, but I concede the point made by the gentleman is well taken.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

INCREASE OF THE LIBRARY

For purchase of books, miscellaneous periodicals and newspapers, and all other material for the increase of the Library, including payment in advance for subscription books and society publications, and for freight, commissions, and traveling expenses, including expenses of attendance at meetings when incurred on the written authority and direction of the Librarian in the interest of collections, and all other expenses incidental to the acquisition of books, miscellaneous periodicals, and newspapers, and all other material for the increase of the Library, by purchase, gift, bequest, or exchange, to continue available during the fiscal year 1935, $100,000.

Mr. BACON. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the subcommittee a question. Did the subcommittee give any consideration to the building of the new annex to the Library of Congress?

Mr. SANDLIN. We did.

Mr. BACON. The gentleman, of course, is aware that the Library of Congress is now so completely overcrowded that it is difficult to make full and complete use of the Library. Congress has passed a law authorizing the new

annex. The plans have been drawn, and the land has been purchased. The probability is that the building could be constructed more cheaply at this particular time than it can be later. It has got to be constructed sometime, and I believe a million dollars or so could be saved by building it now. I think it is false economy to postpone its construction until building prices go up.

Mr. SANDLIN. Mr. Chairman, the committee gave serious consideration to that and to the statement made by Doctor Putnam and others, which showed that the condition of the Library is overcrowded indeed, but it is not in as bad shape as the United States Treasury. Inasmuch as building generally has been curtailed at the Army posts all over the country, where the gentleman and I know it is very necessary at this time, the committee thought it best to not go on with the construction of that building now. Boiled down to a simple question it is, Where are you going to get the money for it?

Mr. BACON. I did not rise to criticize the action of the subcommittee.

Mr. SANDLIN. And I do not take the gentleman's question as a criticism.

Mr. BACON. But I rose to find out whether the subcommittee had gone into the matter thoroughly.

Mr. SANDLIN. Yes; we did. We considered it very seriously but felt that at the present time, on account of the condition of the Treasury and the unbalanced Budget, the matter could be held up until some other time.

Mr. BACON. I appreciate the necessity for economy. However, I hope that this annex to the Library can be built as soon as the financial conditions of the Treasury warrant it. The work of the Library is seriously hampered by its overcrowded condition. The need for relief is pressing.

Mr. LUCE. Mr. Chairman, I rise simply to record my regret that the committee did not deem it possible to continue with this work at the present time. My hope is that at the earliest possible moment, if it can not be done now, the work will be completed.

The Clerk read as follows:

No part of any money appropriated in this act shall be paid to any person employed in the Government Printing Office while detailed for or performing service in any other executive branch of the public service of the United States unless such detail be authorized by law.

Mr. MEAD. Mr. Chairman, I move to strike out the last word. While we are on this appropriation with the Government Printing Office, I should like to ask the chairman of the subcommittee if any arrangements have been made to take care of the employees' time off which was accrued and which was theirs when the furlough law went into effect.

Mr. SANDLIN. We did not have any authority to do that in this bill. We understand there is a bill pending to take care of that.

Mr. MEAD. Does the gentleman understand that the employees of the Government Printing Office had earned 30 days' annual leave prior to the enactment of the furlough law, and that by reason of the operation of the furlough they are penalized in a double way by forfeiting that 30 days this year also?

Mr. SANDLIN. I said I had understood that; but that we could not correct that on this bill, because it would be legislation on an appropriation bill. I think the bill should be passed to correct that.

Mr. MEAD. There is justice in their claim.

Mr. SANDLIN. Yes.

The pro forma amendment was withdrawn.

Mr. ELLZEY. Mr. Chairman, I ask unanimous consent to revise and extend the remarks I made to-day.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk concluded the reading of the bill.

Mr. SANDLIN. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. BULWINKLE, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 14562) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1934, and for other purposes, directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and the bill as amended do pass.

Mr. SANDLIN. Mr. Speaker, I move the previous question on the bill and all amendments to final passage.

The motion was agreed to.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. BLANTON. Mr. Speaker, I ask for a separate vote on the O'Connor amendment.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The other amendments were agreed to.

The SPEAKER. The Clerk will report the amendment on which a separate vote is demanded.

The Clerk read as follows:

Amendment offered by Mr. O'CONNOR: Page 20, beginning in line 16, strike out all down to and including line 2, on page 21.

The SPEAKER. The question is on the amendment offered by the gentleman from New York.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 61 and noes 69.

So the amendment was rejected.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. SCHAFER. Mr. Speaker, I have a motion to recommit.

The SPEAKER. Is the gentleman a member of the committee?

Mr. SCHAFER. I am not, Mr. Speaker.

The SPEAKER. The rule is that if minority members of the committee desire to offer a motion to recommit, the Chair will give preference to them. Otherwise he will recognize any member of the committee to offer a motion to recommit if he is opposed to the bill.

Mr. BOYLAN. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman a member of the committee?

Mr. BOYLAN. I am, sir.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. BOYLAN. I am, sir.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Mr. BOYLAN moves to recommit the bill to the Committee on Appropriations with instructions to that committee to report the bill back forthwith with the following amendment: On page 32, strike out the language in lines 15 to 20, both inclusive.

Mr. BOYLAN. On that motion, Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit offered by the gentleman from New York [Mr. BOYLAN].

The question was taken, and the motion was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the bill was passed.

On motion by Mr. SANDLIN, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. TAYLOR, of Tennessee, for one week, on account of important business.

TERMS OF PRESIDENT, VICE PRESIDENT, AND MEMBERS OF CONGRESS

The SPEAKER laid before the House a communication from Wilbur L. Cross, Governor of the State of Connecticut, transmitting a certified copy of a resolution of the House of Representatives and the Senate of the State of Connecticut, ratifying the proposed amendment to the Constitution of the United States fixing the commencement of the terms of the President and the Vice President and the Members of the Congress, and fixing the time of the assembly of the Congress.

LATE PRESIDENT COOLIDGE

Mr. LUCE. Mr. Speaker, I ask unanimous consent to extend my remarks by inserting a short poem in the RECORD relating to the late President Coolidge.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LUCE. Mr. Speaker, under permission to extend my remarks, I so do with the following poem, written by a Massachusetts man, who at one time worked with the late President Coolidge, and read over the National hook-up, by Rev. S. Parkes Cadman, Sunday afternoon, January 15, 1933:

CALVIN COOLIDGE

By William H. McMasters

Home in the native soil that sent him forth,
Where loving eyes may view the tranquil scene,
Home from the fleeting glories of the earth,
He rests in peace, unhurried, calm, serene.
No more responsive to the sordid cry
Of selfish hopes, of nations torn with pain,
He kept his tragic tryst with destiny
And shall not walk these troubled ways again.
Humbly he lived, in death yet played his part;
Alone, he closed his patient eyes in sleep;
Secure his fame, enshrined within the heart
Of men, in words of simple faith and deep.
Where once his youthful hands upturned the sod,
His spirit roams the silent hills with God.

CIVIL SERVICE RETIREMENT

Mr. GIBSON. Mr. Speaker, I ask unanimous consent to insert in the RECORD some remarks of my own in regard to the operation of the civil service retirement act.

The SPEAKER. Is there objection to the request of the gentleman from Vermont?

There was no objection.

Mr. GIBSON. Mr. Speaker, the last annual report of the Administrator of Veterans' Affairs and the report of the joint conference on retirement present some interesting and instructive facts that should come to the attention of the Members of Congress.

The retirement act was approved May 22, 1920. It became effective for deductions from salary of employees August 1, 1920, and fully effective August 21, 1920.

There have been nine legislative amendments since the first act, May 22, 1920. The outstanding changes were made September 22, 1922; July 1, 1926; and May 29, 1930.

Statement of the retirement and disability fund

Total deductions from pay of employees, from 1920 to June 30, 1932	$258,970,784.90
Interest and profits during same period	39,325,255.17
Service credit payments and miscellaneous receipts	1,448,932.05
Appropriated by the Government from 1929 to June 30, 1932	82,450,000.00
Total receipts	382,194,972.12
Annuities paid from 1920 to June 30, 1932	109,558,715.17
Refunds and interest to those leaving service during this period	39,168,413.07
Direct settlements, etc	120,282.14
Total disbursements from 1920 to June 30, 1932	158,606,846.10
Deductions from pay of employees during fiscal year ending June 30, 1932	$31,517,286.38
Annuities paid during fiscal year ending June 30, 1932	23,553,816.82
Refunds during fiscal year ending June 30, 1932	3,924,553.04
Interest earned during fiscal year ending June 30, 1932	8,583,812.39
Total funds available for annuities and refunds Dec. 1, 1932	243,402,075.46
Cost of annuities for June, 1932	2,060,839.80
Cost of annuities for December, 1932	2,537,072.23
Increase of cost in December over that of June	466,232.43

Number of annuitants on retired roll

Compulsory retirements from July to December, 1932	3,700
Number on retired roll June 30, 1932	25,567
Number on retired roll Dec. 1, 1932	30,956
Number on retired roll for age	20,865
Number on retired roll for disability	6,614
Number on retired roll accepting optional retirement	1,983
Number on retired roll by involuntary separation	1,494
Number on roll between ages of 90 and 99, inclusive	94
Number on roll between ages of 80 and 89, inclusive	1,590
Number on roll between ages of 70 and 79, inclusive	10,837

There is one annuitant on roll 112 years of age.

There are two annuitants on roll 103 years of age.

There are more than 400,000 employees who come within the purview of the law.

While the retirement law is one of the best, if not the best law in operation to-day, there is a need for some changes to safeguard the service and protect the employees which will be presented in the form of bills in the future.

ENROLLED BILLS SIGNED

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 13607. An act to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of distress.

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 487. An act for the relief of Herbert G. Black, owner of the Schooner *Oakwoods*, and Clark Coal Co., owner of the cargo of coal on board said schooner; and

S. 4509. An act to further amend the act approved February 25, 1920, entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain."

BILL PRESENTED TO THE PRESIDENT

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee did on this day present to the President, for his approval, a bill of the House of the following title:

H. R. 13959. An act to authorize the incorporated town of Fairbanks, Alaska, to issue bonds in any sum not exceeding $100,000 for the purpose of constructing and equipping a public-school building in the town of Fairbanks, Alaska, and for other purposes.

ADJOURNMENT

Mr. SANDLIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 7 minutes p. m.) the House adjourned until Monday, February 6, 1933, at 12 o'clock noon.

COMMITTEE HEARINGS

Tentative list of committee hearings scheduled for Monday, February 6, 1933, as reported to the floor leader:

DISTRICT OF COLUMBIA—SUBCOMMITTEE ON INSURANCE AND BANKING

(10.30 a. m.—Room 377, House Office Building)

Hearing on H. R. 14204, to amend section 653 of the Code of Laws for the District of Columbia.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. POU: Committee on Rules. House Resolution 369. Resolution providing for the consideration of H. R. 13918, a bill to extend the operation of the act entitled "An act for the temporary relief of water users on irrigation projects constructed and operated under the reclamation law," approved April 1, 1932; without amendment (Rept. No. 1973). Referred to the House Calendar.

Mr. PESQUERA: Committee on Insular Affairs. House Joint Resolution 564. Joint resolution to validate an act of the fourth special session of the Twelfth Legislature of Puerto Rico entitled "An act authorizing the Governor of Puerto Rico to guarantee repayment, in the name of the people of Puerto Rico, of loans made by the Reconstruction Finance Corporation to the agricultural credit corporations of the island of Puerto Rico, and for other purposes," approved October 21, 1932; without amendment (Rept. No. 1976). Referred to the House Calendar.

Mr. DREWRY: Committee on Naval Affairs. H. R. 13026. A bill to amend section 546, title 34, of the United States Code; without amendment (Rept. No. 1978). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. THOMASON: Committee on Military Affairs. H. R. 1430. A bill for the relief of Frank Fanning; without amendment (Rept. No. 1974). Referred to the Committee of the Whole House.

Mr. THOMASON: Committee on Military Affairs. H. R. 10542. A bill for the relief of John Newman; without amendment (Rept. No. 1975). Referred to the Committee of the Whole House.

Mr. LANKFORD of Virginia: Committee on Naval Affairs. H. R. 12193. A bill for the relief of John P. Seabrook; without amendment (Rept. No. 1977). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII,

Mr. GOSS introduced a bill (H. R. 14579) to provide for the free importation of certain articles exported temporarily for scientific or educational purposes; which was referred to the Committee on Ways and Means.

MEMORIALS

Under clause 3 of Rule XXII, memorials were presented and referred as follows:

Memorial of the Legislature of the State of Nevada, memorializing Congress to adopt the Oddie amendment to the reconstruction finance act, whereby money can be loaned to schools; to the Committee on Banking and Currency.

Memorial of the Legislature of the State of Wisconsin, memoralizing Congress not to impose a tax in excess of $3 per barrel on beer; to the Committee on Ways and Means.

Memorial of the Legislature of the State of Wisconsin, indorsing the Great Lakes-St. Lawrence waterway project, and memoralizing Congress to ratify the treaty with Canada; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII,

Mr. PURNELL introduced a bill (H. R. 14580) granting an increase of pension to Rachel N. Martin, which was referred to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10184. By Mr. BOYLAN: Letter from the Monterey Sardine Canners' Association, Monterey, Calif., favoring House bill 13999; to the Committee on Ways and Means.

10185. Also, resolution adopted by the American Society of Civil Engineers, New York City, N. Y., recommending the modification of title 2 of the emergency relief and construction act of 1932; to the Committee on Banking and Currency.

10186. By Mr. DELANEY: Petition of the Niagara Textile Co., of Lockport, N. Y., urging the passage of House bill 13999, introduced by Congressman HILL of Washington; to the Committee on Ways and Means.

10187. Also, petition of the Educational Conservation Society favoring the passage in the House of Senate Concurrent Resolution 6, providing for an American conservation week; to the Committee on Ways and Means.

10188. Also, petition of the Mercantile Import & Export Corporation of New York City, opposing any tariff bills increasing the duty on goods imported from countries with depreciated currencies; to the Committee on Ways and Means.

10189. Also, petition of Henry H. Scott, captain, United States Army, retired, protesting against the Connery amendment to the appropriation bill; to the Committee on Appropriations.

10190. By Mr. GIBSON: Petition of the West Haven Grange, No. 390, opposing the curtailment of the Rural Mail Service; to the Committee on the Post Office and Post Roads.

10191. By Mr. GILBERT: Petition by 205 residents of the District of Columbia who are opposed to the return of the liquor traffic in any form; to the Committee on the Judiciary.

10192. By Mr. GREENWOOD: Petition of residents of the District of Columbia, opposing the return of the liquor traffic in any form in the Nation's Capital; to the Committee on the District of Columbia.

10193. By Mr. HANCOCK of New York: Petition of W. W. Hunt and other residents of Syracuse, N. Y., favoring the stop-alien amendment to the Constitution; to the Committee on the Judiciary.

10194. By Mr. KOPP: Petition of Edith L. Birkett and many other citizens of Durant, Iowa, urging the revision of the banking laws to safeguard depositors; to the Committee on Banking and Currency.

10195. By Mr. LINDSAY: Petition of the Mercantile Import & Export Corporation, New York City, concerning tariff bills to increase duty on goods imported from countries with depreciated currencies; to the Committee on Ways and Means.

10196. Also, petition of Niagara Textile Co., Lockport, N. Y., favoring the enactment of House bill 13999; to the Committee on Ways and Means.

10197. By Mr. McCLINTOCK of Ohio: Petition of citizens of the District of Columbia, opposing the return of the liquor traffic in any form in the Nation's Capital; to the Committee on the District of Columbia.

10198. By Mr. PARKER of Georgia: Memorial of Gen. William L. Grayson, of Savannah, Ga., protesting against the methods employed by the Government in disposing of the 500,000 bales of cotton allocated for relief through the American Red Cross during the last session of Congress and commenting on the manner in which the additional 329,000 bales of cotton will be disposed of under the plans of Congress at this time to further relieve the distress of the people and to further reduce our surplus of cotton; to the Committee on Agriculture.

10199. By Mr. RAGON: Petition of the House of Representatives and the Senate of the State of Arkansas, mem-

orializing Congress to give consideration to the Glenn-Smith bill; to the Committee on Flood Control.

10200. By Mr. RUDD: Petition of the Mercantile Import & Export Corporation, New York, referring to tariff bills to increase duty on goods imported from countries with depreciated currencies; to the Committee on Ways and Means.

10201. By Mr. SEGER: Petition of Associated Letter Shops of Northern New Jersey, favoring legislation to reduce the 3-cent postage rate to 2 cents; to the Committee on the Post Office and Post Roads.

10202. Also, petition of Clearing House Association of Paterson, N. J., opposing enlargement of Postal Savings System facilities, and favoring legislation to eliminate Government competition with banks and other business; to the Committee on Banking and Currency.

10203. By Mr. SPENCE: Petition of C. G. Flarity, cashier the Farmers Bank of Butler; Henry Kroeger and others, of Ludlow; John J. Burke, of Latonia; Arthur Frost and others, of Bellevue; Mr. and Mrs. Joseph Krebs, sr., and others, of Fort Thomas; George Listerman and others, of Newport; Mrs. James C. Layne, of Florence; George McHugh and others, of Erlanger; A. C. Gardner and others, of Melbourne; Mr. and Mrs. Joseph Krebs, jr., and others, of Cold Springs; and Ennis L. Ewing and others, of Covington, all of the State of Kentucky, requesting the revaluation of the gold ounce and correction of financial abuses; to the Committee on Banking and Currency.

10204. By Mr. SWICK: Petition of William Gilboy, 226 Elm Street, New Castle, Pa., and 158 other residents of New Castle, urging the revaluation of the gold ounce, and elimination of mass production as proposed by Rev. Charles E. Coughlin in his radio discourses; to the Committee on Banking and Currency.

10205. By Mr. TARVER: Petition of a number of citizens of the Green Street Church community, Dalton, Ga., protesting against the repeal of the eighteenth amendment; to the Committee on the Judiciary.
